British possessions, covers an area of 151,790 sq. m., and has a population of about 200,000. It is administered as a part of the Dutch East Indies, by a Resident at Ternate, who is responsible to the Governor-General. See COLONIES, LTC, OF EUROPHAN POWERS.

New Hebrides. A long chain of volcanic islands in western Polynesia, lying W. of Fig and N.E. of New Caledonia. Area about $_{3000}$ sq. m.

New Jerusalem Church The New Church, whose members are commonly called "Swedenlorgians," because they accept the system of Scriptural interpretation contained in the writings of Emanuel Swedenborg (b 1688, d 1772), by whose instrumentality they believe the Lord has effected His Second Coming by unfolding the internal or spiritual sense of the Divine Word. The doctrines of this sense, together with the science of correspondenceswhich constitutes the key by which that sense may be unlocked—are set forth in Swedenborg's theological writings. The fundamental doctheological writings. The fundamental doc-trines taught are, that the Lord Jesus Chist, in His glorified humanity, is the only God of heaven and earth, and that in Him is the Trinity of Father, Son and Holy Spirit, answering to the trinity in man of soul, body, and then operation together, and that in order to be saved it is necessary to believe in Him, and to keep the commandments by shunning the evils therein forbidden, as sins against Him Swedenborg's writings were first extensively Swedenborg's writings were first extensively made known in this country by a clergyman of the Church of England, the Rev. John Clowes, rector of St John's, Manchester, who translated a great number of them, including his greatest work, the "Arcana Coolestia" (13 vols.) Another clergyman, the Rev. William Hill, translated the work second only in importance to it, the "Apocalypse Explained" (6 vols.) The Rev. Thomas Hartley, lector of Winwick, translated "Heaven and Hell" Very early, some drawn from the ranks of the Methodist preachers and other students of Swedenborg, formed a separate organisaof Swedenborg, formed a separate organisa-tion for worship (1788), which has continued and increased. There are existing 8° societies, with 4868 registered members. They have Sunday-schools with 6413 children, and day-schools with 7713 scholars. There are twelve schools with 7713 scholars There are twelve societies in London and its neighbourhood Then statistics, however, full to tell the number of then receivers, who have always consisted of separatists and non-separatists the latter sometimes from their isolation, but sometimes from principle, worshipping in the Established Church or with some of the other religious bodies. In America the number of the societies of the New Jerusalem Church is much greater; and in every foreign country, both in Europe and elsewhere, they possess zealous, if not numerous, adherents. The body in Great Britain is governed by a Conference, which meets annually, and consists of all the ministers and of from one to the experience of the conference. ters and of from one to three representatives from each society, according to the number of its members. The Swedenborg Society, 1, Blooms-bury St., was founded 1810 for translating, printing, and circulating Swedenborg's works, which may be had in fifteen languages. The Church also possesses its own orphanage, its college

Newnham College. See Women, Higher Education of.

NEW SOUTH WALES.

New South Wales is the oldest of the British colonies in Australia. It was founded as a penal settlement in 1888, and originally embraced half the continent. It has Queensland on the north, and Victoria on the south. From the sea upon the cast it stretches to about the sea upone the east it stretches to about long 140 £, which meridian divides it from South Australia Total area 310,700 sq. m; pop in 98, 1,335,800. The capital is **Sydney**, on Port Jackson, pop 410,000 Ruled by a Governor (Viscount Hampden, see under PEERS) and responsible Ministry. Legislative power is vested in a Parliament of two houses. The upper, or Legislative Council, consists at present of 65 members (the number is unlimited, but is not to be less than 21) appointed by the Governor for life. The lower house, or Legistative Assembly, is composed of 125 members, elected trienmally by 125 constituencies on a basis of manhood suffrage. Every male subject above twenty-one, having resided for one year in the colony and for three months in his electional district, possesses a vote. The elections take place all on the same day. Numbers are paid the sum of ξ_{300} a year. For local government purposes the colony ecognises 75 boroughs and 107 municipal districts, besides Sydney. There is also a division into 141 countries Education under Government control, compulsory for all children between the ages of six and fourteen years, and fee to the poor. The Church of England has by far the most adherents, next coming the Roman Catholics, the Presbyterians, the Wesleyans and the Congregationalists, in the order named There is no state and to religion For defence there is a permanent force of about 500 men and about 500 volunteers, while there is a naval station at Port Jackson and a naval force of nearly 600 men There are 2691 niles of railway open, and 30,000 miles of telegraph line Much grain is grown, and there are nearly 50,000,000 sheep in the colony there are large forests, and gold and silver are mined Staple export is wool, to the amount of \$Li_0, \circ_0, \circ_0 DIPLOMATIC

the latter sometimes from their isolation, but Established Chuich or with some of the other religious bodies. In America the number of the societies of the New Jerusalem Chuich is much greater; and in every foreign country, both in Europe and elsewhere, they possess zealous, if not numerous, adherents. The body in Great Britain is governed by a Conference, which meets annually, and consists of all the ministers and of from one to three representatives members. The Bwedenborg Society, i, Bloomsbury St., was founded 1810 for translating, printing, and circulating Swedenborg's works, which may be had in lifteen languages. The Church also possesses its own orphanage, its college for training candidates for the ministry, its National Missionary Institution, and other associations formed to forward its propaganda.

and his supporters contended that the Premier was not a sincere supporter of Federation, but was pressing amendments to the Constitution Bill which he knew would not be accepted by the other colonies, while the Ministerialists retorted that Mr. Barton and his party would agree to terms which would be much to the disadvantage of New South Wales. The Labour members supported the Premier, while the Protectionists joined the Federal party under Mr. Barton The election was most under Mr. Barton keenly fought, and scenes of disorder were common. The Premier defeated Mr. Barton in the King division of Sydney, but the result of the poll showed that 63 Ministerialists, 57 returned (20th). The Government majority retuined (20th). previous to the election had been about 37
Three of the members of the Cabinet were defeated, and the Labour party were included in the 63 Ministerialists. In opening Pailiament the Governor said that the Government proposed to introduce, as the first business, a series of resolutions specifying the amendments in the Constitution Bill which were deemed of urgent importance, since the Government felt their paramount duty was to endeavout to bring about Federation on fair and just lines (Aug 17th). The resolutions were moved, and an amendment proposed by the Opposition was only deleated by 58 to 54 votes (Sept. 15th). Mr. Reid later on estimated the revenue for the current year at £9,433,000, and the expenditure at £9,681,000. The deficiency he proposed to meet by new duties on tea, coffee, biscuits, confectionery and jams, thus departing from his Free Iride policy. Ihe Assembly agreed to the amendments in the Constitution Bill suggested by the Government (Oct. 20th)

Newspapers and Magazines It appears from the '98 edition of the "Newspaper Press Directory" that he number of newspapers now being published in the United Kingdom is 2418 In England there are 1878, 472 in London and 1408 in the provinces, in Wales there are 103, in Scotland 216, in Ireland 179, and in the various isles round the coast 22 Of these there in Scotland 216, in Ireland 179, and in the various isles round the coast 22. Of these there are 185 daily papers in England, 6 in Wales, 19 in Scotland, 20 in Ireland, and 4 in the isles in '46 there were only 551 papers published in the United Kingdom, and only 14 dailies. Of magazines, including the quarterly reviews, there are now 2225, 194 of which are religious In '46 there were only 200 magazines in existence.

existence.

NEW ZEALAND.

New Zealand is a colony of the British Empire, consisting of a group of islands in the South Pacific, about 1200 miles E. by S. from Australia. There are two large islands: North Island, 500 m. by 250, area 44,467 sq. m. South Island, sometimes also called Middle Island, 500 m. by 200, area 85,528 sq m; also Stewart Island, area 665 sq m.; Chatham and Anckland Islands at some distance E. and S, area 377 sq. m. Area of entire colony, 104,409 sq m, population 759,146, exclusive of the Maoris, who number 39,854 Capital, Wellington, pop. (including suburbs) 44,791; chief cities, Dunedin, 48,672; Auckland, 58,344; Christchurch, 50,330 Volcanoes and volcanic belt across the centre of North Island

Island, between Taupo and the Bay of Plenty. Island, between Taupo and the Bay of Fienty. Government is carried on by a Governor, who is advised by a responsible Ministry. Of the two houses of parliament, the Legislative Council consists of 48 members nominated by the Governor for life (ext. pt those nominated subsequently to Sept. 17th, '91, after which date all appointments are for seven years only), the House of Representatives of 74 (including 4 Maoris) members elected triennially on an adult suffrage. The qualifications for electors are residence in the colony for a year, and in the electoral district for 3 months. Members of the Lower House receive £240, and of the Upper House £150 a year for local government the country is divided into counties and boloughs, the 83 counties being further divided into town districts and road districts. About into town districts and road districts. About 40 per cent of the inhabitants belong to the Church of England, 22 per cent, are Presbytenians, and roper cent Methodists. Education is compulsory, free, and secular. Ports defended by heavy batteries, mines, and torpedobats. The majority of the population are engaged in agricultural and pastoral pursuits, and short to compact buildistrict being footbred. and a big frozen meat industry is being fostered. There are 2222 miles of railway, as well as numerous roads and water communication. There are over 200 daily, weekly, and monthly periodicals. The ohief exports are wool, frozen meat, gold, gum, and grain Revenue, '97-8, £5,070,230, expenditure, £4,912,372, imports, 97-8, £8,055,222; exports, £10,070,993. Public debt, £44,081,521 See Briffish Empire (table) and L44,081,521 DIPLOMATIC

History, '94, - The Premier, Mr. Seddon, announced that the result of the financial year's working was a surplus of over £500,000 (April 18th) All branches of the revenue had returned more than was estimated, thus showing the continued prosperity of the country exact amount of the surplus was given in the Budget statement (Aug. oth) as £521,000, and the Government proposed to take advantage of the Government proposed to take advantage of the by remitting 5 per cent, in the duties on British manufactured goods, and by asking Parliament again to sanction the old age pen-sions scheme. The Old Age Pensions Bill, providing that every person of 65 years and upwards, of good chanacter, having resided for 25 years in the Colony, and possessing an income of not more than £44 per annum, should be entitled to a pension of £18 per annum, passed its third reading in the House of Representations of the person of th sentatives (Oct 8th), and its third reading in the Legislative Council (10th), and duly became law Other measures which passed during the Session ending in November were a Mining (Consolidation) Act, a Divoice Amendment Act,

(Consolidation) Act, a Divoice Amendment Act, and a Municipal Fruchise Reform Act.

Nicholas I., the reigning Prince or Hospodar of Montenegro, was b. Oct. 7th, 1841. After an educational course at Trieste and Paris, he succeeded his uncle, who had been assassinated, Aug. to. He married, in the same year, Princess Milona, the daughter of the Vice-President of the Council of State. During go the thirtieth anniversary of his accession was celebrated, and during the foundation. and during '96 the bicentenary of the foundation of his dynasty Queen Victoria gave him the Grand Cross of the Royal Victorian Order in March '97. His daughter Princess Helen is married to the Prince of Naples, the her to the throne of Italy; and another daughter, Princess

Nicholas II., who on Nov 1st, '94, succeeded his father, Alexander III, as "Emperor of all the Russias," was born at St. Petersburg on May 18th, '68, his mother being the Princess Dagmar, a daughter of the King of Denmark, and sisterto the Princess of Cumberland, and the King of Greece. The course of his studies was, by the wish of the late Carr, chiefly directed to modern history and languages, constitutional history, political and social economy, and the law and administration of his own country. He is gifted with the linguistic facility of most of his countrymen, and guistic facility of most of his countrymen, and especially English, of whose literature he has a thorough knowledge. During the famine of 5the was, at his own, request, made President of the Committee of Succour, and worked hard in the organisation of relief. As Czarevitch in the organisation of felici. As Czalewich he held several military commands in his own country—in the famous Preobrajensky regiment among others—and in England he had confeired upon him in '93 the Order of the Gaiter. He married the Princess Alix of Hesse-Dai mstadt in Nov. '94 A daughter, Pincess Olya, was born to them in Nov '95, and another daughter in June 197. His coronation took place with impressive and elaborate coremonal at Moscow in May '96, and in August of the same year tow in May 90, and in August of the same year he commenced a tour which included visits to the Emperor of Austria and Germany, to the King of Denmark, to Queen Victoria, and to the President of France. The visit to Paris was taken advantage of to accentuate the friendly understanding or alliance, as it may now be called, between France and Russia. This alliance was definitely approximed on the now be called, between Figure and Russia. This alliance was definitely announced on the occasion of the visit of President Faure to St Petersburg in '97 The famous peace proposals which he made to the Powers during '98 are set out under Russia, History, '98.

Nicoll, W. Robertson, IL D., was born Oct. 10th, 1851, at the Free Church manse, Auchindoir, Abeildeenshire. He studied first at the University of Aberdeen, graduating at the University of Aberdeen.

at the University of Aberdeen, graduating M.A. in '70; next at the Fice Church College, Aberdeen, until '74, when he was ordained minister of the Fice Church, Dufftown, from which in 77 he was transferred to the Free Church, Kelso. In succession to Dr. S. Cs., he became editor of the Expositor in 84. In the following year ill-health compelled him to give up public speaking. In Nov. 86 he came to London, and started the British Weekly, which has been instrumental, to a remarkable

ferred upon him by Aberdeen University in '90. He was married (his second mariage) to Miss He was married (his second mariage) to Miss Katherine Pollard in '97. Dr. Nicoll is the author of many theological works, in addition to a "Life of James Macdonell, of the Times" ('89), a "Memoir of Professor Elmshe" ('90), and has been engaged for a long time on "The Victorian Era of English Literature: a Biographical and Critical History." He has projected and edited "The Expositor's Greek Testament," "The Lepositor's Greek Testament," "The Clerical Library," "The Clousehold Library of Exposition," etc. The clogical Educator, "The Clerical Library, "The Household Library of Exposition," etc. He is also joint editor of "Literary Anecdotes of the Nincteenth Century," of which two volumes appeared in '95 and '96 In Oct. '91 he commenced the Bookman, a monthly literary commenced the Bookman, a monthly literary journal, which was quickly recognised to be of high literary merit, in '93 the Woman at Home, which he had a large share in founding, began its career, and in '98 he undertook the editorship of the Christian Budget.

Niger Coast Protectorate. A British pro-

tectorate was formed in 1884 along the west coast of Africa, from the boundaries of Lagos (q v.), at the mouth of the Benin river, to the mouth of the Rio del Rey, including the mouths of what are called "the Oil rivers," but excluding that portion of the coastline which lies between the Fortion of the coastine which hes between the 1 of cados and Brass rivers, and which belongs to the Niger Ierritories. Until '93 it was called the Oil Rivers Protectorate. Inland it includes Oil Rivers Protectorate. Inland it includes the whole Benin region, the Niger delta, and the Old Calabar or Cross river from the rapids to the sea Benin lies on the western limits of the Protectorate, and owing to the attitude of the king and the savage fitish customs pre-vailing, trade was very difficult to carry on, so an expedition was sent in '97 and the king was deposed, a Resident being appointed in his place the country is rich in rubber, gums, mahogany, etc. It is bounded on the north-west by Lagos and Yoruba. The territory is administered by an Imperial Commissioner and Consul-General, with six vice-consuls, and is now divided into three divisions, each under a consular officer. Government posts have been established at Ediba on the Cross river and Ngwa, behind Opobo. Old Calabar is the headquarters. The trade is chiefly carried

NIGERIA.

(map), and NIGERIA

on by a Liverpool Company, called the African Association, Ld. The chief products are palm oil and kernels, rubber, Ivoly, cambood, gums, etc. See Diplomatic, French West Africa

The Royal Niger Company are the chief representatives of British power and influence in Western Africa. The Niger Territories, now called Nigeria, which they administer under a royal charter dated July 10th, 1886, cover about 500,000 sq. miles, and contain a population variously estimated at from 20,000,000 to 40,000,000. The Anglo-German and Anglo-French agreements of '85,' '86, '90, and '93 settled the frontiers of the territory. The eastern frontier, settled by previous agreements made in '85 and '93, runs from a point on the Old Calabar or Cross river on the coast in a north-easterly direction to a point on the river Benue. Yola and its immediate neighbourhood were made the pro-perty of Great Britain, while Germany secured the Upper Benue and the confluence of the Faro extent, in introducing new writers to the river, together with the south shore of Lake leading world. The degree of LL.D. was con-Chad, as far as the 14° E. long. This frontier

separates the Company's territory from the German sphere of influence in the Cameroons. The northern frontier, separating the British and French spheres of influence, stretches from Baiua, on Lake Chad, westwards to lo, on the west bank of the Middle Niger, I ut drawn so as to leave within the British sphere all the territory belonging to Sokoto. The frontiers on the west were settled by the agreement made in '98 (see History '98 below') On the Gulf of Guinea the Company have access to the sea by means of a coastline of about 120 miles in length, extending from the Porcados to the Brass river. The capital of Sokoto is Wurno, and other large towns are Gando, Sokoto, Kano, Bida, Yola, Yakubu, Zaria, and Illorin. The capital of the Territories is at Asaba; and the troops—Hausas principally, with English officers—are chiefly centred at Lokoja, the junction of the Niger and Benue rivers. The naval headquarters are at Akassa, at the mouth of the Niger, which possesses the only "slip" on the West coast of Africa on which vessels can be repaired. The Niger delta has a bad climate, but the inland portions of the territory are much healther. The chief products are rubber, gum, hides, ivbr., palm oil, and palm kennels. The Governor of the Company is Sir George Taubman-Goldic, and the Deputy Governor is Loid Scarbrough The Offices are at Surrey House, Victoria Embankment, W.C. See British Empire

(table) and DIPLOMATIC History, '98 .- In January an understanding was airived at by the Company with the Sultan of Sokoto, who, since the subjugation of Nupe in '97, had shown symptoms of rebellion against the Company's authority He, however, finally declared his intention to adhere to his alliance with the Company, and in proof thereof accepted the annual subsidy which he had pieviously refused. The Ibouza tribe agreed (Feb. 17th) to abolish human sacrifices, to open their roads to all tribes, to admit missionaries into three of their towns, and to appoint a responsible chief and a Council of twelve under the Company instead of the numerous petty chiefs then ruling In this month and later on the French policy of pushing forward into British territory armed expeditions, even while negotiations were going on at Paris, led to serious complications, and a French force was actually reported to be approaching Sokoto, though this was denied Colonel Lugard left England (March 5th) to take command of the British West African Frontier Force, with his headquarters at Lokoja The Anglo-French Commission was all this time sitting at Paris, and an agreement was finally reached and a Convention signed (June 15th) so far as Nigeria is concerned the result was as follows. The French claim was for the whole of the right bank of the Niger from Say to a point just below Busa, the capital of the kingdom of that name. The boundary agreed upon gave them the kingdom of Gurma, and a triangular district on the east of the river, lying between Say, Mauri, and a point ten miles north of Ilo, with both banks of the river from Say to the point ten miles north of From that point the boundary passed in a north-easterly direction along the watershed between the Niger and the river Sokoto, and

intersection of the arc with the 14th parallel the boundary line ran along that parallel for 70 miles, then south and east again for 250 miles, and then north again to the 14th parallel and along the parallel to a point a little to the east of the longitude of Kuka, and thence southward to the southern shore of Lake Chad. Southwards, from the point ten miles north of 10 highlighted the point the point ten miles north of 10 highlighted the wind and the point ten miles north of 10 highlighted the wind was traced so as to include Borgu, but leaving Nikki to France, the line eventually joining the boundary between Dahomey and Lagos on the 9th parallel. This necessitated the withdrawal of the French from 110, Busa, Kish, and Boua, leaving them Nikki, however. Two pieces of land (to be mutually agreed upon by the two Governments) on the Niger between Leaba and the junction of the Mossi and the Niger, and on one of the mouths of the Niger, we leased for 30 years to the French Government for trade purposes, and in 1 eturn France conceded equal terms for French and British trade in all French colonies from the Liberian frontier to the Niger. Borg was completely evacuated by the French (Sopt. 18t) and re-gain isoned by British troops. In October it was reported that the Imperial Government had taken over Akassa from the Company, and the territories is to be trais sterred to the Imperial Government were made the subject of many rimmours. However, nothing definite hid transpired up to the time of going to press (Nov. 19th).

Mile, Valley of the Upper. The events of the last few years, and more especially of '98, have combined to lend especial interest to this region. The distance from Khartoum to Lak Victoria, at the point where the Nile leaves it, is about 1100 miles, and Great Britain, Egypt, the Congo State, France, and Abyssimia are all interested more or less in the territory lying on both sides of the river along this part of its course. The events connected with the overthrow of the Khalifa and Dervish rule will be found set out under Fadel, with maps to illustrate the position of affairs. There also, as well as under France and Frincis Congo, Major Marchand's expedition to Fashoda, and the events which ended in his withdrawal, are described. Fashoda is about 370 miles from Khartoum. The Congo State have captured and now hold Refaf, Wadelai has been occupied by a British foice from Uganda, whence another expedition is now advancing northwards, and the Sirdai has established ports at Fashoda and Sobat.

NOMS DE PLUME

The word non-deplane is not known in Figure, the proper phrase being non-de-guerre. The following list of pseudonyms deals chiefly with modern English or American writers. It is by no means exhaustive, but it will be found to include plactically all writers of note who use a pen-nume—

Norfolk Island. Discovered by Capt Cook, Oct. 9th, 1774, 600 miles from New Zealand, 200 miles east from Australia; length 5 miles, breadth 3 miles. Pop. 750. Occupied as a penal settlement till '55, and then given to the Pitcairn Islanders. In Nov. '96 the Island was transferred to the Government of New South Wales, and a resident magistrate was appointed to administer it, assisted by an elected council of twelve members. The chief village is Kingston.

Sydney Dobell. Miss Linskill Lieut R J Morrison.

Norman, Henry, born in Leicester, journalist, author, and traveller. Educated in France, at Harvard, USA, and at Leipzig For several years on the staff of the Pall Mall Gazetle From '88 travelled in China, Siberia, Korea, Japan, Tonquin, and Malava, visiting the Franco-Chinese frontier, crossing Korea on horseback, and exploring a hitherto unknown part of the Malay Peninsula, which he also clossed, being the first European to mass part of the Malay Peninsula, which he also crossed, being the first European to pass through the upper part of the closed native State of Kelantan Author of "An Account of the Harvard Greek Play" (81), "The Real Japan" (91), "The Peoples and Politics of the Far East" (94), and a later work upon the Ralls an Penysula based upon account of the Part Fast" (194), and a later work upon the Balkan Peninsula, based upon a series of letters in the Daily Chronicle, in the autumn of '95, called "Round the Near East" Since '92 he has been a member of the editorial staff of the Daily Chronicle, and was appointed assistanteditor March '95

Married Frances Isobel, daughter of the late J Married Frances isobel, daughter of the late J Ballenden, Esq, in '71, and was left a widower in '81. His first novel, "Heaps of Money," was published in '77, and there have since followed "Mademoiselle de Mersac," "Matrimony," "No New Thing," "His Grace," "A Deplorable Affair," "The Countess Radna" (93), "St. Ann's," "Matthew Austin," "A

Victim of Good Luck" ('94), "Billy Bellew" ('95), "A Dancer in Yellow" ('96), "Clarissa Furiosa," "Marietta's Marriage" ('97), "The Widower" ('98), and several other books, and serials in the various leading magazines. His novels are noticeable for their excellence of dialogue, and are generally descriptive of aristocratic society. Address Underbank, Torquay.

North-West Territories, The, comprise three organised districts: Assimboia, area 89,538 sq m; Alberta, area 106,100 sq. m; and Saskatchewan, area 107,002 sq. m. The unorganised territories, comprising Athabasca, area 104,500 sq. m; Yukon, Mackenzie, Franklin, and Ungava, the combined area of which is lin, and Ungava, the combined area of which is ooo, ooo sq m, are strictly under Federal jurisdiction, represented by the Lieut Governor Fop. 99,722 Capital, Regina Great lakes and large navigable rivers—the Mackenzie, Slave, Peace, Saskatchewan, among the chief—are found in the Teritories. The resources are enormous, agricultural, pastoral, and mining. Vast coal fields of fauly good quality exist, and are being profitably worked The Canadian Pacific Railway traverses Assimbola and Alberta. The Government of the Territories, consisting of a Lieut Governor, a Responsible Ministry, and a Legislative Assembly of 26 consisting of a Lieut covernor, a responsible of 26 members, was made representative in '91. The Territories have two seats in the Dominion Senate, and four in the House of Commons. The new gold fields at Klondike he in the Territories Klondike is only a small section of Yukon, one of the provisional districts above of Theon, one of the provisional districts above named. All those who know the district seem to agree with Mr. W. Ogrlvie, the Dominton Surveyor on the Yukon, and recently appointed Commissioner for the district, that it nomises to be one of the largest and richest mining areas in the whole world. The goldbearing area extends south-castwards from the 141st meridian into British Columbia Indica tions show that it is at least 50 miles long, and in places upwards of 100 miles wide. The arctic climate and the shortness of the summer season appear to be the great hindrances to mining operations, together with the scarcity of supplies caused by the remoteness of the of supplies caused by the remoteness of the district, and the great difficulty of the transit thither. The Times sent a special commissioner to the district in '98, and from the articles published in its columns it appears that Dawson City, which has sprung up at the junction of the Klondike and Yukon rivers, has a population of 20,000, that of the whole district being about 27,000. There are about 5000 miners actually at work, and the output of the '97-8 season has been estimated at from £2,000,000 to £5,000,000, primitive and un-economical as the modes of working the gold are The administration of the district has been bitterly complained of, more particularly the Dominion regulations that a 10-per-cent Norris, William Edward, was b Nov 18th, that alternate claims in every new district 1847, and is the son of the late Sir W. Norris, must be reserved for the Government A formerly Chief Justice of Ceylon Ed. at Eton. Commission directing Mr Ogilvie to hold an Married Frances Isabel daughter of the late I. immediate inquiry under oath into the charges of official corruption and maladministration in the Yukon district was issued (Oct. 9th, '98) See British Empire (table), Canada, and DIPLOMATIC.

> NOTWAY. See SWEDEN AND NORWAY. Norwich, Bishop of. See under PEERAGE.

Nossi Bé. A small island on N.W. coast of Madagascar, held by France since 1843; and a

Madagascar, neid by France since 1843; and a flourishing trade-port.

Nova Scotia. A province of the Dominion of Canada. It is a peninsula connected by narrow isthmus with New Brunswick. Incorporated with it is Cape Breton Island, formerly a distinct colony. Area 20,907 8q. m.; pop. 450,396
Capital, Halifax; pop. 38,556 A fine city and harbour, also an Imperial military and naval station. Divided into 18 counties. The coal mines near Halifax and Cape Breton turn out about 2,000,000 tons of coal per annum, and the whole of the Dominion Government railways are worked with coal from these mines Administered by a Lieut -Governor and Executive. The people elect a Legislative Council of 21 members, and a House of Assembly of 38 members. The Province has 10 seats in the Dominion Senate and 20 in the House of

Commons. Education receives some Government support, and is free and to some extent compulsory. The colony was originally a French one, and then called Acadia; ceded to England 1714; entered Dominion 1867. See BRITISH EMPIRE (table), CANADA, and DIPLO-

Nurses, Royal British Association of, 18 a professional organisation of trained nurses, with a membership of nearly 3000. Its objects are to improve the status of the nursing profession, to establish a Register of Trained Nurses, and to carry out benevolent schemes for the advantage of members. Over 2500 nurses have already been registered, and a copy of the register (38 6d) can be obtained of the Secretary, 17, Old Cavendish Street, Oxford Street, W.

Other bodies are the Grand United Order of Oddfellows, with Grand Master Wallis at its head, a total membership of 175,306, and tunds amounting to £650,000, and the British United Order of Oddfellows, with a membership of 15,047

Okuma, Count, is one of those who took part in the Japanese revolution of 1868, and through it rose to office In '73 he was appointed Minister of Finance, and held that post till 81, when, through a disagreement with the Premier, Maiquis Ito, he resigned In '88 he became Minister for Foreign Affairs for a short time, but his efforts to push forward the revision of the treaties with foreign nations made him unpopular, and he had to resign After his first resignation in '81 he organised the Progressive party known as the Kaishinto, and their power has steadily grown till, in '96, it carried him into office as Foreign Minister The Count has always advocated party government for Japan, and in '98, after the fall of the Marquis Ito's Ministry, he organised the first Government ever appointed in Japan on a party basis, though he did not long remain in office. Sec TAPAN

OLD AGE PENSIONS.

This subject, which has been much and scriously discussed during the last ten years has greatly increased in public importance, and it will probably be one of the leading questions upon which legislation will be required by a large number of voters, on both sides, at the next general election. As much controversy has always existed and now prevails respecting an equitable and practical scheme for granting State pensions to the subjects of the United Kingdom on attaining old age, a select committee was appointed on July 21st, '96, to take evidence and report on this question. In the conduct of their inquiry the Committee availed themselves of the evidence laid before the Royal Commission on the Aged Poor, and well considered the report of that Commission, as well as the reports laid before it of individual members Much of the testimony taken by the Commission related to the condition and treatment of the iged und i the existing Poor Law ment of the ged and i the existing from Law system, to the means that exist for meeting the needs of the aged mespective of that system, and to certain schemes for State and which had been suggested, but none of which were recommended by the Commission—The Committee at the commencement of their proceedings had to consider more than a hundred schemes, which for the most part may, they state, be classified in the following groups-

viz.

Schemes involving compulsory contribution towards a pension fund, either according to the German method of deduction by employers form wages paid by them, and aided by a contribution levied from the employers, or by way of a yearly or lump payment made by all young persons previous to a certain age and accumulated at compound interest until the 2. Schemes to provide a universal grant of pensions to all individuals on reaching a certain age, without requiring from them any direct contribution or examining their merits and their needs. Different modifications were suggested, mainly with the object of fixing the income above which there should be no grant of pension.

3 Schemes providing special facilities and encouragement to voluntary insurance against old age, with substantial assistance from the

4. Schemes which provide State assistance towards old age pensions for members of Friendly Societies only Some of these proposed that such members should, on attaining a certain age, receive pensions from the public funds, while others proposed that pensioners should receive part of their pension from their Society and the remainder from the State

The Committee reported that, after examining rather than serve the best interests of the industrial population." The Committee considered, with the view to making it their own, a scheme originally suggested by Sir Spencei Walpole, a member of the committee, and afterwards developed and modified in discussion. The Committee stated that within the limits marked out by their reference they had not received and were unable to construct any scheme less open to objection than Sir Spencer Walpole's scheme, which they designate Scheme A. After long and careful discussion in the Committee it stood as follows -(2) Any person who, on attaining 6s, has an assured income of not less than 2s 6d, and not more than 5s a week, may apply for a pension to the pensioning authority (2) It shall be the duty of this authority, unless it has reason to believe that the assured income of the applicant is either less than the smaller of more than the larger of these sums, to grant a pension to the applicant if eligible (3) A person shall not be thus cligible who, in the person shall not be thus chighle who, in the opinion of the pensioning authority, requires, owing to his physical or mental infimity, relief in an asylum, infirmary, or as an inmate of a workhouse (4) A person to whom a pension may be granted shall receive the following sums from the pensioning authority—If his income is 2s to and less than is, an additional 2s to get pensioning authority as, a further 2s a week; and if s, is, and difference week (5) "Assured income" is defined to be an income obtained from one of the to be an income obtained from one of the following securities (a) real estate, (b) lease-hold property, the unexpired term of the lease being not less than thirty years, (c) any security in which trustees are authorised to invest either by statute or by order of the Court of Chancery, (d) any annuity purchased from the National Debt Commissioners, or through the Post Office, or from a registered Friendly Society, or from an insurance office, (e) of any other security approved from time to time by the Treasury. No allowance of outdoor relief from the rates shall be "assured income" (6) The Poor Law guardians of the district in which the pensioner resides shall be the pensioning authority. (7) The pensions shall be paid from the local rates, and a proportion, not beyond one-half of the cost, shall be made good by the State. (8) The reterpt of a Stateaided old age pension shall not involve the

forfeiture of any civil rights. The Committee stated that this scheme, in their judgment, was not free from objection, because "It (1) imposes on the State generally, and therefore on the industrial classes, a heavy charge for providing pensions for a portion only of these classes: (2) encourages that amount of thirst only which is required to ensure an income of 25 6d a week at 65, but discourages any further thirft; and (2) by relieving the industrial poor from the obligation of wholly providing for their old age, probably tends to depress the wage rate. But on the other hand (i) it is capable of being brought into immediate operation, at any rate to some extent; (2) it leaves tion, at any late to some extent; (2) it leaves the industrial classes to save in their own way; (3) it requires no difficult investment of accumulated funds by the State; (4) it offers the public aid to all persons of the industrial classes who can make the required contri-

bution

the schemes and evidence which came before the Committee, this age and such measure appeared to be those concerning which there was most concurrence of opinion According to the census of 91, 1,372,607 persons out of a population of 29,002,525 for England and Wales we to of the age of 65 years and ipwards; the population of England and Wales is rather more than three fourths of the population of the United Kingdom Owing, however, partly to extensive emigration, the proportion of old people in Ireland is larger than the proportion in the remainder of the kingdom. Taking it, how-evel, as similar, at least 343,000 must be added to the above total to arrive at the old age population of the United Kingdom Consequently there cannot have been less than 1,715,000 persons 05 (carsold and upwards in the United Kingdom in '91 One person out of every kingdom in '91. One person out of every twenty-three was at least of years old. Ob-yiously the aged in '91 were the people who had sinvived to old age out of the population born at least sixty-five years previously. In '21 the population of the United Kingdom was only 27,272,187 The 1,715,000 persons therefore are the survivors of those who were born at a time when the population was only 22,812,336 In 1961, according to the opinion of Sir Spencer Walpole, it may be assumed that the old aged will amount to 2,969,712, being the survivors of those born when the population was 39,536,721. The next subject for consideration 1-, the proportion of the old people who are in need of iche According to Mr Ritchie's return, out of the 1,372,621 persons in England and Wales sixty-five years old and upwards, 268,397 or 19 5 per cent, in other words one person in every five, were in receipt of relief on a parti-cular day, and 401,904 or 29 3 per cent, in other words three persons in every ten, applied for relict in the course of the year.

These figures, startling as they are, are more so still when it is known that probably one-third of the population belong to the well-to-do classes, who are above all need of dependence on the lates. If these are deducted from the calculation, the proportion of paupers over 65 to the total of the population over that age and below the well-to-do will not be less than three out of seven, or nearly one in two. It is, therefore, a lamentable fact that nearly one-half the working population of this country either cannot

or do not make sufficient provision for their old age, and are therefore more or less dependent on the rates at that period. The Committee considered that State aid cannot be justified unless it is limited to assisting the person when circumstances beyond his control make it practically impossible for him to save from his own carnings an adequate provision for his old age Such a limitation could not be enforced by any investigation into the past history of the earnings of an applicant for this assistance. The only test which can be made is the possession at the pension age of an income within the limits specified as qualifying for the aid limitation to a large degree is dependent upon the average wages the individual can command, and in considering this question, it must not be overlooked that the power of the employed to obtain from the employer the full wage and value of labour has increased, and is likely to increase still further. As to what minimum nicrease still further. As to what minimized of wages enables a man, by the exercise of reasonable economy, to make sufficient provision for his old age beyond subscribing for sick pay and functal expenses cannot be approximately determined. The evidence given to the Committee appears to suggest that men whose average carnings do not fall below the equivalent of 20s a week in towns and a rather smaller sum in the country should find no great difficulty in contributing 2d a week towards their maintenance when past work—a contribution which, if begun at 20 years of age, would produce, according to the rate of charge now made for deferred annuities the of chaige now made to deterted annunces through the Post Office, a pension of 25 6d per week from the age of 65, or it commenced at 16 years of age, one of 15 per week. If not begin until 25, 34d a week would be required for the 25 6d pension. Iestimony has been produced to show that, while a large number of the class who earn less than Li a week do now make sufficient provision for old age, it is a fact that many who have received a fai higher wage attain the age of 65 without any savings. The wage rates referred to can only apply to actual payments in money, and do not include remuneration partly paid in board and lodgings, as in the case of doniestic service, etc.
The Committee said that "The people thus in

a position to require assistance must in any case form but a small proportion of the industrial population, and even of this section, which can hardly be estimated at more than a third, only a small proportion of those above 65 years of age who now appear as inmates of the work-house or infirmary would under any system of State-aided pensions be able to support them-selves independently. Unfortunately the old age of the working classes, following as it does on a life of hard work done under trying and unhealthy conditions, is very frequently accompanied by bodily or mental infirmities which demand special care and supervision. Those who are bedridden, those who are suffering from senile inability, those who have lost their power of self-control and have fallen into insanitary habits, and finally those who are no longer capable of the economical application

the workman dependent on wages have to prowide for his support, not only so long as he is employed, but also for his age when he is past work, and this consideration affects the rate of his wages But if the whole or part of the cost his wages. But if the whole of part of the cost of maintaining him when past work is undertaken by the State, the portion of the wage which applies to this service ceases to be essential, consequently, whenever the competition for employment is very keen the wage payment will tend to fall by a percentage approximating to that contributed by the State to the pension fund. This difficulty reappears in a different form when the power of the aged to contribute to their means of support by beht to contribute to their means of support by light labour is considered. A man or woman sub-sidised by the grant of a State pension is in a position to underbid a competitor who has no resource but his or her actual earnings or the resource but ins or net actual earnings or the rates. This difficulty, the Committee stated, is of very wide application. To obviate such, "an attempt might probably be made to prohibit all recipients of State-aided pensions from engaging in remunerative work of any kind. Such an attempt must assuredly fail, but even if it could succeed it would have the effect of creating a compulsorily unoccupied class, with doubtful advantage to the community." It has often been uiged by the advocates of State-aided pensions that the receipt of money in the form from the taxes or the rates is free from the tant which attacks to allowances made under the Poor Law. Fix Committee declared that "this might be true of a system such as that advocated by Mr Charles Rooth, under which a uniform pension became the right of every individual at a certain age miespective of his antecedents, his character, or his private means, but all such schemes are practically excluded by their enormous cost."

Now, both political patties are strongly in favour of pensions for agrid persons above of, if a good practicable scheme can be established for the purpose which will not pauperise the recipients of such on the one hand, or interfere with the benefits which the friendly societies confer in the same direction on the other. In short, nearly all intelligent nicially societies confer in the same direction on the other. In short, nearly all intelligent persons are agreed, as the Spectator has well declared, that icht for the aged—namely, for those inhabitants of the United Kingdom above 65 - should, if possible, be changed from iche though the workhouse into relief through pensions. The better opinion is that the only method to raise the fund for the agency of such pensions it control every payment of such pensions is to compel every individual who is to be a recipient of it to subscribe to it a certain proportion, and to direct that the remainder shall be paid out of the Imperial exchequer. It is evident that, in the near future, if politicians will strongly advocate legislation for these pensions and point out well considered schemes for the payment of such, a strong party may be formed to carry a working scheme. Efforts, however, will probably be required to carry it, com-mensurate with those which were necessary to legislate for the repeal of the Corn Laws and other Free Trade measures As regards the of a small pension, must in any case find asylum. The cost of indoor relief will not therefore be appreciably diminished by the operation of any system of old age pensions."

As segards the question, addressing a necessary of the control of any system of old age pensions."

As segards the question, must be the discount of the state and old age pensions. The State alone could not afford at the expense of the taxpayers to give a pension indiscriminately to everybody who reaches the age of sixty-five, and any scheme which discouraged thrift or which did not encourage thrift would bring abou new cvils even greater than those which it was desired to remove. The report of the Committee above to remove. The report of the Committee above referred to was unlayourable, but he did not believe that the last word had been spoken He did not think it was possible immediately to deal with this question. There were financial considerations to be taken into account, and other matters might have a still more pressing claim upon the Government But still be entertained the hope that before the Government went out of office it might be able to do something to assist and to stimulate and to encourage provision for old age. See references to pension schemes in Iceland and Italy under LABOUR MOVIMENT V Foreign Notes.

Ontario, a province of the Dominion of Canada—also called Upper Canada—It joined with other provinces to form the Dominion in with other provinces to form the Dominion in 1867 Area, 219,650 sq m., pop. 2,114,321 It extends along the north shores of the great lakes, and is important as containing the Dominion metropolis, Ottawa (pop. 44,154) Provincial capital, Toronto, pop. 181,220, on Lake Ontario, the second city in Canada in wealth and population Besides the two capitals, important towns are Hamilton (pop. 48,980), London (pop. 31,977), Guelph, St Catherine's, Brantford, Belleville, and Chatham Adminisbrantoid, Believille, and Chatham Administred by a Lieut-Covenior and responsible Ministry. a Manchester manufacturer, vexed with the tests at the Universities, bequeathed, on his death in 1846, £96,654 for the purpose of founding this college, which commenced with 62 students the old Quay Street buildings became too small, and the Owens College Extension I und small, and the Owens conege Extension: a unwas started and ultimately reached \$\mathcal{L}\$11,152, the old buildings being sold for \$\mathcal{L}\$13,000. The new buildings were opened and amalgagamated with the Manchester Mcdical School in '23. Further and rapid development was \$\mathcal{L}\$1. In 73. Future and rapid development was promoted by many generous bequests In 86 the College became the first college of the Victoria University $(n \ v)$ In 83 further additions to the college buildings became necessitions. sary, and were built; and, four years later, new Beyer Laboratories and the Natural History Museums were erected, at a cost of 780,000 Additional buildings for the Medical Department were opened in Nov '94, and the medical school is now one of the finest in the kingdom In '88 Stil Joseph Whitwoth's bequests to the College amounted to over Dequests to the College amounted to over 55,0000 as supplemented by the liberality of his residuary legatees, one of whom, Mi R (Christie, m 97, further pre-sented the College with the balance of his share, amounting to \$55,000, for the election of a Hall and the completion of the Quadrangle. In 94 Mr the College at a cost of about Leo,000, and the building was opened in June '98 Fotal students ('97-8) 986, composed of 639 art students, 199 women, and 416 medical students. The admission of women was sanctioned by the Exension Act. There are two halls of residence—the "Hulme" (conducted on Chuich lines) and the "Dalton" (in connection with the Society of Friends), both for men only The College receives annually £3500 from Government, £1000 from the Manchester Hulme Irust, ment, £1000 from the Manchester Hulme I rust, and £700 from the Manchester Corporation (under the Technical Instruction and Local Taxation Acts), in addition to £4c0 for the Manchester Museum, of which the College is entrusted with the administration President, the Duke of Devonshire, K G Treasurer, Mr Alderman Joseph Thompson Principal, Alfred Hopkinson, Q C.

Oxford, Bishop of. See under Perracipal Coxford, Bishop of. This University seems to have grown up in the twelfth century.

Oxford Bianop of. See under Perrate
Oxford University. This University seems
to have grown up in the twelfth century,
although to Alfred the Great is ascibed the
foundation of one college, University, in 872
Originally the scholars at Oxford lived scattered about in various houses in the city,
meeting for instruction, but in other respects
resembling the non-collegiate students of the
present day. The number of undergraduates
in residence is now somewhat over 2000. It is
practically stationary. The University began

to experience reform at the hands, to some extent, of devoted sons in 1854. The Ordiextent, of devoted sons in 1844 The Ordinance of that year, amongst other changes, assigned positive and not merely ornamental duties to the professoriate The second Universities Commission introduced some sweeping changes which began to take effect in '82 Not the least of them, as affecting the personnel of the Colleges, was the substitution of Prize and Tutorial Fellowships for Life Fellowships (which had been voided, as a rule, by marriage, or neglect, save under dispensation, to take Holy Orders, and for none other cause). The Holy Orders, and for none other cause). The Government of the University vests in three bodies The Hebdomadal Council (so called from meeting once a week in term), which alone has power of initiation, Congregation (consisting of resident M A s and members of superior faculties), which has power of rejection and amendment, and Convocation (all M As and members of superior faculties), which has power of ment, and Convocation (all MAs and members of superior faculties), which has power of rejection alone. The two latter bodies consist of members of Colleges, Halls, or of the Non-Collegiate Body. The Colleges, with reputed dates of foundation, and Heads, are. University, 872 (2), 1 F. A statute (passed in '80, amended in '91), allowing colleges within Her. Marketic degree of the College Seathin Her. Majesty's dominions to affiliate, has been adopted by St. David's College, Lampeter, University College, Nottingham, and Firth College, Shelfield. Under a similar statute (of 87), applying to Colonial Universities, the following Universities only the privileges therein contained — (ape of Good Hope, Sydney, Calcutta, Punjab, Bombay, Adelaide, Madras, Toronto. In degreeso dinarily granted by the University are. Baccalaureate and Magistrate in Arts, and on the Sub-Faculty of Surgery, included in the Faculty of Medicine, the Baccalaureate and Doctorate in the Superior Faculties of Divinity, Law, and Medicine, and in the Faculty of Music. For the Baccalaureate in all these faculties, cycept Divinity, an examination must be passed. For that Backalaureate, and for all the Doctorates except Music, a thesis or exercise qualifies The quasi-Faculty of Music stands alone, but to entrance into all the other faculties the attainment of the Baccalaureate in Arts is essential It may be taken either as a Pass or in any one of the Honour "Schools" of Classics, in its two divisions of Moderations and Litteræ HumaniHistory, Theology, Natural Science, in one or more of its several branches, Oriental Languages, and English Literature. Equally with passing the examinations, residence for twelve terms (of which for these purposes there are four in each year) is essential, but it need not

Hugh's Hall, St Hilda's, or the Home Students, a body in some degree resembling the Non-Collegiate Body (see WOMEN, HIGHER EDUCA-TION OF) Two colleges, neither of which has any official connection with the University, four in each year) is essential, but it need not be continuous nor contemporaneous with the continuous nor contemporaneous with the mansfield, Principal J. Drummond, in '95; passing of examination, standing for which is reckoned from the date of matriculation, i.e., formal entry into membership of the University. Women are admitted to the examinations for the B.A. degree, but here at piesent their privileges cease. A strong attempt to secure for them, if not the degree, at least a diploma, was made in '96, but failed. They may join Somerville College, Lady Margaret Hall, St.

Pacinic Gapile Projects. Framing the last servers were much discussion has taken place as to the importance and necessity of the laying down of a cable between Canada and the British Australasian colonies. The subject attracted much attention at the Colonial Conference at Ottawa in '94. Of the several routes which have been proposed for the cable two may be mentioned. One is from Vancouver, British Columbia, to Faining Island, Fiji, and Norfolk Island to Iweedmouth in Australia, which is a distance of 6730 miles, and if a branch were made to connect it with New Zealand, there would be an additional 415 miles. This route is entirely through British territory. The other route is from Vancouver to an island in the Hawanian group, and thence through the Gilbert and Solomon Islands to Bowen in Queensland This route is about 6,000 miles. The cost of a single cable from Vancouver to Australia has been estimated at from £1,250,000 redstrain has been estimated at not 2,1750,000. It is calculated that the carnings therefrom would be at least 25 per word, and that the futther charge of 90 per word to England from Canada would reduce the charge between Australia and Great Britain to 35 3d in place of 4s od as at present. It appears that a large subsidy would be necessary to connect England telegraphically with Australia through Canada and the Pacific Ocean. This subsidy Canada and the Favine Ocean. This subside has been proposed to be equitably apportuned, the contributing governments being Great Britain on behalf of the United Kingdom, and the Crown Colonies, Canada, Queensland, New South Wales, Victoria, New Zealand, I asmania, and Westein Australia. It has been further proposed that if the Imperial Government by an arrangement with the Colonial governments, itself guarantee the whole amount, the total subsidy may be materially reduced, because the Imperial guarantee would cause the company for the construction of the line to find capital for this purpose at a reduced rate of interest. With such a guarantee, it is said that a total subsidy of $\chi_{00,000}$ for about four or five years weuld be enough. In June 1.56 a computee was appointed to consider itself guarantee the whole amount, the total of a committee was appointed to consider the matter. The delegates from the Imperial Government were Lord Selborne, Under-Secretary of State for the Colomes, and Mr. G. H. Murray, C.B., a principal clerk at the Treasury, with Mr. W. H. Mercer as

Pacific Cable Projects. During the last ten | Secretary; the Canadian representatives ears much discussion has taken place as to the | were Sir Donald Smith and Sir Mackenzie Bowell, and the Australian delegates were Sir Saul Samuel and Mr Duncan Gillies The Committee have since reported on the subject, but have not published their report. As to other cable projects by foreign countries, As to did table photes by foreign countries mentioned in the previous editions of the ANNUAL, nothing of importance appears to have been done, or definitely arranged to be done, during the last twelve months. On the other hand, another cable route to Australia are the foreign to propose details and by via the Cape has been proposed to be laid by and the Eastern Extension, Australasia and China Felegraph Companies. This project, in the opinion of these companies, is far preferable to the Pacific route to Australia, where a break in the cable would interrupt communication, while, as regards the proposed new route, it is stated that except in the case of cables from Maintinus to Perth, Western Australia, if any of the sections were broken there would be two alternative lines as far as Zanzibar, and between there and Manritus — In an article in existing submarine cables, which have been manufactured and laid by British industry and enterprise, and are worked by British clerks . . The new cables will land only in British possessions, and will form a triplicate route to Australia removed from the volcanic dangers of the lava Seas, while experience on both sides of Africa shows that interruptions from seismic disturbances there are not frequent." The first part of the new project is nicquent. Include the house of the new project is to lay cables from Cornwall to Gibraltar, thence to Bathenst or Sierra Leone, afterwards to Ascension, on to St. Helena, and from that island to Cap. Town. The other part of the scheme is to extend the cable from Natal to Mauritius This is in conjunction with the present Zanzibar-Seychelles-Mauritius line, and will have the effect of providing an alternative to the Zanzibar-Mozambique and Mozambique-Delagoa Bay-Durban sections if they should be interrupted. From Mauritius the cable route may be to Rodriguez Island, thence

to Cocos or Keeling Island, and afterwards to Perth, Westralia,

Paderewski, Ignace Jan, the famous planist and composer, was born on Nov. 6th, 1860, in Padolia, a province of Russian Poland. He began to play the plano at the age of three, and, when seven years old, was placed under and, when seven years old, was placed under Pierre Sovinski, a local tutor. In '72 he went to Warsaw, learning harmony and counterpoint from Roguski, and subsequently from Frederick Kiel He toured through Russia, Siberia, and Roumania, playing only his own compositions. In '78 he became Professor of Music in Warsaw Conservatoire, still continuing to practise his art indefatigably. For a short while in '84 he was a professor at Strasburg Conservatoire, but then definitely decided to try his fortune as a virtuoso After thiee to try his fortune as a virtuoso. After thie years' study with Leschetizky, in Vienna, he made his debut in '87 with instant success. He next toured through Germany, and in the autumn of '89 appeared in Paris, where he created a furore. His debut in London took place under Mr Daniel Mayer's direction, on May 9th, '90, at 5t James's Hall. In the following year he visited America, and has since repeated the tour. He has composed more than early yearlangths a coverto un A misor. than eighty vocal works, a concerto in A minor for piano and orchestra, a suite for orchestra in G, and many picces for the piano. His "Polish Fantasie" was produced at the Noi wich restival in 93. M. Paderewski is a widowei

"Pall Mall Gazette" Evening newspaper and review Established 1865, by George Smith, of Smith, Elder & Co I ransferred to Henry Yates Thompson, his sou-in-law, in '80 Yates Inompson, his soli-in-law, in 80 F1st number appeared Feb 7th, '05 Edited first by Frederick Greenwood, next ('80) by John Morley, who in turn was succeeded in '83 by W. T Stead, and he by Mr E 1 Cook In Oct. '92 the paper was sold by Mr. I hompson to the Hon W. W Astor The present editor is Sir Douglas Straight Offices, 18, Charing

Pamirs, The, are sometimes called "The Roof of the World," and consist of a number of ble ak plateaux and shallow valleys situated about 13,000 feet above the sea level. They he between Chinese Furkestan, Russian Turkestan, and Afghanistan, and are inhabited chiefly by nomad Khirghiz bands. They command the routes to many of the territorics which they overlook, and so Russia and England and the Afghans and the Chinese are all interested in them. In April '94 Russia so far conceded China's demands as to undertake that, pending the conclusion of a final agreement, Russian China's demands as to undertake that, pending the conclusion of a final agreement, Russian troops should not touch the portion of Pamir territory claimed by China Regotiations between the Russian and British Governments resulted during March '95 in an agreement that the spheres of influence of the two countries should be divided by a line starting from a point on Lake Victoria (Zor Zul) near to its eastern extremity, and following the crests of the mountain range running somewhat to

the south of the latitude of the lake towards the Chinese frontier. For full details see ed. 96. A joint commission of British and Russian delegates was entrusted with the demarcation of the line. The British Government engaged that the territory lying within the British sphere of influence between the Hindu Kush and the line from the east end of Lake Vietoria to the Chinese frontier should form part of the territory of the Ameer of Afghanistan, that it should not be annexed to Great Britain. and that no military posts or forts should be established in it. A further condition of the agreement was the evacuation by the Ameer of Afghanistan of all the territories then occupied by him on the right bank of the Panjah, and the evacuation by the Ameer of Bokhara of the portion of Darwaz lying to the south of the Ovus, in legard to which the British and Russian Governments agreed to use their influence respectively with the two Ameers. These conditions were duly carried out.

Parker, Gilbert, is the son of Captain Joseph Parker, R.A., and was born in Canada, Nov 23rd, 1862 He was educated at Trinity University, Foronto, from which he holds the degree of D.C.L. He was for some years associate editor of the Sydney Morning Herald, New South Wales, and there devoted himself to New South Wales, and there devoted himself to dramatic and literary work entirely. He is the author of "Round the Compass in Australia," "A Lover's Diarry," "Pierre and his People," "Mrs Falchion," "The I respasser," "The Translation of a Savage," "When Valmond came to Pontiac," "An Adventurer of the North," "The Scats of the Mighty," "The Pomp of the Lavilettes," and "The Battle of the Strong." A dramatised version of "The Scats of the Mighty was produced at the opening of Her Majesty's Theatre in April '97. Address., Park Place, St. James's, London, S.W.

83, and a second time '97, and of London Congregational Union '90. Founder of Not-Congregational Union '90. Founder of Not-tingham Congregational Institute. Dr Parker, in addition to being a vigorous and popular preacher, is also an author of repute Among preacher, is also an author of repute Among numerous works written by him may be mentioned "The Paraclete," "Exce Deus," "Springdale Abbey," "Inner Life of Christ," (3 vols), "Apostolic Life" (3 vols), "Paterson's Parish," "Studies in Texts" (6 vols), and "The People's Prayer-Book" He has visited the United States five times. He was for years engaged on the "People's Bible," which is now completed in twenty-five vols, and may be recorded as the waynum with of loss bit ray. regarded as the magnum opus of his literary The conclusion of his twenty-fifth year of ministry in London was celebrated year of ministry in London was criedlated during of by numerous good wishes and gifts from all denominations, and the pinenase of an annuity, value £250. On June 18th, 98, Dr. Parker celebrated his preaching Jubile. In connection with this event he has a book in the piess entitled "A Preacher's Life an Autologiaphy with Sidelights." Dr. Parker prearies in the City Femilie event hunsday. preaches in the City Femple every Thursday at 12 (noon)

PARLIAMENT AND PARLIAMENTARY PROCEDURE.

Parliament is composed of the Sovereign and the Three Estates of the Realm, which are the Lords Spiritual, the Lords Temporal, and the Commons; the Lords Spiritual and Icm-poral sitting together and forming the House of Lords The Sovereign alone has the power of summoning or protoguing of dissolving Par-liament, and gives the Royal Assent to measures which have passed both Houses Unless it be dissolved by the Crown, Parliament exists seven years from the date on which it was first to meet. The demise of the Crown does not dissolve Parliament, but, on the contrary, renders an immediate assembling of the two Houses necessary, and if there be no Parliament in existence, the old Parliament must reassemble, and may sit again for six months, if it be not within that time dissolved by the new Sovereign See also Commons, House

of, and PLERAGE.
The Houses of Lords and Commons differ from each other not only as to their constitution but likewise in respect of their powers and methods of procedure. It is in the House of Peers, for instance, that the Sovereign meets Parliament, and the formal coremonies connected with the opening or proroguing of the Legislature are gone through. On these occasions, as also gone through On these occasions, as also when the royal assent is given to public or private bills, the "faithful Commons" merely attend in their lordships' House. But, on the other hand, the House of Commons has an individuality of its own, which is yearly becoming more marked Its powers and privileges are enormous it is in the Lower Chamber exclusively that the national estimates are voted. and it is in the Commons that the majority of important legislative proposals are initiated. The Royal Assent to bills is always given in the House of Lords, more frequently by commission than otherwise; and it is a curious circumstance that the French language is still employed in connection therewith. When a public bill is approved, the clerk says, "Le roy (or, la reyne) pursuance of any Act of Parhament or standing le veult." If the measure be a private one, he says, "Soit fait comme il est desire." Should tion of the standing order, be then under

the bill have subsidies for its object, the official says, "Le roi (or, la reyne) remercie ses loyaux sujets, accepte leur benevolence, et aussi le veult."
If the Sovereign thinks fit to refuse approval to a measure, the clerk then says, "Le rot (or, la rryne) s'avisera." This power of rejection, it may be noted, was last exercised by Queen Anne, in the year 1707.

The most striking feature with the procedure of the House of Commons is the great power vested in the Speaker. Unlike the Lord Chancellor, the Speaker must abstain from debating, unless in committee of the whole House, and even there he rarely takes advantage of his right The member of the House who is elected to the office of Speaker usually acts quite independently of party considerations. He never votes, save when the numbers happen to be equal, in which case he gives the castto be equal, in which case he gives the cast-ing voice. The thicf duty of the Speaker undoubtedly is the preservation of order, with respect to which the rules of the House of Commons are very stringent. Only the royal assent can convert a bill into an Act of Partherment. hament. It occasionally happens that the opponents of a bill are not desirous of meeting the motion for its second reading with a direct negative An amendment is therefore proposed to the effect that the bill "be read this day three months," or "this day six months," It being understood that three months or six months hence the House will not be sitting. In the cases of motions in respect to which the House is also unwilling to come to a decision, "the previous question" may be carried, in which case the other business of the day is

at once proceeded with
The business of both Houses of Parliament. but more especially of the House of Commons, is transacted very largely "in committee." When the whole House is in committee the Speaker vacates the chair, the Mace is placed under the table, and the Chairman of Ways and Means or another member of the House presides. Proceedings relating to the expendipresides. Frocedings relating to the expenditure of public money take place in Committee of Supply, while in Committee of Ways and Means resolutions having reference to the funds by which such expenditure is to be sustained, are passed. There are also grand committees, Select Committees chosen for specific purposes, and committees for the considera-tion of private bills. No member of the House of Commons can, as a matter of fact, resign his seat, but this end is attained by acceptance of the "Chiltern Hundleds." office having emolument attached can be conferred on a member of the House of Commons without his vacating his seat, and therefore by obtaining "the stewardship of Her Majesty's Chiltern Hundreds, the stewardship of the Manor of Poynings, of East Hendred and Northstead, or the Escheatorship of Munster," a member may rid himself of his duties

The rule regulating the Sittings of the House of Commons provides that unless the House skall otherwise order, the House shall meet every Monday, Tucsday, Thursday and Friday, at 3 o'clock, and shall, unless previously admired the shall of journed, sit till i o'clock a m., when the Speaker shall adjourn the House without question put, unless a bill originating in Committee of Ways and Means, or unless proceedings made in pursuance of any Act of Parliament or standing

consideration. At midnight on Mondays, Tuesdays, I hursdays, and Fridays, except as afore-said, and at half-past 5 on Wednesdays, the proceedings on any business then under con-sideration are to be interrupted, any dilatory motion which may be before the House is to lapse without question put; and the business then under consideration, and any business subsequently appointed, is to be appointed for the next day on which the House shall sit, unless the Speaker ascertains by the preponderance of voices that a majority of the House desires that such business should be deferred until a later day. On the interruption of business the closure may be moved, and in such case the Speaker or Chairman is not to leave the chair until the questions consequent thereon have been decided. After the business under consideration at midnight, or at 5.30 on Wednesdays, has been disposed of, no opposed business is to be taken A motion may be made by a Minister of the Cionii at the commencement of public business, to be decided without amendment or debate, to the effect that the proceedings on any specified business if under discussion at midnight that night be not interrupted under this standing order When the House meets at 2 o clock for a morning sitting, the sitting is suspended at 7 (no opposed business to be taken after 10 minutes to 7), and is resumed at 9, and continued, unless previously adjourned, until midnight, the evening sitting being subject to the provisions of the Standing Order No. 1, which relate to the interruption of business and the adjournment of the House On Wednesdays the House meets at noon, opposed business is not taken after 5 30, and the House adjourns at 6 -- Closure of Debate Questions for the closure of debate are to be decided in the affirmative, if when a division be taken it appears by the numbers declared from the Chair that not less than one hundred members voted in the majority in support of the motion.—Disorderly Conduct The Speaker or the Chairman may order members whose conduct is grossly disorderly to withdraw immediately from the House during the remainder of that day's sitting, and whenever any member shall have been "named" by the Speaker of Chairman for distinguishing the authority of the Chair, of for abusing the rules of the House by persistently and wilfully obstructing business, or otherwise, he may, by vote of the House, be suspended from the service of the House, on the first occasion for a week, on the second occasion for a fortnight, and on the third or any subsequent occasion for a month, but such suspension is not to exempt the member from service on any private bill to which he may have been previously appointed —Irrelevance or Repetition The Speaker or the Chairman, after having called the attention of the House or of the Committee to the conduct of a member who persists in irrelevance, or tedious expetition either of his own arguments or of the arguments used by other members in debate, may direct him to discontinue his speech

Parliamentary Session, '98. See Session

Parliaments, Clerk of the. An officer of the sealing, Li ros, ditto, after sealing, L3. the House of Lords, by whom, in conjunction with the Clerk Assistant and the Reading years from the date of application, subject to sealing, L1 ros, ditto, after sealing, L3. the House of Lords, by whom, in conjunction with the Clerk Assistant and the Reading years from the date of application, subject to sealing, L1 ros, ditto, after sealing, L3.

and witnesses, and signifying the Royal assent to bills which have passed both Houses. Tolerk of the House of Commons acts as chairman and is addiessed by members during the election of Speaker He, like the Clerk of the Parliaments, is appointed by the Crown, and is associated with two clerks assistant, who make minutes of the proceedings. The office of Clerk of the Parliaments is held by Henry J. L. Graham, C.B., and Sir Reginald Palgrave, K.C. B., is Clerk of the House of Commons.

Passmore Edwards Settlement, The. The Settlement, towards the cost of which Mr. Passmore Edwards gave £14,000, embraces a lecture-hall, accommodating 450 persons, classiooms, gymnasium, library, entertaining-rooms, and rooms for a Warden and 18 Residents. It is intended to continue and develop the work that was formerly carried on at University Hall and Marchmont Hall, and to be a centre of education, recreation, and social life for the district. Mrs. Humphry Ward, one of the founders of University Hall, delivered to opening lecture at the Settlement (Oct. 10th, 107), and it was formally opened, on the completion of the building, on Feb. 12th, 198, by the Right Hon. John Morky, M.P. The Warden is Mr. R. G. Tatton, and the Settlement is located in Lavistok Place, St. Paineras.

Patents for Inventions and how to get them. The right to patent and the procleges which go with it are defined to no one of either The two principal points to bear in mind in patenting are novelty and utility. A patent is essentially a restricted monopoly, and the inventor is therefore called upon to observe certain limitations. His protection extends over a period of fourteen years, provided the fees are paid, but he can extend it at the end of that there for a punity round. By fees the of that term for a similar period. Before the actual date of patenting an invention may not be used for profit, either secretly or publicly Patents are issued at the Patent Office, 11, Staple Inn, London Application must be made on an application form accompanied by either a provisional or complete specification and must conform strictly to the prescribed regulations. Forms are obtainable at the Inland Revenu Office, Law Courts, or, at a few days notice, of any money order office in the United Kingdom Patents may be taken out through patent agencies, and this is the best plain, provided only that the agent be respect-able and reliable Applications are liable to adverse judgment by the Patent Office, and to outside opposition, in the former case ten days' or more notice is given the applicant, and he may amend under certain regulations, in the latter, notice of opposition is made on a special form, the grounds being stated. When a complete specification is accepted, the inventor is informed of it, it is advertised in the official journal, and is open to inspection by the public at the Patent Office on payment of a tee of one shilling, while certified copies of entries can be had at the rate of one hundred words for fourpence. The fees are, in brief: words for hoursenees. The tess are, in order up to sealing, on application for provisional protection, \mathcal{L}_1 , on filing complete specification, \mathcal{L}_3 . On application to amend specification, up to sealing, \mathcal{L}_1 is , ditto, after sealing, \mathcal{L}_3 . Every patent is granted for the term of fourteen the ditter of application, where the

term of the patent, of the prescribed fee. The patentee may pay all or any of the prescribed fees in advance. They begin with £5 in espect of the fifth year, increasing by annual instalments of £1 to a last payment of £14 in respect of the sounteenth year. Thus the total cost of a patent kept in sorce for the maximum period of 14 years is £99 Applications for patents communicated from abroad are entertained, as are also all inventions requiring tained, as are also an invention against international and colonial arrangements for their furtherance Special forms of procedure in these cases are necessary. The inventor, in conclusion, is advised to consult the "Illustrated Official Journal (Patents)," published published Wednesdays, price 6d., which contains abridgments of patents, and illustrations, and the volumes of abridgments. Copies of specificavolumes of abingments. Copies of spicinta-tions can be had, on payment of the published price, at Quality Court, chancery Lane, W C The above may all be consulted also at the Patent Office Free Library, Bishop's Court, Chancery Lane, where adminable facilities exist for readers. During '97 there were exist for readers. During '97 there were 30,958 applications for patents, 19,318 for single designs, 1009 for sets of designs, and 10,624 for trade marks.

Patti, Madame Adelina Clorinda, was b at Madrid in 1843. Was trained profes-sionally under Ettore Barili, her step-biother, and made her first appearance on the stage at New York in '59 She first appeared in London in '61, as Amina in "La Sonnambula" at Covent in '61, as Amina in "La Sonnambula" at Covent Gaden, and at once became the favourite prima donna of the day. In '70 she received from the Fuperor of Russia the Order of Merit, and the appointment of First Singer at the Imperial Court. She married in '68 M Roger de Cahurac, Marquis de Caux, from whom she was divoced in '83, and afterwards Signor Nicohin, who died in '98. A theatre, which she had creeked at Craig-y-nos, her welch residence has covered in '84. Welsh residence, was opened in Aug Madame Patti has undertaken several very successful tours abroad, in the Argentine Republic and in the States, and in Oct '91 she began her far well tour to the latter country o : she In '95 she reappeared at Covent Garden after a ten years' absence She rarely appears now except at concerts

Peace Society, The, was founded in 1816, and has for its object the promotion of permament and universal peace. It welcomes the support of Christians of all denominations, and also of those persons who oppose was on humanitarian of other grounds. The Society has always advocated a gradual, proportionate, and simultaneous disarmament by all the nations of Europe, and the principle of arbitration, and it is unquestionably due to its efforts that this mode of settling international difficulties has been adopted with increasing frequency and acceptance. During the period of its existence over 140 instances of pacific settlements have occurred. The Society maintains a constant propaganda in favour of peace, and, constant propaganda in favour of peace, and, amongst other methods of action, especially advocates the preaching of seimons on the subject of peace, in as many churches as possible, on the Sunday before Christmas. President, Sir Joseph W. Pease, Bart., M.P.; Trasurer, Walter Hazell, Esq., M.P., Seoretary, W. Evans Darby, LL.D. Offices, 47, New Broad Street, London, E.C.

PEERAGE.

Peers are created by the Sovereign, and, with an exception to be noticed presently, the titles are hereditary, though they may be lost by attainder for high treason. Before the union of the three kingdoms, England, Scotland, and Ireland had each a peerage of its own containing the five temporal ranks or degrees and precedence, in each degree degree. degrees, and precedence in each degree de-pended upon the date of the creation of the title. Thus in each country the dukes came first, and took precedence of each other in order of date of title; then came the marquises, earls, viscounts, and barons, precedence in each rath barne similarly governed. dence in each rank being similarly governed by priority of date At the union with Scotland, in 1707, it was arranged that the Scotch pecrages should rank after the English peerages then in existence, according to degree, and the Scotch dukedoms were accordingly placed in order of date after all the English dukedoms, and so on through the other ranks. The Act of Union also provided that the Scotch peers should be represented in the House of Lords by a portion of their number only; and as it made no provision for the creation of any new Scotch peers, the peerage of North Britain consists exclusively of those whose titles date from before the year 1707. From that time until the Union with Ireland the prerages created were either Irish or of Great Britain, the latter alone giving seats in the House of Lords, and taking precedence according to degree next after the English and Scotch peer-ages. The Art of Union with Ireland provided that peers of that kingdom should take precedence next after peers of Great Britain according to rank, and that Ireland should be represented in the House of Lords by a portion of her peers only It was further enacted that one new lish peciage might be created on the extinction of three existing Irish peciages, and that when the number should be reduced to one hundred, if one peerage became extinct one other might be created. The peerages of the United Kingdom and of Ireland created since the Umon take precedence according to rank and date of patent next after those of Ireland which were in existence at the Union, but of the two classes only the peerages of the United Kingdom give of themselves a seat in the House of Loids There is no limit to the There is no limit to the norcase of these but the pleasure of the Sovereign The perrage collectively may thus be classified as consisting of peers of England, of Scotland, of Great Britain, of Ireland, and of the United Kingdom, but of the Scotch and Irish peers only a portion are peers of Parliament. Irish peers who have not been elected to represent their order in the House of Lords may be returned and may sit for any bolough or county constituency in Great Biltain. The House of Lords is composed of two of the estates of the realm, the lords spiritual and temporal. The first consists of the Archbishops of Canterbury and York, and twenty-four bishops of the Church of England, the number not having been increased with the successive creation of new bishoprics. The Archbishops and the Bishops of London, Durham, and Winchester are always entitled to sit; the other bishops only receive a writ of summons when the voidance of a see decreases the total number of lords spiritual to less than Pensions. See Finance National, Part III. twenty-six, and then in order of seniority of

appointment. The Bishop of Sodor and Man is not included in this rotation, and has no seat in Parliament. A bishop ceases to be a lord of Parliament on resigning his see. The temporal lords may be divided into peers whose right to sit and vote in the House is hereditary, repre-sentative peers of Scotland and Ireland, and lords of appeal in ordinary. By the Act of Union between England and Scotland the Scottish peers send sixteen representatives to the House of Lords, who are elected immediately after every general election, and sit until Parliament is dissolved. The Irish peers elect twenty-eight representatives for life. The Lords of Appeal, of whom there may not be more than four appointed, enjoy the dignity of a baron for life By the Act of '76 they were to lose the right to 5it and vote on resigning office, but by the Appellate Juris-diction Act of '87 any retired lord of appeal may sit and vote as a member of the House of Lords during his life And it was directed, '98, that the children of legal life peers and of legal life peers deceased should in future have the courtesy title of "Honourable," together with the rank and precedence next to and immediately after the younger children of all hereditary barons now created or hereafter to be created, and immediately before all baronets The pecia temporal are divided into dukes, marquises, carls, viscounts, and barons, these titles taking precedence in the order given. But it should be borne in mind that a peer may hold a superior Scotch or Irish title (and by which he may be generally known) to that under which he sits as a peer of the United Kingdom. Thus the Duke of Buccleveli sits as Lail of Doncaster lords spiritual and temporal sit together, and all have an equal voice and vote in the house, whatever may be their rank. As in the House of Commons, each peer must be present to record his vote, the practice of peers giving proxies having been discontinued. A newly created peer, or one clevated to a light title, is into-duced by two other peers of his own degree, who are accompanied by the Earl Marshal (the hereditary office of the Duke of Norfolk), the Lord Great Chamberlam (now the Earl of Aucas ter), all in their parliamentary robes, attended by Garter King of Arms (Sir Albert Woods has long held this office), and Black Rod (Sir M Biddulph). The procession enters the house at the bar, and bows three times on the way to the woolsack, where the peer kneeling pre-sents his patent and writ to the Lord Chancellor. Both these documents are read by the clerk, and the oath is administered to the peer at the table, and he subscribes the roll with further formalities conducted to one of the benches of the house, the position chosen varying with the rank of the new peer, where he and his introducers bow thrue to the Lord Chancellor, by whom he is afterwards congratulated. Peers are robed on these occasions, and at the opening of Parliament by Her Majesty, but wear their ordinary liress when the House is sitting for business. A bishop is introduced by two other bishops, but without many of the formalities described above, representative peers simply present their writs, and are sworn like peers succeeding to a title. The peers place themselves somewhat differently to the commons. There are in this House, as in that, rows of benches running down each side from the throne to the bar; but

in the Loids there are, near the bar, a few seats known as the cross benches, the occupants of which face the woolsack. In this quarter of the House sit the Royal dukes, who take no side in politics, and a few noble loids who give a rigid adhesion to neither great party. The lords spiritual sit on the upper benches to the right of the throne, and retain these places no matter which party may be in pover. The other lords range themselves pretty much as the commons do,—the leader of the House and his colleagues on the Ministry on the front bench to the right of the woolsack, his supporters taking their places on the benches behind him, and the leader of the Opposition in that House and the ex-Ministers on the left front bench, behind them then adherents There is no airangement of peers according to rank, the different degrees sitting together indiscriminately if of the same political complexion The House of Lords has both legislative and judicial powers. It is the highest appellate court of the United Kingdom it may in certain cases try members of its own body, it tries any person who may be impeached by the House of Commons, and it also decides chains to the peciage. The Appellate Court is constituted of the Lord Chancellor and of other legal lords of high standing, such as colord chancellors, and the lords of appeal in ordinary. It may sit during a parlimentary recess, and its hours of business are from 10,0 am to 4 pm. The following list contains in alphabetical order the names of all peers of whatever classification, whether they be English, Scotch, Irish, of Great Britain, or of the United Kingdom, those who are not cutified to a scat in the House of Lords having an * prefixed It also includes the bishops, whether they be lords of Parlinment or not, the distinction between these being indicated in the same manner. The limitals SP and TP and SRP and TRP. are used to signify that the lord is a Scotch or firsh peer, or a Scotch or firsh repre-The abbreviations n, s, bro. sentative peer un, hb, and gs will be readily understood to mean nephew, son, brother, uncle, halfbrother, and grandson PC is used where the pect is a Privy Councillor, and LL stands for Lord Leutenaut. The following is the present composition of the House of Lords: present composition of the House of Lords: Peers of the Blood Royal, 6, Archbishops, 2; Dukes, 2; Marquises, 2; Farls, 123, Viscounts, 9, Bishops, 24, Barens, 319, Scotch Representative Peers, 16, Jush Representative Peers, 28, total, 550 Fourteen of the foregoing are minors, and two are reckoned both as peers of the United Kingdom and Jush remestrative press so that the actual vertices. representative peers, so that the actual voting strength of the House is now (Nov. Devonshire, Spenich Compton, 8th D. of (cr. 1604) Surname Cavendish B 1833, 5 1891 P C 1, K G He 18 e S of the late Duke of Devonshire L at Tim Coll 1, Camb, where he graduated B A 54 Fhe Duke was long familiar to the world by the title of the Marquis of Hartington, which he bore previous Marquis of Hartington, which he bore previous to his succession to the dukedom. He was returned for North Lancashire as a Liberal in '57, and in '59 moved the vote of want of confidence which resulted in the defeat of Lord Derby. In March 63 he was appointed a Lord of the Admiralty, and in April of the same year Under-Secretary of State for War in Lord Russell's administration In Feb '66 he obtained Cabinet rank as Secretary for War. At the general election of '68 he was defeated in North Lancashire, but was returned for the Radnor Boroughs He was appointed Postmaster-General in Mr Gladstone's first administration, and retained that office till '71, when he succeeded Mr Chichester Fortescue as Chief Seoretary for Ireland. On the retirement of Mr. Gladstone after his defeat in '74, Lord Hartington was unani-mously chosen as leader of the Liberal Party

at a meeting held at the Reform Club under the presidency of Mr. John Bright. In '79 he was elected Lord Rector of the University of Edinburgh, which office he held till '91. At the general election of '80 he was elected M.P. for North-East Lancashire, and was M.P. for North-East Lancashire, and was sent for by the Queen on the defeat and resignation of Lord Beaconsfield. He de-clined, however, to form an administration, being content to serve again under Mr. Gladstone. He became Secretary for India, but returned to the War Office in '82. At the general election in '85 he was returned by an enormous majority for the Rossendale Division of Lancashire. When Mr Gladstone formulated his policy of Home Rule Lord Hartington disagreed with him, and became the recognised leader of the Liberal Unionist Recognising his commanding influence with the Unionists of both parties, Lord Salisbury first offered to serve under him if he would accept the premiership, and after the secession of Lord Randolph Churchill, again endeavoured to induce him to join his Cabinet. But, on the ground that he could best serve the Unionist cause without taking office, he declined both offers. Subsequent events only served to emphasise his antagonism to Mr. Gladstone's Home Ruel policy, and he has since assumed an attitude of close alliance with Lord Salisbury. He was appointed Chairman of the Royal Commission on Laboui. April '91. The Duke, as he became at the end of '91, was "inaugurated" as Chancellor of Cambridge University in Jan. '94, and "installed" in June, in succession to his father. In August he was married privately, at Christ Church, Mayfai, to Louise, Duchessof Manchester, a daughter of the late Count von Alton of Hanover, and widow of the 7th Duke of Manchester, who died in '90. She was born in '32. During the same mouth his grace was invested with the Order of the Garter. He was appointed Lord President policy, and he has since assumed an attitude Garter. He was appointed Lord President of the Council in the Coalition Cabinet '05 Is of the Council in the Coartion Capitet of Stational and Imperial Defence such as was recommended by the famous "Hartington Commission" Lord-Lieutenant of Derbyshie and Co. Rosobery, Archibald Philip, 5th E. of (cr. 1703) P.C., K.G., K.T. Sits as Ld. Rosebery (1828). Surname Primrosec. B. 1847, s. 1868. E. at Eton and Christ Ch., Oxford; m. '78, Hannah, d. of the late Baron Mayer de Rothschild, M.P. She died in Nov.'90. Lord Rosebery succeeded his grandfather in '18, appended a commissioner to neour surface.

Rothschild, M.P. She died in Nov. '90. Lord Rosebery succeeded his grandfather in '68, appointed a commissioner to inquire into endowments in Scotland '72, Under-Sterctary of State, Home Office, '81-3, elected Rector of the University of Edinburgh '80, was Lord Privy Seal, and First Commissioner of Works '92, On the Congregate to provide the Clad-'85. On the accession to power of Mr Glad-stone in the beginning of '86, Lord Rosebery attained the distinguished post of Secretary for Foreign Affairs lie held the portfolio for only six months, until the fall of Mr. Gladonly six months, until the fail of mi. Graci-stone's Government in June, but he estab-lished a very high reputation even in that ahort period Lord Rosebery cast in his for-tunes fully with Mr. Gladstone, and entirely agreed with his Home Rule policy. Though a peer, he moved ('84) for a select committee to inquire into the best means of improving the efficiency of the House of Peers. Mr. olladstone some years ago forecast his future, and publicly spoke of him as destined to play a great part in the history of the country. He is a strong advocate of Imperial Federation (q v), and takes a great in-terest in movements for the improvement of the social condition of the masses generously presented a magnificent swimthe East End of London Elected, with Sire Rothschild, Nathaniel Mayer, 1st L. (cr. 1885). Sunname Rothschild. B. 1840 M.P. Ayies-bonath appointed Chairman of that body, the state appointed Chairman of the state appointed the state app over whose deliberations he presided with great success. But, owing to his many public duties, he had to resign in June 20 His lordship abstained to a great extent from his usual political and social labours during or, owing to the lamented death of Lady Rosebery. His monograph on William Pitt the Younger was issued in November. In Jan. '92 he again became the Chairman of the London County Council, and held the position for some months, till the approach of the general election compelled him to resign it. When Mr. Gladstone succeeded

to power Lord Rosebery became Secretary for Foreign Affairs, and in October he was made a Knight of the Garter. On the resignation of Mr. Gladstone in March '04 the Queen offered the post of Prime Kinister to Lord Rosebery, and he carried on the government with no little success till July '95. He then urged upon his supporters that the general election should be fought upon the question of the predominance of the House of Lords. During '96 his attitude upon the Armenian Question differed from that of Mr. Gladstone, and finally he decided upon resigning the leadership of the party in order to leave himself an absolutely free hand upon this question. His view was that Great Britain should not be hurried into an intervention in the Armenian Question, which would lead to the risk of a European war. In '93 Lord Rosebery, from his place in the House of Peers, pand a noble and eloquent tribute to the life and public services of Mr. Gladstone, and later on spoke in the country in support of the attitude taken up by Lord Salisbury on the Fashoda situation. Lord Rosebery

on the Fashoda situation. Lord Rosebery leeps an excellent racing stud, and both in 04 and '95 he won the Derby. Heir, Lord Dalmeny, s. L. Menimore, Leighton Bussaid, Dalmeny Park, Edinburgh. 8alisbury, John, 93rd Bp. of. (See founded 1042) Surname Wordsworth. B. 1844, of the late Bishop of Lincoln, and g.n. of the poet Wordsworth. E. at Ipswich, Winchester, and New Coll, Oxon, graduating in '65. Ordained deacon in '67 and priest in '69 His clerical life until he was ordained Bishop His clerical life until he was ordained Bishop His clerical life until he was ordained Bishop His cierical life until he was ordained Bishop was passed in academical and cathedral ap-pointments. He was Fellow and College Tutor of Brasenose, Proctor, Crinfield Lec-turer, Select Preacher, Bampton Lecturer, Examiner for Classical Moderations and in the Theological Schools, and Examining Chaplain to his father, In '83 he was appointed Canon of Rochester and Oriel Professor of Interpretation of Scripture, and Bishop of Salisbury'85 Dr. Wordsworth is a moderate High Churchman, and has written several theological and classical works, the best theological and classical works, the best known of which are "Fragments and Speci-mens of Early Latin," the Bampton Lectures for 'si, and his critical edition of the Vulgate New Testament (in partnership with the Rev H. J. White), of which the first volume, con-taining the Gospels, was published in '94 His Visitation Addresses on the Holy Com-munion reached a second edition in '92 His "Considuation on Public Worship and on munion reached a second edition in 92 ris
"Consideration on Public Worship and on
the Ministry of Penitence," addressed to the
clergy, with a "Pastoral Letter to the Laity
of the Diocese" ('98), has been recently much
read and commented on. Made a voyage round the world in '04-5, spending two months in New Zealand in Jan and Feb '98 he executed a commission from the Archbishop to visit the Patriarchs and Chief Presbyters of the East, and Alexandria, Nicosia (Cyprus), Damascus, Jerusalem, and Constantinople, and to present the resolutions of the Lambeth

and to present the resolutions of the Lambeth Conference of 'op on Union among Christians. He consecrated the Anglican Church of St. George at Jerusalem '98. Palace, Salisbury, Lollards' Tower, S. E. Salisbury, Robert Arthur Talbot, 3rd M. of (cr. 1789). Surname Gasco, ne-Cecil. B. 1830, s. 1868. E. Eton and Christ Church, Oxford, and—as Lord Robert Cecil—was elected for the family borough of Stamford in '53. K. G., P.C. He received a place in Lord Derby's ministry of '66 as Seoretary of State for India ministry of '66 as Secretary of State for India ('66-p), under the title of Lord Cranboine, which he assumed on the death of his elder brother. Owing to certain divergencies of opinion on the question of the extension of the franchise, to which he was opposed, Lord Cranborne separated himself for a time from his political associates; but on taking his place in the House of Lords at his father's death, in '67, as Lord Salisbury, he returned to his old party associations, and

soon took rank as the foremost debater of the Upper House. In '64 he was elected Chancellor of the University of Oxford. He gradually assumed a high position of authority gradually assumed a nign position of authority on Indian and foreign affairs; and when Mr. Disrael: resumed office as Premier in '74, Lord Salisbury became Secretary for India ('74-8). He was despatched to Constantinople in '76 to take part in the Conference which was expected to settle the matters in dispute between Russia and Turkey. The Conference failed to attain this result, and of San Stefano Lord Salisbury accompanied Lord Beat onsfield to the Berlin Congress He was Secretary for Foreign Affairs '78-80. Upon Lord Beaconsfield's death, in '80, Lord Salisbury became the recognised leader of the Conservative party, and when the Gladetone Ministry resigned office in June '85 Lord Salisbury became Premier as well as Secretary for Foreign Affairs The new Administration, however, did not last long. The general election in November of the same year did not result favourably to the Government, and immediately after Lord Salisbury resigned. Mr Gladstone succeeded, but he too signed. Mr Gladstone succeeded, but it even had a short lease of power, and was defeated on the second reading of the Home Rulk Bill June 8th, '86. The general election which took place in the following month brought Lord Salsbury again into power, and his tenure of office during the Jubilee year of the Queen's reign will be memorable in his lordship's family for the honour which her Majesty paid him by going in person to visit him at Hatfield In May '88 he intro-duced a Bill into the House of Lords for the reform of that Assembly and the creation of life piers. He was presented with the free-dom of the city of Glasgow May 20th, '91, and in July he had the honour of entertaining the German Emperor at Hatheld, which was also visited by the Prince of Naples. Though the result of the general election in oz was adverse to his Government he remained in office till he was defeated in the Commons, when he gave way to Mr. Gladstone Lord Salisbury was an occasional contributor in his younger days to the Quarterly Review, but he now seeks relaxation from the cares of office in scientific rather than in literary pursuits, experimental physics being his favourite study. He spends much of his time in his laboratory at Hatfield, and has greatly interested himself in the application of electricity to practical purposes on his estates. On the resignation of Lord Rosebery, in June '95, Lord Salisbury formed his third Administration, which is a coalition ministry, in which places were found for a number of Liberal Unionists (see MINISTRY). Lord Warden of the Cinque Ports of D L. Kent. He was occupied throughout of by the conduct of our relations with America in regard to the Venezuelan Boundary dispute, and by affairs in Armenia, and in '97 events in Ciete, and afterwards in Greece, found ample occupation for him, apart from other foreign affairs. His conduct of the negotiations in regard to the China question (98) exposed him to criticism even from his own eide, but in the firm stand he made on the Fashoda question he received the support of both great political parties. Peers who have been Commoners will be People's Palace for East London, The, opened May '87 by Her Majesty, is situated in the busy thoroughfare of the Mile End Road. It provides for the vast population of the East End a large hall for concerts, entertainments, etc.; a library and reading-rooms, gymnasia, swimming baths, social meeting rooms, game rooms, refreshment rooms, and trade shops and technical schools. The last-named department is intended to instruct youths in their trades, and is subdivided into day and evening departments. The day school, the fee of which per session of about 40 weeks is £2, contains 400 boys, of whom 205 pay fees, and the rest hold scholarships. The evening classes attract an average attendance of about 954, and embrace such subjects as brass-finishing, bookbinding, physiology, tailors' cutting, elocution, machine construction and drawing, elect. Much stress is laid upon this feature as a social factor of great probable importance. These trade training schools, built, equipped, at a cost of £20,000, by the Drapers' Company, were opened by the Master and Wardens of the Company Oct. 5th, '88. The site has cost in all £22,400. The "Palace" indea is a resuscitation and development of the Beaumont Philosophical Institute, established nearly half a century since in Mile End, the Governors of which are some twenty gentlemen closely identified with the East End. In '92 the buildings and grounds were practically completed by the grant of £3500 by the Drapers' Company towards the laying out of the grounds and the public gardens, which were then thrown open to the public. Patron, the Queen; Chairman of the Governors and Treasurer, Sir | H. Johnson; Secretary, C. E. Osborn. Offices. People's Palace, Mile End Road, E.

Persia. An independent Asiatic state lying between Turkey and Afghanistan, these times as large as France. The chief cities are Teleran, Tabriz, Ispahan, Meshed, and Shiraz The Shah, officially called the "Shahimshah" or king of kings, is the autociat of the realm, and carries on his government through a cabinet of 12 responsible ministers, and several ministers without portfolios. The country is divided into 33 provinces under governors-general, generally called Hakim, who, with the Sheikhsel-Islam, or chief judges of the cities, administer justice and superintend the collection of the revenue. The provinces are subdivided into districts. The chiefs of the nomal tribes exercise authority over them and collect the revenues from them. The nomade consist chiefly of Turks, Kurds, Arabs and Lurs, and altogether number nearly 2,000,000. The priests have great power in the country. Many colleges exist for instruction in religion, which is of the Shia sect, and Persian literature. The ohief products of the country are silk, grain, fruits, gums, opium, carpets, and tobacco. The army numbers about 20,000, for whom about one-fourth are kept in active service. Revenue, '978, about £1,450,000. The Government obtained from the Imperial Bank of Persia in '92 a loan of £500,000, repayable in eighty half-yearly instalments. This is the only public debt. The imports and exports of '97 were estimated to amount to about £7,500,000. For Ministry see Diplomatic. See also Persian Roads and Tramways under Engineering.

Persia, Shah of. See Muzaffer-ed-Din.

Persian Gulf, etc. For Residents, etc., see DIPLOMATIC.

Peru. A republic on W. coast of S. America. The capital is Lima, with an estimated population of 104,000. The country contains vast stretches of rich agricultural and pastoral lands, besides profitable mining and petroleum fields and immense forests. The Sierra is a region of mineral wealth. The climate is very good, and the dynutry is admirably suited for European immigrants. The disastrous war with Chili completely shattered the power of Peru. The Constitution is modelled on that of the United States, the legislative power being vested in a Senate elected by the provinces, one member for every 30,000 inhabitants, and a House of Representatives nominated by the electoral colleges of the provinces. Executive in the hands of a President elected for four years. Absolute political but not religious freedom allowed, the constitution prohibiting the public exercise of any but the Roman Catholic religion, although some degree of teleration exists. Education is compulsory and free in the elementary schools Chief products are sugar, wool, cotton, coffies and guano Area, 464,000 sq. m.; ppp., 3000,000 Revenue, 96, about £1,002,000 exports about £1,130,000; imports, 97, about £1,000,000 | hermal debt, about £200,000 For Ministry, etc., see DiptionAnlic.—History, '98. In his Message to Congress the President stated that 1,000,000 sofre would be paid to Chili as the first part of the lansom of Facna and Arica (July 28th).

PHILIPPINE ISLANDS.

A large group of the Asiatic Archipelago, and antil '98 ruled as a Spanish colony by a Governor-General, with the Caroline, Sulu, and Marianne Islands. Area, 114,326 sq. m., pop. over 7,500,000. The largest islands are Luzon and Mindanao Capital, Manila. The inhabitants consist of the aborigines, called Negritos, the Igolotes, probably of Chinese descent, who are the agriculturists of the islands, and the Tagalos, who are Malay immigrants. Over the two former races the Spaniards easily obtained the ascendency, but the Tagalos never bowed to Spanish rule. Great mineral wealth is suid to exist throughout the islands, but their unhealthy climate prevents any effective attempt being made to work it properly. The chief industries are in the hands of the Chinese, who number about 100,000. Sugar, hemp, and tobacco are exported. The islands are specially rich in timber. The imports amount to about £2,000,000, and the exports to about £4,000,000. A conspiracy to secure the independence of the islands developed into open rebellion during '96. General Primo Rivera, appointed Governor in the latter part of '97, was charged by the Spanish Government with instructions to carry out a scheme of reforms. In December terms were arrived at with Agulnaldo and other rebel leaders for their aubmission. This was accomplished largely by the help of money, and a

full amnesty was granted, many of the leaders emigrating to Hong-Kong. Despite a small rising against the taxes in Luzon during March 198, which was speedily crushed, peace prevailed till the Americo-Spanish war broke out. varied till the America-Spanish war broke out. Then Admiral Dewey sailed with an American squadron from Hong-Kong and completely destroyed the Spanish ships in Manila harbour, capturing the forts at Cavite, and thus having Manila itself at his mercy. Being without military aid, he could not, however, proceed to reduce the city, so Aguinaldo and other rebel leaders were brought from Hong-Kong, and soon the old insurgents took the field again, and completely hemmed in Manila from the land side Meanwhile, American troops with supplies of animunition left San Fiancisco (May 26th), and a second expedition was despatched later on. The Spanish garrisons all! over the country were overpowered and the lack of provisions made the situation of the troops in Manila desperate. The Captaintroops in Mahla desperate Ine Captain-General, indeed, proposed to surrender (June; 5th), but finding himself unsupported resigned, and was succeeded by the second officer in command, afterwards leaving the island. The Ladrone Islands were seized by an Amerkan cruiser (20th) In due course the American troops arrived, and the disembarkation began (July vist) Agrunaldo had menuschie mede (July 1st) Aguinaldo had meanwhile made great progress, but a Germin man-of-war inter-fered with his troops while attacking IslaGrande in Subig Bay Thereupon Admiral Dewey sent two of his ships to take the island, and the German vessel retired (7th) The attitude of the Germans generally, and especially of the German squadron at Manila, was by no means friendly to the United States. Aguinaldo began to get troublesome early in August, owing to his arrogance, and his apparent desire to oust the Spaniards and then to get 11d of the Americans and run a rebel republic himself. However, the city was bombarded and taken by the American land and seaforces co-operating (13th), just one day after the signature of the peace protocol at Washington (see Spain and United STATES), and before the proclamation of the President, ordering a cessation of hostilities, could reach Manila. A deputation of the most influential natives in the Southern Philippines waited on the American Consul urging that the United States should annex the islands, and declaring that they would never submit to the rule of the Tagalos (Sept 3rd) Meanwhile the insurgents attacked the Spanish positions till they controlled the whole island of Luzon, except Manila and Cavite Their headquarters were fixed at Malolos, and there an Assembly of Delegates met (15th), and decided (23rd) to request the Americans to recognise the inde-pendence of the islands, save for an American protectorate relating only to external affairs Aguinaldo was elected President Consider able friction manifested itself as time went on between the American forces and the insurgents, and there was even a naval engagement (Oct. 19th), while General Otis obliged them to evacuate the suburbs of Manila. Meanwhile the Peace Commissioners were sitting in Paris, and the American delegates presented a demand (31st) for the cession of the whole Philippine Archipelago to the United States, as territorial communication on the subject. At about the indemnity for the expenses of the war. This same time the adaptation of Dr. Joly's methods was, of course, rejected by the Spanish Communication on the subject. At about the indemnity for the expenses of the war. This same time the adaptation of Dr. Joly's methods missioners; but ultimately the United States colour photography into popular notice, the missioners; but ultimately the United States colour photography into popular notice, the Cabinet sent instructions (Nov. 13th) that the Natural Colour Photographic Co. of Dublin

American terms must be accepted within a week. The Spanish Commissioners thereupon refused to discuss the question of Spanish sovereignty, and proposed that to avoid a rupture the interpretation of the clause of the Protocol relative to the Philippines should be submitted to arbitration (16th).

PHOTOGRAPHY, '98.

General activity in all branches of photographic practice during the year has resulted m many technical advances, whilst the average of artistic work is distinctly higher. Perhaps the most important announcement of the year was the communication to the Royal Society which Dr W J Russell made in his Bakerian lecture with reference to the photogenic emanations of a great many substances, especially metals such as zinc. Dr. Russell's careful experiments carried to a further point Captain Coulson's "Vapography," so called from the fact that this eminent investigator found that certain metals give off at ordinary temperatimes vapours which, even at a distance, and trespective of intervening substances, such as glass or celluloid, will affect the gelatino-bromide film in the same way as will light. The interest almost amounting to consternation which these communications created amongst inventors and makers of apparatus will be easily understood when it is remembered that zinc has often been largely used for apparatus wherein it was brought into contact with the sensitive plate, to which it was never suspected of doing many Among the organic bodies ionind to affect a plate may be placed oils and turpentines. Alcohol, ether, petroleum, etc., have no apparent action, but amongst organic solids which are injurious may be placed mahogany (of which nearly all cameras are made), also oak, acacia, cork, charcoal, etc. Gutta percha, paper, parchiment, gelatine, and collodion, though mactive themselves, permit the active emanations of other bodies to pass through them, whilst mica, selenite, and gum arabic are opaque to them. These emanations arabic arc opaque to them. These emanations in other respects justify their being termed vapours flowing, turning corners, and generally moving piecisely as fluids and vapours generally do Whilst a great deal more remains to be done to systematise and explain the discoveries thus far made, the subject bristles with interest, and would seem to open up difficulties of grave import, at the same time possibly clearing up some matters hitherto but little understood.

Colour photography, misleadingly so-called, has been the constant object of study by Capt. Abney, Ives, Joly, Lippmann, and others, and under the term heliochromy many interesting lectures and demonstrations have been given, and the various methods of three-colour printing have come into more general commercial use. The scientific requirements of colour photography, and the difference between this and photography in natural colours, formed the subject of the sixth Boyle lecture, delivered by Capt. Abney in '97, but the publication of which was not until February of the past year, and it must be regarded as an important

supplying, in such a form that any photographer might use them, the necessary ruled screen and tinted glass for taking the three negatives for subsequent superposition, and thus producing a heliochrome. The Chassagne process, which created so much excitement last year, is discredited, and of Bennetto's alleged discovery little more has been heard, so that for all practical purposes colour photography, in the sense the average person understands the term, is about where it has been any time this last Photographic Society this year a result was shown in vivid colours by M1. Edwin Brewerton, in which two subsequent printings were made in pigmented-bichromated gum of the requisite transparent colours on a blue ferro-prussiate foundation, the result being a vividly coloured print in hues approximately true to nature for this he was awarded a medal. At the same exhibition some examples of carbon printing shown by Mi. Thos Manly, who christens his process Ozotype The principle of this process, however, remains a secret with its exhibitor With regard to the at present chimerical notion of combining the powers of photography and the electric telegraph, various more or less the electric telegraph, various more or sensational announcements have appeared from time to time in the general press accrediting obscure persons here and there with having made astounding discoveries which would revolutionise all known methods of long-distance communications. What may be called Teleelectroscopy, however, temains as yet only within the sphere of the possible. According to Herr Liesegang this can be accomplished with almost any degree of perfection, it being merely a question of cost for the maintenance and delicate construction of apparatus. The results of the expeditions at the beginning of the year to observe the total eclipse of the sun were attended with much photographic interest, owing to the very complete an anagements which were made to secure complete photo graphic records. Much that was of great value in this direction was secured, and formed the nucleus of an interesting fecture delivered by the Astronomer Royal during the great photographic exhibition at the Crystal Palace in May. Under the title Cammatograph, and a host of other faucy names, this popular and entertaining form of photograph is new being shown all over the country, though neither the film nor the projected image can be said to have been very noticeably improved, and most of the draw-backs are still present. In October Mr. Birt Acres, who was the first to show "animated pictures" in London, introduced to a critical audience a new and simplified machine which would be within the reach of nearly every one, and by means of which apparatus, attached to any ordinary camera, cinematograph films can be exposed and again projected on the screen by any photographer of only ordinary attainments and opportunities. The National Photographic Record and Survey Association has now taken definite form, and has already been the means of depositing several hundreds of excellent historical photographs in the British Museum In this connection Sir Benjamin Stone has established an excellent department. connection with improvements in photographic optics Mr. T. H. Dalimeyer has been prominent, gaining high places at the examinations in whilst Ross, Ltd., have given to the photoboth schools. After serving in Algeria with grapher an eminently useful instrument in the the Zouaves he entered the infantry, and

Ross-Goerz lens. Acetone as an alkaline accompaniment of pyrogallol has been prominently brought to public notice and highly spoken of whilst a new reagent, Diogen, has been added to the list. The Gum Biohromate punting method, a resuscitation of an old and nearly obsolete process recommended on account of the liberal amount of control the operator can exercise over the formation of the image, has found increasing favour. Other printing methods, more or less modifications of familiar ones, new brands of dry plates, many new and remarkably ingenious hand cameras, have been introduced, and the extension and increase of manufacturing firms who are solely occupied in the making of photographic materials or appliances, all point to the continued vitality of photography as an assistance in aits, clafts and industries, and as a hobby for the more leisured classes.

Perhaps from a general standpoint the event of the year was the great International Photographic Exhibition held at the Crystal Palace under the auspices of the Royal Photographic Society, and opened by H. R. H. The Prince of Wales on April 25th. It was the most compared to the property of the prince of the Royal Photographic Compared to the property of the prince of of the plete and extensive exhibition of Photography in all its branches and applications that has even been held. Almost simultaneously an exhibition of the Photographic Trades was held at the Portman Rooms, London. At the commencement of the year an important photographic exhibition was held in Glasgow; and in April the North-Western Photographic Exhibition at Manchester was up to that time in some re mannester was up to that time in some respects unique as regards photograph exhibitions outside London, the system of awarding medals and pizes being abolished with notable success. In November, in the Lity Art Galleries of Biadford, an exhibition called The Yorkshire Exhibition on similar lines was held, the Bradford Corporation lending the Galleries and in other ways assisting the undertaking.

The Annual Exhibition of the Royal Photographic Society was held from Sept 20th to Nov 12th, at 5a, Pall Mall, in the galleries of the Royal Water Colour Society, as usual Six medals were awarded, the smallest number on record, the recipients being Art Section, W. J. Watten, W. F. Fraser, Charles 5 Baynton, Mathide Weil, Leonge E. Thompson, Technical Section, W. Edwin Brewerton. The Photographic Salon was held in the Dudley Gallery, Piccadilly, from Sept 30th to Nov. 5th The Photographic Convention met at Glasgow from July oth to 12th Mr. John Stuart being the president for the year. The Earl of the president for the year. The Earl of Clawford, the president of the Royal Photo graphic Society, hopes to prevail on Government to establish Photographic departments at all principal public museums, for the supply of official photographs of the objects they contain. In addition to the boon which this would be to authors, publishers, etc, it would be giving photographers an official status which might in time necessitate and so lead to the establishment of a Government training

Picquart, Colonel, was born at Strasburg in 1854, and was educated at St. Cyr 72-74, and at the General Staff School from '74-'76,

gained his captaincy '80. In '83 he was appointed to the War Office staff, and in '85-88 served in Tonquin, where he earned a decora-tion. Returning to France he became professor at the Military School, and in '93 rejoined the War Office, becoming head of the Intelligence Department in succession to Colonel Sandherr, Department in succession to Colonel Sandnerr, in 95 I he next year he was given the rank of lieut-colonel, but then he began his inquiries into the Dreyfus case, moved thereto by certain suspicious discoveries which he made as to Major Esterhazy. In this he was at first encouraged by his official superiors, at its encouraged by his official superiors, but afterwards discouraged, and in January '97 he was sent in disgrace to Tunis. He returned to take a prominent part in the inquiries and legal proceedings which took place in the winter of '97 and during '98, and his evidence formed the strongest proof of the illegality of the trial at which Dreyfus was condemned, and of the astounding methods employed by the War Office to hush up the affair. In Feb '98 he was placed on the retired list, and afterwards prosecuted on a charge of revealing War Office secrets See France, History, 98, for full details.

Pinero, Arthur Wing, dramatic author, was in London in 1855 Commencing a legal b. in London in 1855 Commencing a legal career, he afterwards became connected with the stage, and acted at the Lyceum and Hay-market Theatres. Devoting himself to playwriting he produced his first piece, which was entitled "Two can Play at that Game," at the entitled "Two can Play at that Game," at the Lyceum. Other plays from his pen include "£200 a Year" (77), "The Money Spinner" (80), "The Squire" (81), "Lords and Commons," "The Rocket" (83), "The Magistrate" (85), "Sweet Lavender," "The Profligate," "In Chancery," "Lady Bountiful," "The Times," "The Second Miss. Lanqueray" (93), "The Notorious Mrs. Ebbsmith" and "The Benefit of the Doubt," both produced in '95, "The Princess and the Butterfly," produced at 51 James's Theatre, March '97, and "Trelawny of the Wells," produced at the Court Theatie Jan '98. He also collaborated with Sin Arthur Sulliyan and Mr Comyus Cair in "The Beauty Sullivan and Mr Comyns Cair in " The Beauty Stone," a romantic musical diama pioduced at the Savoy Theatre in May '98 Address 63, Hamilton Terrace, London, N.W

Poet Laureate. An office in the household of the sovereigns of Great Britain, the appellation having its origin in a custom of the English Universities, which continued to 1512, of presenting a laurel leaf to graduates in rhetoric and versification, the king's "laureate" being a graduated rhetorician in the service of the king. The first appointment of a poet laureate dates from the reign of Edward IV, the first patent being granted in 1630 It was formerly the duty of the poet laureate to write an ode on the birthday of the monarch, but this custom has been discontinued since the reign of George III Amongst those who have held this office may, be mentioned Dryden, Southey, Wordsworth, Irish (and Tennyson. Mr Alfred Austin (q.v) is the Police. present holder of the office.

Poisons Bill See Session, sect 76.

of its administrative independence, and in '68 it was incorporated as an integral part of it was incorporated as an integral part of Russia, trial by jury was abolished, and the official use of the Polish language was pro-hibited. The majority of the inhabitants are Roman Catholics. There are two main parties, one the Nationalist party and the other the Socialist party But both are equally opposed to the Russian Government. See Russia.

Police Courts. Oity Mansion House, presided over by the Lord Mayor; Chief Clerk, C. G. Douglas. Guildhall, presided over by one of the Aldermen, in rotation for a week at a time; Chief Clerk, H. G. Savill. Metropolitan: Bow Street, Covent Garden Magistrates, Sir J. Bridge, Knt., Sir J. Vaughan, Knt., and F. Lushington, Esq., Chief Clerk, H. Cavendish. Glerkenedl, King's Cross Road Magistrates, J. R. W. Bros and H. Smith, Esqs.; Chief Clerk, O. Wheele. Lambeth, Lower Kennington Lane Magistrates, G. L. Denman and A. A. Hopkins, Esqs., Chief Clerk, T. C. Martin. Great Marlborough Street Magistrates, Albert De Rutzen and E. N. F. Fenwick, Esqs.; Chief Clerk, T. R. Lyell. Marylebone, Seymour Place Magistrates, M. Curtis Bennett and A. C. Plowden, Esqs.; Chief Clerk, W. Tate. Work, High Stiect, Borough Magistrates, W. Slade and E. S. Foi dham, Esqs.; Chief Clerk, H. Naiii North London, Stoke Newington Road: Magistrate, E. C. T. D'Eyncourt; Chief Clerk, H. Naiii North London, Stoke Newington Road: Magistrate, F. M. Cad and John Dickinson, Fsqs., Chief Clerk, S. Savill Westminster, Vincent Souarc Magistrates, R. H. Bullock Marsham, and Jas Sheil, Esqs.; Chief Clerk, H. H. Stford Worshin Street Magistrates, T. H. Bullock Marsham, and Jas Sheil, Esqs.; Chief Clerk, H. H. Stford Worshin Street Magistrates, R. Police Courts. City Mansion House, pre-Vincent Schart Magistiates, R. H. Bulloca Marsham, and Jas Sheil, Esqs; Chief Clerk, A. H. Safford Worship Street Magistrates, A. H. Safford Worship Street Magistrates, Chief Clerk, H. Fitterton West London (West Kensington), Vernon Street Magistrates, John Rose and R. O. B. Lane, Q. C., Fsqs., Chief Clerk, F. E. Lowris South-Western, Lavender Hill: Magistrate, C. K. Francis, Esq.; Chief Clerk, G. A. Bird Greenwich and Woolwich Magistrates (Chieffer & Reunedy and G. Paul Taulor G A Bird Greenwish and Woolwish Magistrates, Gilbert G Kennedy and G Paul Taylor, Esqs. Chief Clerk, H P Newton. West Ham, West Ham Lane, Stratford Magistrates, E Baggallay, Esq and the Borough Justices; Chief Clerk, W. H Fowler The Clerkenwell and North London police courts are together served by three magistrates, as are also the South-Western and West London. Hours of Sitting. Mansion House, 12 to 2; Guildhall, 10 to 4; Greenwich, 10 to 1.30; Woolwich, 2.30 to 5. All other Courts, 10 to 5.

POLICE OF THE UNITED KINGDOM.

Below will be found a series of articles on the police forces of the United Kingdom, arranged in the following order 1, Metropolitan Police; 2, City of London Police; 3, Police of England and Wales (Counties and Horoughs), 4, The Scotch Police; 5, Royal Irish Constabulary; 6, Dublin Metropolitan

Metropolitan Police. - Established by Act of Parliament (1829), and the protection of Poland, a general government of Russia, the district by watchmen was discontinued by including ten provinces, with a total area of 49,759 square miles, and a population of over 9,000,000. The country had a separate constitution x815-30, and a separate government all places within a radius of fifteen miles of 30-64, but, in the latter year it was deprived

which has its own police. The Metropolitan police district consists of twenty-one land divisions, in addition to its jurisdiction on the river Thames. Every division is under the immediate charge of a superintendent, and the subdivisions under that of inspectors. Each subdivision has a station house in charge of inspectors, who are sometimes assisted by sergeants. About 260 mounted police patrol the more distant parts of the outer subdivisions, and assist in the inner divisions during processions assist in the inner divisions during processions and large meetings. The Thames police are selected from sailors, and patrol in boats and steam launches. For executive purposes there are three police districts, each of which is in charge of a superior officer, called a Chief-Constable. The Metropolitan police are also employed in H.M dockyards, and in the principal military stations of the War Department. In each division there are about fifty men selected as a reserve force to carry out special duties, headed by an inspector and assisted by several sergeants. The supreme government of the Metropolitan police is vested in the Commissioner appointed by and acting under the control of the Home Secretary This office is now held by Sir Edward Bradford, C. C. B., K.C.S.I. Fhere are three Assistant Commissioners—A. C. Bruce, Esq., Dr. Anderson, C. B. and Sir A. C. Howard, C. B.—and four Chiel Constables. Latest returns, for the year ending Dec. '97, give the strength as 15,452, compilsing 32 superintendents, 578 inspectors, 1908 sergeants, and 12,934 constables Four superintendents, 52 inspectors, 197 sergeauts, and 15 5 constables were employed on special duties for various Government Departments. The police available for service in the Metropolis, exclusive of the last named, were 28 superintendents, 526 inspectors, 1711 sergeants, and 11,429 constables; total, 13,644. The financial administration is under the control of the Receiver for the Metropolitan police district, A R Pennefather, Esq., CB, who is appointed by the Crown. He has the direction of contracts of every description, the management of all police building s, he buys the sites of and elects new buildings, and all the property of the police force is vested in him. He is constituted a corporation sole with perpetual succession. He receives all money applicable to the purposes of the Metropolitan police, and makes all disbursements. He is also the receiver for the Metropolitan police courts. He has a staff of 22 clerks, 19 surveyors and assistants, 12 storekeepers and assistants, and 65 subordinate officers. The income of the force for the year 36-7 was £1,772,978, and of the pension fund £300,442 There are also a chief surgeon and about thirty Civil Service clerks. There are local surgeons of the police in the divisions. The most important branch of the police not engaged in ordinary divisional duty is the Oriminal Investigation Department, which was organised in '78 under a "director," and is now presided over by Dr. Anderson, CB, assistant commissioner. A part of this service is at New Scotland Yard, and consists of a superintendent, three chief and three firstclass inspectors, seven second-class inspectors, and about eighteen sergeants. There is also another part of the service in each division, under the charge of an inspector, responsible to the director. The number of members beto the director. The number of members be-longing to each branch is regulated according to circumstances. The Convict Supervision

Office, established in '80, is a branch of the Criminal Investigation Department, under a superintendent. It registers the names and particulars of discharged convicts on licence, particulars of discharged convicts on heence, and other criminals under police supervision in England, and retains photographs and marks of these persons, under the provisions of the Prevention of Crimes Act of 71. The development and progress of this office has been immense, and the amount of good it has done in co-operation with Discharged Prisoners' Aid Societies and otherwise for the prevention and repression of crime, not only in the Metropolis but throughout the provinces, cannot be exaggerated. The number of licence holders, supervisees, and expirees registered by the Metiopolitan Police from '64 to the end of December '97, was 56,898. So commendable December '97, was 56,898. So commendable are the results of this work that the number of identifications in '97 was 3701 as compared with 3503 in '96 The register is a national one, dealing with every convict, supervisee and habitual criminal discharged in England and Wales. In Oct '93 the Home Secretary appointed a Committee to inquire into and report upon the best means available for identifying habitual criftinals. This committee reported in Feb. 104, recommending the adoption in a modified form of the French method of anthropographic and the committee of the french method of anthropographic and the first form of the french method of anthropographic and the first form of the french method of anthropographic form of the french metho net form of the French method of anthropometiv as carried out in France by M. Bertillon, together with Mr. Francis Galton's finger-print system. This proposal has been approved by the Home Secretary, and he has intrusted its administration to Dr Anderson, Assistant-Commissioner of Police, and has appointed Dr J G Garson as an expert to assist in organising the department established for that purpose. Among other departments of for that purpose Among other departments of the Metropolitan police are the executive branch. and the public carriage and lost property branch. Satisfactory provisions are made for rewards for diligence and praiseworthy acts by the of discipline. Appreciable regulations also exist for promotion and testing by examination the qualifications of members to fill the higher offices Provision is made by the Police Act on the lorce who have completed 25 years' approved service; and the pension is to be not less than $\frac{1}{6}$, or more than $\frac{3}{8}$, of their annual pay, with an addition of not less than $\frac{1}{60}$, or more than 3, of such pay for every year of approved service above 25 years, so that the pension shall not exceed more than 4 of their yearly pay. Provisions are also made for payment of pensions to policemen who have served a less number of years, and who are incapacitated by injuries in the performance of their duty. l'ensions are to be paid to the widows and allowances to the children of a member of the force who dies from the effect of an injury received in the execution of his duty. Gratuities may be granted in other cases to the widow and children of a policeman who dies from any and children of a politeman who dies from any other cause while in the force. The rateable value of the Metropolitan area for '96-7 was £40.265,598. The police rate is now fixed at 9d. in the £, of which 4d. in the £ is payable out of the Local laxation Account under the Local Government Act of '88. The pay of the Metropolitan Police Force for '97 was about £1,340,000.

City of London Police.—This force is under the control of a Commissioner, who

is appointed by the Mayor, Aldermen and Common Council, subject to the approval of Her Majesty the Queen. The total strength of the force is 928, consisting of 1 Assistant-Comthe force is 948, consisting of 1 Assistant-Com-missioner, 1 superintendent Executive De-partment, 1 superintendent Detective Depart-ment, 8 chief inspectors, 15 district inspectors, 22 station inspectors, 12 detective inspectors, 72 sergeants, 7 detective sergeants, and 795 constables. In addition to the above, 55 con-stables are employed on private service duty stables are employed on private service duty at the expense of persons engaging their services, the charge being at the rate of £135 per annum for each man. The force has also a surgeon, receiver, chief clerk, and several assistant clerks. The detective department consists of a superintendent, 12 inspectors, 7 sergeants, 12 detective constables, and about 45 plain clothes constables, who are selected from the uniform branch. The Police area is divided into three districts, each con-taining two divisions (exclusive of the chief and detective offices) and under the immediate charge of a chief inspector, assisted by five district inspectors and six station inspectors district inspectors and six station inspectors. The Superannuation Fund is provided from the stoppage of 24 per cent of the pay of the force, the amount of fines at Police Courts, etc., the balance being provided from the Police rate. The City Police Superannuation Act, '94, provides pensions for members of the Force with 25 years' service in espective of are. The total cost of the force is about £136,000 per annum, one-fourth of which is paid from the City's cash, the remainder by a rate of 5½d on the assessable rental of the City. The City Police, unlike the Metropolitan Police Force, is supported entirely by the citizens, with-out Imperial aid. The pay of the force is out Imperial aid The pay of the force is considerably in advance of any other similar body in the United Kingdom. The members also enjoy other advantages, perhaps the greatest of which is the scheme for granting pensions to the widows of deceased members of the service. All married men contribute from 4d. to 15. per week, according to their rank, the balance is made up by grants from the City cash, the pensions varying from 7s. to 21s per week The services of nearly 200 men are daily required to cope with the enormous and everincreasing traffic of the City, the most capable men being selected for this dangerous and important duty, for which they receive a small allowance of extra pay. Headquarters, Old Jewry, Cheapside Chief Clerk and Superintendent, Mr. John Whatley.

The Police of England and Wales (Counties and Boroughs)—5ce pictions eds. for the various Acts from 39 to 56 felating to the appointment of police in counties and boroughs. Important changes were made concerning their control and payment by the Local Government Act 1888. By this statute the powers, duties and liabilities of quarter session and magistrate out of session respecting the county police, are to be exercised and discharged through the standing joint committee of the quarter sessions and county council. In those boroughs (not being county boroughs), which according to the census of 3n had a population of less than 10,000, it is provided by this Act that the power and duties of the watch committee have now ceased and have been transferred to the council of the administrative county which comprises these

boroughs. County boroughs, as defined by the Local Government Act, are those cities and towns each of which on June 1st, '88, either had a population of not less than 50,000 or was a county of itself. To a considerable extent, the system of administration in cities and large towns is based upon that which exists in the Metropolitan police. The cost of the county and borough police is paid from rates levied in counties and boroughs, supplemented by a contribution from the Exchequer or Local by a contribution from the Exchequer or Local Taxation Account of half the cost of pay and clothing of every force certified by the Home Secretary on the report of the Inspector of Constabulary to be efficient The Local Taxation Account has been provided by the Local Government Act, '88, and consists of the proceeds of the duties on local taxation, licences, and fourfifths parts of one-half of the probate duty payable in certain ascertained proportions to each county and borough in aid of their rates. By the Police Act, '90, equitable provisions were made for payment of pensions for life to all members of county and borough police forces in England and Wales In certain cases gratuities are paid to them and to their widows and children (see Metropolitan Police for further statements under this head, which are substantially applicable to the county and borough police). The pension scales are, as regards the great majointy of the forces, the maximum rates men-tioned in the Act In a considerable proportion of counties a limit of age is required, and in of counties a limit of age is required, and in some instances as much as sixty years of age is stipulated before pensions are granted. The authorised stringth of county and borough police was for the year ended Sept. 20th, 20, 25,701. Out of this number there were 1460 in the Liverpool force, exclusive of 436 of all ranks additionally appointed—viz, 373 for the Docks, 11 for private duty, and 52 for the fire brigade, 1031 in the Manchester force, exclusive sive of 6 constables appointed at private cost; 700 in the Birmingham force, exclusive of 15 of 700 in the Diffiningnam force, exclusive of 15 different ranks appointed at private cost; 84 in the Leeds force, 402 in the Bristol force, exclusive of 6 constables not paid by rates; and 440 in the Sheffield force, exclusive of 10 different ranks appointed at private cost. All these boroughs and a few other of the most populous towns have a more or less meritable detective police service. Those for Liverpool, Manchester, Birmingham, Leeds, and Bristol appear to be very good.

The Scotch Police.—Several statutes have been passed from an early part of this century for establishing and maintaining police forces in Scotland Fire principal Acts under which they are now regulated are those of '57, to render more effectual the police in counties and burghs, and the Act of '62 for making better provision for regulating the police of towns and populous places. The authority of each county force was vested in the Commissioners of Supply, acting through a police committee. By the Local Government (Scotland) Act, '89, this authority has now been transferred to a standing joint committee, consisting of County Councillors, and such Commissioners not exceeding seven of each class. The Sheriff of the county, or one of his substitutes in his absence, is to be an ex-officio member of this Committee. It is provided also by the same statute that the administration of the police in any burgh or police burgh, containing a less population than

7000, shall also be transferred to the same authority. The Inspector of Constabulary for Scotland, appointed under the County and Burghs Police Act, '57, submits a report annually. According to that for the vear ended Dec. 21st, '97, the authorised strength of the force is 4713, of which 1701 belong to county forces and 3012 to city and burgh forces. There are also 200 additional police who are privately employed. If these are added, the total in counties will be 1700 and in cities and burghs 3152, giving a grand total of 4922 policemen in Scotland, excluding the Orkney and Shetland Islands. There is a detective staff of 131 officers in 12 county and in 11 city and burgh forces. The staff in the former is 24 and in the latter 85. In addition to these detectives constables in plain clothes frequently assist them In Edinburgh there is a detective staff of 26, consisting of i lieutenant, i inspector, 3 sergeants, and 21 detective officers. In Glasgow, which has a police force of 1320 members and an estimated a police force of 17300 members and an estimated population of 715,000, there is a detective staff of 42, consisting of 2 lieutenants, 7 sub-inspectors, and 33 detective officers. The Criminal Registry kept at Łáinburgh, Glasgow, Aberdeen, Inverness, Greenock, Dumfries, Dundee, Perth, Stirling, Elgin and Ayr works very satisfactorily in supplying the police with valuable information concerning habitual criminals. The total amount expended for the last financial year for pay and clothing for the whole authorised force was £377,551 160 9d. The aggregate cost of the police, excluding the additional gate cost of the police, excluding the additional police, privately employed and paid for, was £460,365 68., which includes rent, taxes, buildings, and all other expenses connected with the police. Towards the cost of pay and clothing £150,000 per annum is distributed out of the Local Taxation (Scotland) Account. This amount is made up of duties of local taxation, licences, and a part of the probate duty Only those forces, however, are entitled to be aided out of the amount which obtain a certifiadded out of the amount which obtain a ceitin-cate from the Secretary for Scotland under the Police Act of '77. A satisfactory system of paying pensions and gratuities has been pro-vided by the Police (Scotland) Act, '90, sub-stantially similar to the system established for the police of England and Wales by another;

statute passed in the same year.

In his last annual report the Inspector of Constabulary states that he has always been in favour of a General Criminal Investigation Department for Sociland, working from a central office, which would be of the greatest service in the prevention and detection of Crime.

Royal Irinh Countabulary.—This is a semi-military force, consisting of 11,240 members, who are drilled and disciplined as soldiers, live in barracks, and are armed with rifles, swords, bayonets, and revolvers. In quelling disturbances they are frequently required to act in large bodies in the double capacity of policemen and soldiers, but upon all their ordinary duties they are, like the men of other police forces, armed with a truncheon only. As at present constituted, the Irish Constabulary force was established by Act of Parliament in 36. It has undergone several changes and additions to its strength by subsequent statutes. In '67 the title of Royal Irish Constabulary was conferred on the force by command of Her Majesty. The City of Dublin one commences,

and its suburbs are protected by the Dublin Metropolitan Police, and the Royal Irish Constabulary perform police duties for the remainder of Ireland This force is directly under the Irish Government, and the Parliamentary responsibility is in the Chief Secretary for Ireland. The principal officer of the Constabulary is the Inspector-General, resident in Dublin, and who is assisted by a Deputy Inspector-General and three Assistant Inspectors-General. Each county or riding is under the immediate charge of a county inspector. A certain number of districts are allotted in every county, with a district inspector in charge of each. The members of the force subordinate to the district inspectors are head constables. sergeants, acting-sergeants, and constables. The duties of this imperial constabulary consist of the following among other numerous civil services not imposed upon police forces in the United Kingdom viz, collecting agricultural statistics yearly, taking the census decennially, acting as auctioneers for sale of distress; any, acting as auctioneers for sale of discuss, acting as inspectors of weights and measures; the performance of Custom officers duties for the prevention of smuggling, and of Excise the 'prevention of smuggling, and of Excise duties to prevent illuit distillation. A Reserve Force in Dublin was established in '39 for duty, when required, in any part of Ireland Its authorised strength consists of 4 district inspectors, 8 head constables, and 400 sergeants, acting-sergeants and constables. The headquaiters of this body is at the depot in Phenix Paik. This is also the place for recruiting and the professional education of all members of Palk. This is also the place for recruiting and the professional education of all members of the Constabulary, Recruits must be unnarried, at least 5 ft 9 in in height, and between 19 and 27 years of age. The chief officer in command is called the Commandant of the Depot, and is one of the Assistant Inspectors-General A separate extra force was established by Act of Parliament for Religious 19 ft. selfast in '65, with an inspector in charge now styled Commissioner of Police, whose salary and half the cost of the extra men was to be paid for by that borough. In '70 a small additional force was appointed to Londonderry, the cost of which was to be defined in the the cost of which was to be defrayed in the same manner Civil Service examinations are held, where candidates nominated by the Chief Secretary for Ireland compete for cadetships in the force. The vacancies for district inspectors are filed in fixed proportions by cadets or by specially selected head constables of exceptional merit. Candidates for cadetships must be unmarried, at least 5 ft 8 in. in height, and between 21 and 26 years of age. The Royal Irish Constabulary is the only police force in the United Kingdom which is almost entirely supkported from the Imperial funds, the remainder of the cost is met by the comparatively small payments made in various districts when special services of the Constabulary are necessary. An equitable pension system, which has varied very much from time to time, has been established by statute law. Special provisions have also been made for men who are incapacitated from injuries received in the discharge of their duty. Pensions and gratuities are also payable to the widows and children of head constables and other subordinate members of the force who die while serving therein. Payment of gratuities is also authorised to the widows and children of pensioners who die within one year after their superannuation

Dublin Metropolitan Police.—In 1808 Dublin was formed into a district called the "Police District of Dublin Metropolis" After several changes the police system of this arter several changes the police system of this city was in '36 reorganised upon the basis, in a great measure, of the Metropolitan Police Force, as established by Sir Robert Peel's Act of '29. After other statutes had passed for the amendment of the Lublin police it was further assimilated to the Metropolitan Police, and has since continued to be worked as far as practicable on the same lines The Dublin Metropolitan Police is under the immediate direction of a Commissioner and an Assistant Commissioner, and the offices of Receiver and Secretary are consolidated. The Commissioner submits an annual report to the Chief Secretary for Ireland, accompanied by statistical tables respecting the work of the police, the state of crime, and particulars concerning public and refreshment houses, drunkenness, and hackney carriages. When the duties of the Dublin Metropolitan Police commenced in '38, it consisted of 911 officers and men. At the end of '97 the effective strength of the force was 1144 of all ranks, consisting of 7 superintendents, 24 inspectors, 35 station sergeants, 143 sergeants, and 903 constables. An excellent detective staff exists in the force for the prevention and staff exists in the force for the prevention and detection of crime, headed by a superintendent and other officers. The area of the Dublin Metropolitan district is 32 15 square miles, and the population, according to the census of '01, 18 352,277. The expenditure of the force for the year ending March 31st, '97, for the Dublin Metropolitan Police Courts and police establishment, was £144,78 78 54, of which £52,661 cs. 1d was received as appropriations in aid from local sources, and the balance from the Imperial Treasury Pensions and gratuities are provided for the force by an Act of Pallaare provided for the force by an Act of Parliament passed in '83.

POLITICAL PARTIES OF THE UNITED KINGDOM.

In the first years of the Parliament of 1868 only two parties were known to the House of Commons—(1) Conservatives, and (2) Liberals, the latter being subdivided into Whigs and Radicals. Irish members who were not Conservative were classed as Liberal, though they occasionally asserted their independence. Home Rule movement was statted in Dublin by the late Mr. Butt in '70, and soon gained considerable support At the general election of '74, 56 Home Rulers were returned by Irish constituencies, and in '80 the number rose to Almost from the first the party consisted 63 Almost from the first the party consisteur of a moderate and a more forward section, and this division was maintained in the Parliament of '80, the one section giving a general support of 80, the one section giving a general support to the Liberal party, while the second and larger half acted independently of, and in the main hostilely to, them under the leadership of Mr. Parnell At the general election of '85 the moderates disappeared, and Mi. Parnell led a party numbering in all 86 In the spring of '86 Mr. Gladstone, up to that time the acknowledged head of the whole Liberal party, declared himself in favour of Irish Home Rule, and united his forces or a many of them as * Parnell and united his forces, or so many of them as he could carry with him in his new departure, with those of the Irish Nationalists led by Mr. Parnell. A considerable minority of Liberals, resenting Mr. Gladstone's action,

declined to continue their support, and combined with the Conservatives to form that Unionist majority which succeeded in defeating the Home Rule Bill. An appeal to the country followed, and in Aug. '86 a new Parliament met, consisting of 85 (afterwards 86) Nationalists or Parnellites, 102 Gladstonians, 77 Liberal Unionists, and 316 Conservatives.

The Conservatives, with the support of the Liberal Unionists, then carried on the government of the country for six years. The Liberal Unionists, although cordially working with and supporting the Conservative Government, retained their independence, and formed themselves, indeed, into a separate party, with a separate organisation, separate leaders, and separate whips. The only Unionist to take office was Mr Goschen, who, at the greatest crisis in the history of Lord balisbury's Government, accepted the post (which Lord R. Chuichill had resigned) of Chancellor of the Exchequer. Attempts were made to compose the difference between the Gladstonians and Unionists, notably at the famous Round Table Conference, but all failed In opposition the relations between Mi Gladstone and the Nationalists were, after he had accepted Home Rule, most coidial. The even course of events was, however, naturally disturbed by the decree made in the Divorce Court proceedings instituted against Mr Parnell. The result of the memorable discussions in "No. 15" was that 54 Nationalists revolted against his leadership, and 30 remained faithful to him as the exponent of a Home Rule whene more advanced or complete than, according to his declarations, Mr. Gladstone was prepared to propose. Mr Parnell died in 91, and Mi. John Redmond became the exponent of his policy and the leader of his following.

The General Election in '92 resulted in the return of a Notonellists of the expension of the return of a School of the expension of the return of a Notonellists of the expension of the return of a Notonellists of the expension of the policy and the leader of his following.

The General Election in '92 resulted in the return of 72 Nationalists, 9 Painellites, 275 Gladstonian Liberals, 46 Liberal Umonists, and 268 Conscrivatives From the point of view of party combination the Ministerialists found upon the whole little to complain of during the famous and protracted Home Rule Bill session of '93. Contrary to the expectation of some members of the Opposition, the Liberal and Nationalist alliance field together wonderfully well. On March 1st, '94, Mr. Gladstone made, in the House of Commons, a vigorous attack upon the House of Commons, a vigorous attack upon the House of Loids for its action upon the Parish Councils Bill, and this speech proved to be his last utterance from the Treasury Bench. The subsequent appointment of Lord Rosebery to the premiership was undoubtedly popular with the bulk of the Liberal press, and was commented upon very favourably by the Opposition organs. Mr. Labouchere, however, and a number of Radicals acting with him, strongly objected to the appointment of a peer as Premier, and urged the claims of Sir William Harcourt to the position. The effect of their opposition, though not noticeable at the time, was seen later on in '96. On June 14th, '95, the Liberal Government were beaten on the estimate for the Houses of Parliament buildings, on the 20th they were in a majority of 7 only on an amendment to the Welsh Church Bill, on the 21st they were defeated on the ammunition question in committee on Army Estimates; and on the 22nd Lord Rosebery placed his resignation in the hands of the Queen, by whom it was accepted. Lord Salisbury

was sent for, and duly formed an administration. His cabinet, as ultimately constituted, consisted of no less than nineteen members, of whom fifteen were Conservative, including Mr. Goschen (who in '93 was announced to be a member of the Carlton) and four Unionists. The latter wing of the Coalition Party also received such a share of the minor appointments as caused no little heart-burning in many Conservative breasts The dissolution hany Conservative beasts in the dissolution of '95 which followed was notable for one thing, in that it marked the disappearance of Mr. Gladstone from Parliamentary life

The General Election of '95 resulted in giving the Unionist coalition a majority of 152, the biggest majority of modern times, instead of a minority of 28. There were 340 Conservatives, 71 Liberal Unionists, 177 Liberals, 70 Nationalists and 12 Parnellites returned Although the Anti-Parnellites had acted together in Parliament, rumours were prevalent of internal dissensions; and in July '95, in the very midst of the general election, a serious dispute arose as to certain Irish seats. Mr McCarthy having as to certain Irish seats. Mr McCarthy having decided not to again stand for the chairman-ship of the Irish Parliamentary or Anti-Parnellite party, Mr. Sexton was unanimously requested by the party to serve as its chairman, but declined the honour. At a meeting of the party held on Feb 18th, '06, Mr. Dillon was elected sessional chairman by 38 to 21 votes. In April Mr Sexton accepted the Chiltern Hundreds. That there were sharp differences of opinion in the ranks of the party was ences of opinion in the ranks of the party was more than once made manifest in the course of the session. The reverses of the general election left Loid Rosebery leader of the Liberal party, and leader of the Opposition in the House of Lords, Sir William Harcourt being leader of the Opposition in the Combeing leader of the Opposition in the Commons, and these positions they respectively continued to fill during the session of '96. Very little of note occurred in the House of Lords, but Sir William Harcourt led the Liberal Opposition in the Commons with especial brilliancy and success in the debates on the Education Bill and the Agricultural Rates Act. Cn Oct. 6th, '96, in the midst of the agritation arising out of the Armenian at octices, lead to Sonday wrote to the chief Libral Loid Rosebery wrote to the chief Liberal whip. "I find myself in apparent difference with a considerable mass of the Liberal party on the Eastern Question, and in some conflict of opinion with Mr. Gladstone, who must necessarrly always exercise a matchless authority sarily always exercise a matchies authority in the party, while scarcely from any quarter do I receive explicit support. This situation, except as regards Mi Gladstone, is not altogether new; but in saying this I complain of no one. I regret only that I should appear to divide the energies and try the faith of Liberals. This question, however, is above and beyond personal considerations. When I speak, which I do this week [at Edinburgh], I must speak my mind, and sizek it without reference. speak my mind, and speak it without reference to party. Under these circumstances it is best for the party and myself that I should speak, not as Leader but as a free man I consequently beg as Leader but as a free man it consequently beg to notify to you that the leadership of the party, so far as I am concerned, is vacant, and that I resume my liberty of action." In his speech a few days later Lord Rosebery declared

European war. It afterwards became apparent that this was the view taken by a large section of the Liberal party, though there were others undoubtedly who were prepared for isolated action under certain circumstances.

During '07 but little change occurred in the mutual relations of the parties in Parliament, or in the internal condition of the parties them. selves Political antagonism was allowed to fall into abeyance during the outburst of patriotic feeling evoked by the Diamond Jubilee; the business in both Houses of Parliament was got through as rapidly and with as little party contention as possible. The two most con-tentious items were the Workmen's Compen-sation Act and the Voluntary Schools Act. Several bye-elections occurred, at nearly all of which the Liberal poll exhibited a very marked improvement upon that of '95, and many of which were won outright by the Liberals. During the excitement consequent upon the state of affairs in Giecce, a section of the Liberals—conspicuous among them being Mr. George Russell—formed a Forward Party advocating a more determined attitude against Turkey on the part of Great Britain. Early in October the disaffection of many Conservatives on account of the deference paid by the party to on account of the deference paid by the party to Mr. Chamberlain—especially in respect to the Workmen's Compensation Act—found expression in a threat of revolt offered by Lord Londonderry and others. This was supposed to have had some weight with the leaders of the work of the control of th

the party; but no definite action followed.

During '98 the criticism of the Government. which is supposed to be the prerogative, if not the duty, of the Opposition, was performed very largely by the Government's own supporters, notably in the press The course of affairs, in China in particular, provoked the disapprobation of many Conservatives, and the Liberals were not slow to take advantage of their opportunities. The details are given fully in the article SESSION. Later in the year -which all through was characterised by the overwhelming interest of foreign affairs—
politicians of all parties patriotically rallied to
the support of the Government in regard to
the situation in the Upper Nile Valley, and
the dispute which arose thereupon; and the Government were somewhat rehabilitated by the firm stand which they made on this on the first stand which they made on the question. Considerable feeting was aroused by the lish Local Government Act and by the action of the Government over the Vaccination question, but on the whole there were no sharp lines of party division The state of parties in November is shown under article Commons. in the summary table, on page 171.

Polytechnic, Regent Street. With the view of further developing the movement on behalf of young men to whom Mr. Quintin Hogg had shown such generosity, he purchased in 80 the old Polytechnic, Regent Street, for £50,000, and converted it into a great technical and recreative school. The institution has been a great success invaride of tution has been a great success, upwards of 15,000 members and students having attended its classes during the last twelve months. The his strong disapprobation of any policy which should involve Great Britain's isolated inter- about £36,000 of which is provided by class vention in regard to the Armenian question, fees, etc., and £6000 is contributed from other since he held that this would precipitate a sources. Previous to '89 the deficit of £9000 was

annually made up by Mr. Hogg, who has alto-gether spent £150,000 upon his scheme. The surrioulum embraces over 500 classes weekly un upwards of 80 different subjects, including carpentering, plumbing, metal work, engineering, pottery work, photography, furniture, decorative art, electricity, and numberless other subjects. A Young Women's Institute has also been founded in premises adjoining the Polytechnic, and promises to be as successful as the latter. The Mailborguph Rooms, acquired in '92, have been converted into one of the most commodious schools of art in London. Mr. J. E. K Studd acts as Hon. Secretary, and Mr. R. Mitchell as Director of Education. Continental tours are also a feature of the Institute, over 6000 persons making use of them every year. They include cruises to Norway, visits to the Polytechnic châlets in Switzerland, where a considerable freehold has been purchased, and trips all over the Continent, Baltic, Madeira, etc.

POOR LAW.

The English Poor Law is contained in a number of statutes, the earliest being that of the 43rd year of Elizabeth, and in innumer-able reported cases. The modern system of able reported cases. The modern system of poor relief was established by the Poor-Law Amendment Act of 1834. Under this Act the parishes which had formerly been areas for poor-law purposes were grouped into inions, a market town being generally taken for the centre. There are about 650 unions in England a market to the control of the contr duty is the care of the poor in then union and the administration of relief; but they have many other duties, such as the enforcement of the Vaccination Acts By the Local Govern ment Act, '94, great changes were made in the constitution of the boards of guardians and the constitution of the boards of guardians and the mode of election. Each board of guardians provides a workhouse, in which the poor in their union requiring total relief are maintained. They also give relief to poor persons in their homes where necessary this is termed "outdoor relief," and is given in money, or food, or other necessaries. Outdoor relief is distributed by the relieving officers. District medical officers are appointed by the guardians, who are required to attend fice of charge on poor persons on receipt of an order from the relieving energons on receipt of an order from the relieving persons on receipt of an order from the relieving officer Relief is also given by the guardians in other ways, such as in providing for emigration and apprenticeship; and they are empowered to subscribe to many institutions for the maintenance therein of paupers and the children of paupers. Guardians also have many duties as regards lunatics. The receipt of relief is a disqualification for voting or election at Parliamentary and local elections A board of guardians employs a large staff of officers, the chief of which are the clerk, the treasurer, medical, vaccination, workhouse, and relieving officers. The workhouse is under the control of a master and matron, has a medical officer attached to t and a special staff of nurses. Boards of guardians are medical officer attached to it and a special sesued in '98 for the year ending March 25th, staff of nurses. Boards of guardians are largely controlled by the Local Government rates raised during the year was £22,166,996. Board (see Local Government), which by its including the sums contributed by Governmental orders regulates the mode of their ment in lieu of poor rate, on property belong-election, their procedure, their finance, and

their administrative methods, whilst by its special orders it compels observance of the law in particular cases. The accounts of the receipts and expenditure of guardians are strictly audited by auditors of the Local Government Board. The expenses of the guardians and of poor rehef generally are defrayed out of poor rates, which are levied by the overseers in each patish. The guardians are overseers in each parism Ine guardians issue nail-gearly pre-cepts to the overseers for the amounts required by them The poor-rate is levied on houses, buildings, land, and other property, according to a valuation list which is prepared by the overseers of each parish, and after publication is sent to the assessment committee of the guardians, who must hear objections. After altering the list as they think proper, the committee approve and sign it. From the decision of the committee there is an appeal to quarter sessions. Overseers are appointed for each parish by the parish council or meeting, or in urban parishes by the urban district council or the justices They can give orders for poor relief in cases of sudden and urgent necessity. Boards of guardians seceive grants from the county council out of the proceeds of licence and excise duties towards many of their expenses, such as the salaries of officers, maintenance such as the salaries of officers, maintenance of lunatics, etc. As to the total cost of the relief of the poor, see Poor Rate Statistics, '98. Other Poor Law authorities, who exercise powers in relation to the relief of the poor, are (1) The Metropolitan Asylums Board, who are the managers of the Metiopolitan Asylums District, constituted under the Metropolitan Poor Act (67) for the reception and relief of fever and small pox patients and the insane poor charge-able to the unions and parishes in the district;
(2) The Managers of two Metropolitan Sick Asylum Districts, constituted under the same Act; and
(3) The Managers of School Districts formed
under the Poor-Law Amendment Act ('44) for the maintenance of district schools, which children are sent by certain boards of guardians instead of being maintained in the workhouses The subject of Poor-Law Children has recently received much attention. A somewhat similar system of poor relief exists in Scotland and Ireland, where the central authority is the Local Government Board for Scotland and Ireland respectively. A Royal Commission was appointed, Jan. '93, to consider "whether any alterations in the system of poor law relief are desirable in the case of persons whose destitution is occasioned by incapacity for work resulting from old age, or whether assistance could otherwise be afforded in those cases " A majority and a minority report were cases A majority and a minority report were presented and issued at the end of March '05, for the details of which see eds. '96 and '97. For Poor Law (Scotland) Act, '98, see S.ESION, sect. 77, and for Poor Law Unions Association (Expenses) Act, '98, see S.ESION, sect. 78.

POOR RATE STATISTICS, '98.

1. RECEIPTS.

From Part I. of the Local Taxation Returns

Lo30,600 more than in the preceding year. The Receipts in Aid, consisting of various sums paid by the County Councils and County Boroughs to the Poor-Law authorities in respect of teachers in Poor-Law schools, fees for workhouse children attending public elementary schools outside the workhouse, registrars of births and deaths, lunatics, the remuneration of medical officers in the Metropolis, the maintenance of indooi paupers in the Metropolis, and the cost of Union officers, etc., in Unions outside the Metropolis, amounted to £2,009,756 Miscellaneous sums received by Hoards of Guardians and Managers of School and Asylum Districts for, inter alia, the maintenance of paupers (amounts recovered from their friends), the sale of oakum, stone, etc., rents and dividends, gave a further amount of £557,739 The total receipts from and in aid of the Poor Rate may be summarised as follows—

Poor Rates raised Receipts in aid Other Receipts	:	:	:	£22,166,996 2,009,756 584,866
Total				£24,761,618

2. EXPENDITURI

The principal items of the expenditure on the relief of the poor, and purposes connected therewith, were .in-maintenance . £2,256,667 Out-relief 2,680,290 Maintenance of lunatics in asylums or licensed houses 1,642,505 Workhouse or other loans repaid, and interest thereon 793,001 Salaries and rations of officers, and superannuation allowances 1,781,509 Other expenses . 1,278,211 £10,432,189 Total . Payments for county, borough, or police rates . £9,129,874 Payments to Highway Boards . Payments to Burial Boards . 70,204 127,387 Payments to Rural District Councils for sanitary and highway purposes Payments to School Boards . . . 1,772,688 1,336,145 Payments to Parish Councils or Parish Meetings 87.430 Payments to Commissioners of Baths and Washhouses 75,676 Payments to Free Library Commissioners 59,227 Payments to Urban District Councils for School Attendance Committee 8,382 Conservators of Commons . School Attendance Committee expenses 46,671 Payments on account of the Registra-

tion (Births, Deaths, etc.) Acts

Parliamentary, municipal, and county registration, and cost of jury lists.

Total .

Vaccination fees and expenses

Other expenses

the relief of the poor was as follows:

The expanditure partly connected with the relief of the poor and also with other purposes

The total expenditure amounted to £24,473,507, of which £13,149,547, or more than one-half, was for purposes altogether unconnected with the relief of the poor. There was an increase in every item of expenditure connected with relief of the poor, the largest item of increase being that in respect of the maintenance of lunatics.

3. MISCFLLANEOUS STATISTICS.

The gross estimated rental of property in England and Wales hable to contribute to the poor rate in the year ended March 31st, '97, was £199, 380,667, and the rateable value £165,990,055. The total number of paupers of all classes in England and Wales in receipt of 1 chef on Jan. 1st, '98, was \$45,913, of whom 231,666 were indoor and 655,125 outdoor paupers, plus 182 who received both indoor and outdoor relief. There was an increase of 3641 in the indoor and a decrease of 3422 in the outdoor paupers, and an increase of 20 in the other classes as compared with the previous year. It was estimated that the proportion of the total number of paupers to the population amounted approximately to 1 in 37. Of the total of 837,095 paupers, 90,540 were insane and 13,563 were wagrants, while of the residue 184,853 were wagrants, while of the residue 184,853 were adult males, 332,487 adult females, and 225,652 children under 16 years of age. Of the adults 150,050 males and 250,219 females were not able-bodied. The Report of the Local Government Board for '97-8, from which these figures are taken, states that the number of paupers i elieved in the year ended Lady Day '98 was, proportionately to the population, smaller than in any year since '49, save the years '92-3. The greater part of the decrease in paupers of recent years is attributable to a reduction in the numbers of outdoor paupers.

Pope, The His Holiness Leo XIII., the 258th Roman Pontiff, son of Count Ludovico Pecci, was b. at Carpineto, 1810. Ed. at the Jesuit Coll of Viterbo (18-24). Entered the School of Collegio Romano (24), where he greatly distinguished himself, and proceeded to the College of Noble Ecclesiastics Having become a Doctor of Laws, he was made by Pope Gregory XVI Referendary of the Segnatura (37). Took holy orders, and was consecrated priest (37) by Cardinal Carlo Odescalch. The title of "Prothonotary Apostolic "was bestowed on him by Pope Gregory, who also appointed him Apostolic delegate in succession at Benevento, Perugia, and Spoleto. Was sent as nuncio to Belgium (43), and created shortly after Archishop of Damietta; nominated Bishop of Perugia (46); created cardinal (53). Elected Pope Feb. 20th, 78, and took the title of Leo XIII. Among the events of his Holineas's reign may be mentioned the restoration of the hierarchy in Scotland

the contest with Germany, the Kulturkampf, the contest with Germany, the Kulturkampt, the now famous Falk Laws, and the rapprochement with Prince Bismarck. Towards the close of 87 and the beginning of '88 Rome was the centre of great rejoicings in connection with the Papal subilee, intended to commemorate the 50th year of his Holiness's assumption of holy orders. In June '91 he issued an important Encyclical on In June '91 he issued an important Encyclical on Labour, which gaverise to much discussion. It is said that the average annual expenses of the Vatican are about £286,4000 Of this sum £20,000 are at the Pope's disposal, £28,000 go to the cardinals, £18,400 to poor bishopilis, £72,000 for administration of apostolic palaces, £40,000 for diplomatic expenses, £60,000 for employes, £48,000 for schools and charities On the occasion of his episcopal jubilee (Februth '200 yest numbers of nigrims flocked to 19th, '93) vast numbers of pilgrims flocked to Rome from all countries The Pope summoned a conference of the Patriarchs of the Eastern Churches at the Vatican in Oct. '94, but no practical results followed, and the same may practical results followed, and the same may be said of his letter to the English people in April '95, urging them to retuin to "holy unity" with the Church of Rome His Holiness said Mass in St. Peter's (Feb 13th, '98) in celebration of the 60th anniversary of his 'sist' Mass.

Porto Rico, until '98 a Spanish colony, lies to the east of San Domingo in the West Indies Its area is about 3688 sq m, and the pop poo.000, of whom about 100,000 are negroes and about the same number mulattoes. The chief towns are San Juan, pop. 23,414, Ponce, 17,545, and San German, 30,146. I he island is mountainous, and the climate healthy. The is mountainous, and the climate negatify I focusity is generally fertile, and the chief exports are coffee, cacao, sugar, tobacco, and timber. The annual value of the exports is about £3,000,000 An American expedition under General Miles effected a landing at Guanica (July 25th, '98), and easily overcame the Spanish opposition. Their advent was the Spanish opposition. Their advent was accepted with gladness by the people generally The city of Ponce was taken possession of (27th), and the Spanish troops were everywhere (27th), and the Spanish troops were creery state being forced back when terms of peace were arranged (see Spans and United Statis for details) and hostilities ceased. One of the conditions was that the island should be ceded to the United States, and a joint commission arranged all the details for the evacuation of the island by the Spanish troops and authorities and the spanish troops and authorities and the spanish troops are spanish troops. ties and the transfer to the States (Sept. 18th) The American flag was hoisted (Oot. 18th), the bulk of the Spanish troops having left by that

PORTUGAL

Portugal is a kingdom in the Peninsula in S. W. Europe, under Carlos I of the House of Praganza. Area (including the Azores and Maleira, which are regarded as an integral part of the kingdom), 36,038 sq. m; popabout 5,082,257. Constitution of 1826 (amended in '52, 85, and '95) gives a special moderating power to the king. There are two legislative chambers, the Peers and the Deputies, collectively called the Cortes. By royal decree (Sept. '95) the Chamber of Peers consists of 90 members nominated for life, in addition to the members nominated for life, in addition to the princes of the blood and the twelve bishops of the continental dioceses. The nominated peers may be selected without limitation as to

tions are imposed. The elective portion of the Chamber was put an end to. The second Chamber, under a decree published in March '95, is composed of members elected under a system composed of members elected under a system of universal suffrage every four years, to the number of 146, of whom 6 are elected by Portuguese colonies. The king has no veto on a law that has been twice passed by both houses. I he State religion is Roman Catholic, but all others are tolerated. Education, though nominally compulsory, is in a very backward state. Chief exports: wine, cork, cattle, fish, and copper. There are 1453 miles of railway. Revenue, 97, £11,748,000; expenditure, £12,147000, imports, 96, £9,070,000; exports, £0,640,000 Public debt, 97 foreigh, £05,050,625, internal, £91,731,217 See Colonies, itt, 91 European Powers, Diplomatic, Forfign Armits, and Foreign Navies.

Political Parties. The legislature of

Political Parties. The legislature of Portugal is the Cortes Geraes, consisting of two houses, the Camara dos Pares and the two houses, the Camara aos rares and the Camara dos Deputados The deputies are divided roughly into Conservatives (also called Regeneradores), led by Sunhor Serpa Pimentel, Progressists (of Liberals), Independents, and Republicans In '93 another party, the Miguelistas, or supporters of Dom Miguel, a pretender to the throne, who was at the time living in Austria, showed renewed activity, and began to press their leader's claims on the people. The general elections in recent years have all resulted in triumphs for the Government, the Conservatives being returned with large majoritics.

Portugal King of See Carros f

Positivism. The philosophical and religious system of Auguste Comte (1798-1857). The chief principles of the former side of the system are (1) The classification of the sciences in hierarchical order, proceeding from the simpler to the more complex, as follows mathematics, astronomy, physics, chemistry, biology, sociology, morals, and (2) The doctrine of the "three stages" through which the human mind has to pass in the investigation of phenomena, the theological or personifying, the metaphysical or abstract, and the positive or scientific. The religious side of Positivism consists in the cultus of Humanity considered as a corporate being in its past, present, and future. The "positive philosophy" is its theoretical or doctrinal basis, corresponding to the theology of the supernatural religions, but besides this. it consists in a worship requiring for its full development an organised priesthood, temples, etc. Under the "life" or régime of positive religion Comte would include the political and PORTUGAL

Portugal is a kingdom in the Peninsula in the establishment of an international republic, where the establishment of an international republic, consisting of the five great nations of Western raganza. Area (including the Azores and Europe, which is ultimately destined to lead the whole world, the latter the leorganisation of society on the basis of a double direction—that of the temporal or material authority, and that of the spiritual or educating body Positivism as a religion has achieved some success since Comte's death. In Paris it possesses a periodical, the Revue Occidentale, and Comte's apartments, at D. Rue Monseur and Comte's apartments, at 10, Rue Monsieur le Prince, are kept as a place of meeting Other groups exist in other cities of France, of of the continental dioceses. POST OFFICE STATISTICS, '98.

The forty-fourth annual report of the Postmaster-General, issued during '98, showed the following results as to postal packets for the year ended March 31st, '98 —

		Average Number to toh Person
	1	
Letters	2,012,300,000	50 1
Postcards	350,400,000	9.0
Book-packets, Circu-	, ,	•
lars, and Samples .	727,300,000	18 ,
Newspapers	150,000,000	3.8
Parcels .	67,823,000	17
Гоtal	3,318,7 13,000	831

The number of registered letters was 14,213,470 An increase was recorded in every 14,113,479. An inclease was recorded in every variety of postal packet save that of news papers. The revenue for the year, in respect of the Post Office, amounted to £14,420,376, and the expenditure to £8,680,713, showing a profit of £3,918,614. The figures for the telegraph of L. 505,514. The figures for the teleplapin department were invenue, £ 5,071,773, expenditure, £ 3,481,261, showing a loss of £ 69,538. Therefore the net profit of the whole department was £3,000,076. The Express Delivery Bervice, under which a letter can be sent by express messenger to any train, forwarded by that train, and met at the station and delivered by another messenger, dealt with 551, 179 letters, as against 448, 120 in the previous year. I wo thirds of these were in London. The numbers of undelivered packets were as follows 7,699,040, an increase of 1,063,878, Postcards 1,204,216, an increase of 115,079, Book-packets 11,606,374, an increase of 94,100; Newspapers 534,120, a decrease of 28,364, and Patrels 175,075, an increase of 10,271 Property exceeding an increase of 19,271 £593,947 in value was found in letters opened in the Returned Letter Offices. The letters The letters posted without any address numbered \$8.860, and in them was contained property worth £4715 As to Home Mails, the number of daily county mails to London was increased by 23, and from London by 35; 430 new post offices and 1221 new letter-boxes were added during the year, making the totals 21, 107 and 30, 303. Money-order and 42 niges-bank business is tansacted at 12,300 offices. The Staff of the Post Office incleased during the year from 144,700 to 150,110. The number on the permanent establishment, including 11,000 women, was 84,309. As to Money Orders and Postal Orders, the total number of inland money orders issued was 9,429,609, ber of inland money orders issued was 9,429,629, on an increase of 115,587, for the total amount of 427,404,145, an increase of 41,574,202. The total number of foreign and colonial orders issued to the teacher for acquiring a knowledge of in the United Kingdom and payable abroad his profession, and by providing for the

was 523,886, an increase of 39,082, for a total sum of £1,477,836, an increase of £153,864. The number issued abroad and payable in the United kingdom was 1,174,763, an increase of 51,972, for the total sum of £3,142,598, an increase of £137,336. In the Post Office Savings Bank the amount due to depositors on Dec. 31st, '97, was £115,896,786, as against £108,098,641 on Dec. 31st, 96. There were 7,239,76. accounts open on Dec. 31st, '97, and the average sum to the credit of each account at that time was thus (16 os. 2d.

as against £15 155 1d in 96

The number of ordinary telegrams forwarded in the United Kingdom (*e excluding foreign, press and free telegrams) was 68,810,786, an Increase of 3,248,969, giving a levenue of £2,130,973 as compared with £2,070,045 in '96. The number of foreign telegrams was 6,482,806, an increase of 174,819, of press telegrams to 15,015,901, an increase of 178,200, and of Govern-ment and railway telegrams 1,720,506, an increase of 20,785. The total number of telegrams, inland and foreign, increased from 79,423,556 iii '96-7 to 83,029,099 in '97-8 New telegraph offices were opened at 268 post offices and 32 railway stations, making the total num-ber of offices at which telegraph business is done 8172 and 2311 tailway stations
As to telephones, the Post Office made con-

siderable reductions in the charges for Post Office telephone exchange wires, and for short lines of private wire. The Department now controls a total mileage of 53,526 miles of trunk wire, and the system consists of over 880 separate trunk circuits, supplemented by more than 2000 circuits between post offices and the National Telephone Company's Exchanges

There are 264 post offices open for trunk telephone business. The total number of trunk conversations during the year was 5,808,247, and the revenue therefrom £133,974 There are 666 telephone operators (women) employed by

the Department For Post Office Guarantee Act, '98, see SESSION, sect 79, see also sect. 24.

Poynter, Sir E. J., was b in Paris in 1836, and is the son of Mi Ambiose Poynter, an architect He was ed at Westminster School and Ipswich Giamma School, and studied art in English schools, and at Paris under Gleyre '6-9 He was clerted an Associate of the Royal Academician in '69, and an Academician in 76 In 77 he became a member of the Belgian Water Colour Society, and in the same year and again in 73 was appointed Slade Professor of Art at University College, London He was Director for Art and Principal of the National Art I raining School at South Kensington for some years, and in '94 was appointed Director some years, and in '94 was appointed Director of the National Gallery In '96, on the death of Sir John Millais, he was elected to the Presidency of the Royal Academy Ilis best known pictures are "Israel in Egypt" '67, "Perseus and Andromeda" ('72), "Atalanta's Race" ('76), "The Fortune Teller" ('77), "The Meeting of Solomon and the Queen of Sheba" ('91) He is known not only for his pictures, but as the author of "Ten Lectures on Art" ('70), and as one of the desurgers of the new

but as the author of "Ten Lectures on Art" (79), and as one of the designers of the new coinage issued in '04 Knighted' 197.

Preceptors, College of. Established 1846, mosporated by royal charter, '49, "for the purpose of promoting sound learning and of advancing the interests of education, especially among the middle classes, by affording facilities to the teacher for acquiring a knowledge of

Presbyterianism is church government by presbyters (or elders), and by them only Session of a Presbyterian Church consists of the ordained ruling elders, and the pastor or teach-ing elder of the church, who always presides when present. In case of a church being vacant the pastor of some other church within the bounds of the presbytery is chosen moderator ad interim. The Presbytery consists of the pastors of churches, and a ruling elder from each congregation within prescribed boundaries. The Synod consists of presbyteries within a larger area, and the General Assembly, where the size of the church renders one necessary, takes in the whole church, and consists either of the pastors of all the church's, together with a ruling elder from each congregation, or representatives chosen from amongst both pastors and ruling elders. The standards of the Presbyterian Churches are the Westminster Confession of Faith, with the Catechisms, Larger and Shorter The United Presbyterian Church in Scotland, and some others, receive these with an explanation, especially in respect to Chapter XXIII of the "Confession". The United Presbyterian Church has idopted a Declaratory Statement in regard to its relation to the "Couff soon." The Presbyterian Church to the "Confession." In Presbyterian Church of England has adopted a similar document together with XXIV brief "Articles of the Faith" See Church of Scotland, Church in Ireland, Presbyterian Clurch of Fagland, and Welsh Presbyterian Church of Fagland, and Welsh Presbyterian Church of England,

Presbyterian Church of England. The revival of Presbyterianism in England in the actility portion of the present century was due to influence on English Presbyterianism, on the one hand of the Evangelical movement in the Established Church of Scotland which led up to the Disruption, and on the other of the consolidation of the dissenting Presbyterianism of Scotland which led up to the formation of the United Presbyterian Synod in '46. The English section of that Synod united with the older

Presbyterian body in England in '76, so forming the Presbyterian Church of England. O the present congregations 28 trace back their existence to the seventeenth century, 42 to the eighteenth century, while the remaining 244 have been established within the present century—Statistics. The Church consists of 314 fully organised congregations and 16 preaching stations, providing accommodation for 162,041 Several churches are in course of re Dersons. building, and consequently their sittings cannot be given. A large number of fully equipped mission stations also exist in connection with town congregations, and these have an average attendance of about 12,000 persons. The number of ministers, including professors, is 320, with 19 ordained and 10 medical missionaries in the foreign field, besides 3 missionary teachers and 25 lady missionaries. There are also 20 heentrates, and about 20 theological students preparing for the ministry. The property of the Church is estimated at £1,501,215, exclusive of sundry investments for the endowment of the College and scholarships, and for the Sustenta tion Fund and other schemes of the Church, of the College itself, and of buildings for mission work abroad The total mome of the Church in '97 was £770,376 The backbone of the Church finance is the Sustentation Fund, which since '78 has secured for the body of the ministers, excluding a limited number under special arrangements, a minimum str pend of £200 Under this scheme 93 congregations were aid-receiving in '07 to the amount of L880 78 10d, as a same to 3 m 78 to the amount of L880 78 10d, as a same to 3 m 78 to the amount of L644 78 od, the average amount of and required being at the L620 88 7d per congregation, as against L62 108, m 78 A new Church Building and Debt Extinction Fund was inaugurated by the Synod of 'os The amount inaugurated by the Symod or os a new amount contemplated is £50,00, pryable over five years, and nearly £40,000 has already been subscribed. The Rev. John Bogne, M.A., is organisms sceretary of this Fund. General Secretary, Rev. J. Thoburn McGaw, M.A., D.D., £4st. India Avenue, Leadenhall St., E.C., Economic Secretary. Mr. Lohn Largat. Financial Secretary, Mi John Leggat

Prime Minister is he who at the summons of the sovereign has succeeded in forming an administration, of which he is the head, and which may be named after him. It may be assumed that those who accept office under him agree with his policy in the main. Although each member of the Cabinet administers his own department independently of his colleagues, all important departmental matters are submitted to him, the most important being brought before the whole Cabinet, and no appointment of moment is made or recommended to the Crown without his knowledge and concurrence. His own patronage is very extensive. In forming an administration, he selects all those who are to fill the various offices, though the appointments are subject to the sovereign's approval. It is upon his advice that as vacanices occur the archishops, bishops and deans and the highest judges are appointed, and over one hundred Tovwn livings are filled; and upon his recommendation that the most envired temporal titles and honourable distinctions—peerages, baronetices, and the Garter, for example—are conferred, and such high appointments as the Lord-Lieutenancy of Ireland, the Viceroyalty of India, the principal ambassadorships and teelonal governorships, and the lord

lieutenancies of counties, are made by the Crown. He is the leader of the House of Par-liament of which he is a member. Yet as Prime Minister he enjoys no legal precedence over his colleagues, his official existence being indeed not recognised by statute

METHODIST CHURCHES.

Primrose League. A league originated in 1883, in memory of the late Earl of Beaconsfield, and so called because on the anniversary of his death every member wears a bunch of primroses. The members, who include both sexes, are styled Knights, Dames, and Associates, and their bianches are called "Habitations."
The members of the Primrose League took an active part in the last electoral campaign, and exercised considerable influence in favour of the Constitutional-Unionist candidates. The testimony of both candidates and election agents leaves it beyond doubt that the extraordinary development of organised work on the part of the ladies of the Primiose League attained a measure of importance and success artained a measure of importance and success far greater at the last general election than on any former occasion Grand Master, Marquis of Salisbury, K. G., Chairman of Grand Council and Chancellor of the League, Duke of Marlborough Members enrolled up to September 98 number, including Scotland, 1,444,600, divided among 2306 Habitations Vice-Chancellor, 6 S Lane-Fox Head Offices 64, Victoria Street, 5.W Official Organ, The Primrose Lingue Gazette (monthly)

Prince Edward Island. A province of the Dominion of Canada It lies in St Lawrence Gulf, north of Nova Scotia and between New Brunswick and Cape Breton Area, 2133 sq m.; pop. 109,078 Capital, Charlottetown, pop. 11,485. Divided into three countries Admini-stered by a Licut-Governor and Executive Council The people elect a House of Assembly of thirty by manhood suffrage. The Province has four seats in the Dominion Senate and five in the House of Commons Education is stateaided, free, and compulsory, between the ages of 5 and 16 Entered the Dominion 1873. See BRITISH EMPIRE (table) and CANADA

Prison Reform. For a report of the Committee on this subject, which reported in 95, see eds. 'o6 and 'o7.

PRISON STATISTICS (ENGLAND AND WALES).

All the essential information which has been published on this subject appears to be com-prised in Part I of the Judicial Statistics prised in Part 1 of the Judicial Statistics for '967 the Reports of the Commissioners of Prisons and the Directors of Convict Prisons for the year ended March 31st, '98, and the report to these officials of the Rev P. G. Merrick on the operations of Discharged Prisoners' And Societies 119, 66. The following statements are mostly gathered from the Commissioners reports

LOCAL PRISONS

The number of prisoners received in such

prisons during go and 97 were	_	
	'96	'97
Under sentence of ordinary courts Soldy ry and sailors sentenced	148,113	153,965
by courts-maitial .	1,008	1,077
Debtors or on civil process In default of sureties	11,243	10,756
in detault of smetres	1,670	1,776
	-	
	102,034	167,574

The population of these piisons on March 11st, 198, was 14,021, as again t 14,001 at the corresponding period of the previous year. The average daily population in 07.8 was 14,225, of which 11,075 were males and 250 were females. In the previous year such population consisted of 13,927 - viz, 11,570 males and 2417 females. If the increase due to retaining convicts under sentence of penal servitide in local prisons is deducted, the average daily popula-tion would be 13,723 in '97 8, and 13,481 in the previous year. The average population of local or short-sentenced personers was consequently higher by 12 in 97-8 than in the preceding year. The following table shows the general tendency to decrease of committals to prisons and the number committed iclative to population -

	0	n Indutment.	On Summary Conviction	
Yearly Average Number of Persons imprisoned in England and Wales	Actual Number	Number per 100,000 of Population of Fngland and Wales		Number per 100,000 of Population of England and Wales.

Decrease per cent	196	30.0	20	17 0

It is also important to consider that many new offences have been created recently, and there has been a material extension of the powers of dealing with other offences, and also greater activity by the police and local authorities in prosecuting. This fact is well notified by sta-

last ten years for certain offences of a quasi-criminal kind, including adulteration of food and drugs, cruelty to animals, offences against the Diseases of Animals Act, and in relation to dogs, offences against Highway Acts; offences prosecuting. This fact is well notified by sta- against the Factory Acts, police regulations, tistics showing the increase that has taken local bye-laws, etc, and against gaming; in-place in the number of convictions during the corrigible rogues, and "other offences" under

the Vagrancy Acts. The total number of con- of juveniles committed to reformatories the Vagrancy Acts. Ine total number of convictions for all offences on indictment and summarily, which was 519,781 in '85-6, had increased to 644,226 in '96-7, being an increase of 23 per cent. The total number of convictions for quasi-criminal offences in '96-7 were 324,944, as against 229,,285 in 85-6 Among such convictions for the former period there were 1/12,665 for drunkenness alone; 29,328 for offences against the Highway Acts, 76,055 for breaches of police regulations, local byelaws, etc., and 19,605 under the headings of gaming, incorrigible rogues, and under offences under the Vagrancy Acts there are a variety of cases of a quasi-criminal character in which the proceedings approach nearly to the criminal form, and most of which would be deemed criminal for purposes of appeal under the Judicature Acts. Thus, it appears from the Judicial Statistics relating to Crime, for '96—the latest returns published—that in 19,631 cases applica-tions were made for orders to require persons using threats, etc., to find surcties, and in 17,007 orders were made, and in 1231 cases the defendant was imprisoned in default of finding the sureties. The sentences under this head are occasionally severe. In 41 instances they exceeded three months. Bastardy oiders were made in 6401 and culoiced by imprisonment in Orders for maintenance of wives 057 Cascs were made in 5314 and enforced by imprisonment in 865 cases. The Prison Commissioners, in their report for '06-7, state that "the large increase of convictions for the minor offences." detailed, and the considerable proportion that they bear to the total volume of crime, has an important bearing on the general question of the increase of crime, if that is to be gauged solely by the total annual number of convictions irrespective of the offence, and by the fact that about three-fourths of the persons con-victed escape by the payment of a fine imposed for comparatively trivial offences." Under the Under the Protection of First Offenders Act the court before whom an individual not previously convicted is convicted of larceny or false pretences may, having regard to the youth, character, antecedents, etc., of the offender, or to the trivial nature of the offence, order that he be released, on entering into recognisance, etc., to come up for judgment when called upon, and to be of good behaviour. If he fail to conform to any of the conditions of his recognisances, he may be brought up to answer concerning his conduct and to receive judgment. It is provided by section 10 of the Summary Judicature Act, 79, that when the charge, although proved, is of a trifling nature, the court, without proceeding to connature, the court, without proceeding to con-viction, may dismiss it, and may order the defendant to pay damage not beyond 40x or costs. By the same section it is further enacted that the court, on conviction, may order the defendant to give security with or without sureties, and with or without payment of damage or costs

The prisoners discharged under the First Offenders Act '67, and the Summary Jurisdiction Act '79, in cases which came before Courts of Summary Jurisdiction, were no less than 9.9 7 in '97. The number of juveniles in prison at the end of that year was about the same as the previous year, being 46 as against 42, but there has been a considerable diminu tion since '95, when the number was 127 There class, of whom 485 males, or 4 9 per cent., and has also been a slight falling off in the number 152 fc males or 7 per cent., have been recommitted

new rules for the treatment of suvenile offenders are now in full operation, and are working well. The Governor of Bedford Prison reports. "As a result of these rules being carefully applied, strict discipline combined with discretion and kindness and constant employment, it is proved beyond doubt that the imprisonment of these lads has a most salutary effect, which is only realised by a comparison, both as regards then moral and physical state, on reception with their condition on discharge." The Chairman of the Aid Society in their report states that "excess (flot) is made, by a combination of kindness with firmness, to reclaim them from criminal conises, and the prejudice and objections which have arisen to the imprisonment of juvenile offenders would appear to have a mean transfer foundation in yiew of the of the Aid Society in their report states that have no reasonable foundation in view of the new system that has been introduced by H M Commissioners of Prisons." The Governor of Warwick Prison also speaks highly of the new system, and stated "that the physical dull, habits of cleanliness, and implicit obedience, with instruction both in religious and secular knowledge, cannot but bear some fruit in a majority of these poor boys who are at an age apt to learn

CONVICT PRISONS

The number of mile convicts received in these establishments from local prisons and the Channel Islands, under fresh sentences during the year ended March jist, '98, was 655, besides 189 with licences revoked or forfeited The number of female convicts received into the convict prisons from local prisons under fresh sentences and during such year was 30, besides 18 with licences revoked or forfeited The Penal Servitude Act, '91, by which courts of justice are enabled to pass sentences of penal scryitude for thice years and upwards instead of being restricted to terms of five instead of being restricted to terms of any years and upwards has been freely taken advantage of The average length of the sentences of all the convicts in convict and local prisons on Maich 3rt, '98, was 686 years for males and 8 id for females, while on the same date in '97 it was 7 or years for males, and 750 years for finales. As regards local and convict prisons generally, and their prisoners, some important statements are to be notified. Firstly, concerning first offenders, and since the formation of what is called "the star class" in convict prisons, in '79, ip to March 1st, '08, 330 male convicts have been placed therein, of whom only 21 of those discharged have returned to penal servitude under fresh sentences, and only 5 have had then lectnees revoked or forfeited. Of 99 females in the class, none have returned to penal servitude

The Prison Commissioners state that, regards the segregation of first offenders, the very results of the "star clasp" led the Commissioners to anticipate that an analogous system of the separation of first offenders in local prisons would have a most beneficial effect. The Commissioners therefore carried into practical effect in '97 the complete separation of first offenders from the habitual criminals by the establishment of the "star class" system in all local prisons During the year 9812 males and 2210 females have been placed in that

o prison inider fresh sentences. In their similar posts of trust, most of whom have had report for '77 the Commissioners state that, a fairly liberal education. Now, to most of its regards the "star class" referred to, these imprisonment is a crushing blow, and s success in a great measure depends on were it not for the fact that one is able to offer the co-operation of the police and of the visiting magistrates, which it is expected will be forthcoming. The advantages of the segregation of the first offenders from other the Chaplain of Wormwood Scrubs Prison, who states that "frequent personal intercourse with this class on a whole shows that they are not thieves, neither are they criminals as this term is generally understood. They are of a better stamp, both socially, morally, and intellectually, than the ordinary prisoners, consequently one has better material to work upon I find among them managers, bankers' clerks, insurance agents, clocks to solicitors, in mer-eantile and other offices, diapers' assistants, men employed in H.M. Post Office, and in

were it not for the fact that one is able to oner them some helping hand on discharge, would almost overwhelm them, I find them well behaved, free from schools reports, very read to listen to and it cave advice. The very fact that they are in the "star class" and regarded as first offenders at once raises them a step above the ordinary prisoners, a position they are not slow to realise, and yet not to presume upon it So far, therefore, the scheme is a step in the right direction"

The following table shows the population of England and Wales with the number of prisoners sentenced to death, to penal servitude for life, to penal servitude for a term of years, to imprisonment on indictment, and on Summary conviction or want of sureties, in each

year from '88 to '97 inclusive

PRISON INDUSTRIES.

A further advance has been made in the regulation of prison labour by the appointment of paid instructors for these industries which require special skill and technical qualifications The Prisons Committee advised that better provision should be made for the supply of skilled workers as teachers, and for the direct superintendence of industries in each prison, and that workers who acquire sufficient knowledge to supervise skilled work should receive an extra allowance. A scheme has been approved, and is now in operation, giving literal effect to this recommendation. In Appendix No 18 to the Commissioners, last report a very interesting statement is made by the Comptroller of Prison Industries as to the work done therein by prisoners during '07-8. In gauging the industrial powers of our prisons the following points must, he states, be borne in mind (a) the shortness of the sentences of the bulk of the prisoners. (b) the fact that the law requires for the first month, or during his sentence if it is less than a month, every prisoner sentenced to hard labour (unless the medical officer objects on the ground of health) to be employed in one or other of those forms of severe toil, of which the treadwheel and the crank have been so long the accepted types; (c) the comparatively low physique of the ordinary prisoners of to-day, (d) the scarcity of skilled workmen among the prisoners now received. (e) the fact that not less than 22 per cent of our local prisoners are practically non-workers, consisting as they do of dectors, prisoners awaiting tital, and prisoners on the sick list

An increased support compared with 'of has been given to prison trade operations by Government Departments. The Admiralty, the war Office, the Post Office, the Crown Agents for the Colonies, the Office of Works, the Stationery Office, etc., have used prison labour on an extended scale, and their technical officers have in many cases rendered valuable assistance by suggesting improvements made in the details of prison manufactures Among the details of prison manufactures. Among the date of all improductive craims and detailed supplies have been, brooms and brushes, tin labour. The value of the prisoners cannings ware, mattresses, bolsters, pillows, sacks, at local and convict prisons to the year ended hammocks for wounded men, kit bags, haver-

sacks, baskets, canvas, clothing, clothes-bags, bad, sackings, sand, bags, nose-bags, mailbed sackings, sand-bags, nose-bags, mail-bags, leather leggings, beds, drabbet, twine, pouches, packing-cases, crates, rugs, mats, joundry-work, hand-stoves, carpentry, shoe-making, bookbinding, upholstery-work, mat-ting, ship-tenders, desputch-bags, tool bags, frewood, and washing for the Government Offices in London

An interesting experiment is in progress with the binding of books for the Home Office Libiary, and it is probable to indertake work of this kind for other branches of the Government service A large proportion of the bookbinding and printing required for the Prison Commission Office and for the or local and convict prisons in England and Wales has been done in pilsons. A depletion in the ranks of the oaknin pickers has been steadily proceeding, and arrangements have been completed for the final discontinuance at an early date of all unproductive crank and treadwheel

DISCHARGED PRISONERS AID SOCIETIES

Many such societies have been formed for the object of the reinstatement in honest life of men and women on release from prison, and where a helping hand or a kindly encouragement on discharge may save from a relapse into crime Since Jan 1st, '87, every prison in England and Wales has had a Discharged Prisoners' Aid Society working in connection Some of these societics are well organised and managed, and are doing then work well. There are others, however, which do but little for the purposes for which they concerning such societies by the Rev. G. P. Merrick in his report to the Commissioners of Prisoners' Aid Societies in '96, are supplemented by others of great importance on this subject. He adds that some of the societies leave the care of the work and of the interest of such bodies to a very few zealous members. "Some, again, are deeply interested

in the work, but do not march with the times. There are other Discharged Prisoners' Aid Societies which are active and but do not march with the zealous, and are in various ways endeavouring, at much cost of time, money and labour, to find out how best to help the ex-prisoner to become a respectable, law-abiding citizen, and to recover his good name and place in the everyday world . These societies are doing their self-appointed work in such a manner that thousands who have been discharged from the prison-gates have abundant reason to be thankful for their existence In '96 these societies offered to help nearly 26,000 men and women who, out of a total of 169,737, were released from the prisons of England and Wales during the year The Prison Commissioners state in their report for '97 that they have given much attention to the question of aid on discharge, and that Mr Merrick's comprehensive report on the existing system in relation to local prisons, and his suggestions for its improvement, have afforded them (the Commissioners) the opportunity of submitting a scheme (the details of which are not yet finally approved) for the inture organisation of the Aid Societies referred to, with a view to developing their effectiveness towards the end for which they

were created. These officials further state that it is neither their object nor wish "to hamper or interfere with the nee pay voluntary societies constituted for the aid of prisoners throughout the country venture only to offer advice and guidance, having opportunities as the central authority of seeing by what methods this form of charity is likely to be excreised to the greatest advantage in the interests of the individual prisoner tage in the interests of the individual prisoner and of the State. It is our object also to recognise and simplify the principle on which the Government grant will be allocated, and generally to introduce uniformity of operation into a great system of charity, which, while it is best discharged by voluntary persons and agencies, must, having regard to its important and far-icaching results, always be a subject of State concein and interest. And to convicts is on a different principle. There is no local society, and no additional grant, the gratuity which a prisoner under long sentence earns. which a prisoner under long sentence earns being considered sufficient to meet his actual needs on discharge. The function of aiding convicts on discharge rests mainly with the two well-known London societies—the Royal and the St. Giles's Christian Mission have ascertained by inquiry that the governors and chaplains of convict prisons are on the whole satisfied that existing means are adequate for at least affording an opportunity to a discharged convict who is desirous of leading a better life . . With regard to the question of the aid on discharge generally to female convicts who have fulfilled their sentence, we are not satisfied that existing methods are sufficient, and the governor and chaplant of Aylesbury Prison concur in this opinion." Fix Commissioners therefore recommend that this prison "should be specially treated, and that a system should be established analogous to that in use in local prisons—vi/, a Government grant at so much per head of discharged prisoners, to be disbursed by a specially continued. stituted Aid Society, consisting of the prison authorities and the official visitors working on the spot, with fell knowledge of the character, antecedents, and prospects of this special class of prisoner.

According to the Report of the Com-missioners published in '98, the improved scheme referred to for the better organisation of discharged prisoners' and societies has been approved, and came into operation on April 1st Since that date six societies have applied for the certificate, and forty-form have been duly certified. There still remain ten to whom certified have not yet been issued pending further inquiries. Great efforts have been and are being made in various localities to comply with the provisions of the scheme. An arrangement has now been completed under which the authorities of the Royal Society for Assisting Discharged Prisoners co-operate with the lady visitors of the Aylesbury Prison with the object of making special provision for all deserving cases. Since the previous report of the Commissioners for the year ending 97 further advance has been made in the appointment of lady visitors to the local prisons. The Commissioners state that excellent results follow from the appointment of discreet and judicious ladies in this respect. Hitherto their efforts have been chiefly directed to making provision for deserving cases among ferred to the Committee for Privileges of the the female prisoners on discharge. The success House of Lords, a body which is composed of

of the system, and the evidence that their work among the prisoners in gaol can be carried on without any detriment to its discipline and good government, has led the Commissioners to desire that the sphere of influence of these ladies might be more extended. A circular has been addressed to the Visiting Committees throughout the country, inviting their opinion whether the services of lady visitors might whether the services of rady visitors might be placed on a more satisfactory footing, and used not only for purposes of aid on discharge, but for duties more closely connected with the internal life in prison during imprisonment. The Commissioners were of opinion that ' might follow if ladies connected with the locality were to advise as to the industrial occupations that might be followed in prison, and if to a certain extent they undertook the duties of scripture reader in selected cases, reading to and conversing with prisoners in their cells."

MISCELLANEOUS.

As regards extradition, the number of cases which occurred in '96, according to the "Judicial Statistics concerning Crime" before mentioned, was very small In that year the surrender of 23 criminals was granted to foreign Governments, and the surrender of 3 criminals was obtained from such Governments During the year ended March 31st, '88, there was a considerable decrease in the number of cases of msantly, compared with the corresponding period of '96-7, the total number of cases in the former year having been 150, and 164 in '96-7; while the number of those in which the symptoms of insanity first appeared after reception into prison was 62, as against 43 in 90-7, but of these 62, as the Medical In spector has stated, the mental condition of 18 was returned as unsatisfactory on reception Concerning criminal lunatios, these consist of persons charged with a criminal offence who persons charged with a criminal offence who are found ins me by the jury at assizes or quarter sessions, and of criminal prisoners who are cottined means while awaiting trial or undergoing sentence. The latter class are more numerous, and chiefly consist of prisoners sentenced to short terms of imprisonment for minor offences. These persons are generally removed to the nearest county or borough assulum, and that the end of the respective of the sentence of t asylum, and after the end of their sentence are detained therein as ordinary pauper lunatics. The more serious cases—when the charge is minder or some other grave crime—are sent to Bioadmoor Criminal Lunatic Asylum. The number of criminal lunatics received into asylums during of was 194, of whom 24 were found in ane by the verdict of juries, 138 were certified to be insane while serving sentences in prison, and 16 were found insane while under detention on remand or awaiting trial. Forty-one of the lunatics were received into the Broadmoor Asylum Of those remaining under detention at the end of the year, 645 out of a total of 769 were in this Asylum, and of these 145 had been confined therein for ten years, 115 for fifteen years, 68 for twenty years, and 146 above twenty years. For Prison Act, '98, see Session, sect. 80.

Privileges, Committee for. The petition of every claimant to a title of nobility is referred to the Committee for Privileges of the

the Lord Chancellor, the ex-Lord Chancellors, and the Lords of Appeal, or some of them, the President being the Chairman of Committees. Counsel and witnesses may be heard, and the case is decided by the majority of the members of the committee present.

PRIVY. COUNCIL.

A body of persons nominated by the sovereign without any patent or grant, and who, upon taking the oath of office, are at once qualified members. A privy councillor must be a natural-born or naturalised British subject, and as he is created by the sovereign, so he can be removed from the list at her pleasure It is customary to include in the body the royal princes and the aichbishops, several of the principal officers of State and of the Household become privy councillors by viitue of their office, the principal secretaries of state are of course sworn of the Council before they can take part in the deliberations of the select number of the body which we know as the Cabinet Council, the Judge-Advocate-General is always included, and the rank is bestowed upon ambassadors and the principal colonal governors, and frequently upon respected politicians who may never have been in office, as an honorary distinction. Occasionally in recent years a colonial statesman of eminence has been appointed, and in '97 all the premiers of the self-governing colonics, who by invitation officially attended the celebration in London of H M Diamond Jubilce, were added. Any privy councillor may act as a justice of the peace. The Lord President of the Council is appointed by letters patent under the great scal, his duty is to manage the debates in council, to propose matters from the sovereign at the council hatters from the sovereign at the countri table, and to report to Hei Majesty the reso-lutions taken thereon. It is only on rare occasions that the whole body of members assembles, one of those instances being at the demise of the Crown, when it is the duty of the Privy Council to meet and proclaim the the Privy council to meet and proclaim the new sovereign. For the ordinary business of the Council only those who are summoned attend, and the number thus called upon is usually very small, and consists generally of members of the party in power. Among other important functions of the Council are the granting of charters of incorporation to public and private bodies, and the bringing into operation by means of orders in council of the operation by means of orders in council of the provisions of many statutes which Parliament leaves to the executive to enforce, temporarily or permanently, at such time or times is it may deem necessary and desnable Royal proolamations, summoning or protoguing of dissolving Parhament, and for many other purposes, are made by and with the advice of the P C, before being issued. Several public departments have grown out of or are even now committees of the Council The Board of Trade, although it is now an entirely interested advantagements. separate department, is still officially entitled the Committee of Council for Trade Ihe Education Department, with its own vice-president, is a Committee of the Privy Council, and there are besides a Universities Committee, which reviews the statutes made under the Oxford and Cambridge Act, a Scottish Universities Committee, and a Judioial Committee for appellera but the control of the control late business. It is provided by statute that certain of the colonial judges, acting or retired,

who may have been appointed members of the Pinty Council, shall be members of this committee, and two such appointments were made in '07 Included among the powers and duties of the Board of Agriculture (see AGRICULTURE) are many which were formerly discharged by the Agricultural Dept. of the Privy Council – The Privy Council in Ireland, a smaller body than that in England, advises the I ord-Lieutenant, and exercises some of the powers possessed by the Council in Great Britain, but in iclation to Irish affairs only. -As the Pivy Council in Great Britain and the Privy Council in Iteland are distinct bodies, though it will be noticed that some persons are members of both, a separate list of each is set out, corrected to Nov. '98. The word "Pear is intended to signify that some particulars regarding the public life of the noble lord referred to are given under the head of "Peccage", and "MP" is meant to refer the reader to our list of the House of Commons. In cases where the Privy Councillor is neither Peci nor MP come biographical facts are appended. All Privy Councillors should be addressed as "Right Honourable" MINISTRY

Quarantine. From Nov 7th, '66, the system of quarantine ceased to exist, so far as regards the British Islands. The Quarantine Act of '25 required that quarantine should be performed by vessels coming to the British Islands from places from which "the plague of other infectious disease or distemper highly dangerous to the health of his Myesty's subjects" might be brought; but in recent years this Act has applied only to the plague and yellow fever, and has not often been used. Vessels arriving from infected places or carrying goods, etc., from such places, were required to be kept at some safe distance from the shore and from other ships all their passengers and crew being detained on board -until all danger of spreading infection was considered to have passed. Healthy persons were thus exposed to the risk of taking any disease there might be on the ship. In some places quarantine establishments were maintained for receiving persons from suspected vessels, but most of these were long since abolished, and latterly the only such receiving ships were some old bulks at the Motherbank in the Solent. These were maintained by the Privy Council, on whom devolved the administration of the Quarantine Acts Orders in Council prescribed the system of quarantine By the Public Health Act of '75, the defence of the country against cholera was placed in the hands of the Local Government Board, and regulations were issued by that Board for the purpose Instead of quarantining the entire crew of an intected or suspected vessel, the method adopted consisted in the medical inspection of the persons on board, and the separation and detention of those who were suffering from cholera or who were suspected of being infected. All others were permitted to leave the ship, but were traced and watched by the local authorities. Infected articles on board were to be disinfected or destroyed Quarantine has long been con sidered ineffective against the introduction of disease, besides being a source of much danger . to those who were compulsorily detained under to those who were compulsorily detained under the system. The sanitary ideas of our day favour the less showy but safer methods used in the case of cholera. The fate of quarantine was determined on in '94, when, in discussion on the Privy Council Estimates, objection was made to the cost of maintaining the quaiantine establishment in the Solent on the ground of its uselessness, and the Government promised

which yellow fever and the plague are to be dealt with in the same manner as cholera, and regulations made by the Local Government Board will apply equally to the three diseases Of course qualitatine is still required to be performed in many foreign countries.

The Quarties Act of '94, which Cuarries came into operation on Jan 1st, '95, applies to all workings for minerals, except mines, which are more than 20 feet deep A return has to be sent annually from every quarry exceeding this depth to the inspector for the district, specifying the quantity of mineral obtained, and statistics are prepared from these yearly returns The quantity of clay, brick earth, sand, and gravel obtained from shallow quarries sand, and grave contained from standow quarrections large, but without further statutory powers no accurate account of the quantity and value are be publicly notified. The minerals from quarries more than twenty feet deep in Great Britain and Ireland with the Isle of Man. These during '97 is returned at 37,378,108 tons minerals include - iron oie, 13,787,878 tons, of the value of £,217,795, 3,556,-37 tons of chalk, valued at £12,595; clays, 12,705,196 tons, of the value of \$1,453,120, granite, 1,847,323 tons, priced at £552,004, gravel and sand, 1,356,787 tons, of the value of £111,333, limestone (exclusive of chalk), 11,003,524 tons, valued at $\mathcal{L}_{1,155,003}$, sandstone, 4,064,109 tons, of the value of $\mathcal{L}_{1,524,700}$; and slate and slate slabs, 609,104 tons, valued at $\mathcal{L}_{1,6}19,576$ The 1 manning minerals obtained from quarries more than 90 feet deep include barytes, quartz, the limit of the control of the contr gypsum, clay, ochie, umber, and tin ore, etc. Kent is by ha the most important chalkyielding county, and much of its produce is used in the manufacture of Portland cement at works on the banks of the Thames and the Mcdway There are few counties in England which do not produce minerals for brickmaking, but the workings for clay and brick earth are often shallow, and there are many quarries of less than twenty feet deep which produce much of both As regards granite the term is used very vaguely in commerce, and therefore some of the stone so called is not entitled to that name when used in its proper geological sense. Limestone, without taking chalk into account, appears to be the most important mineral quarried in the United Kingdom, owing to its various uses by builders, farmers, iron smelters, and chemical manufacturers. Derbyshire, Durham, and Yorkshire are the counties which produce more than others. The leadto abolish the quarantine system As a result which produce more than others. The lead-the Public Health Act of '96 was passed, by ing producers of sandstone are the counties

of Lancaster, York, Glamorgan, Edinburgh, and Lanark. North Wales supplies most of the slate. As to the persons employed at quarries under the Act of '94, these numbered 123,370 in '97, of whom 58,845 worked inside the excavations, and 64,525 outside. At these quarries in the same year there were 118 fatal accidents, which caused 123 deaths. The death rate from accidents of the inside workers was 158 per 1000, while the death rate of the persons at factories and workshops outside the quarries but connected with them was 46 per 1000 Forthe purpose of inspection of quarries, under the '94 Act the United Kingdom is divided into thirteen districts A list has recently been published, piepared by the Inspectors of Mines, by direction of the Home Secretary, which contains the names of the quarries, under the Quarries Act, 94, situation, names and addresses of owners, date of signature of special rules, number of persons employed, and kind of minerals obtained from the quarries

Quebec, a province of the Dominion of Canada It his scattward of Ontario, occupying both banks of the St Lawrence. Area, 344,050 sq m; pop 1,485,535, mostly descendants of original French colonists. There are 1,201,060; Roman Catholics in the province. Capital, Quebec, pop 63,000, a picture sque, imprignable for tress, with historic associations. Montreal, a splendid city, at the head of the St Lawrence navigation, is the chief scaport and the most populous town in the dominion, with 210,500 inhabitants. Other towns are St Henri, Hull, and Shicibiooka. Administered by a Licuit Governor and responsible Ministry. A Legislative Council of 24 members appointed for life by the Licuit-Governor. The Legislative Assembly has 7; members. Quebec has 24 stats in the Dominion Schate and 05 in the House of Commons. Primary education obligatory, fice, under local control. There are separate schools for Roman Catholes. Sec. BRITISH FMIRH (table), Canada, and Difformatic

QUEENSLAND.

Until 1859 the territory of Queensland was administered by New South Wales, but in that year it was raised to the dignity of a colony. It comprises the N E section of the continent, immediately N of New South Mustalia by 141st meridian of E long from New South Wales boundary to 26° S. lat, thence by 148th meridian to Gulf of Carpentaria. It is 1300 miles from N to S., and 800 miles from E to W, including 808,497 sq. m of area. Population, porarily stuated on the river Brisbane, pop 100,913, stuated on the river Brisbane, 500 miles N of Sydney; and is a thirving city, rapidly increasing, and provided with various excellent.

institutions. Other leading towns are Ipswich, Maryborough, Rockhampton and Townsville. Ihe colony is divided into three districts—Southern, Central, and Northern. In the first the bulk of the population icside, with 45 representatives in Palhament; the Central district has it representatives; and the Northern 16 representatives. The railways all run east and west, so that there is as complete an absence of communication between the districts as there is of similarity between the conditions of labour and of climate in them. There seems to be an opportunity for developing a most prosperous sugar industry in the colony if only it is attempted by a number of men on small plantations instead of on a large scale. The pastoral industry is very large, and there is a considerable amount of mining for gold carried on Executive vested in Governor and responsible Ministry. Parliament consists of two houses Council and Legislative Assembly Legislative I he former is composed of members, 41 nominated for life by the Governor on the advice of the Ministry. No hant is placed to the number of members, The latter has 7,2 members elected from 61 electoral districts for three years on a manhood suffrage basis. The members are paid £300 suffrage basis. The members are paid a year. The colony is represented in Federal Council of Australasia, but so far has take i no part in the proceedings of the Federal Convention The principal religious bodies are Church of England, Ko, ian Catholic, and Presbyterian. Valuable land grants were formerly made to these bodies, which they now retain free from taxation. Education is now retain face from taxation. Education is nee and in ectation, and is well provided for in every branch. Here are about 772 primary schools, with an average daily attendance of \$15,466 pupils. The chief exports are gold, wool, are about 2500 miles of rulway open Revenue. 90, £3,613,150, expenditure, £3,601,264, imports, 90, £5,47,191, exports, £0,01,557, public debt, £33,495,411 See Australia, British Empire 233,448,411 (table), and for Ministry, etc., see Dipromatic.

History, '98. The redetal Luabling Bill was laid before the Assembly by the Premier for second reading (Nov. oth, 197), but as he refused to assent to a proposal to divide the colony into three electroates for federal electrons, an amendment that the Bill be withdrawn was carried. The Premier (Sti. II. M. Nelson) accepted the presidency of the Legislative Council (April 19th), and the Cabinet was their reorganised, with Mr. Byrnes as Premier. The Budget statement showed an estimated revenue for the ensuing year of A₂A₂A₂A₃ and expenditure £3,806,500 (Aug. 19th). In consequence of the drath of Mr. Byrnes, the Hon. I. Dickson became. Premier and Chief Secretary, temporarily combining the Ministry of Justice with that of Postmaster General (Sppt. 19th).

From the above figures it will be seen that a very large proportion of the rulwa, mileage of the world is in the United States, and that, relatively to population, that country is far better supplied than any other of those owning large mileage, with the exception of British North America and Australasia. France has the next best supply per population, and then follow in order Germany, Great Britain, and Austria Hungary. Russia and British India, though they possess large initiage in the aggregate, are both very poorly served per inhabitants, and these great countries should in the Inture be able to support very many miles more. The greatest quantity of rathoad relatively to population is found in the Australian colonies. In West Australia, for instance, there are no less than 115 miles for each ro, comhabitants, but, on the other hand, the mileage per no square miles is so scanty as not to be

per 100 square miles 15 so scanty as not to be expressible in a mist decimal figure.

The railway system of the United Kingdom, on the 31st, 67, nach, according to the Board of Frade returns, a total extent of 21,113 miles, the mileage for the three countries separately being Lingland and Wales, 14,518; Scotland, 4175, reland, 4168. Of new lines opened completely in '98, perhaps the most important is the Highland Company's new direct line between Parth and Interness the direct line between Peith and Inverness, the final portion of which, from Daviot to Inver-ness, a distance of 11 miles, was brought into use on Nov 1st. The new line leaves the Company's old main line at Avieniore, and the portion between Avience and Daviot, 2 miles, was opened last ven, and has been worked is a branch. Now that the remaining portion is finished, it is being worked as the main line in place of the present circuitous route cia Portes and Narri, and thus a saving of 26 nules in distance, or about one hour in time, is effected on the through journey between Inveness and the South - The works of the new her are very heavy, and it has been under construction for no less than fifteen years Another newly opened line in the north of Scotland is the Cruden branch of the Great North of Scotland Railway, opened on Aug 2nd, 97, facution of which was accidentally omitted from our 'azed This line leaves the Company's Buchanline at I llon (romiles north of Aberdeen). and runs in a north casterly direction until it strikes the beautiful Ciuden bay, where the Company is creeting a large hotel to be opened in 99. Thence the line proceeds northwards through the famous Peterhead deposits of red granite to its terminus at the fishing village of Beadam Other new lines opened in Scotland in 98 are the East File Central (from Cameron Bridge to Lochty), and the Aberlady and Gulline Railway, both constructed by the North Entish Company Next to Scotland, in point of new radway openings in '98, comes the South west of Lingland, where the Lynton and Burnstaple, 25 miles, the Holsworth and Bude, 11 miles, the Lambourn Valley, 1.3 miles, and the Mailborough and Grafton, 7 miles, have all been opened in '98 The Lynton and Bainstaple, and Lambourn Valley, are local lines, constructed and worked by independent companies, the one having a connection with

the South-Western and the other with the close to the Market Place. Great Western system. The Mailborough and commodious hotel is also in co Grafton is a link line consolidating the system of the Midland and South-Western Junction Railway Company, whose traffic is principally between the Midlands and Southampton. The Holsworthy and Bude line is the undertaking of the South-Western Company, which Company has also recently opened a new branch line of 6 miles to Budleigh Salterton, a seaside place in South Devon, and wile shortly extend this to Exmouth. The same Company, too, on Oct. 12th, '98, laid the coping stone of its new deep-water quays at Southampton Docks In Norfolk and Suffolk the Great Eastern Company and the Midland and Great Northern Joint Committee have united to construct a system of new railways for further developing the seacoast, the first portion of which, from North Walsham to Mundesley, 52 miles, was opened on July 1st, 98 On the same day the Great Fastern opened a new station, with a connecting railway more than a mile in length, at Felixstowe. On April 4th, '98, the Great Northern opencid a further portion, smiles, of its Leen Valley extension in Nottinghamshire, which is eventually to connect with the Lancashire, Derbyshire and East Coast Railway at Langwith, and the London and North-Western Langwith, and the London and North-Western has added two additional lines to its Trent Valley line for a distance of it miles. The Cawood, Westow and Selby line, 4i miles, was opened by the North-Eastern in '98, and in connection with the same system a branch line, 4 miles in length, constructed by an independent company, has been opened from (hathill to North Sunderland Some important electric lines have been opened during the star, including the Laxey and Ramsey (Isle of Man), rod miles, the Fleetwood and Blackpool, io miles, and an extensive system in the neighbourhood of Stockton-on Pees London's second underground electric railway, the Waterloo and City, 11 miles, was opened in August, and the opening of the Central London August, and the opening of the Central London is expected next year. An extension of the City and South London northwards is well in hand, the Baker Street and Waterloo has been commenced, and a "Great Northern and Strand" line is projected

An addition to the railway mileage of the United Kingdom far larger and more impor-tant than any of those recorded above is that made by the Great Central Company's new trunk line from Annesley to London, 92 miles in length, which was opened for coal traffic in July 98 Its complete opening 15 to take place in the course of '99. Starting at Annesley (about 10 miles north of Nottingham), where large sorting sidings have been laid out, the new line crosses over the Great Northern and Midland Railways at Linby, and runs on to Hucknall Town, the first station. Stations are also being provided at Bulwell, Basford (Haydn Road), and Carrington Between the latter two stations the line is in tunnel, called the Sherwood Rise tunnel, 662 yards long Immediately south of this the Mansfield Road tunnel-1188 yards long-commences, which emerges into the site excavated for the Central

A large and commodious hotel is also in course of erection here The goods yard at Nottingham, where a large goods warehouse is being erected, is situated between Kirk White Street and the situated between Kirk White Stieet and the river Trent Stations are also being elected at Alkwright Street (Nottingliam), Ruddington, Fast Leake, Loughborough, Quorndon and Woodhouse, Rothley, Belgrave and Birstall, Leicester, Whetstone, Ashby Magna, Lutterworth, Rugby, Willoughby, Charwelton, Woodford, Culworth, Helmdon, Brackley, Finmere, Calvert, and at Marylebone Road, London, The passenger station at Leicester extends The passenger station at Leicester extends from Talbot Lane to Soar Lane, and the principal entrance to the station will be from a new road, so feet wide, which the Company are constructing from Soai Lane to Sycamore Lane. The station has a commanding position, and will be very convenient. The goods yard is being laid out on the Bedehouse Meadows, where an extensive goods warehouse is being built. The access to the station at Rugby will be obtained from Hillmorton Road, one of the principal thoroughlares of that town. In addition to the passenger station at Woodford, large sorting sidings are being laid down, and short branch lines have been made forming a connection with the Last and West Junction connection with the Last and west junction Railway, which will open out a new route to Stratford-on-Avon and other places. Large hydraulic and cleetric lighting plant are being provided at Annesley, Nottingham, Leicester, Woodford, Neasden, and London. The sorting addition. A Notable, use of most present places. Woodfold, Massian, and London The sorting sidings at Neasden are of an extensive character. The tunnelling under Lord's Cricket Ground, st John's Wood, for the new line, was completed in March, 97, and the three tunnels which the Company were inder agreement with the Cricket Club to cover over have been entirely hidden from the public view by a been carriery midden from the public view by Jayer of earth which has been turfed over, and leased to the Club by the Railway Company. Inc large area of land which belonged to the Clergy Orphan Corporation has been acquired by the Company and handed over to the Cricket Club, so that not only has the Club suffered no damage whatever by the advent of the Railway Company, but it has actually obtained a considerable addition to the ground. The coal traffic in London is being dealt with on a site between Grove Road and Carlisle Street, lying to the rear of Edgware Road, and absorbing the property between Luton Street and Orcus Street on the north, and Samford Street on the south. The Regent's Canal, opposite the goods station yard, has been widened to a minimum. width of 100 feet, to enable barges to turn with ease. A large transit shed is here being erected, and extensive sidings laid down, to be used in connection with the traffic to be barged along the canal to the docks on the Thames. The goods warehouse at the I ondon terminus is being built on the most modern principles. About 6500 tons of steelwork have been used in its construction. The passenger station, which is being constructed of red brick, will have a frontage of 325 ft, and will contain dining and refreshment rooms, and the usual emerges into the site excavated for the Central companies. Iwo large island platforms, with bay platforms at the end of each for the local train services, are being constructed for this being constructed for this station, which is in the centre of the town, ploaching completion, in front of the passenger

station in Marylebone Road, should be a source of considerable attraction to the new route.

In addition to taking a half-share in the construction of the Nottingham Central Station, as mentioned above, the Great Northern is constructing a junction line through that town This will enable it to run express trains through Nottingham, and thence, by its running powers over the Great Central, to Sheffield and Manchester, thus providing itself with an alternative route to the present one via Retford, by which the joint traffic of the two companies has hitherto been conducted. The Great Northern has already begun to carry on its goods traffic with Manchester and the northwest independently of the Great Central, having opened on July 1st, '98, a portion of the very large goods depot which it is electing in the centre of Manchester, and having also set up its own separate organisation in other important places in this district whose traffic it previously obtained through the agency of the Great Central

Besides the very large works connected with the construction of this new trunk railway, there have been many important new lines under construction during '48 I he North-The North-Western still proceeds with its two great works mentioned in ed '97, viz —Asliboui ne to Paisk y | Hay, 13 miles, and Heaton Lodge to Wortley, | 14 miles, the one to provide a new route between the Midlands and Manchester, and the other a new route between Huddersfield and Leeds This Company is also constructing a new viaduct over the river Dee The Great Western's short-cut line to South Wales (from Wootton Bassett to Patchway, 30 miles), and its Wootton Bassett to Patchway, 30 miles), and its new route to Weymouth and the west of England afrom Stert to Westbury, 14 miles), continue to make good progress, and the latter is expected to be completed next year. The Midland partially opened on Nov 14th its Kentish Iown widening (1½ mile) and its new London coal depôt; it is pushing on with its harbour and railway works at Heysham, Lancashire, and it has taken in hand an important new line between New Mills and Hauton Mersey. between New Mills and Heaton Mersey, 10 miles in length, to improve its route to laureashire Both the Great Northern and North-Eastern have short extensions in hand to Hunslet, a manufacturing suburb of Leeds The South-Western has just started on its Meon Valley (Alton to Farcham) line, which is to extend 25 miles through an undeveloped part of Hampshire, and it is also constructing a link line, 8 miles, from Alton to Fainham, and a light railway, 12 miles, from Alton to Basing-stoke The North Cornwall Company's line when completed, be worked by the South-Western The Brighton Company's new line from South Croydon to Parlswood, to replace running powers over the South-Eastern, is expected to be completed shortly The Southexpected to be completed shorty. The Soudi-Eastern is enlarging Folkestone harbour. The Great Central is enlarging its Sheffield station and extending Grimsby docks. The North British's great improvements at Edinburgh are approaching completion, and it has also in hand a new dock at Burntisland, and an extension of the West Highland Railway from Banavie to Mallaig The Glasgow and South-Western is building a new bridge over the Clyde, and the Caledonian has just started a new dock at Grangemouth The Highland is parcel rates. The North-Eastern started a doubling its main line for 184 miles north of new express service between Sheffield and Blair Athol. The Belfast & North Counties is Edinburgh, and a new service between York

about to open an hotel at Belfast, where it has just completed other extensive improvements. Of new railway schemes authorised in '98, by Rosslare scheme, by which the Great Western and the Great Southern and Western of Ireland Companies propose to establish a new shortcompanies propose to establish a new since sea route between England and Ireland. The works authorised include a new harbour at Fishguard, in South Wales, an improved harbour at Rosslare, and a new line from Rosslare to Waterford, with a bridge there over the river Sun In connection with this scheme the Great Southern and Western proposes to absorb the Waterford and Limerick and Central Iteland Railways, if Parliamentary sanction can be obtained. The Great Western has also obtained powers for a new harbour at Weymouth. The Milland has secured sanction for new lines (19) miles) in the West Riding, which will give it a new direct route to the North through Bradford, avoiding the existing loop viá Leeds The North-Western's Act included a deviation line, 8; miles, at Shap, in Comberland, and an conlargement of Euston terminus, the Great Northern's, an extension (20 miles) of its En-fields braich to join the main line again at Stevenage, and so make a new loop line to the North, the Great Central's, a suburban line to Roth, the Gritt Centary, a standard the to serve South Harrow, Sudbury, and Wembley. The North-Eastern was authorised to absorb the Scarborough and Whitby Railway (202 miles), and the Great Eastern to make a line, 6 miles long, from Woodford to Hford The Glasgow and South-Western was empowered to enlarge 5) Frioth's Station, Glasgow, and the approach lines thereto, and the North British to construct a link line (rol miles) from Dunfermline to Kincardine

In providing improved facilities for travel and ransport all the leading companies were more or less active in '98; but again, as in '97, the most important work was done by the London and North-Western This company's day express service, London to Dublin, was accelerated by an hour and a half, and the time of departure from Euston is now if a m instead of 9 40 as formerly, the arrival time at Dublin icmaining the same-viz, 8 30 p.m In the opposite direction the day express service was accelerated by an hour The day Irish mail was also quickened by nearly an hour in each direction To the 10 am Scotch express in both directions luncheon cars for both classes were attached The service to the North Wales coast watering-places was considerably im-proved, and a new through express service was established to Llandrindod Wells and other watering-places in Central Wales New breakfast-car trains were put on from Liverpool and Manchester to London, and the service with these places was quickened and otherwise improved Breakfast cars for all classes of passengers are now run upon the 545 Belfast boat train, Fleetwood to London The Midland Company commenced rebuilding their express rolling stock on an improved pattern, the interrors of the compartments being much larger and more arry than those in general use, and placed new duning carriages on several of their services. They have also extended their Winter tourist and week-end fares to most of the chief holiday resorts, and lowered their parcel rates. The North-Eastern started a new express service between Sheffield and and Belfast, via Newcastle, Carlisle, Stran-raer, and Larne, the latter connecting by the Great Northern line with London. The Great Northern and North-Eastern also joined hands to run a "Wilson Line express" between King's Cross and Hull. The Great Cential added to its stock some beautiful new corridor trains, with dining and luncheon cars

As regards the southern lines, the Brighton Company, under its newly appointed general manager, Mr | 1 S Gooday, started a special bunday service between London and Brighton, covering the distance in an hour each way, and further improvements are likely to follow. Still more important reforms are likely to accrue. from the great change which took place during the year in the relationship of the South Eastern and London, Chatham, and Dover Companies. These are in the tuture to be worked as one concern, so far as regards competitive traffic, under the management of a joint committee of the two boards, of which Mr. Cosmo Bonsor, M.P., is chairman, and Mi. Alfred. With general manager, Mr. | S. Foibes, the late chairman of the Chatham, having consented to be relegated to a consultative position. As regards improvements in Scotland there is not much to be said, but in Ireland the development of touristicatic by means of new facilities and improved accommodation made much progress, particularly in the matter of hotel accommodation The London and North-Western opened a very large hotel at (accnore, the Great Northern of Ireland opened a new ho'el at Wairenpoint, and took over the management of the Mourne and Woodside hotels at Rostrevor, while the Belfast and County Down completed the Sheve Donard Hotel at New castle. The (neat Northern of Ireland was also very active in improving the comfort of travelling on its line by incars of breakrast, luncheon, and dining cars, and by the installa-tion of the electric light. In connection with the Fishguard and Rosslare scheme already mentioned, a joint committee of the Great Western and Great Southern & Western of Ireland took over on November 1st the Waterford, Dungarvan and Lismore, and Fermoy and Lismore lines, and has equipped them with

up-to-date rolling stock.

A new code of bye-laws was framed by the solicitors of the various leading railway com-panies, and in June last was submitted to the Board of Irade by the North-Eastern Railway Company. The other companies will await ! developments, and if the North-Lastern secures the assent of the Board to its proposals, they will in their turn submit identical ones, each for itself Improvements are introduced into many of the clauses Progress was also made. in the promotion and construction of light rail-wars under the Light Railways Act, 96 (for Origin and scope of which see previous eds.)
The first report of the Commissioners appointed under this statute was issued in March '98, and from this it appeared that up to the date covered by the report-the end of '97--

sittings in all parts of the country, and given their approval to a large number of other schemes l'p to May '98, when the last list of applications was published, the total number of schemes promoted under the new Act was 123, and a goodly number of others are being framed as this article goes to press. But a considerable proportion of the applications have failed to win the Commissioners' approval and of those sanctioned a good number will probably not be carried out, so that the success of the new Act, great as it undoubtedly has been, is not really so important as might appear at first sight. Moreover, the economy of the new method of promotion has not proved so marked as was hoped for by its originators, and various knotty points have arisen in connection with it, the most important being whether or not urban transways should be promoted under the Act The construction of several of the lines sanctioned have already commenced, and more than one will probably be opened for traffic in '99

II BRITISH RAILWAYS AS INVESTMENTS FOR CAPITAL.

The paid-up capital of the railway companies of the United Kingdom reached the stupendous sum of over Lipoto,000,000 at the close of '95, and at the end of last year it exceeded that amount by meanly Loo,000,000, making the cost amount by meanly gorgosopore, making the cost out tailways nearly (50,000 per nule. Of this total, however, over (152,000) epresents merely nominal capital, 1,e additions made on the consolidation, conversion, and division of stocks, bit, even after allowance for this has been made, the result arrived at proves that British railways have been very far above the average in costliness - that, indeed, they have ost nearly double as much per mile as the lines of the rest of Europe, and nearly four times as much per mile as radivays in other parts of the world. Moreover, owing to the large sums which are constantly bying spent by the compames, particularly in London and other large towns, from which no addition to mileage

towns, from which no addition to inheage results, the sum laid out per mile increases year by year Such being the abnormal and increasing costliness of railway construction in the United kingdom, one would not be surprised to find that a large part of the capital sunk therein yielded no return to investors, and that this is true of little more than ½ per cent, of the whole prepares us to find that the companies enjoy a very large and constantly increasing revenue. The official returns, during the forty years over which they extend, show an almost uninterrupted growth under the head of "gross concurrently of course with, but receipts, more than in proportion to, the increase in mileage worked. The gross receipts for '97 reached the very large total of £917 millions, showing the very satisfactory increase of 4,6 millions, or 4 per cent over the total for '90 I o this increase passengers, goods, and miscellaneous have contributed their share, the date covered by the report—the end of '97-' (ellaneous have contributed their share, the orders for five light railways had been ap- increase in the "miscellaneous" receipts being proved by the Commissioners and confirmed to the Board of Trade—12, the Basingstoke of '96, but contrary to that of several years and Alton, Fast and West York-hire Union, immediately preceding, each branch of the Potteries, Hadlow and Wrington Vale Four passenger traffic increased in '97. As regards this date awaiting the Board's confirmation, this date awaiting the Board's confirmation, dafer a decrease from '90 to '94, have sufficed and during '98 the Commissioners have held

had been reached any time during the ten years preceding The change in the tendency of second-class receipts has been even more noticeable, the increases of '96 and '97 having made up so much of the leeway of the preceding six years that the total for '07 was only a small amount less than in '92. The explanation of this is that the movement for the abolition of the second-class has ceased, and given place to the policy of encouraging that class by reducing its scale of fares more nearly to the level of third. Coupled with the increase in first and second-class passenger traffic, an increase of second-class passenger traint, an intrease serial fairly average proportions was registered in '97 in the season-ticket takings. The bulk of the increased passenger revenue, however, was, as usual, derived from third-class traffic. under which head there have been gains of greater or less amount year by year since '85.
The total gain from that date to '97 has been £8,000,000, or at the rate of £666,000 per annum, and the increase in '97 was a little above this average, although less than that of several individual years. The receipts from third-class passengers now amount to over three-fifths of the total passenger revenue. The increase in the goods traffic revenue for '97 was at the same proportionate rate as the passenger traffic increase. Under the heading of "minerals" the gain was larger both in amount and proportion than for '6, and considerably in excess of the average for the previous inne years. The increase in "general merchandise," though less than that for '96, was also in excess of the average for the past nine years, but these have usiness. The decreases in "hive stock" traffic which occurred in '95 and '96 were arrested in '97.

Turning now to the other side of the account, we find that the total working expenditure of the companies showed an increase in '97 larger both in amount and in proportion than any which has occurred for several years, with the result that the proportion of expenditure to receipts, after having stood at 56 per cent for the three previous years, was raised in '97 to 57 per cent. This is the same level as that reached in '93, the year when revenue suffered so much from the great coal strike, and it is the highest yet recorded. Moreover, the 50 per cent. of '94, '95, and '90 was itself in exciss of the mean of the percentages of the previous decade; so that it appears that the cost of railway working has not only been permanently raised during the last few years, but that it tends still further to increase. Much of the gross increase of expense is, of course, due to increased business, but, whereas the increase which occurred in '96 was very largely the outcome of satisfactory business conditions, it was not so much so m'o7. In other words, the companies in '07 spent more money, on the whole, to earn the same amount of revenue. To a large extent this increase of expenditure. is outside their own control, particularly in the department of wages, advances in which have been necessitated by the operation of the Act dealing with the hours of railway servants, the agitation of the men's unions, and the additional facilities demanded by the travelling public. From these causes the wages bill may be expected to go on increasing in the near future. An increase in the items of rates and taxes also continues year by year, though perhaps at a less rate than a few years ago. In '97, also,

there was a substantial increase in the amount paid for fuel, in which item a reduction had occurred in each of the five years ending with 36. This increase may be expected to be much greater in 36, owing to the Wish coal strike.

From the above it is evident that the railway shareholder has little to hope in the near snareholder has little to nope in the near future from diminution of working expenses, but that, on the contrary, he has to fear a further increase in this department. Never-theless, thanks to increasing gross receipts, the net earnings available for distribution as dividends seem likely to increase sufficiently to keep pace, on the whole, with the constant additions to real capital. The figures for '97 showed, it is true, an apparent decline in the proportion of the net earnings to total capital from 188 per cent, the figure for '96, to 37, per cent, but this was largely, if not entirely, due to the large nominal increase of capital made during the year, the ordinary stocks of the Midland and Glasgow and South-Western companies being divided in '97 into "preferred" and "deferred" stocks, in such a way as to double the amounts while reducing the rates of dividend. The figures for '98 are sure to be of dyldend. Inc ngures for 90 are sure to be adversely affected by the coal strike in South Wales, from which the Great Western and some of the Welsh companies have suffered those serving the Northern and Midland coal-fields, have done unusually well, and generally the traffic returns have been satisfactory, but no marked improvement in the profitableness of railway business can be expected to be shown by the returns for '98, indeed, it is very doubtful whether the status quo has been preserved

III. RAILWAYS AS EMPLOYERS OF LABOUR.

The iclations between the railway companies and their employes have, on the whole, been less disturbed during '98 than seemed probable at the end of the previous year. In ed '98 we chronicled the presentation to the companies by the Amalgamated Society of Railway Scruants of a "national programme," embodying the men's demands, replies being asked for by Nov 10th, '97. Most of the companies sent only formal acknowledgments of this ultimatum, and the Society, much disappointed, threatened a general strike at Christmas, if more attention were not paid to the men's grievances. Ultimately, however, Mr. Bell, the secretary of the Society, contented himself with appealing, on Dec 31d, to the Board of Irade for its intervention, ''so that the disaster of a general strike might be averted.'' Sir Countenay Boyle prompily replied, on behalf of the Board, definitely declining to intervene, and pointing out that "any attempt to force the claims of the men by a strike would be entirely inconsistent with the exceptional position secured to the men by the Legislature, and would show an entire disregard of the convenience of the travelling public.' This severe rebike quite put an end to all talk of a general strike in England, and the Society fell back on other methods of pressing its national programme on the attention of the companies. In Ireland, however, the situation had become more acute, strike notices having been actually served upon the Great Southern, and Midland Great Western Companies, and, although these

were withdrawn, an actual rupture was not were withdrawn, an actual rupuner was not averted, though fortunately it was confined to a small arca. On Jan 24th, '08, 350 men came out from the service of the Cork, Bandon & South Coast Railway, this extreme step being precipitated by the alleged "victimisation" of a signalman. The tradic of the system was much impeded, but not paralysed, the loyal portion of the staff working devotedly. The strikers, having obstinately refused an offer to jeturn before the end of the month, which served with summonses, both for breach of contract and for impeding the traffic of the railway Some of the mengot off the penalty asked for on the ground of not being manual I. bourers, but cight of them- four guids, two shurters, and two signalmen-were sentenced each to two months' imprisonment without the option of a fine a great blow to the Society, which had assured them that a fine would be the extreme penalty. A disgraceful meident in this strike was a fortunately unsuccessiol attempt to wicck was nortunately unsuccessivate in pero wice, the Cork mail by the displacement of rails at Frankfield on March 20th Soon after this the strike began to break down, the directors having agreed to register trikers many as apprents for reinstatement, and by May'r the applicants for reinstatement, and by May the affair was at an end. Meantime a somewhat similar rupture of a more local character had occurred on the Midland Railway at I cods and occurred on the Midland Railway at J ceds and Sheffield. On March 21st so I ceds men left work, the occasion of their coming out being, as in the other case, the alleged 'victorisa-tion' of one of their number. On the 4th about 186 Sheffield men struct in sympathy, and on the same day a number of Legeste. men came out, but only stayed out three hours On the petition of the Secrety the Midland directors decided to registrate the Sheffield men, but declined to do so in the Leeds case whole affair was subsequently claracterised by the Society as a "blunder", and the Society may also be said to have condemied the Trish strice by dismissing its firsh scrictar, at its annual congress, held it Leeds in October in At this congress an amalgamation was effected between the Amalgamated Society and the Railway Workers' Union - After the severe purishment imposed upon the Cork men for impeding railway traffic by leaving their work abruptly, it is not it all likely that still is will be resorted to hastily by rails is workers in f be said to have marked a decided step in the direction of peace. Moreover, the companies have done much during the year to conclude then men by granting improved conditions of service, and that legitimate grounds of guev ance on the latters' part have dominished in recent years is proved by the falling off in the number of cases with which the Board of Irade has had to deal under the Railway Servants For the year (Hours of Labour) Act of a as compared with a dealt with it the pictions year. It is also worthy of note that the men have never carried a case beyond the Board of I rade to the Railway Commission, though the Act gives them the right to do this, and the Board of Trade is quite withing to assix in such an appeal. During the year the Amalgamated Society has made some strong complaints to the Board of Irade as to the "victimisation of men attached to the Society, and a list of such alleged cases has been furnished to the Board, but without any practical results at present.

Rainy, Robert, D.D. (Glasgow and Edin.), b. in Glasgow 1526. Ed. Glasgow University, graduated M.A. '43. Having joined the Free Chuich of Scotland, he studied theology at New College (Edin.) '45 (Ed Church of Scotland, he studied theology at New College (Edm.) '41 to '48. Ordained minister of Free Church, Huntly, '51. Elected to Free High Church, Fedinburgh, '54; Professor of Church History, New College, Edmburgh, '65; Principal, 74. Dr. Ramy takes the first place or Scotland as an ecclesiastical statesman and an scottand as an ecclesiastical statesman and tader. His chief works are "Three Lectures on the Church of Scotland" (72), "The Delivery and Development of Christian Doctrine (74), "The Bible and Criticism" (78), and "Epistle to the Philippians" (92) Address 28, Douglas Crescent, I dinburgh

Ranavalona III, the late Queen of Madagastai, was b in 1861, and succeeded Queen Ranavalona II in Fig. having been nominated by her as the future Queen. She married the Prime Minister, Ramiliaarivony (deposed in 55 and eccased in 56) soon after ascending the throne. She was crowned in Nov Fig. Her kingdom and capitil were taken by the French in second the country was made a funching and the country was made a funch in 95, and the country was made a French colony. In 97 she was exiled to Reunion See MADACASCAR

Rayleigh, Lord. See under Prirage.

Recorder of London. See London Cor-PORATICA.

Record Office, Public The public records and state papers are preserved in this office, which is situated between Chancery Lane and Fetter Lane Previous to the erection of this building they were stored in the Chapter-house of Westmenster Abbey, the Tower, the Rolls Chapel, the State Paper Office, and the Queen's Remembrancer's Office Among the more interesting books at the office is the Domesday Book of William the Conqueror A Record A Record Commission was established in 1800 to search the records, examine their state, and publish such of them as they thought of sufficient Then first publication was made in interest rion and the series is being continued under the direction of this Oline. The Master of the Rolls was made kept of these records in risk, when this public department was first constituted. There are public search rooms at the Office, where the records and state papers can be consulted by historians and others

Referendum A system of legislation which consults all the electors of a tate as to whether new laws shall be confirmed. In some cantons of Switzerland a method resembling the reterendum has been practised since the sixteenth century. The present form was adopted in the canton of St. Gallen in 1830. In '48, in spite of Conservative opposition, the referen-dum was, by the action of the Radicals, in-corporated in the Swiss Federal Constitution, and in 74 its application was extended. In all the Swiss cantons, except Freiburg, the reterendum is now established. According to the Swiss, Federal Constitution, all constitutional amendments must be ratified by the Swiss electorate before they become law. Other measures must be submitted to the popular vote, it demanded within minety days after their publication by 30,000 voters, or by the governments of eight cantons. During the seventeen years 74 to 91, out of one hundred and forty-nine laws, twenty-seven were referred to the people, of these fifteen were rejected. The referendum has worked so well

that it has conquered all opposition to it, and In the above three classes of occupiers the it is now generally regarded as a check on hasty and class legislation. It will be observed that the essence of it is that it submits to the people a single and clear issue upon which they may give their decision. There exists also mass of the electors, and it is not necessary that a demand for this submission to the electors should be made In Great Britain what may be termed a kind of local referendum with regard to the "Adoptive Act," was set up by the Parish Councils Act of '04. Fire reis a growing demand in the United States for the great all the distribution. the general introduction of direct legislation by means of the referendum

REGISTRATION, PARLIAMENTARY.

The right to vote in the election of a member of Parliament is confined to those adult males whose names appear on the register of voters in force for some county or borough. Most of the law as to the compilation of the register and the qualifications for enrolment thereon is contained in some fifty or sixty Acts of Parliament, but these are subject in some measure to the principles of the common law, and hable to alteration in several particulars by Order in Council. Ihe following sketch may afford a good general idea of the different classes of males of full age who are entitled to be registered There are, besides those set out below, some ancient franchises, such as those enjoyed by the liverymen of the City of London No man can be registered who has within the twelve months preceding July 15th received parochial assistance other than medical relief or who is an alien. In counties the qualifications are as follows Freehold of inheritance or by purchase of the clear annual value of 405 and upwards liechold for life must be of the clear annual value of 45, unless the same comes by descent, marriage, devise, or promotion to any benefits or office, in all which cises tos clear annual value is sufficient. Freeholders by purchase are required to be six months in possession previous to July 15th, by descent, etc., no length of possession is necessary. Copyhold of the clear annual value of £5 of upwards Copyholders are subject to the same terms of possession as freeholders Leasehold, if created originally for a term of not less than sixty years, of the clear annual value of \(\frac{1}{2} \) or upwards, if for a term of more than twenty, but less than sixty years, the clear annual value must be \(\frac{1}{2} \) or \(\frac{1}{2} \) \(\frac{1}{2} \) Descent than the clear annual value must be \(\frac{1}{2} \) or \(\frac{1}{2} \) Descent than the clear annual value and \(\frac{1}{2} \) or \(\frac{1}{2} \) descent than the clear annual value and \(\frac{1}{2} \) or \(\frac{1}{2} \) descent than the clear annual value and \(\frac{1}{2} \) or possession previous to July 15th, by descent, etc , no length of possession is in cessary sons qualified in respect of any of the foregoing qualifications must send in their claims to the overseers on or before the 20th of July - Counties and Boroughs Occupation as owner or tenant of any land or tenement of a clear yearly value of not less than ten pounds Occupation as owner or tenant of any dwelling-house. The term "dwelling-house" includes part of a house in which the landlord or

occupation need not be of the same premises, but may be of different premises, occupied in immediate and unbroken succession in the same constituency. Occupation as lodger of any lodgings of a clear yearly value, if let an Obligatory Referendum in eight Cantons, unfurnished, of the Successive occupation where every law and every expenditure beyond its also allowed in the case of lodgings, but a fixed maximum must be submitted to the int must be from one part to another part of the same house Ir all cases of occupation, whether as owner or tenant, servant or lodger, twelve months' occupation is required up to the 15th day of July in any year Occupars need not send in claims unless they find that their names are omitted from the list published by the overseers on the 1st of August, or that in the entry on such list there be a misdescription of some essential particular or particulars, and in case of such omission or misdescription they must send in their names to the overseers on or before the 20th of August Lodgers must claim every year, and when claiming for the first time must send in their claims to the overseers on or before the 20th of August The revised register comes into operation on the 1st of January in each year.

Any person whose name appears on a list of electors may object to the name of any other person appearing therein Written notice of such objection must be given both to the overseers and to the person objected to On a given date the overseers publish a list of the names of all persons who have sent in claims or have been objected to Copies of all the or nave been objected to Copies of all the lists that have been published are then for-warded by the overseers to the clerk of the peace of the county, or (in the case of municipal boroughs) to the town clerk. He prepares an abstract of such lists of claims and objections, and transmits it to the requirem benefits. austract of such 11sts of claims and objections, and transmits it to the revising barrister for his district. Revising barristers are appointed every year, for London and Middlesex by the Lord Clinef Justice, and for other places by the senior judge of assize. The barrister so appointed makes a circuit and holds open court for the revision of the list in each borough and at or near every polling place in the county The clerk of the peace, or town clerk, and the overseers, must attend. The revising barrister has power to examine witnesses on oath, to hear claims and objections, and to oath, to hear claims and objection, and to insert or omit names as he finds just An appeal hes from his decision to the Queen's Bench Division of the High Court, but no further appeal is possible without its express The list of voters as settled and signed by the revising barrister is sent, in the case of a county to the clerk of the peace, who must have it printed in a book and delivered to the sheriff, in the case of a borough to the town clerk, who must have it printed in a book and delivered to the town clerk, who must have it printed in a book and delivered to the returning officer. The clerk of the peace or town clerk must keep printed copies of the register for sale at a fixed price. The register is conclusive evidence that the persons therein named have the qualifications annexed to their respective names. (For further information on the subject see "Rogers on Registration") In the case of part of a house in which the landlord or any person not having his name on any list of superior tenant does not reside. When he does reside, his under-tenants are held to be objection, he should apply to the registration lodgers. Occupation by virtue of any office, agent for his district of the political party to service or employment, of any dwelling house, which he belongs. Such agents are appointed which is not tubobled by a recognized to the political party to service or employment. which is not inhabited by a person under whom | and paid by the various party organisations in such office, service or employment is held most constituencies, and make it their business to know the intricacies of the law on the

The number of registered electors for the United Kingdom was in '98 returned at 6,528,629, of whom 4,817,278 were in England, 289,829 in Wales, 664,095 in Scotland, and 720,312 in Ireland. The grand total of lodgers came out at only 130,783, \$8,296 being in the countres and 101,487 in the boroughs. The number in some of the large constituencies was quite insignificant. For Registration (Ireland) Act. '98, see 51 5510N, sect 63

Reid, Sir Wemyss, was b at Newcrette-on-Tyne 1842. Beginning journalistic life at the early age of cighteen, in 64 he became editor of the Preston Guardian, and (70 to 80) editor of the Leids Mercury, which he conducted with so much ability that it speedily tarked as one of the most influential provincial newspapers Sn Wemyss Reid has written several highly successful books. His monograph on "Char Gaskell's "Life 'His novels "Gladys Fane and "Mauleverer's Militons" have commanded and "Manuscreer's Millions have commanded a very wide circulation." (Cabinet Portraits." and "Politicians of Fo-day," are telling sketches of leading statesmen. He has also written lives of the Right Hon. W. F. Forster, of Lord Houghton, and of Mr. Gladston. In '87 has accounted the programment of the programment of the programment. Lord Houghton, and of Mr Gladstone. In 87 he accepted the pos tion of general manager to Messrs Cassell & Co., Limited, and in 90 he ame editor of the Sycaker 11 on LL D St. Andrews, 92 in 98 he was elected President of the Institute of Journalists. He was kinghted in 94. Addies 6. Bramhain Gardens, London, S.W.

Reid, The Right Hon G H, Premier of New South Wales, was b at Johnstone, Ren-trewshire, 1845, and is the son of a Presbyterian minister minister. His parents went to Melbourne in 52, and to New South Wales in '9 Mr. Reid embarked upon a legal career, and was called to the New South Wales bu, but soon entered bythics, and was elected as member for East bythic in 80 In 83 he was appointed Minister of Education, and rapidly advanced his influence with his party. He is an enthi-siastic free trader. When Sir George Dibbs ministry was overthrown in 94, Mr. Reid, who had been leading the Opposition since or, was made Premici, the Governor, to the surprise of many, calling upon him instead of upon Sir Henry Parkes The country emphatically endorsed Mi. Reid's free trade and progressive policy, and at the '95 general election gave him a big majoricy to carry it out. He visited Fingland for the Jubilee celebrations in '97, and was made a member of the Privy Council In 98 he became () (His attitude towards the

Federation question is discribed under New South Walls, History, 98. Religious Tract Society, The (instituted 1799), has for its object the circulation of religious books and treatises throughout the British dominions and foreign countries. The Society has published in 220 languages and dialects The business is conducted by a committee chosen annually in London, and consists of four ministers and eight laymen, and of six trustees, half the Committee being members of the Church of England and the other half Nonconformists The Society has in its catalogue some 4000 separate tracts and hand-

bills, books, etc., for adults, besides books and tracts for children. The well-known Lessure Home are published by this Society, as well as the Boy's Own Paper and the Girl's Own Paper. Circulation of the Society's publications for '978, 50,000,300. Income for 97-8, from subscriptions, donations, etc., £21,622 tos 2d., including part payment from recipients of grants, £6307 tos. 5d. payment from recipients of grants, Losoy ros. 5d. Restitution of Conjugal Rights may be brought for this purpose in the Divorce Division by either husband or wife, not being themselves guilty of a matermonial offence must be preceded by a request to the reconductor terms Conduction, couched in conductor terms. Until 84 a decree for restitution was enforced by imprisonment Since then, by virtue of an Act known as the Weldon Act, passed as a result of the suits of Mr and Mr. Welldon, such a decree results in monetary advantages to the petitioner, the respondent being compelled to settle portions of his or her property on the petitioner, and neither party can by imprisonment be com-felled to live with the other. A failure to comply with the decree is legal descrition and ground for a judicial separation, or, coupled with daltery for divorce. See Divorce and with adaltery, for divorce IL DICIAL STEARATION

Revenue Act, '98. See Sussion, sect. 85.

Rhodes, Right Hon Cecil, P.C., is a younger son of the late Rev. F. W. Rhodes, Rector of Lishop Stortford After taking his degree at Oxford (Oricl College) he went out to Africa, where he at first met with but little success However, when the De Beers mine (with which his name is now so prominently connected) was anything but prosperous, he combined various Kumberley mines under his direction, and amassed a large fortune. Cape politics attracted him, and he represented West Barkly attracted him, and he represented West Barkly for a short period, and held a position in the ministry of 5n 1 Scanlon. On the fall of the Spriggs Ministry, a new government, with Mi. Rhodes as Frime Minister, took office at the Cape (July 17th, 60). He remained in office from that time till Jan '96, when he resigned in consequence of the Jameson raid into the Jiansvaal. His gift of Lio,000 in summore of the cause of Home Rule in '91, when support of the cause of Home Rule in 'or, when he was in England, attracted much attention Mr. Rhodes was the prime mover in obtaining mining rights over Matabeleland and Mashonaland, and till '96 he was the Chairman of the British South Africa Company When the trouble with Lobengula began, in Sept '93, he went to lost Salisbury to direct the operations against him. His policy in this direction was warmly approved at the Cape, as was evidenced at a banquet given to him by the citizens of Cape Town in Jan. '94. Mr. Rhodes, in his speech of thanks, defended his policy,

Rhol

and sketched in outline the United South Africa which he hoped to see in the near future, covering all the country south of the Zambesi, one in the question of tariffs, of railway communication, of law, and of coinage, although possessing full local government in and ough possessing full local government in local matters. He was sworn as a member of the Privy Council in Feb '95. After resigning office at the Cape in '96 he visited England, and after an interview with Mr Chamberlain left for Bul iwayo, intending to devote himself to the development of Rhodesia. He took an active part in suppressing the Matabele revolt and in arranging terms of peace, although he gave up his managing directorship of the Company. In Jan '97 he came to England again, and gave evidence before the South Africa Committee, after which he returned to the Cape and again took up his work. Rhodesia, later on resuming his place on the Board of Directors of the Company. He took a leading part in the elections to the Cape Parliament during '98, and was himself re-turned for two constituencies. See Capi Colony and Rhodesta.

HODESTA.

Rhodesia is the name given to that part of South Africa which has been occupied of icent years by the British South Africa Company, acting mainly under the leadership of Mr. Creil Rhodes—It is bounded on the least by Portingness East Africa, on the west by Angola and German South-West Africa, on the worth by Guinan East Africa, and the the north by German Fast Africa and the Congo Free State, and on the south by Bechuanaland and the Transvaat. The whole nechanism and the Transval. The whole territory, covering an area of $\frac{1}{1}$ -spoons square miles, is administered by the British South Africa Company (q|v|), which was given a royal chaiter in Oct. 80. The river Zambest flows through it, cutting the region into two portions—Southern and Northern Rhodesia.

Southern Rhodesia consists of the two provinces of Matabeleland and Mashonaland Mashonaland is bounded on the porth by a line running roughly in a S.E. direction from Inc running roughly in a S.E. direction from Zambo, on the Zambea, to the intersection of the river Mazoe with 33° E. long, on the south-west by Matabeleland, and on the east by the Portuguese province of Lorenzo Marques. The capital, and the seat of government of Direction of the seat of the The capital, and the seal of government of Rhode sia, is Salisbury, with a population of 1800. The other principal townships are New Umtah, Melsetter, and Enkeldoom A rail way is being built, running inland towards Salisbury from Beira on the coast, and it is already sixtymiles beyond Unitah. Its completion will place Salisbury in direct communication with the sea over a line 382 miles in length It is then proposed to connect Salisbury with Bulawayo, The African Trans-Continental Bulawayo. The African Trans-Continental Telegraph Company has constructed a line between Umtah and Tete, and from there on Zomba, Fort Johnston, Kota Kota, or the western shore of Lake Nyasa, and Kalonga, at the north-western end of the lake. The survey onto Lake Tanganyika is practically completed The survey Matabeleland lies between the Limpopo and niddle Zambesi rivers, and is bounded on the north-east by Mashonaland and on the south by the Fransvaal and Khama's country. The Bulawayo has given an impetus to the mining principal town, and the chief commercial centre industry, and many mines have machinery on in Rhodesia, is Bulawayo, with a population in the ground. The crushings at the Geolong

of 5000. Telegraphic communication exists between Cape Town, Bulawayo, and Salisbury, and in the Bulawayo district the telegraph system has been considerably extended. Bulawayo has also telephone communication with the principal stations. The extension of the Cape Government western railway system through Kumberlev and Vryburg to Bulawayo was completed in October '97, and officially opened on Nov. 4th The distance from Cape Town to Bulawayo is 1360 miles.

Northern Rhodesia consists of the whole of the British sphere north of the Zambesi, lying between Portuguese East Africa, German East Africa, the Congo Free State, and Angola, Africa, the Congo Free State, and Angoia, with the exception of the strip of territory forming the British Central Africa Protectorate, which is under direct Imperial administration. North of the Zambesi the country has as yet been little prospected. Coal has been found on the shore of Lake Nyasa. Fig. North Charterland Exploration Company, which holds a grant of 10,000 square miles north of the Zambest, is engaged in trading, agriculture, and stock breeding operations. A new industry has lately been started in

fibic, on which the representative of a large

London company has been experimenting with satisfactory icsults

Public roads in Rhodesia have been made to the extent of 2 30 miles, and telegraph lines to the extent of isso miles of line and 550 miles of vite. The rinderpest, which for several years has been devastating Africa, travelling slowly through the continent from moth to south, made its first appearance in Matabeleland in February to The adoption of the diastic regulations which the Administration decided to enforce had to some extent checked the progress of the epidemic, when the outbreak of the Matabeleland rebellion put a stop to all precautionary measures. The effects of the disease have been far-reaching, and, apart from considerations of human life, have been more disastrons than those of the native rebellion. During the twelve months succeeding the outbreak of the rebellion, agriculture was practically at a standstill agriculture was practically at a standshif Smeet the pacification of the country considerable tracts of land have been placed under cultivation, and fresh stock, including Angora sheep and Mermo goats, is being imported Throughout the country the conditions of soil and climate are spitable for all kinds of I uropean cereals and regetables, and, in addition, many trees, shrubs, and plants, peculiar to subtropical regions, can be successfully cultivated Good results have already been obtained from the introduction of fruit and gither trees. Tobacco occurs in a wild state, is grown universally by the natives, and has been produced of excellent quality by white farmers in several districts. Indiarubber, indigo, and cotton are similarly indigenous, and will probably well repay cultivation. The Rhodesian forests produce abundance of hard timber of fine quality, and a company is workmg this industry with a view to meeting the large demand for building and other purposes in Salisbury and Bulawayo. In addition to gold, silver, copper, coal, tin, plumbago, anti-mony, arsenic and kusiguhr have been discovered. The arrival of the railway at Mine for the month of September ('98) averaged 193 dwts., including tailings, to the ton In Southern Rhodesia a company is being formed to develop the indiatubber industry on a large scale. Full advantage has been taken of the facilities afforded to the Administrator in Council by the Matabeleland Order in Council, '94, to legislate locally by means of regulations, and upwards of forty measures have been thus passed. Several Ordmanics have also become law. A drait Order in Council, entitled the "Southern Rhodesia Order in Council, '98, which modifies the provisions of the Matabeleland Order in Council, '94, and in some cause to be stows a new constitution on Southern Rhodesia, has been prepared. A Customs clause in the new Order in Council provides that the duty on British goods imported into Southern Rhodesia, has been prepared. A Customs clause in the new Order in Council provides that the duty on British goods imported into Southern Rhodesia, shall not exceed the present Cape tairli. By a proclamation, dated June 10th, 10th, the laws of the Cape Colony passed prior to that date were adopted for, and are to be administered in, Rhodesia, as far as the circumstances of the country will period. In consequence of the Jameson raid into the Transvaal the control of the military forces of the Company was removed from their hands, and is now in the hands of the lingerial Government. See Africa, Rheitish South Africa, Company, and Transvan.

Entory, '48, — At a contener between Captam the Hon Arthin Lawley, the Deputy Administrator, and King Lewanika of Barotseland, held in September, it was agreed that, in addition to the concessions already greated to the Company, administrative powers over the whore kingdom of Parotseland should be conceded to them. The kingdom wis, by the Anglo Portugue se treaty of or, left within the British sphere. It is, roughly speaking, as large as the German Limpine, and embraces the whole basin of the Upper Zambesi lying between 12 yof and 12. S. lat, and o and 27 30 E. long. The western boundary between 1 and Angola has not yet been definined Lialin is the capital, and M. R. I. Corviging the thirty higher contains the british representative that

Ripon, Bishop of. See under Perrage Roberts, Lord. See under Perrage

Robertson, Johnston Forbes, is the son of Mi | I orbe's Robertson of Oberdeen, and was bin London | Ian toth, 1673. He was ed, at the Charterhouse, and at Rouen, and has been an actor since he came of age. He studied his art under Phelps, and for some time took the principal parts at the Bane ofts' theatre and in Mr. Hare's company, but recently has successfully been his own manager. He proof duced "Romeo and Juhet," and Mr. H. A. Jones's play, "Michael and his Lost Angel," at the Lyceum in '95, "Hamlet in 97, and "Macbeth" in '68.

Robinson, Sir John R, the manager of the Daily News (qv), is the son of the Rev R. Robinson, and was be at Witham, Lescy He has been associated with this new spaper solder of the evening paper published by the editor of the evening paper published by the propietors of the Daily News, under the aconstant contributor to the columns of the American press, especially to the Boston Advertiser and the Chicago Tribune. Appointed the

sole manager of the Daily News in '68, he was also editor '87-96. Knighted '93.

Rochester, Bishop of See under Peerage. Rodriguez. An island in the Indian Ocean, 344 miles east of Mauritus (q v), of which British colony it is a dependency. It is 18 miles long and 7 broad. Administration is provided for by a Civil Commissioner appointed by the Governor of Mauritius. The population is about 2000. Rodriguez was annexed in 1814. See British Emirgs (table).

Rogers, Rev. J. Guinness, B.A., well-known Congregational ninister and writer, was ed at Fin Coll, Dublin, and graduated at Dublin Univ in [43, afterwards studying for the munistry at Lain ashire Independent College. His first pastorate was at St. James's Church, Newcastle-upon-Type (46), and he went to Ashton-under-Lyne five years later. In '65 he succeeded the Rev. J. Hill at Grafton Square, Clapham, where he celebrated his semi-jubilee in '06. He was elected Chairman of the Congregational Union of England and Wales in '75, and in the annual meetings of the Union he has always taken an active part. His hterary labours have been extensive, and in the domain of politics he has always been active, of late earls he has worked most energetically for the cause of Hom. Rule for Ireland. The jubilee of his call to the ministry was celebrated Jan 12th, '96. Address. 81, Clapham Common, S. W.

ROMAN CATHOLIC CHURCH.

The Roman Catholic Church is the name of that community of Christians who profess the same faith, partake of the same sacraments and sacrifice, and are united under one head, the Pope or Bishop of Rome and successor of St. Poter, and under the bishops subject to him. Its essential parts are the Pope, bishops, posters so fir as they are priests—and laity. The distinctive characteristic of the Roman Church is the supremacy of the Papacy. Its doctrines, like those of the rest of Christendom, are chiefly found in the articles of the Nagaria fixed. Nicene Creed After the Council of Frent Pope Purs IV added to the formal Profession of Faith the articles on transubstantiation, invocation of saints, and others which chiefly distinguish the Roman from other Christian communities The Immaculate Conception of the Virgin Mary and Papal Infallibility vere defined as articles of faith in 1854 and 70 respectively. One great and central object of faith and worship is the Mass, which is the mystical sacrifice of the body and blood of Christ, instituted by Himself at the Last Supper, and is essentially the same as the Sacrifice of the Cross Scripture and tradition are appealed to in support of this and other doctines—as the Seven Sacraments, the honour due to the Blessed Virgin, Purgatory, Invocation of Angels and Saints, etc. There is a great distinction between what is of docume and what of december the former belowers. what of discipline, the former belonging to Apostles, which is invariable, whilst the latter, founded on the decisions and canons of councils and the decrees of popes, is the Church's external policy as to government, and may vary according to times and circumstances—The Sacred Oolege of Cardinals—70 in number, after the 70 disciples—are the supreme council or

sovereign pontiff, and at the death of a pope they elect his successor. They are also the chief members of the Sacred Congregations, or permanent ecclesiastical commissions (about twenty in number), to which much of the business of the Holy See is entrusted. Among the best known of these congregations are the the best known of these congregations are the Propaganda, the Index, the Inquisition on Holy Office, and the Congregation of Rites. The number of cardinals is hardly even complete, in Nov. '98 there were 57. Including 52 of the cardinals, the patriarche, archbishops, and bishops, in '98 numbered 1284. There are no patriarchates with 14 patriarchal sees, and 19° archiepiscopal and 779 episcopal sees which are termed residential. Besides these, there are a number of titular sees, most of which are assigned to archbishops and bishops appointed, either to apostolic delegations, vicalitates, of prefectures, or to the office of coadjutor, auxiliary, or administrator of a diocesc There are altogether 8 delegations, 122 vicariates, and 48 prefectures See Andrean Orders

Statistics. - The total number of Roman Catholics throughout the world, ruled by about catholies throughout the world, rited by about 1200 archbishops and bishops, is estimated at 240,000,000. There are in Great Britain and Ireland, about 5,500,000 (1.2., about 3,550,000 in Ireland, and the remainder in Great Britain), and in the rest of Europe more than 100,000,000 and in the rest of Europe more than 100,000,000.

Ireland is divided into 4 ecclesiastical provinces, subdivided into 27 dioceses, juled by 4 archbishops and 23 bishops (v. m/ra). The 4 attentishings and 23 Dishops (b m/m) 11 at mumber of priests in Ir land (a shout 4450, setting 2434 churches and chapels, situated in 1070 parishes. The 24 archbishops and bishops of Great Britain (b m/m) consist of 15t, for England, 1 archbishop (of Weetminstr), with authorities and a sufficient and a sufficient England, 1 archbishop (of Westminster), with 4 suffragains and 1 coadintor, and a suffragain bishop for Wales, 2ndh, for Scotland, 2 archbishops (one of St Andrews and Edinburgh and one of Glasgow), with 4 suffragains and 1 auxiliary. The number of priests of and a auxiliary. The number of priests of England and Wales in 68 was 2008, with 1482 churches, chapels, and stations, of Scotland 421, with 350 churches, chapels, and stations The United States has about 12,000,000 Roman Catholics, 90 archbishops and bishops, about 10,750 priests, 0570 chur hes, 5105 chapels and stations, and 958,960 pupils in parish schools. In the British possessions of North America there are about 2,000,000 Roman Catholics, 39 archbishops and bishops, about 2000 priests, 2000 churches, chapels and sta-tions, 800 colleges and academies, and 4400 parish schools. From statistics like these, which can be approximated to in all the other parts of the world by the bishops presiding over the different dioceses or vicariates, and are published occasionally, may be interred how complete is the organisation of this Church, and how vigorously she exercises the forces at her command for the extension of the Roman Catholic faith. Westminster Cathedial, a vast edifice in the Byzantine style, of which the first stone was laid by Cardinal-Vaughan and Logue on June 20th, 95, is rapidly rising, and every effort will be made to open it on Sept. 27th, 1900, the fiftieth anniversary of the restoration of the hierarchy in England Internally, the length is 342 ft, the width across nave and asiles and side chapters 55 ft., the width of nave of ft, and its height 112 ft. For Papal Ministry see DIPLOMATIC

,, John Conmy Kıllala Rontgen Rays, The The experiments which led to the discovery of these lays by Professor Routgen, of Wirzburg, were made at the end of '95, but were not communicated till the beginning of Jan '90. The essential part of the experimental apparatus is a Crooke's tube, rr., a small glass tube into each end of which is fitted a write from some form of electic grounding apparatus, then form of electric generating apparatus, then, the tube being calcusted by an an pump, the electric enemit is broken by the vacuum space in the tube between the two ends of the wires. If, when an electric current is made to pass along the wires, a living hum at hand be interposed between the Crookes' tube and a photographic plate, a shadow photograph can be obtained which shows all the outlines and joints of the bones most distinctly. In the same way Rontgen obtained photos of shadow pictures, of a set of weights in a box, of a compass card and needle completely inclosed in a metal box, and many other concealed From these and other experiments he objects inferred that some invisible kind of rays were generated in the neighbourhood of the Crookes tube, by the electric disturbance set up by the passage of an electric current, and that these invisible rays possessenthe property of passing through all bodies interposed in their path But some bodies, being less primeable than others, east a shadow. Thus bone is much less permeable to these rays than flesh, hence the possibility of photographing a shadow of the bones of the hand, since a photographic dry plate is sensitive to the rays. Rontgen's ex-periments to determine the nature of these phenomena were for the most part negative in iesult. But he was warranted in assuming the presence of a form of radiation, and in consequence of the indeterminate character of the rays he proposed the name X-rays. The algebraical symbol has since been generally dropped in favour of the discoverer's name. A Röntgen Society was formed during '97, and Professor Silvanus Thompson delivered and Professor Silvanus Thompson delivered appointed Vice-Chancellor of the University of his presidential address at the mangural London. Addresses 10, Bramham Gardens, meeting on Nov. 5th. He asserted that with the exception of antiseptics and anæsthetics | næum Club.

no discovery of the century had done so much for operative surgery. The first great application of the rays had been to the diagnosis of dislocations and the discourse, the study of bone disease, and the detection of foreign bodies in various parts of the human frame, even the progress of tubercular disease in the lungs had been rendered evident, and to watch the motions of the living heart was now an every-day experience. Soon after the invention of focus tubes had furnished powerful sources of the rays, it was noticed that exposure to them frequently resulted in severe local inflammation, accompanied in some cases with destruction- at least temporary-of the hair, which fell out and left bald patches. It was disputed whether this effect was direct, like sunburn, or whether it was indirect and due to the chemical action of ozone generated by the ionizing of the oxygen of the air, or, finally, whether it was electrical. It appeared that the rays were not the inselves homogeneous, but were of many kinds, differing in penetrative power, the quality of the mixture depending on the state of the vacuum as well as on the form of the tube and the nature of the emitting surface. The relations between the Rontgen and the cathode rays had been investigated and the cathode taxs had been investigated by Mr. A. Campbell Swinton, by M. Perrin, and by several It than investigators. Many speculations had been put forward as to the physical nature of the rays themselves. Crookes, Tesh, and others held them to consist of flights of minute atoms or hyperatoms, on the other hand, there was a hypothesis that they were meiely an extreme soit of ultra-violet light, consisting of transverse waves of excessively minute wave-length Jaumann and apparently, Rontgen regarded them as due to longitudinal vibrations, while Sir George tokes had put forward the view that they might be transverse waves, not in icgular trains, but consisting of innumerable

regular trains, but consisting of innumerable solitary waves. For the progress of investigations during 'v8, see Figure 17, '98

Roscoe, Sir H. E., was b 1833, and is the grandson of Roscoe the historian. He was ed at University College, London, and at Heidelberg. He was Professor of Chemistry at Owens College '58-80, and distinguished himself specially by his researches as to the chemical action of light, and on the metal vanadium. His treatise on "Chemistry," in books written in comuniction with Professor books written in conjunction with Professor Schorlemmer, is well known. He has also written "I essons in Elementary Chemistry, which have been translated into many lan-guages, and "Lectures on Spectrum Analy-ies" He served on the Royal Commissions on Noxious Vapours, on Technical Education, on the Scottish Universities, and on Secondary Education. In 87 he was chosen President of the British Association. The is a Fellow of the British Association. Eton College, an officer of the Legion of Honour, a corresponding member of the Institute of a corresponding member of the institute of France, an Hon D.C.L. of Oxford, LL.D. of Cambridge, Dublin, and Montreal, M.D. of Heidelberg, D.Sc. Hon of Victoria, Manchester, and a member of various other learned societies In 85 he was elected for the South Division of Manchester, and ictained his seat till the '95 election, when he was defeated. In '96 he was

ROWING, '98.

A finer summer for rowing could not have been wished for, and fair weather favoured all the regattas after the early part of the year. The Colquboun Sculls at Cambridge were won by R. B. Etherington Sunth, First Limity The Open Boat Handicap on the Tyne was won on Dec. 11st, 79, by J. White, and on March 2nd W. Haines beat J. Wray on the Tyne for £100 a side. The 55th Oxford and Cambridge Boat-race was rowed on March 2oth in the worst weather in which it has ever been rowed, a gale blowing from the east with sleet, hail, and snow stoims, and ended in a signal victory for Oxford for the 95th year in succession. Cambridge had been very unfortunate all the caller part of the year there was trouble amongst the rowing men, and a split owing to the action of certain Trinity Hall B.C. men, and their luck for sook them on the race day as well. The gale was

blowing from the Middlesex shore, consequently Oxford, who had won the toss and chosen the Middlesex station, were comparatively sheltered. The Cambridge boat was full of water has been a dead near. In the Sunmer Engine New College retained her position as head of the river at Oxford, First Timty is head of the river at Cambridge Henley Regatta was held on July 4th, 6th, and 7th, in splendid weather. Of all the foreigners who entered for the different races, only one—from Berlin— appeared, Mr. P. Schultze, Denhard, who was beaten in his heat for the Diamond Sculls by Blackstaffe. B. H. Howell made a new record of 8 mm 23 Sec for the Diamond Sculls, New College, Oxford, a record of 7 mm 37 sec for the Visitor's Cup. The final heats were as tollows - Grand Challenge Cup Leander Club follows - Grand's fall (age Cup Leander Club (Becks) o, won by three quarters of a length, time 7 min 13 sec. The premises of the Royal Academy at Burlington House comprise a grand gallery or range of thirteen halls, besides a central octagon for sculpture, a theatre, and a large room in which the annual banquet is held—the latter always an event of much interest to the artistic world. The basement is devoted to schools of art for male and female students. The total cost of the buildings was nearly £150,000, the whole of which was defrayed out of the funds of

^{*} RA. Ikci

the Academy. The Royal Academy derives the whole of its funds from the holding of its annual exhibition of the pictures of living artists, which opens on the first Monday in May and continues until the first Monday in August. No works which have previously been exhibited are accepted, and the Council has the right to reject any picture it may please. The Winter Exhibition of art treasures established in 1869, paintings being liberally lent by private individuals. The result is that a really admirable collection of masterpieces is usually brought together. The exhibition rename open from the first Monday in January for a period of ten weeks. The fine library and books of prints belonging to the Academy are open to students and the general public at certain hours. The Diploma and Gibson Gallories, reached by a stancase to the right of the entrance hall, contain the works presented by each member as a specimen of his ability on his election as a Royal Academician, the works of J Gibson, R.A., bequeathed by him, several interesting pictures of old masters, and some fine pieces of sculpture

Royal Agricultural Society of England
This the premise arranging the presence of the stremes.

ROYAL Agricultural Society of England This, the premier agricultural society of the United Kingdom (though not the first established) was founded by Royal Charter on the 26th March, 1840 I he Charter gives a long list of the national objects which the a long list of the national objects which the Society was intended to promote, and which have been well embodied in its motto, "Practice with Science". The results of the Society's efforts for what the Royal Warrant calls "the general advancement of English agroutture" have been given and striking It would be impossible in this brief record even to enumerate all the improvements in the different breeds of live stock, and in agricultural machinery, which have arisen from the annual competitions in the Society's showlands, or the advances in scientific knowledge as to the experiments and grants to investigators have brought about It has two sides to the work (1) The practical, the chief feature of which is its annual shows, to which the best pedigree animals are brought to compete for the valuable prizes offered by the Society, and still more for the honour of being "Royal" prizewinners, and at which also the newest inventions in agricultural implements and labouisaving appliances are exhibited; (2) The soundifie, for which purpose it maintains a complete chemical laboratory for the analysis of feeding stuffs, manures, soils, etc., and retains the services of Chemical, Botanical, Zoological, and Voterinary experts in order that its members may have at low rates the best soundific advice obtainable. It controls. best scientific advice obtainable It controls, moreover, an experimental farm and "Pot station at Woburn, where elaborate Culture" investigations into crops, soils, feeding stuffs, and other matters connected with agriculture are carried on. Its *Journal* has from the first taken high rank amongst scientific publications, and contains in each quarterly number articles by leading authorities on the most Important agricultural questions of the day The R. A S. offers gold and silver medals and Life Memberships of the Society for competition by agricultural students at its annual agricultural examinations, and has, in conjunction officially recognised by the Technical Educawith the Highland and Agricultural Society of tion Board of the London County Council.

Scotland, instituted in 'or annual examinations for the award of a national diploma in the science and practice of dairying. It seeks in many other ways to foster the study of in many other ways to loster the study of agriculture. The governing body of the Society consists of a president (elected annually), twelve trustice, twelve vice-presidents, and fifty members of council, half of whom go out of office each year. The Journal meet once a month at the Society's house, 13, Hanover Equare, and the business is divided amongst Square, and the business is divided anoight as large number of standing committees. Three general meetings of members are held in each year one on the 22nd of May (the anniversary meeting); one in the Society's shown and in the summer, and one in December, would not the Thursday of the Southfold usually on the Thursday of the Smithfield Cattic Show week. The number of members Cattle Show week. The number of members is over 11,000, including nearly all the chief landowners and practical farmers and stock breeders of the country. Membership of the Society entitles to the use of a large and well-stocked library of standard books on agricultural subjects, and a reading-room, at which the principal agricultural newspapers and other periodicals can be consulted by members blembers may obtain skilled veterinary advice in cases of disease amongst cattle, sheep, or pigs, by arrangements made with the Royal Vetermary College. They can also consult the professors of the College at fixed rates, and have the pivilege of sending cattle, sheep, and pigs to the College infirmary. The Society makes annually a considerable grant from its general funds in order that members may obtain at low rates analyses of feeding stuffs, artificial manures, soils, etc., by the Society's consulting chemist (Dr. J. Augustus Voeleker), whom members may also consult either personally or by letter at a small fee. Reports can be obby fetter at a smarried response can be ob-tained by members from the Society's consulting botanist (M). W. Carruthers, F.R.S.) on the punity of seeds, and on diseases of weeds affecting farm crops, at a fee of one shilling in each case. Information respecting any animal (quadruped, bird, insect, worm, etc.) which, in any stage of its life, affects the farm or rural economy generally, with suggestions as to methods of prevention and ready in respect to any such animal that may be injurious, can to an such animal that may be injurious, can be obtained by members from the Society secologist, Mi Cecil Warburton, MA, the Zoological Laboratory, Cambridge, at a fee of one shilling for each case. The fifty-mith annual show of live stock, implements, and farm produce was held in the week commencing June 20th, '98, at four Oaks Park, near Immingham President for '98-9, The Evolution's Secretary Expect (and near Brimingham President for '98-9, The Earl of Coventry Secretary, Sir Linest Clarke, 13, Hanovet Square, W

Assent. See Parliament and PARLIAMENTARY PROCEDURE.

Royal Botanic Society The Society was monoporated in 1839 for the promotion of Botany, and for the formation of Botanical Gardens within the Metropolis The Gardens, in the Inner Circle, Regent's Park, are about 20 acres in extent, and are beautifully laid out as an interest the state has been to be Society as comornamental English park. The Society is comornamental ringisti park. The Society is composed of Fellows and members, admission to the Gardens being by personal introduction or Fellow's order. A School of Practical Gardening has also been established, and is officially recognised by the Technical Education Board of the Lindius Courte Courte The public are admitted on Saturdays and Mondays at a charge of 1s. (Bank Holidays, 6d.). Musical promenades are held in the season on Saturdays, also on Wednesdays (admission 2s. 6d.). The public are now admitted, by payment, to the exhibitions and fetes held in the spring and summer. President, H.H. The Duke of Teck, G C B. Secretary. Mr. J. B. Sowerby, Library and Office, Innei Circle, Regent's Park, N.W. Royal College of Music, The, Prince Consort Road, South Kensington, was founded in 1882, under the presidency of H.R. H. the Prince of Wales, and incorporated by Royal Charter in May 83, when the College was opened for the reception of pupils. At its commencement the

Royal College of Music, The, Prince Consort Road, South Kensington, was founded in 1822, under the presidency of H R H. the Prince of Wales, and incorporated by Royal Charter in May 83, when the College was opened for the reception of pupils. At its commencement the sum of £126,000 was raised by public gifts, and has all been invested. The pupils are of both sexes, and consist of scholars, exhibitioners and students. The Open Free Scholarships are fifty in number; they are gained by competition, and cuttle the holder to a thorough and systematic free education in theoretical and practical music. There are also eleven Close Free Scholarships, for the benefit of persons residing in certain specified localities, as well as various Exhibitions and Prizes. The following are the most important—The Council Exhibitions, each term, value £20 and £30, for pupils of one year's standing, and those of two years' standing, iespectively, the Erard Exhibitions, value £102 each, and tenable for three years (value £40 a year), and the Charlotte Holmes Exhibition (£15). Various prizes, medals, etc. are also offered from time to time for competition to pupils in the College. Students (or paying pupils) are admitted on payment of a fee of £12 125. per term Associates need not necessarily be pupils or ex-pupils of the College, they have to pass a qualifying examination, which entitles them to use the initials AR C M (fee £55). The teaching staff includes a large number of musicans of the highest eminence; amongst other-the following gentlemen (who constitute the Board of Professors)—Sir J F Bridge, Mi E Dannreuther, Mi Richard Gompert, Scinol F. Fernandez-Arbos, Sir Walter Parratt, Mi A Randegger, Prof C. Vilhers Stanford, Mi Franklin Laylor, Mi A Visetti Director, Di C H H Parry; Hon Secretary, Mr Charles Morley, Registrar, Mr. Frank I 'ownall, to whom all communications relating to admission, etc., should be addressed

Royal College of Surgeons of England. The Royal College of Surgeons in London was established in the year 1800. By a charter granted in '43 the name of the College was altered to that which it now bears, The Royal College of Surgeons of England. The first building of the College, in Lincoln's Inn Fields, was opened in '33, in '35-6 it was practically rebuilt by Sir Charles Bairy. In '90-92 considerable additions were made to the accommodation for both the Museum and Library. The nucleus of the present Museum was the celebrated Hunterian collection; this was purchased by the Government after John Hunter's death, and, under certain conditions, handed over to the College. The Library (Librarian, V. G. Plarr), which is kept up for the use of Fellows and members of the College, contains about 50,000 volumes. The examination for the L.R.C.P. and M.R.C.S is held conjointly with the Royal College of Physicians

at the Examination Hall, on the Victoria Embankment. That for the F.R C.S. is held by the College of Surgeons in the same building. Full particulars of all the examinations will be found in the College Calendar Scoretary, E.

found in the College Calendar Secretary, E. Irimmer, 40, Lincoln's Inn Fields, London, W.C. Royal Colonial Institute. The growth of the R C 1 (tounded 1868) since its incorporation the KC1 (founded 1868) since its incorporation by royal charter in '82 has been very rapid. In '78 it numbered 800 fellows, with an annual income of \mathcal{L}_{1331} In '98 the number exceeded 4200, with an annual income of over \mathcal{L}_{7500} , evelusive of the building fund. The fact that the Prince of Wales is Frequency of the instance, has given it much additional prestige. The Council is composed of gentlemen well known in connection with the Colonies; and Bir Montago Ommanney, the senior Crown Agent for the Colonies, is Treasurer. The objects the Prince of Wales is President of the Institute for the Colonics, is Treasurer. The object of the R C I are thus officially set forth:-"To provide a place of meeting for all gentle-men connected with the Colonies and British India and others taking an interest in Colonial and Indian affairs, to establish a reading-room and library, in which recent and authoritic intelligence upon Colonial and Indian subjects may be constantly available, and a museum for the collection and exhibition of Colonial and Indian productions, to facilitate interchange of experiences amongst persons representing all the Dependencies of Great Britain; to afford oppor-tunities for the reading of papers and for holding discussions upon Colonial and Indian subjects generally, and to undertake scientific, literary and statistical investigations in connection with the British Empire—But no paper shall be read, nor any discussion be permitted to take place, tending to give the Institute a party character. Evening meetings are, as a rule, held on the second Tuesday in each month, from November to lune, and afternoon meetings are also held from time to time Amongst the matters which engaged the special attention of the Council in 97-8 were the importance of diffusing amongst the using generation such a knowledge of the British Colonics, geographically, historically, and commercially, as may be of practical service in after-life, the Extension of Commercial Relations between the Mother-country and the Colories, the dissemination of authentic information on Colorial subjects to all in-quirers, and the payment of income tax in the United Kingdom on income carned and taxed The monthly Journal and Proceedings give the papers read during the year, which are always of a valuable and very interesting description. On Sept. 181, '98, there were 1456. resident and 2753 non-resident Fellows. Library contains over 34,000 volumes and pamphlets, and is made readily accessible by the publication of a new printed catalogue Office, Northumberland Avenue Secretary, J. S. O'Halloran, C.M. G., Librarian, James R. Boose; Chief Olerk, William Chamberlan

Royal Family, Annuties to, and Civil List. The total amount of the Uvil List is \$785,000, thus divided Her Majesty the Queen's privy purse, \$60,000; salaries of Her Majesty's household and retired allowances, \$131,200; expenses of Her Majesty's household, \$172,500; royalbounty, alms and special services, \$13,200; unappropriated, \$6040. There are, besides, the Civil List Pensions, which, in the last financial year amount of \$L23,289.78. 2d., making the total amount isaued on account of

the Civil List \$408,280 7s. 2d. Her Majesty, as Duchess of Lancaster, also receives the revenues of the Duchy, which amounted in the year for which the last return has been issued to \$60,000. The cost of maintenance and repair of certain of the Royal Palaces is defrayed out of the estimates (see Finance, National, for the amount voted for '98-9). Subjoined are the annuities to the royal family: H. I.M. Victoria, Dowager German Empress (the Princess Royal), \$8000. H. R. H the Prince of Wales, \$40,000. the Princess of Wales, \$10,000; Duke of Leinburgh, \$10,000. —he formerly received \$25,000, but renounced \$15,000 per annum from Dec 31st, '93, on succeeding to the Duchyof Saxe-Coburg and Gotha, Princess Louise (Marchioness of Lorne), \$6000, Duke of Connaught, \$25,000, Duchess of Albany, \$6000; Princess Beatrice, \$6000, Princess Augusta (Duchess of Mecklenburg-Strelitz), \$2000; Duke of Cambridge, \$12,000, Prince of Wales also receives the revenues of the Duchy of Cornwall, which, in the year for which the last return is available, amounted to \$58,118.

Royal Geographical Society, 1, Savile Row, W., was founded in 1830. It annually awards various medals to distinguished workers in the cause of geography, and distributes prizes among training colleges and University extension students for proficiency in this science it contributes to the maintenance of chairs of geography in Oxford, Cambridge, and Owens College. It subsidises exploring expeditions It also gives instruction to and lends instruments to travellers in various parts of the world. In '98 the Founder's medal was given to Dr Hedin, and the Patron's medal to Lieut R. E. Peary, U.S.N. During the year 305, and 3 Honorary Corresponding Fellows were elected, and on May 9th, '98, there was a total of 3996 Fellows. The published Journal is valuable, as tracing the progress of explorations and discoveries. The annual report presented at the anniversary meeting (May 9th) she wed that the mocane of the Society during '07 had been (11,029 198 of 4, and the expenditure (11,518) 5 1rd., while the total assets amounted to £49,309 175 9td. President, Sir Clements Markham, R.C.B., F.R.S., etc., Hon. Secretaries, Major L. Parwin, and J. F. Hughes, Esq.; Secretary, J. Scott Keltie. See Gro

Royal Indian Engineering College, The, Coopers Hill, is primarily maintained under the orders of the Secretary of State for India in Council, to educate candidates for Government service in the Indian Public Works, in the Accounts, Indian State Railway, Telegraph and Forest Departments About 400 ingineer students are admitted by arry to the College Candidates for Government appointments must be between the ages of 17 and 21 years on the 1st day of July of the year of admission. The collegiate year usually begins at the end of September Applications for admission and for all information should be made at the College, Coopers Hill, Staines. Secretary, Lieut.-Col. W. J. Boyes

Royal Institute of British Architects, The, was founded, in 1834, for the general advance ment of an chitecture and for promoting and facilitating the acquirement of the knowledge of the various arts and sciences connected therewith. It was incorporated by royal charter in

'37, and obtained a new charter in '87, conferring greatly extended powers. A Journal containing the papers read before the Institute and allied Societies, and articles, reviews, and reports of legal cases affecting architects, is published fortinghtly during the session, and monthly in the ricess. A Kalendar, giving full particulars of the bye-laws, examinations, and prizes, with the Register of members, is published annually, in October Secretary, Mr. W J. Locke. Offices, 9, Conduit Street, Hanover Square, W. See Architecture.

Royal Institute of Painters in Water Colours I his Society was founded in 1831, and formerly held its exhibitions in Pall Mall, but in the spring of 83 moved to more commodious galleries at 180, Piccadilly. There is an annual exhibition of water-colour paintings, commencing the second week in March. The walls are open to artists whose works are approved, and members are elected according to the merit which their productions display. President, Sir James D Linton, Vice-President, E. M. Wimperis, Secretary, W. F. Blackmore. Office, 189, Piccadilly, W.

Royal Institute of Public Bealth, The Pation, Her Majesty the Queen Founded in 1886, and incorporated in 192 with the following objects....To carry on the work of the Public Health Medical Society, and thus to provide a means for the association of medical practitioners possessing registrable qualifications in public health, state medicine, or sanitary science, also medical officers of health and others, with the object of promoting, by intercourse of otherwise, the development of all questions having for their object the public health, to aid the theoretical and practical investigation and study of all branches of public health medicine, to issue publications of the transactions of the Association, to found a library, and to publish a journal; to examine candidates, either alone or in conjunction with one or more kindred bodies, and to grant certificates of their having passed an examination as sanitary inspectors. Chairman of Council, Sir Chailes A. Cameron, M.D. The 198 Congress was held in Dublin The Journal of State Medicine is the official organ of the Institute, and is published every month. The President is Prof. William R. Smith, M.D., D.S., F.R.S., the Treasurer, Brigade-Surgeon W.F. Ruttledge, and the Secretary, Henry C. Jones, Esc. Offices, 197, High Holborn, W.C.

Royal Institution of Great Britain, The. Founded 1790, incorporated 1800, and enlarged in 1810. Its chief objects are—(1) To promote scientific and literary research, (2) to teach the principles of inductive and of experimental science, (3) to exhibit the application of these principles to the arts, and (4) to afford opportunities for study. The Institution includes Laboratories for the promotion of chemical and physical science. In the Laboratories the researches of Thomas Young, Humphry Davy, John Fraill, Edward Frankland, William Odling, John Hall Gladstone, James Dewar, and Lord Rayleigh have been conducted. It gives Public Lectures, holds weekly meetings (on Friday evenings) of its members, and supports a model room and a reading-room. The entrance fee is ten guineas, which includes the first year's annual subscription of five guineas; or a life composition of sixty guineas may be paid.

In '94 Mr. Ludwig Mond conveyed to the members of the Royal Institution the freehold members of the Royal Institution the freehold of No. 20, Albemarie Street, to be held by them for the purpose of a laboratory, to be named the "Davy Faraday Research Laboratory of the Royal Institution," and for the purpose of providing increased accommodation for the Institution. The Ashoratory was accounted. Institution The Laboratory was opened by H.R. H. the Prince of Wales on Dec 22nd, '96 The library contains about \$60,000 volumes House, Albemarle Street, Piccadilly; President, The Duke of Northumberland, K.G., D.C.L., LL.D.; Treasurer, Sir James Crichton-Browne, M.D., LL.D., F.R.S., Hon. Secretary, Sir Frederick Bramwell, Bart, D.C.L., LL.D., F.R.S., VP.; Professor of Natural Philosophy, The Right Hon. Lord Rayleigh, M.A., D.C.L., LL.D., F.R.S. Fullerian Professor of Chemistry, Dr. James Dawar, M.A. LL.D., F.R.S. Fullerian A. nstitution The Laboratory was opened by Dr. James Dewar, M. A. LL. D. F. R. S. Fullernan Professor of Physiology, E. Ray Lankester, Lsq., M.A., LL.D., F. R. S., Assistant Secretary and Librarian, Mr. Henry Young; Assistant Libra-rian, Mr. Herbert C. Fyfc.

Royal Irish Academy. A scientific and literary society, meeting in Dublin, incorporated by royal charter of George III, 1786, and having 400 members. The Academy 1786, and having 400 members The Academy publishes "Transactions" and "Proceedings," containing papers on Science and Polite containing papers on Science and Polite Literature and Antiquities. President, Earl of Rosse, D.C.L., LL.D.; Treasurer, Rev. M. H. Close, M.A.; Secretary, E. P. Wright, M.A., M.D.; Secretary of Gouncil, R. Atkinson, LL.D., Librarian, W. Frazer, F.R.C.S.I., Secretary of Foreign Correspondence, J.P. O'Reilly, C.E. Academy House, 19, Dawson Street, Dublin.

Royal Normal College and Academy of Music for the Blind, Upper Norwood, London Established March 1st, 72 Patron, Her Most Gracious Majesty the Queen. Charman of Excoutive Committee, Right Hon J A Campbell, LL, D, M.P., Vice-Chairman, Sii John Stirling Maxwell, M.P., Treasurer, Rt. Hon Lord Stalbridge; Hon. Sec., Arthur Miall, Esq., Principal, F. J Campbell, Esq., LL D Lady Superintendent, Mrs. F. J Campbell, Esq. LL D Lady Superintendent, Mrs. F. J Campbell, a Grammar and High School, a Technical School, and an Academy of Music The instruction includes (1) general education, and the preparation Royal Normal College and Academy of (1) general education, and the preparation of those who desire it for the University Examinations, (2) the science and practice of music, (3) the training of teachers, (4) pianoforte-tuning. The founders were this country could be improved by the employment of new and progressive methods of instruction, based upon a thorough course of physical training, and that thus many could be prepared for self-maintenance. The results have more than justified that expecta-tion Eighty to ninety per cent. of all the pupils who have completed their course of training at the college are now self-sustaining men and women, their earnings during the past year having been about £25,000. It is important to remember that these pupils have, with few exceptions, been drawn from the poorest classes, and if they had not had this practical training would to-day be dependent upon charity. The work of the institution is not year on the 1st Saturday in June. Persons

only philanthropic but also eminently economic. From a national point of view, therefore, it is deserving of that liberal support which is indispensable to success. The work is carried dispensable to success. The work is carried on by voluntary subscriptions, and is in need of increased support, especially in the shape of annual subscriptions. Donations and subscriptions can be paid to the Principal at the College, or to the Bankers, Messrs. Barclay & Co, Ld., 1, Pall Mall East, S.W.

Royal Observatory, Greenwich. The great increase in British maritime trade in the seventicular control of the property of the determinant of the seventicular carbon and in the seventicular carbon and is an increase in British maritime trade in the seventicular carbon and is a subscription.

seventeenth century rendered the determina-tion of longitude at sea a pressing necessity. The subject was brought to the notice of King Charles II, who, on understanding that the first requisite was a more accurate knowledge of the positions of the moon and principal stais, founded the Royal Observatory at Greenwich in 1675, on the hill which was formerly the site of a castle built in 1437 by Himphrey, Duke of Gloucestei The first observation was made on Sept 16th, 1675. The Director of the Observatory is atyled the Astronomer Royal, and is under the official control of the Admiralty, but receives his appointment directly from the Prime Minister, and holds office by warrant under the Royal sign manual. It has been the fortune of the Observatory to have at its head such men as Flamsteed, Halley, Bradley, Maskelyne and Airy Fhe present Director is Mr. W. H. M. Christie, C.B., F.R. S. (q v) The meridian observations of sun, moon, planets and stars, which constitute the fundamental work, are made with a fine transit-circle of 8 inches aperture An altazimuth on a new principle with telescope of 8 inches aperture has been constructed to supplement the observations with the transit circle. The largest instrument is a 28-inch refractor, with a spectroscope attached which has been recently mounted. Another fine instrument is the astrographical equatorial designed for work in connection with the "Photographic Chart of the Heavens." It consists of two telescope tubes rigidly connected and parallel, one carrying a 10 inch telescope lens, the other a 13-inch photographic lens by which the star images are imprinted on the photographic plate. A new equatorial, having on one side of the declination axis a lens corrected for photographic rays of 26 inches apeiture, and on the other side a mirror of 30 inches diameter, has recently been presented to the Observatory by Sir Henry Thompson I here are several smaller refrac-Ihompson Incre are several smaller retractors used for observing comets, occultations of stars by the moon, Jupiters satellites, etc. Photographs of the sun are taken on every available day, and after being measured are carcilly stored for reference. Magnetic and meteorological observations, made continuously, form an important branch of the works. ously, form an important branch of the works. The ohronometers used in the Navy are purchased, and generally examined, at the Observatory The average number being tested daily is nearly 400. Hourly and daily timesignals are sent out from the Observatory through the Post Office telegraphs giving Greenwich time to all parts of the country. By the influence of Sir Issac Newton a Board of Visitors was instituted in 1710 to visit the Observatory and receive the Astronometer. Observatory and receive the Astronomer Royal's report of the work of the past year. This Board, which is recruited from our leaddesirous of visiting the Observatory must satisfy the Astronomer Royal that they are interested in astronomy. Office hours 9 to 4.30.

Royal Scottish Academy, instituted in 1826, incorporated in 138, consists of three orders—viz., Academicians, Associates, and honorary members. A supplementary charter was granted in 191, by which the Academicians were empowered to add to the number of Associates, certain privileges being also granted the latter class. Each member is entitled to exhibit in the annual exhibition five works. President, Sir George Reid; Seoretary, George Hay; Treasurer, John Hutchinson; Librarian, W. D. McKay; Clerk, James Hastings.

Royal Scottish Geographical Society. This Society was founded in %4 to promote inquiry into all subjects of geographical interest, to give special attention to Scottish topography, to form a library, to press for the recognition of geography as a branch of Higher Education, and for other objects. There are 1623 members, including 100 ladies. Monthly meetings are held in Edinburgh and Glasgow, and lectures and papers are given and read, while the Society publishes monthly the Scottish Geographical Magazine. The President is the Marquis of Lothian, the Editor and Librarian Mr. W. A Taylor, M.A. and the Secretary Lieut.-Col. Fred. Bailey The Headquarters are at Queen Street, Edinburgh.

Royal Society, Burlington House. A society for med in 1660 for the pursuit of science, now famous throughout the world Charles II in 1662 granted the Society a charter of incorporation. This was followed by a second in 1663, giving further privileges. By that the Society was named "The President, Council, and Fellows of the Royal Society of London, for Improving Natural Knowledge." Meetings for reading and discussing scientific papers are held weekly on Thursday afternoons at 4 30 pm. from November to June. The Society awards the Copley, Rumford, two Royal, Davy, Darwin, and Buchanan, medals, each annually, with the exception of the Rumford and Darwin, which are given biennially, and the Buchanan, which is given quinqueninally. Fit Copley is the most highly prized, and may be awarded to Englishmen or foreigners, and only goes to distinguished savants. Sir William Huggins was the recipient in '98. Among the preadents have been Sir Isaac Newton, Sir Christopher Wren, Samuel Pepys, Sir Hans Sloane, Martin Folkes, Sir Joseph Banks, Sir Humphry Davy, Sir Joseph Hooker, Prof Huxley, Sir Gabriel Stokes, and Lord Kelvin. The Loid Lister, F.R.C.S., is the present President There are now upwards of 450 Fellows and 50 Foreign Members. Fellows elected, '98 Henry Frederick Baker, M.A., Prof. Ernest William Brown, Dr. Alexander Buchan, M.A.; Sidney Frederic Harmer, M.A.; Albert Charles & Person, M.A.; Prof. Edward Waymouth Reid, M.B., Alexander Scott, M.A.; Albert Charles Seward, M.A. William Ashwell Shenstone, F.I.C.; Henry Martyn Taylor; James Wimshurst. The rooms of the Society are enriched with busts and paintings, while the library contains 50,000 volumes, and there is a unique collection of relics, many of which relate to Sir Isaac Newton.

W. Rücker, D.Sc., BurlingtonHouse, Piccadilly, W. Assistant Secretary, Robert Harrison.

Royal Society of Painter-Etchers, The, was founded in 1881 by Sir Francis Seymour Haden, who has thus stated its object. "The purpose of this Society is not merely the restoration of original etchings, but the re-infusion, into all forms of engravers; work, of those personal qualities which, whatever the process employed, in the hands of the great masters of painting made engraving a fine art." Annual Exhibitions of the work of members are held by the Society at the Gallery, 5a, Pall Mall East, in the spring of each year. All forms of engraving on metal, whether by the burin, the etching needle, by mezzotint or aquatint, or by whatever other process, are eligible for exhibition. The Offices of the Society are at 5a, Pall Mall East, S.W.

Royal Society of Painters in Water Colours. The older of the two Water Colour Societies was founded in 1804, and has held exhibitions annually since that date. The Summer Exhibition is opened to the public towards the end of April, and the Winter Exhibition, which, chiefly comprises sketches and studies, opens on the 1st of December. The number of associated exhibitors is unlimited. The exhibition of the Society, which are held at their galleries, 5A, Pall Mall East, S.W., are confined to the works of members and associates. Preadent, E. A. Waterlow, R.W.S., Secretary, Percy Ldsall. Attached to the Society is an "E.W.S. Art Club," established 84, for the puipose of holding a series of Conversation to which members are invited to send works of art for exhibition President, H. M. Marshall, R.W.S.; Secretary, Aubrey Stewart, 7.1, Mornington Rd., N.W. Office, 5A, Pall Mall East.

Royal United Service Institution, Whitehall, S.W., was established in 1831, for the promotion of naval and military art, science, and literature. Being only in quarterly occupation of the buildings in Whitehall Yard, an address was presented to her Majesty the Queen, Oct. '90, setting forth the request of the Institution that the Banqueting House, Whitehall, might be granted to it for a museum. Her Majesty instituted the Lord Chambeilain, in Dec. '90, to convey to the Institution her compliance with this desire. On Jan 181, '95, the transference took place. No interference has been made with the architecture of the structure. The Museum contains the celebrated models of Trafalgar and Waterloo, interesting naval and military relics, and models of modern war-vessels. Admission 6d. daily April to September, 11 to 6; October to March, 11 to 4. President, H.R. H., the Duke of Cambridge. Chairman of the Council, Lieut-Gen. Lord Methuen, K.C.V.O., C.B., C.M.G. Secretary, Lieut-Col. R. Holden.

Rugby School Founded by Lawrence Sheriff, a native of Rugby (1567), and originally entrusted to two trustees, in place of which twelve gentlemen of Warwickshire were appointed by Commissioners under the Great Seal in 1602. The boys are divided into foundationers and nonfoundationers. Has, every July, 1007 12 entrance

and other scholarships of £100 to £20, and 7 Leaving samulations tended at the other since f for 4 years, 3 of f to and 4 of f 30 annual value. Pupila, 570; admission at the age of 12. Head **Master**, Rev. H. A. James, M.A., D.D. (g v.) **Motto**, Orando laborando. Some distinguished Johnson's friend and originator of The Gentleman's Magasine; Macready, the celebrated actor; Dr. S. Butler, afterwards Master of Shrewsbury School; Walter Savage Landor; T. Shrewsbury School; Walter Savage Landor; I. Hughes; Lord Derby; Dean Stanley; Arthur H. Clough; Matthew Arnold; Lord Bowen, Professor T. H. Green; F. C. Selous; G. J Goschen; Sir H. Drummond Wolff, Lord Davey, Dean Bradley; Dean Vaughan; C L. Dodgson ("Lewis Carroll"); and Loid Brassey. In '89 it was decided to establish a Home Mission, in addition to the Fox Memorial Mastership in India, in connection with the School. Consult Rugby School Register.

Rules of Procedure. See Parliament and PARLIAMENTARY PROCEDURE.

Rumbold, Sir Horace, Bart., G.C.M.G., H.M. Ambassador at Vienna, is the son of Sir William Rumbold, Bart., and was b in 1829 He was appointed Attache at Washington in 49, and served successively at Florence, Paris, Frankfort, Stuttgart, and Vienna In '58 he was appointed Secretary of Legation at Pekin, and in '62 filled a similar post at Athens Further promotion led him to St. Petersburg, as Secretary of the Embassy there, in '68, and as secretary of the Embassy there, in '68, and thence he was transferred to Constantinople in '71. In '72 he became Minister and Consul-General in Chil, and thereafter he acted as Minister at Berne '78, to the Argentine '79, to Sweden and Norway '81, to Greece '84, and to the Netherlands and Luxembourg '88. In Aug '96 he was appointed to succeed Sir Edmund Monson at Vienna.

Rural Dean. See Church of England

Rural Dean. See Church of England Rural Labourers' League, The, was established in May '88. Its President is the Right Hon. Jesse Collings, M.P. The objects of the League are: To assist in putting into operation the Allotment Acts of '82, '87, and '90; and the Parish Councils Act, '94. To assist every practical effort to secure a more direct connection of the agricultural population with the Soul. To assist the proportion of a practical soil. To assist in the promotion of a practical scheme, either by old-age pensions or some other means, by which the agricultural labourer may be relieved of the necessity of ending his days in the workhouse, and may have secured

days in the workhouse, and may have secured to him a condition of reasonable comfort in old age. The Becretary is Mr. F. G. Pyne, and the Offices are at 95, Colmore Row, Birmingham. Ruskin, John, M.A., LL.D., was b. in London 1819. Educated at Christ Church, Oxford. where he gained the Newdigate prize (39) Having early developed a taste for art, he studied with great success under Copiey Fielding and Harding, and, becoming enamoured of Turner's paintings, he wrote a letter in defence of Turner, in response to an attack made on him in Blackwood's Magazine. This developed into the celebrated work "Modern Painters," vol. 1. ('a3), which obtained a great success, though it evoked some sharp criticism on the part of those who discrete from his new Heresided for comsented from his views. He resided for some time in Italy, and subsequently published the remaining volumes of "Modern Painters," making five (all issued in '46-60). These con-

tained valuable illustrations by himself, and have run through many editions. He had previously (49) written "The Seven Lamps of Architecture" and "The Stones of Venice" (51-3); both books have been frequently reprinted. He has also written extensively on economic and other questions, and more recently was engaged upon his autobiography, which after being brought out at very irregular intervals under the title of "Protenta," has now stopped altogether Address Brantwood, Comston.

Ruskin Society of London (Society of the Rose) was established in 81. It invites the help of all earnest friends of Mr. Ruskin and students of his works, and suggests the establishment of local centres as branches or reading societies. It offers public readings, papers and addresses, in exposition of Mr. Ruskin's writings and in exposition of Mr. Ruskin's writings and teachings, to literary and other associations. It possesses a good library of Mr. Ruskin's works (most of which have been presented to works (most of which have been presented to the Society by the author) for the use of members Subscription, ios. 6d For information as to the Society apply to Mr. J. P. Smart, jun, 5, Mount View Road. Crouch Hill, N. Russell, George W. E., the younger son of Loid Charles Russell, and grandson of the 6th Duba of Berliotd was bound and grandson of the 6th

Duke of Bedford, was born in London Feb. 3rd. 1852. Educated at Harrow and University College, Oxon, of which he was a Scholar and Prizeman, he became M.P. for Ayle-bury in '80, and was appointed Pathamentary Secretary to the Local Government Board 835. He re-turned to the House of Commons as Member for North Beds, '92-5, and held the offices of Under-Secretary of State for India '92-4, and for the Home Department '94-5. He was also an Alderman of the London County Council '89-95. In literature of the Lordon County Council 39:95-118 literature achievements include a monograph on Mr. Gladstone contributed to the Prime Ministers series, and the "Letters of Matthew Arnold," which he clitted. In '96 and '97 he was prominent as a leader of the "Liberal Council Management, with record to America. Forward "Movement with regard to Armenia and Crete. In '98 published "Collections and Recollections." Address. 18, Wilton Street,

London, S W. Russell of Killowen, Lord. See under PEERAGE.

RUSSIA.

Russia is one of the largest of the military powers of Europe. It has a European area of 2,095,504 sq. miles, and the total area of the Empire, including the Asiatic possessions, is 8,644,100 sq. miles. The total population is about 130,000,000. The fifty governments of European Russia contain 94,188,750 people, the Vistula Province (Poland) 9,442,500, Finland 2,527,801, the Caucasus 9,723,553, Siberia 5,731,732, and Central Asian possessions (Turkestan and Franscaspia) 7,596,687. The Slavs constitute nearly two-thirds of the population (about 70,000,000), of whom 5,000,000 are Poles; the rest of the population being made up of Lithuanians, Finns, Germans, Tartars, Jews, Armenians, and a variety of Asiatic peoples. The population of the capital, 5t. Petersburg, its about 1,200,000. The Government is an autocracy, the Czar being the Russia is one of the largest of the military ment is an autocracy, the Car being the supreme ruler and legislator, and the only source of power in the body politic. He, however, entrusts the administration of the empire to four chief Councils, known respectively. to four chief Councils, known respectively as the Council of State, a consultative body, the members of which he appoints, and which is

divided into three departments, viz. Legislation, Civil and Church Administration, and Finance; the Ruling Senate, which is a partly deliberative and partly executive body, and promulgates all laws; it also supervises the general adminis-tration of the empire, superintends courts of law, and is the high court of justice for the empire; the Holy Synod, which superintends religious matters, and the Committee of Minisreligious matters, and the committee or ministers. For purposes of local government the empire is divided into the five general governments of Finland, Poland, Wilna, Kieff, and Moscow, 68 governments and 635 districts in European Russia, and into the five general governments of the Caucasus, Turkestan, the Steppes, Irkutsk and the Amur, 10 governments of the caucasus Turkestan, the Austronaus of the Caucasus, Turkestan, the Austrices and a districts in Assatic ments, 17 territories and 3 districts in Asiatic Russia. In European Russia the country is divided into communes, groups of which are united to form cantons. Communal and can-tonal affairs are decided by communal and cantonal assemblies. The administration of the districts is to some extent, and in some governments, entrusted to elective district assemblies, called semstros, in which the landowning nobles have great power. There are elective administrative bodies in most towns elective administrative bodies in most towns and cities. The State religion is Græco-Russian, called the Orthodox Catholic Faith. The Emperor is the head of the Church, but the Holy Synod is the board of government. The orthodox number 73,000,000; Roman Catholics 8,300,000, Protestaints 2,050,000, [ews 3,000,000, Mohammedans 2,600,000. In educational matters Russia is perhaps the most backward country in Europe. There are comparatively few primary schools, though the lack of official information on the subject may make matters seem worse than they are. The administration of justice, though nominally reformed in 64, is very defective. Grain and other agricultural products, timber, naphtha, flax, linseed, and hemp are among the chief products of the country. By an Imperial Ukase, issued Nov 26th, 97, the curiency was established on a gold basis, and the relative value of silver and paper roubles in gold was perivanently fixed. There were in 97 26,211 miles of railway opened and working in the empire. Total revenue, 97, 4150,450,600, expenditure, £158,801,054; exports, 97, 470,091,167; imports, £75,528,90; total debt, 98, about £75,5000,000, including about £250,000,000 incurred in respect of railways. See Dipliconatic, Foreign Armies, Foreign Navies, Siberia, etc. and cities. The State religion is Græco-FOREIGN ARMIES, FOREIGN NAVIES, SIBERIA,

History, '98.—M. Witte's financial statement for '38 showed the estimated revenue ment for '38 showed the estimated revenue and expenditure balancing at 1,474,049,923 roubles, with a surplus of 14,000,000 roubles ordinary revenue, and a deficit of 106,000,000 roubles extraordinary revenue (Jan. 13th) This deficit largely represented outlays on railways. During the following months the main interest in Russian policy lay in the development of her teaction. Characteristics of the control of the teaction of the teact teach in the control of the teach teach

prevail during the ensuing winter. The following proposal was by direction of the Czar sent out to all the Powers, and made public (28th).
"The maintenance of universal peace and a

possible reduction of the excessive armaments which weigh upon all nations in the present condition of affairs all over the world represent the ideal aims towards which the efforts of all Governments should be directed. This is the overnments should be unfected. This is an even which fully corresponds with the humanitarian and mage animous intentions of his Majesty the Emperor, my august master. Being convinced that this high aim agrees with the most essential interests and legitimate requirements of all the Powers, the Imperial Government considers the present moment a very favourable one for seeking by way of international discussion the most effective international discussion the most effective means of assuring for all peoples the blessings of real and lasting peace, and above all things for fixing a limit to the progressive develop-ment of present armaments. During the last twenty years aspirations towards general pacification have grown particularly strong in the consciences of civilised nations. The preservation of peace has been made the aim of international policy; for the sake of peace the Great Powers have formed powerful alliances, and for the purpose of establishing a better guarantee of peace they have developed their military forces in an unprecedented degree, and continue to develop them in spite of every sacrifice All these efforts, however, have not yet led to the beneficent results of the desired The ever-increasing financial pacification. burdens attack public prosperity at its very 100ts. The physical and intellectual strength of the people, labour and capital, are diverted for the greater part from their natural application and wasted unproductively. Hundreds of millions are spent to obtain frightful weapons of destruction, which, while being regarded to-day as the latest inventions of science, are destined to-morrow to be rendered. obsolete by some new discovery. National culture, economical progress, and the production of wealth, are either paralysed or turned into false channels of development. Therefore, the more the armaments of each Power increase the less they answer to the Power increase the its they answer to the purposes and intentions of the Governments. Economic disturbances are caused in great measure by this system of extraordinary armaments, and the danger lying in this accumulation of war material renders the armed peace of to-day a crushing burden more and more difficult for the nations to bear. Evidently, therefore, if this situation be prolonged, it will certainly lead to that very disaster which it is desired to avoid and the horrors of which skike the human mind with terror in anticipation It is the supreme duty, therefore, at the present moment, of all States to put some the present moment, of an States to put some limit to these unceasing armaments, and to find means of averting the calamities which threaten the whole world. Impressed by this feeling, his Majesty the Emperor has been pleased to command me to propose to all governments accredited to the Imperial Court development of her influence and the expansion of her territory in China, more particularly in Manchuria. A full account of the steps by which Port Arthur and Ta-lien-wan were secured, and of the efforts put forth to get control of various important railway concessions, will be found under China and under Session, sect. 7. Coming back to European Russia, it was reported in August that the fiforts of all States which sincerely wish to harvest had failed in many districts, and that in these districts famine would accordingly It would, at the same time, bind their agreement by the principles of law and equity which support the security of States and the welfare

of peoples."
Most of the Powers in reply formally expressed their sympathy with the aims of the proposal, but little belief appeared to exist in any probable practical outcome. In France a

strong disposition to resent the proposal as a breach of the understanding between the two countries was manifested. It was stated Cook 19th), that the Governments of all Lurope and America, as well as the greater part of Eastern Asia, including China and Japan, had agreed to send representatives to the proposed Conference.

Said Hamud bin Mahomed, the present Sultan of Zanzibar, was placed on the throne by the British Government in August 'oo, His predecessor, Hamid bin I hwain, died suddenly, and a cousin, Said Khalid, tried to usurp the throne, but was driven from the palace by the British forces and the rightful ruler proclaimed Sultan. He is a man of about forty-six, well disposed towards Great Britain See Zan Zibar.

St. Albans, Bishop of See under PLIRAGE St. Andrews University, founded 1411, 15 thus the most ancient of the Universities of Scotland It included three separate colleges and corporations: (1) St. Salvator's (1450), (2) St. Leonard's (1512), and (3) St. Mary's (1537) In 1747 the two first-named were united and took the faculties of arts and medicine, St. Mary's being devoted to theology University College, Dundee (founded in 1880), was affiliated to and made to form part of the University of St Andrews by an ordinance which received the approbation of Her Majesty Jan 15th, '97 Chancellor, the Duke of Argyll, Vice-Chancellor and Principal, J. Donaldson, MA, LLD Rector, The Marquis of Bute Jointly with and rrincipal, J. Donaidson, M.A., Ll. D. Rector, The Marquis of But. Jointly with Edinburgh University it returns a representative to Parliament—the present member is Sir Wilham Octiond Priestly, M.D., Ll. D. Registrar, Mr. J. Maitland Anderson Degrees M.A., BD, D.D. Ll.D., MB, Ch.B., M.D., B So., D.So. The Bachelors in the several faculties—divently law, medicine and street. faculties—divinity, law, medicine, and science—have the hoods of their faculties bordered with white fur instead of lind with white satin. The diploma and title of **L** L.A. is also granted to women In Oct '92 the classes of the University and also the degrees of MA, BSc, MB, ChB, and MD were thrown open to women A number of bursaires are available for women students, and a Hall of Residence has been built on the University rounds at Kathelpie for their accommodation Miss L I Lumsden has been appointed Warden

St. Asaph, Bishop of. See under Prerage St. Christopher, or St Kitts. A British West Indian island, forming with Nevis and Anguilla a Presidency of the federal colony of the Leeward Islands. Capital, Basseterre, with a population of about 9000. The local government is that of a Crown colony, though representatives sit in the Federal Council of the Lecward Islands. A President is the chief official. For statistics see BRITISH EMPIRE (table).

St. Davids, Bishop of. See under Peerage. Members of the first two classes, being Knights, St. Helena. Is an island in the South are entitled to the prefix "Sir." The first

Atlantic belonging to Great Britain, 1140 miles from the African coast, and 800 miles S.E. of Ascension, the nearest land. Port and capital is Jamestown The opening of the Suez Canal and the consequent diversion of shipping from the island have led to its continuous decline of late years Area, 47 sq in , pop. 4120. An effort is being made to set up a fishing and fish-curing industry for statistics see BRITISH EMPIRE (table), see also Diplomatic.

"St James's Gazette" An evening review and newspaper, founded in 1880. In politics the paper has always maintained a somewhat ridependent and individual line, while giving a general support to the Conservative and Liberal Umonist parties. In addition to articles on the political questions of the day, it contains interesting papers and sketches on social, literary and scientific topics, an epitome of the news of the morning, and the latest sporting, financial and general intelligence of the afternoon. Mr. Hugh Chisholm is the editor, and Mr. Theodore A. Cook and Mr. J. Penderel Brodhurst are assistant-editors. The "St. James's Budget," a weekly illustrated paper, is published in connection with the Gazette. Office, Dorset Street, Whitefriars, E C.

St. Lucia A British West Indian island forming part of the Crown colony of the Windward Islands, of which it is the most northerly. Area about 240 sq m, pop. 46,671 Capital, Castries, the harbour of which is one of the best in the West Indies. The whites are mostly French Creoles, the dominant religion Roman Catholic, and education chiefly so; the law is based on old French codes. The scenery of the island is exceptionally beautiful. Products chiefly sugar, logwood, cocoa, tobacco, and spices. Government in the hands of an Administrator with an Executive and a Legislative Council for financial statistics For financial statistics see BRITISH EMPIRE (table)

St Michael and St George, the most Distinguished Order of, was instituted in 1818, and enlarged in '68, '77, and '87, and is the order to which subjects of Her Majesty who have taken a distinguished part in colonial and foreign affairs are generally admitted. It onsists of the Sovereign, a Grand Master (the Duke of Cambridge), and three classes of members

Salvation Army, The. A home and foreign missionary society with a semi-military organization.

commissioners, colonels, brigadiers, majors. and other officers, both commissioned and nonand other officers, noth commissioned and non-commissioned, with large contingents of soldiers, after the model of the British army, scattered throughout the world. Originated in the year 1865 by the Rev. William Booth, previously a Methodist minister, the movement was called the Christian Migsion until, in '78, the present name was adopted. Its objects are to reach, by means of adaptation, the great masses of the people, both at home and abroad, who are either too degraded or too indifferent to be are either to degrated or too indinerent to be reached by oldinary religious agencies. This it perpetually strives to do by adapting its work to the understanding and tastes of the people it seeks to reach, rather than by appealing or commending itself to the approval of the more refined classes of society; hence in the earlier days of its history its objects seem to have been much misunderstood, which led to some amount of opposition from legal and other authorities. This feeling, however, now appears to have almost entirely passed away. Although, comparatively speaking, so young a missionary society, its growth has been very rapid. Its own supported officers now number 14,89, and these proclaim the gospel in no less than 20 different languages and dialects. There are also some 33,600 voluntary officials specially selected and appointed to take definite work. The Army publishes in the several countries, in the vernacular, 42 illustrated newspapers and magazines, with a total annual circulation of over 45,000,000, the sale of which is mostly entrusted to its own members. The above summary conveys a briefidea of one side of the army's work Another side is the Darkest England Social Scheme for mulated by General Booth, which has for its object the immediate alleviation of the present misery of the outcast poor and their actual rescue from destitution, keeping always prominently in view likewise that reformation in character which, undoubtedly, is the true secret of permanent improvement. In this branch of the work the Salvation Army goes to the slums, and ministers to the workless, the homeless, the tramps, the starving, the waifs and stray children of the streets, and amongst the outcasts of society in every land, irrespective of creed or colour. For the accommodation of these this department has, in different parts of the world, 464 shelters, homes, labour factories, and other institutions in full operation, under the guidance of 1600 officers, men and women. Ariangements are to be made to tound the Oversea Colony, when the most desirable locality has been fully decided upon by the General and the experts who have the matter in hand. The International Headquarters are at 101, Queen Victoria Street, London, E.C. The large International Trading Depot, formed mainly to supply the needs of its own institutions and followers, is at Fortress Road, Kentish Town, and the Printing Works and Publishing Offices are at 38 and 100, Cleik-enwell Road, E.C. The offices of the City Colony of the Social Scheme are at 27, White-chapel Road, E. The British Farm Colony is at Hadleigh-on-Thames, Essex.

Samoa Islands. This group, in the western Pacific, consists of ten inhabited and two un-Salisbury, Lord See under Plerace.

Salt. See Trade, '98.

Salvation Army, The. A home and foreign missionary society with a semi-military organisation, having its general, chief of the staff, Savaia, described as being twice the size of the Isle of Wight, and the capital is Apia. The other chief islands are Upolu and Tutuila Great Britain, Germany, and the United States, who are represented by three consuls, have who are represented by three consuls, nave established themselves in the islands and guaranteed their independence. A Supreme Court has been established, consisting of one judge, who is known as the Chief Justice of Samoa. The natives are all nominally Christians. King Malietoa died (Aug 22nd, '98), and the Consuls of the three Powers, with the Chief Justice as President took over the Chief Justice as President, took over the administration pending the election of a successor. Mataafa, Mahetoa's rival, was afterwards allowed to return to Apia, and received a popular ovation on his arrival.

San Domingo is the republic which occupies the eastern end of the island of Hayti (q v) Area, 18,045 sq m; estimated pop. 500,000 lt is divided into six states or provinces, and five maritime districts, and is governed by a President and National Congress of twentytwo members elected for two years Capital, San Domingo, pop. 15,000. The inhabitants of the island are composed chiefly of mulattocs, and the Spanish language is that which is chiefly spoken. The State religion is Roman Catholic Education is free and compulsory There is said to be now some progress, and Exports consist of valuable timbers, coffee, tobacco, cocoa, and sugar. Revenue, '96, about £3,00,000; expenditure (no returns); foreign debt, about £3,400,000; imports, 96, £340,000,

exports, 4439,800.
Sanitary Institute, The, was founded in 1876 and incopposated in 188. The objects of the Institute are to promote the advancement of the sanches. Sanitary Science in all or any of its branches, and to diffuse knowledge relating thereto. congress for the consideration of subjects relating to Hygiene, and an Exhibition of Sanitary
Apparatus and Appliances, are held by the
Institute periodically Sessional meetings of
the Institute are held in London from time to time, for the reading of papers and for discussions upon subjects connected with samidiscussions upon subjects connected with santary science. Examinations are held, and certificates of competency in sanitary knowledge are granted. The examinations are held in London and also in provincial centres, and as at present arranged are adapted for inspectors of nuisances. Examinations are also held in Practical Sanitary Science. The Parkes Museum, which is maintained by the Institute, and is open daily from 10 am to 6 pm., and on Mondays to 8 pm. contains a great variety of the most approved forms of apparatus and appliances relating to health and domestic comfort. There is a large library of sanitary literature, and a reading-room supplied with the principal sanitary periodicals, both home and foreign. Members are elected by ballot by the council. The annual subscription payable by a member 18 £2 28, but medical officers of health and some others holding omeers of health and some others holding sanitary qualifications pay only an annual subscription of £1 1s. Fellows and associates are elected by the council officers President, H.R.H. the Duke of Cambridge, K.G. Treasurer, Sir Douglas Galton; Registrar, Sir Guyer Hunter, K.C.M.G., M.D.; Secretary, E. Whte Wallis, F.S.S. Offices, 72, Margaret Street, London, W.

the north by Guatemala and Honduras, is governed by a President and a Congress of seventy Deputies, elected respectively for four years and one year, by married men, or those who can read and write and support the mealing. Honduras Margarem and San themselves Honduras, Nicaragua, and San Salvador together constitute the United States of Central America, for the purposes of foreign affairs, but retain autonomy as to internal affairs. Education is free and obligatory. The bulk of the population are engaged in agricul-tural pursuits. The chief products are coffee, indigo, sugar and tobacco Area, 7225 sq. m.; pop 803,534. Capital, San Salvador, pop. 25,000. Revenue, 04, £1,231,000, expenditure, £1,224,000; external debt estimated at £24,000; imports, 96, £1,000,000. exports, £1,500,000. Schreiner, Olive, is the daughter of the Rev Mr. Schreiner, a Lutheran (lengyman of South Africa. She came to England when about twenty with the manuscript of "The Story of an African with the manuscript of "The Story of an African Farm," desiring, above all things, to devote herself to physiological studies. Her manuscript, after various adventures, was submitted to Mr. George Meredith, who saw in it great promise, and suggested certain alterations, which she carried out. The story was then published under the pseudonym of "Ralph Iron," and met with great success. It is a singularly move full sourtial authorgraphy. singularly powerful spiritual autobiography, representing the natural liberation of a lofty, idealistic temperament from the ultra-Calvinism of the Dutch profession. The heroine is named atter the maiden name of Olive Schreiner's mother, a very remarkable woman, the daughter of a Congregational minister who lived in East London Besides the above-named work Miss Schreiner has published "Dreams," a collec-In May '93 she tion of occasional parables again visited England, and on her return to Africa in October left a small volume, which was published in the Pseudonym Library under the title "Dicam Life and Real Life" Her larger book, the title of which is said to be "From Man to Man," is not to be published, it appears, for some time. She was married in '94 to Mr Cronwright, a young colonist, and has latterly been actively engaged in opposing Mr. Khodes and his South African policy, the book she published in 97, "Thooper Peter Halket," having apparently this end in view.

Schreiner, The Rt. Hon T., is the son of the Rev. Mi Schreiner, a Lutheran clergyman of South Africa, and brother of Olive Schreiner the well-known authoress. He was educated at Cambindge, where he studied for the law. Having taken his degree he returned to South Africa, and commenced practice as a baristic reputation, and when Mi Rhodes became Prime Minister of the Cape He soon obtained a considerable reputation, and when Mi Rhodes became Prime Minister of the Cape Parliament Mi Schreiner was appointed Attorney-General It thus became his duty to advise the Cape Government when the closing of the Drifts to all Colonial traffic was proclaimed by President Runger in '95, and he then gave it most authoritatively as his opinion that the action of the South African Republic was in direct opposition to the terms of the London Convention. This view being also taken by the Crown lawyers in England, the Imperial Government, supported by the Cape Ministry, including Mr. Schreiner himself, brought such strong pressore the Schreiner himself, brought such strong pressure to bear upon the South African Republic

as nearly resulted in war In the early part of '97, however, when Mr. Schreiner was examined before the South African Committee at Westminster, he expressed himself as being now of the opinion that arbitration would have been a better solution of the difficulty, though he was still convinced that the closing of the Drifts was a violation of the London Convention. Mr Schreiner is considered, along with Mr. Rose Innes, one of the two most able debaters in the Cape House of Assembly, and is a supporter of the Afrikander Bond in politics. It was on his motion of want of confidence that Sii Gordon Sprigg's Government was defeated (Oct. 11th, '98), and he afterwards became Premier.

Science and Art Department, The, of the Committee of the Council on Education. Under this department are the Royal College of Science, South Kensington, with which is in-corporated the Royal School of Mines, and the Royal College of Art, S. Kensington, numerous schools of science and art, which receive payments on attendance, on results, grants in aid, etc., the S. Kensington, Bethnal Green, and Indian Museum's the Science and Art Libraries, the Museum of Practical Geology, Jermyn street, the Museum of Edinburgh and Dublin, and the Geological Survey of the United Kingdom. The department holds annual examinations to test the science and art teaching in the various clementary, secondary, and special science and art schools in England, Wales, and Ireland, as well as in the colonies. Special examinations for navigation schools may be held l'ayments are made for instructron in drawing and science, and for Manual Instruction in public elementary schools and training colleges, and grants are made in aid of technical instruction and of local museums. The sum of money voted annually by Parliament for these purposes is liable to be decreased and eventually discontinued Grants are intended to supplement and not to supersede local effort Every Science and Art school or class must be under the superintendence of managers responsible to the Department It must not be conducted for private profit or farmed out to the teacher, and it must have local support citter in the form of fees and subscriptions or of rates (For fuller particulars see the "Directory of the Department, with Regulations for establishing and conducting Science and Art Schools and Classes," published by Miesis Fyre & Spottiswoode in London, Missis Menzies & Co in Edinburgh, and Messis, Hodges, Figgis, & Co, Ltd, in Dublin,) The 45th annual report of the Department was issued in Aug. '98 It showed that under the Science division there were, in '90, 2424 schools, the teacher, and it must have local support Science division there were, in '97, 2424 schools, 4,102 classes, and 197,795 students, the figures showing a slight decrease on those of o6, except in the number of students, which increased by 3442 Of the 2424 schools, 156 were Schools of Science, with 19,963 students. Of the total number, too, 1899 were in England and Wales, 298 in Scotl nd, and 121 in Iteland. The results of the May examinations showed that 92,246 students from the schools and 980 self-taught students and pupils from classes ineligible for grants had been examined, 151.212 papers worked, 62.261 papers passed, and tha 43.073 had obtained a first class in the held for the first time in '97. The examinations were held at 2131 centres in the provinces, at 189 in the Metropolis, and in the Isle of Man, the Channel Islands, Tasmania, Natal, New Zealand, and South Australia. In the Art Zealand, and South Australia. In the Art division the report showed that 20,493 elementary day schools with 2,286,431 scholars were taught drawing and were examined by the Department in 57. Of these schools, 19,267 were in England and Wales, 976 in Scotland, 85 in Ireland, and the rest in the Isle of Man, Jersey, etc. There were 1083 evening continuation schools examined, in which 51,633 scholars were taught drawing, and classes for Manual Instruction in connection with 1271 elementary day schools were examined, with 106,423 scholars The number of art schools and 159 classes in Scotland, and 13 schools and 56 classes in Ireland The total number of students who sat for examination was 79,687 There were 149,429 exercises worked, 116,998 in elementary stages, of which 73,455 passed, and 32,126 in advanced stages, of which 23,822 passed. Under the head of expenditure the passed. Under the head of expenditure the report stated that the total sum of £814,862 was disbursed during the year, as follows —Expenses of administration, £48,154, direct payments, prizes, etc, to encourage instruction in science, £182,215, and in art, £80,777, services common to both divisions, £87,241, institutions supported or aided by the State through the Department, £61,310, South Kensington and Bethnal Gieen Muscums, £81,812, approach for metricing in public elements. payments for instruction in public elementary schools and training colleges in drawing, £258,402, grants in aid of local museums, £499, and in aid of technical instruction, £2407 See EDUCATION

"Scotsman. The." The representative Scottish political daily paper—occupying in Scotland much the same position as the *limes* Scotland much the same position as the Immes m England First number appeared Jan. 25th, 1817. For six years it was a weekly, price 10d., then a bi-weekly, price 7d. Appeared first as a penny daily, June 30th, 55 Editors have been Ch McLaren, John McCulloch, Alex. Russel, and the present editor, Mr C. A. Cooper In politics it is Liberal Unionist. It gives much space to general literature, art, science Each week, in a single issue, it publishes a greater number of advertisements than any newspaper in Great Britain From the same office are issued the Weekly Scotsman and the Evening Dispatch, which latter has carned a wide reputation as a fearless assailant of public and semi-public abuses Head office: Cockburn Street, Edinburgh. London office: 45, Fleet Street, E C

Scott, Sir Charles Stewart, K.C. M.G., C.B., is a son of the late Major Scott of Wilsborough, co Londonderry, where he was b. in 1838. He was educated at Cheltenham and Trinity College, Dublin (first honours in classics, '57) appointed to Copenhagen, and there served with Count Muravieff, now Russian Foreign Minister. Sir Charles has a thorough knowledge of Russian, and so is particularly qualified for the post which he received in '98 of Ambassador at St. Petersburg.

Scottish Rights of Way and Recreation Society, The, Ltd., Edinburgh, is the society for Scotland which performs the same kind of work as the National Footpath Preservation Society of England. It has been instrumental which were in danger of being lost, and is deserving of the support of all tourists, who have benefited greatly by its operations. The secretary is Mr. C. E. W. Macpherson, C.A., 6, North St. David Street, Edinburgh.

SEA FISHERIES OF THE UNITED KINGDOM

The figures mentioned below are taken from statistics presented to the Board of Trade, and relate to the quantity and value of fish landed in '97 (exclusive of salmon particularised in the Fresh-water Fisheries Returns), the average price of such at the place of landing, the number of fishing boats and persons employed, and the exports of fresh and cured fish. The total quantity and value of the fish returned as landed on the coasts of the United Kingdom for '97 are

on the coasts of the United Ringdom for '9' are given in the annexid table.

The prime fish not separately distinguished includes brill for England and Wales and all sparling for Scotland. The statistics mentioned under Scotland, Ireland, and total United Kingdom are provisional figures, and are subject to rectification. The average price per pound of soles was 14.78d, of turbot 7.72d, of prime fish not separately distinguished. of prime fish not separately distinguished 5'6id, of cod 1'06d., of haddock 1'10d, of herrings '55d, of ling 86d, of mackerel 1'3d., of sprats 38d., of fish not separately distinguished except shell fish 1'74d. The average price of shell fish per dozen was crabs 25 34d, lobsters 103, 23d, and oysters 3dd. The average price of other shell fish was 4id, per pound The total value of all fish landed on English The total value of all fish landed on English and Welsh coasts was £4,574,738 on the East coast, £619,475 on the South, and £709,923 on the West. The most valuable aggregate cargoes were landed at Grimsby, which amounted to £13,94,789. Hull tanks the next, with £811,514 worth, then London with £805,097, Lowestoft with £572,634. Yarmouth with £247,781, Milford with £215,276, North Shields with £18,715, Fleetwood with £160,788, and Scarborough with £113,574.

Scarborough with £113,554.
The number of fishing-boats registered and employed in the Sea Fisheries of the United Kingdom (including the Isle of Man and the Channel Islands) in '96 (latest returns) was 24,097, including 7,704 first-class boats of 15 tons and upwards, 14,169 second-class boats of less than 15 tons navigated otherwise than by oars only, and 4,776 third-class boats navigated by oars only, and 4,776 third-class boats navigated by oars only. Undecked boats fishing or dredging on the coasts of England and Wales, and the islands of Guernsey, Jersey, Alderney, Sark and Man, and gong outside the distance of three miles from low-water mark along such coasts, or in cases of bays less than ten miles wide, the line joining the headlands of such bays, are exempted from registration. As regards the quantity of fish cairied by railway from United Kingdom ports in '97, 352,235 tons were conveyed from these in England and Wales, 102,001 tons from Scotch ports, and 10,894 from those in Ireland The value of the fish imported into the United Kingdom, and returned for home consumption, increased from £2,112,000 in '89 to £2,808,000 in '97. The value of the fish consumed in this country during the last nine years has very greatly increased, as it rose from £6,365 000 in 89 to £8,681,000 in '97.

Secondary Education. See EDUCATION. See INSTITUTE OF SECRI-

TARILS. Secretary of State. As early as 1253 there was a secretary to the sovereign, but the office was not nearly so important as it afterwards became, and it is doubtful whether before Henry VIII's days the holder was a privy councillor. From the time of Elizabeth until the union with Scotland there were two principal secretaries of state, and Anne added a third for Sootoh affairs, but this office was abolished some years later. While there were two principal secretaries they divided home affairs between them, and one was at the head of the northern department, which included Denmark, Germany, Russia, and other countries, and the other was at the head of the southern department, which included France, Italy, Spain, etc.—to the elder of the two ministers being also committed Irish and Colonial affairs. A secretary for America or Colonial affairs was added in the reign of George III., but this office was abolished in 1782; the terms northern and southern were discontinued, and the duties divided into Home and Foreign, the affairs of Ireland and the Colonies being included in the former department. A third principal secretary, who was intrusted with War business, was appointed in 1794; in 1801 the business of the Colonies Britain, by assisting applicants whose character

was transferred from the Home Department to that Secretary, and in 1854 a fourth secretary of state was appointed, when the business of the Colonial Department was separated from the War Department The Secretary of State for the War Department in the following year took over the duties of the Board of Ordnauce and the Secretary-at-War-a financial office in connection with inilitary business which had existed for many years previously, and which was in '63 formally and finally abolished. In '58 a fifth principal secretary of state was appointed, for India, so that there are now five principal secretaries of state. They are ap-pointed without patent, by mere delivery to them of the seals of office by the sovereign; each is capable of performing the duties of the other, and in successive statutes new administrative duties are cast, not upon any one of the five individually, but upon the "Secretary of state," or "one of H M Secretaries of State," Each Principal Secretary is assisted by a Parliamentary Under-Secretary and by a Permanent Under Secretary I he five Permanent Under-Secretaries are Home Office, Sir Kenelm Digby, Secretaries are nome owner, Sir Kenlim Diggly, K.C.B.; Foreign Office, Sir I. H. Sanderson, K.C.B.; K.C.M.G.; Colonial, Mi. Edward Wingfield, C.B.; Warf, Sir Ralph H. Knox, K.C.B.; India, Sir A. Godley, K.C.B. The office of Secretary for Sootland, re-created in '85, is not a principal secretaryship, so that although the holder exercises in Scotland many of the powers and duties of the Home Secretary, he is not by viitue of his office a Cabinet Minister. The Permanent Under-Secretary for Scotland 18 511 C Scott Monerieff, K C M.G. See Ministry, IRELAND, HOME OIFICF, etc

Seddon, Rt. Hon. R. J., P. C., Premier of New Zealand, was b. at Eccleston, Lancashire, in 1845, and emigrated to Australia in '03 His pro tession is that of a mechanical engineer. Going to New Zealand, he stood for the House of Representatives, and was elected '70. Is now Premier, Colonial Treasurer, Postmaster-General, Minister of Labour, and Minister of Native Affairs, from '013 he was Minister of Mines, and was also Minister of Public Works and Minister of Defence from '91-6 He came and Minister of Defence from 51-6. He came to England for the Jubilee celebrations, 57, and was made a Privy Councillor, and had the honorary degree of LL D conferred upon him by Cambridge University In '98 he was accused by a member of the Opposition of having been concerned some years ago in a series of frauds, but a committee of inquiry unan-mously and absolutely vindicated him from the charge.

and fitness are assured to emigrate to Uanada, Australia, and other colonies. The Society in most cases supplements the funds of the intending emigrant, and assists him to obtain his passage. Introductions are furnished to the Society's correspondents, who are men of position resident in Canada, Australia, New Zealand, Tasmania, and South Africa, and work is usually provided for the emigrants on their arrival. During the past thriteen years 5640 persons have been thus located, at a cost of over \$\mathcal{L}_{31},000\$ A large proportion of this cost has been contributed by the emigrants and their friends in '97 the emigrants assisted numbered 250. The income of the Society exceeded \$2000, inclusive of emigrants' contributions. Office, Memorial Hall Buildings, Farringdon Street, London. Applications from intending emigrants should be made to the Secretary, Mr Edward Wilson Gates

Sonegal, or French Senegambia. A French colony in Western Africa, on the Senegal and Gambia rivers Capital, St. Louis, pop 20,000 The colony proper consists of various settlements on the river Senegal, but large tracts have been added to it till it now has a coastline stretching from Cape Blanco to the Gambia, and extends into the interior so as to connect with French Guinea and the French Soudan The total area is about 120,000 sq m, and the pop, about 2,000,000 Great part of the country is fertile and rich in produce Chief exports are gum, india-rubber, nuts, and skins, Senegal navigable 750 miles up There is a railway between Dakar, on the coast, just south of Cape Verd, and St. Louis, at the mouth of the Senegal river. The colony is represented at Paris by a deputy, but is administered by a governor-general and a Colonial Council See Colonies, etc., or European Powers.

Serjeant-at-Arms. The holder of this office

Serjeant-at-Arms. The holder of this office carries the Maoe (q v) when the Speaker enters and leaves the House, places it on the table when the Speaker takes the chair, and under the table when the House goes into committee He, by the messengers, notifies committees when the House is going to prayers. He or his deputy sits within the House, near to the door, and executes any directions of the Speaker for the maintenance of order, even should they extend to the removal of a member who has been ordered to withdraw and has refused to obey the ruling of the chair Certain of the galleries, corridors, etc., are under his charge. The Serjeant-at Arms of the House of Lords attends the Lord Chancellowith the mace; but the duty of maintaining order in certain parts of the chamber is one of the functions of Black Rod (q v.) Both Serjeants-at-Arms are appointed by the Crown Mr. H. D. Erskine is Serjeant-at-Arms of the Kouse of Commons, and the corresponding office in the Lords is filled by Majoi-General Sii Arthui Ellis, K.C.V.O., C.S.I.

SERVIA.

Formerly an autonomous province of Turkey, now a kingdom under Alexander I of the House of Obrenovitch. The executive power was, by the constitution of '88, vested in the King, and the legislative in the King jointly with the Skuptschina or National Assembly There was a Senate or Council of State of 16 members, always in session, which examined and elaborated projects of I ws, etc. The

Skuptschina was elected by the people indirectly once in every three years. Besides this there was the Great Skuptschina, with twice as many members as the National Assembly, which was called when required to decide vital and constitutional questions. All tax-paying citizent were electors. This Constitution was, however abrogated by the King in May 94, and temporarily replaced by the Constitution of '66 By virtue of this Constitution the Government are entitled to appoint one-third of the members of the Skuptschina, while the electorate for the other two-thirds is greatly restricted, with open voting instead of voting by ballot. Great power over the press is also given to the Government, and the arbitrary power of the Crown is also increased considerably. A special commission is, it appears, to draft a new Constitution. For local pui poses the country consists of 15 counties and 1290 communes State religion is Greek Orthodox, but others are tolerated. Education is backward, but progressing. It is nominally compulsory and free. Agriculture is practically the only industry, and almost every peasant cultivates his own freehold. Pauperism is practically unknown. The chief exports are agricultural produce, profile (profile) and animal produce, fruits, etc. Area, 19,050 sq. m; pop. 2,314,153. Revenue, '97-8, £2,733,980; expenditure, £2,733,980; public debt, '98, £14,850,000; imports, '07, £1,812,553; exports, £2,237,598. See Dipi OMATIC and FOREICR ARMIES.

History, '08-Ex-King Milan took up the

Mistery. '98 - Ex-King Milan took up the position of Commander in their of the Army (Jan 20th). The general elections to the Skuptschina resulted in a victory for the Government (June 4th). The final figures showed that 112 Liberals, 62 Progressists, 19 Neutrals, and 1 Radical had been elected. The King declared (July 6th) that he was determined in future to govern without regard to party. Party rule, especially Radical rule, had brought the country into disorder and debt, and he would never again invite the Radical leaders to form an Administration.

Servia, King of. See ALEXANDER I.

SESSION (PARLIAMENTARY). FEB. 8th-AUG. 12th, '98.

[11] This article gives an outline of some of the principal business transacted and the legislation accomplished during the session of '98. As in previous editions, military, naval, and educational matters generally are dealt with under the headings Army, Navy, and Education in the body of the work; though references to the increase of the available military strength of the country are made in sects. 5 and \$4, something regarding the naval programme as originally presented and revised will be found in sect 3, the Teachers' Superannuation Act, and Secondary Education Bill are noticed in sects, 51 and 52, and some of the observations of Sir J. Gorst on the education vote will be found in sect. 8 The Budget's atement in prief is included under the heading Finance, National, in the body of the book, though the provisions of the Finance Act are summarised in sects. 16-19, and also in 63, 63 (Local Govt. Act), and other sects. In order that the narratives may be continuous and complete, foreign and colonial matters are for the most part dealt

with under their proper headings in the body of the book, but some space is given under sect 7 to the parliamentary proceedings regarding events in the Far East Under Peeraged and Commons will be found biographical lists of Lords and M.P.s., and information as to matters of party policy and voting stiength is given under Political Pirties Foi convenient of reference the subjoined article is broken up into number ed sections and divided into three parts, the first containing the Queen's Speech and having reference to a number of miscellaneous matters of interest, the second being devoted to proceedings on Bills and an analysis of some of the principal Acts passed, and the third to Repoits of Committees. A list of sitting Royal Commissions will be found at the end of the a ticle.

QUEEN'S SPEECH AND MISCELLANEOUS.

[2] The fourth session of the fourteenth Parliament of Queen Victoria was opened by Royal Commission on Tuesday, Feb 8th, the Lord Chancellor reading the Queen's Speech as followeth "My Lords AND GENTLEMEN, - My relations with other Powers continue to be friendly. The negotiations between the Sultan of Turkey and the King of Greece have been brought to a conclusion by the signature of a treaty of peace between them, under which the territorial relation of the two Powers is practically unchanged. The question of an autonomous Government for the Island of The difficulty of arriving at an unanimous agreement upon some points has unduly prothese obstacles will before long be surmounted Intelligence, which is apparently trustworthy has been received of the intention of the Khalifa to advance agains the Egyptian aimy in the Soudan, and I have therefore given directions that a contingent of British troops should be despatched to Berbei to the assistance of His Highness the Khediye I have concluded a Freaty of Friendship and Commerce with His Majesty the Emperor of Abyssinia - The report of the Commission which I appointed in Decem ber '96 to riiqui e into the condition of certain of my West Indian Colonies has conclusively established the existence of severe depression in those Colonies caused by a heavy fall in the price of sugar, which is mainly attributable to the reduction in the cost of production and the great increase in its extent during recent years. But this fall has been artificially stimulated by the system of bounties to the producers and manufacturers of beetroot sugar manufained in many European states. There are signs of a growing opinion in those states that this system, is mjurious to the general interests of their population, and communications are now in progress between inv Government and the Governments principally concerned, with a view to a conference on the subject, which I trust may result in the abolition of the bounties In the meantime, measures will be proposed to you for the relief of the immediate necessities of the West Indian Colonies, for encouraging other industries, and for assisting those engaged in sugar cultivation to tide over the piesent crisis. On the not h-western borders of my Indian Empire an organised outbreak of fanaticism, which spread in the summer along the frontier, induced many of the tribes to break their engagements with my Government,

to attack military posts in their vicinity, and even to invade a settled district of my territory. I was compelled to send expeditions against the offending tribes for the punishment of these outrages, and to insure peace in the future. A portion of the Afridi tribes have not yet accepted the terms offered to them, but elsewhere the operations have been brought to a successful close. The courage and endurance exhibited by my troops, British and Native, have overcome the almost insuperable difficulties of the country in which they were operating, but I have to deplote the loss of many valuable lives, both amongst my own troops and those whose services were voluntarily and loyally whose services were voluntarity and royatry placed at my disposal by the Native Princes of my Indian Finpire Papers on this subject will be laid be fore you. The plaque, which appeared more than a year ago in Western India, returned in the autumn, and, although the mortality is less alarming than it was at this time last year, it is still such as to cause anxiety. No effort will be spared by my Government in the endeavour both to limit its extent and to intigate its effects, and I am confident that they will receive the loyal assistance of my Indian subjects in this aiduous task. I rejoice, on the other hand, to inform you that the famine, which prevailed to many months over several large districts, may now be said to be at an end, excepting within a small tract in Madias, and that there is reason to anticipate a prosperous year, both for agri-culture and commerce, throughout my Indian dominions. Gintlinin of the House of dominions. Gentlemen of the 100s; of Commons, The Estimates for the service of They have been framed with the utmost desire for economy, but in view of the enormous armanents which are now maintained by other nations, the duty of providing for the defence of the Figure involves an expenditure which is brond former precedent. My LORDS AND GINILIMEN,—A measure will be introduced for the organisation of a system of Local Government in Ireland substantially similar to that which, within the last few years, has been established in Great Britain - Proposals having for their object to secure increased strength and efficiency in the Army and for amending the present conditions of military service will be submitted to you. Bills for enabling accused persons to be heard as witnesses in their own defence, and for cheapening and improving the procedure of Scottish Private Bill legislaion have been before Parhament on many previous occasions. I trust that in the course of the present Session a final decision may be given upon these important questions. measure for facilitating the creation of muni-cipalities in the Administrative County of London will be brought before you. A measure for the amendmen of the Vaccination Law will be recommended to your earnest attention Proposals for the prevention of certain recognised abuses in connection with Church Pationage, for the constitution of a Teaching University for London, for the amendment of the Law iclaims to Prisons, for dealing in part with the subject of Secondary Education, for amending the Law relating to the Mercantile Marine Fund, for guarding against fraud in the management of Limited Companies, for the better ascertainment of the rights of landlord and tenant on the termination of an agricultural tenancy, and for preventing the adulteration of

drugs and food, will be laid before you in case the time at your disposal should permit you to ploceed with them I heartly commend your momentous deliberations to the care and guidance of Almighty God."

[3] The Addiess in reply to the Queen's Speech was moved and seconded in the Lords by the Earl of Hardwicke and the Earl of Albemarle, and in the Commons by Colonel Lockwood and Viscount Milton. In the one House it was, as usual, disposed of in course of a few hours, in the Commons the general debate and the various amendments submitted occupied attention until late in the sitting of Finday, Feb 18th, among the subjects discussed being slavery in Zanzibai, the military operations on the Indian frontier, the situations in the near and far East, and several questions of special interest to Ireland. The great measure of the session was of course the Irish Local of the session was of course the first Local Government Bill, on which the proceedings were for the most part businesslike, and, although there were naturally a few rather contentious points, harmonious. The leading debates of the session arose out of the developments and ministerial policy in the Fai East, the Government meeting in this regard, as also on their proposals and change of front in reference to vaccination, not a little criticism from then own side. The death-roll of members for the period between the end of the session of '97 and that of '98 was exceptionally heavy, among those who passed away being Sir G Osborne Morgan, Sir Frank Lockwood, General Sir H. Havelock-Allan, Mr Villiers, "Father of the House" (In successor in that esteemed position being Sir John Mowbray), Mr George Dixon the educationalist, Mr. Hamar Bass, Mr. Abel Smith, and Mr Charles Harrison Mr. Curzon was appointed to the Viceroyalty of India, and accepted an Irish peeriage, which then own side. The death-roll of members for of India, and accepted an Irish peerage, which does not disqualify him from returning to the House when his period of Indian service shall have expired. Mr. Gladstone survived his retilement from Parliamentary life rather more than four years, the Commons adjourned on the day of his death, and his remains were, at the unanimous wish of Parliament and the nation, accorded a public functal in Westminster

Abbey (see sect. 10)

[4] The Queen's Speech at the prorogation
was in the following terms — My LORDS AND
GENTLEMIN, — My relations with other nations continue to be friendly. I have witnessed with the deepest sorrow the hostilities that have taken place between Spain and the United States, two nations to whom my Empire is bound by many ties of affection and tradition The negotiations which have recently been opened give a fair ground for hoping that this deplorable conflict will speedily be brought to a termination by the conclusion of an honour-able and enduring peace. Changes which have taken place in the territorial relations of other powers with the Chinese Empire have induced me to conclude agreements by which the harbour of Wei-hai-wei and certain positions adjacent to my colony of Hong Kong have been leased to me by the Emperor of China I trust that these arrangements will conduce to the maintenance of his independence and the security of his empire, and will be favourable to the development of the extensive commeice which is carried on between the people of Great Britain and China In concert with

the French Republic, I have consented to guarantee a loan to enable the King of Greece to satisfy the stipulations of the recent treaty of peace between himself and the Sultan. The evacuation of Thessaly has, in pursuance of that treaty, been duly carried into effect. After lengthened negotiations, I have had great satisfaction in concluding with the Government of the French Republic a convention by which the numerous questions of territorial and com-mercial rights 12 West Africa, which had been for years in dispute between the two countries, have been finally settled. This convention is subject to ratification by the French Chambers, but in the meantime both Governments have instructed their officials to confine their occupation to the places and territories which, under the convention, have been recognised as belonging to their tespective countries Ariangements have been made for the estab-hshment at an early date of a penny postage between the United Kingdom, my Dominion of Canada, my Colonies of Newfoundland, the Cape of Good Hope, and Natal, and other parts of my Empire In certain portions of Western India, and in a small district of the Punjaub, the plague, though it has abated during the hot weather, still exists, and a few cases have occurred in other parts of the country. My officers have done all that hes in their power to relieve the victims of the epidemic and to arrest its growth I am thankful that bountiful harvests have been gathered throughout the greater part of India, and that the internal and external trade of the country is rapidly accovering from the depression caused by the tamine of the preceding year GENILEMEN OF THE HOUSE OF COMMONS,—I thank you for the liberal provision which you have made for the defence of my Empire The sacrifices which have been asked of you are severe, but they are not greater than the exigencies of the present time require. I am glad to recognise the value of the provisions to which you have assented for increasing the strength and efficiency of the Army My Lords and GLNILFMIN, -- I have seen with much gratification that you have this year added to the Statute Book an important measure for assimilating the local institutions of Ireland to those of England and Scotland I trust that this valuable reform will tend to strengthen the bonds which unite the people of Great Britain and of Ireland, and to micrease their common affection for the fundamental institutions of the realm. I have seen also with satisfaction that among the many important bills which you have passed are to be found the Bill for the reconstitution of the University of London, the Bill for enabling accused persons to be heard as witnesses, and the Bill for preventing abuse in the patronage and occupation of benefices in the Established Church The principles on which these measures rest have been generally accepted for many years, but an opportunity has not till now been found for passing them into law I pray that the blessing of Almighty God may attend you.

Africa See sect 6 (East and Central), sect. 26

(South and Tiansvaal), sect. 30 (West).

[5] Army. Mr. Brodrick (Feb 25th), in introducing the Aimy Estimates, stated generally the policy that the Government proposed to adopt with regard to the Army. The number of land forces asked for was 180,513 men, a of Great Britain and China In concest with of land forces asked for was 180,513 men, a the Emperor of Russia and the Piesident of figure exceeding by 21,739 those voted last

year, and making, with last year's addition, a year, and making, with last year's addition, a total additional force on the establishment, as compared with two years ago, of over 25,000 men. This is the largest number of men voted in any year of this century, except during periods of European war, and the greatest increase ever proposed to the Army in time of peace. Although the Army was a few hundred men short of its establishment, we had actually gave a service with the colours. had actually 220,000 serving with the colours and 80,000 in the Reserve. We could put into the field three army corps or 112,000 men, there were 120,000 men in gairison, and there were reserve and auxiliary forces to the number of upwards of 200,000. With the exception of artiliery we could mobilise now the force required for home defence, and we could provide for a big war by means of our reserve, but our present force at home was too small in peace to maintain the force abroad, and in the case of minor wars we had either to send composite battalions or to withdraw strong battalions from foreign stations, replacing them by weak and immature ones. It was proposed to increase the cavalry and field artillery, to commence at once to raise six new battalions of infantiy, and to add 80 rank and file to the establishment of the home battalions, raising it from 720 to 800-4 battalion never to be reduced below 600, to meet the annual drafts for the force abroad. Until the army leached its new establishment, men of good character. were being allowed to rejoin it from the Rcserve without repaying the deferred pay which they had carned According to the incommandum of the Secretary of State, a certain number of men would be enlisted for the line for a term of three years' colour service, with option of extension to seven years. It was proposed to give an allowance of 3d. per day to cover cost of groceries and vegetables, thus raising the of groceries and vegetables, thus faising the pay to 1s. per day, but this increase would only be received by efficients of 19 years of age, and would not be given to men en isted of only three years with the colours. On the other hand, it was proposed to abolish the deferred pay of 2d a day, at present given to the colours on he delegate transfer to the the soldier on his discharge of transfer to the Reserve, and to substitute for it a gratuity at the rate of Li for every year of service with the colours, up to a maximum of £12. Men transferred to the Aimy Reserve after three years, and men entitled to pension, would receive a gratuity of £2. With a view to facilitating the preparation of a force for special service out of the United Kingdom, when required, from the battalions at home, without mobilising the Reserve, a Bill was to be introduced to chable infantry soldiers on leaving the colours to undertake voluntarily the liability to iccall during their first year of leserve service. Men who assumed this liability would lective extra reserve pay of 6d. a day, making with the ordinary reserve pay 13. in all The number of the special reservists for whom pay was provided was 5000. It was also proposed to empower militiamen to volunteer for general service in emergencies Certain reforms of the War Office were also proposed For the hrst time in 26 years troops would be trained in large manœuvies In course of a prolonged discussion Lord Charles Beresford expressed the opinion that the reserve of guns was very of the East African Protectorate. Mr. Curzon, small, and hoped the authorities would not adopt any new quick-firing gun in preference Attorney-General had been consistently acted to that of France and Germany. An amendment

of M1. Labouchere to reduce the proposed establishment by 13,367 was negatived by 232 to 45, and the vote for men agreed to. A supplementary aimy vote of £1,20,000 for the year 1897-98 was carried March 14th (see sect. 84).

Assension Day. The motion that committees

of the Commons should not sit until 2 o'clock was carried by 178 to 39 (May 18th). The motion for the meeting of the House on Ash Wednesday at 2 o'clock instead of noon was

(Feb. 22nd) carried by 215 to 121.

Derby Day fell in the Whitsuntide recess.

[6] East and Central Africa (Uganda, Zanzibai, etc). Mi. Joseph A Pease moved on the Address (Fcb 10th) an amendment expressing regret that, having regard to the assurances given by the Government as to the abolition of slavery throughout the Zanzibar Protectorate, no efficient action appeared yet to have been taken to this end. Mr. Curzon maintained that the Government had given effect to their promise to abolish the legal status of slavery in the Protectorate, and that under the decree which had been is used all slaves would be able to claim their freedom by going through the necessary formalities. Sir W. Harcourt said the decree was condemned by the fact that only a very small number of slaves had been emancipated Mi Balloui replied that the Unionist party had, both in opposition and in office, shown a great desire, and had now taken effective steps, to further the cause of freedom. The amendment was negatived by 181 to 120. Mr. Labouchere (March 3rd), on a grant in aid of the expenses of the British Protectorate in Uganda, and there had been great mismanage-ment in Uganda, and moved the reduction of the vote Sir Charles Dilke contended that we had broken fath with the Soudanese troops. Mr H. M Stanley, while in favour of in-creasing the grant, thought there had been a total absence of consideration for Soudanese troops. Mr Curron contended that the mutiny had nothing whatever, to do with Major Macdonald, but was owing to circumstances long anterior in their origin to the appearance of that officer upon the scene. He at the same time agreed with Sir E Grey as to the necessity for a thorough inquiry into the grievances of the Soudanese mutineers. In the result the proposal to acduce the Estimate was defeated by 212 to 55 Lord Stanmore (March 318t) discussed the condition of affairs in Uganda, and invited a statement with respect to the pro-posed inquiry. The Duke of Devonshire said Mr Berkeley would inquire and report upon the cause of the mutiny of the Soudanese troops, and also with reference to all the circumstances connected with the murder of Major Thurston and his fellow-captives. The disaffection and his fellow-captives. among the troops had taken both the civil and military authorities in Uganda by surprise. Certainly their gricvance as to arrears of pay had been entirely removed before they were ordered up to join Major Macdonald's force, and in the official papers there was no evidence of any remissions in attending to grievances. Sir C. Dilke (Aug. 5th), on the Diplomatic and Consular Vote, diew attention to what he re-galded the extraordinary change of front which had been executed by the Foreign Office with regard to the fugitive slaves on the coast strip of the East African Protector atc. Mr. Curzon, in course of his reply, said the dictum of the Attorney-General had been consistently acted instructions of the Government had been violated. An amendment for the reduction of

the vote was defeated by 119 to 55.

[7] China. In view of the situation of affairs in the Far East, the meeting of Parliament was awaited with exceptional interest. Germany had occupied and secured a lease of Kiao-Chau Bay without objection by England. and had demanded the right to make railways and work mines. The Chinese Government had approached England for a loan, and Sir Claude Macdonald was reported to have mformed the Chinese Government that England was willing to assist China to liquidate the was willing to assist China to inducate the Japanese indemnity, and would provide a loan of £12,000,000 to run for 50 years at 4 per cent. including sinking fund, the conditions to include the opening of three treaty ports—Ta lien-wan, Siang-yin, and Nanning—a declaration that no portion of the Yang-tsze valley should be alienated to any other power, and the right to extend the Buima Railway through Yunnan. The Russian Charge d'affaires had protested strongly against the opening of Ia-hen-wan, and had threatened reprisals and the withdrawal of Russia's friendship if the port were opened, and, supported by France, had herself offered a loan to China The policy of the Government had been declared by M1. Balfour at Manchester (Jan 10th). Our intenests in China wife not territorial, but commercial We had a special claim to see that the policy of China was not directed to the discouragement of foreign trade, and if we asked for freedom of trade we meant freedom asked for fleedom of trade we meant recession of trade for all the world alike. This policy of the "open door" was emphasised by the Chancellor of the Exchequer, who, speaking at Swansea Jan. 17th, said that the Government desired to open China to the benefit of the trade of the world, and were absolutely determined at white we cost of absolutely, determined, at whatever cost-if necessary at the cost of war-that the door should not be shut. Just before Parliament met it was stated that Great Britain had dehnitely withdrawn her demand for the opening of Ta-hen-wan as a condition of the proposed loan, and the loan negotiations appeared to have failed.

Lord Sahsbury, speaking on the Addiess (Feb. 8th), said with regard to China the Government had not surrendered one lota of our treaty rights, not did it intend to do so, and there was no effort that this country would not make rather than allow those rights to be infringed. But nobody had indicated the least intention to infringe them, nor did he beheve that any such intention would ever be entertained. The Government had been willing to make an advance of money to China on condition that certain concessions in no way injurious to her were made with the object of further freeing trade. The Chinese Council said it would embarrass them very much if our proposal as to Fa-lien-wan were insisted on, and he then suggested us a compromise that the opening of the treaty port should be postponed until the railway was completed to the port. The Russian Government had spontaneously given a written assurance that any port they might obtain as an outlet for their commerce should be a port fiee to the commerce of this country; while the German Government had acted in a similar spirit with regard to Kiao-chau.

Replying in the Commons (Feb. 24th) to Sir

E. Ashmead-Bartlett, Mr. Curzon said Russia had given assurances that any port she might have as an outlet for her commerce on the have as an outlet for her commerce on the coasts of the North Pacific would be open to the ships of all the Great Powers and the commerce of all the world. Mr. Curzon informed Lord C. Beresford (Feb. 25th) that the French Government had given an assurance to Her Majesty's Ambassador at Paris to the effect that they had not the least intention to occupy temporarily on permanently a naval base in Chinese waters similar to the recent occupation by Germany and Russia. It was further stated that the post of Inspector-General of Maritime Customs was in the future, as in the past, to be held by a British subject, so long as British trade with China at the ports continued to exceed that of any other Power; and a port was to be opened in Hu-nan within two years. Sir E. Ashmead-Bartlett moved (March 1st), "that it is of vital importance for British commerce and influence that the independence of Chinese territory should be maintained This was seconded by Mr. G. Bowles. M Curzon said the Chinese had withdrawn then proposal for a loan, and the issue of the loan had been arranged by certain banks. The three objects which the Government had in view were the maintenance of the integrity of China, the preservation of our treaty rights, and freedom of commerce From statements made by Mr Curzon (March roth), it appeared that Russia was negotiating with China for the lease of Port Arthur and Ta-hen-wan, as well as for the construction of a railway to one of those ports, on the same conditions as the Manchullan Railway, but Ta-lich-wan, if so leased, was to be opened to foleign trade, like other Chinese ports Her Majesty's Minister at Peking, in confirming the existence of the negotiations, stated there was no indication of anything in the shape of an ultimatum Mr. Cuizon stated in answer to Sir C Dilke (March 21st), that regulations with reference to the recent opening of all internal navigation throughout China of Maritime Customs at Peking. Mr. Curzon stated (March 28th), in answer to Sir E Ashincad-Bartlett, that the Russo-Chinese Ashmuad-Battlett, that the Russo-Chinese agreement was signed on the 26th, and that on March 20th the Russian Ambassador had nothed to the Government that by a convention signed on that day the usufruct of Port Arthur and Ta-hen-wan and the adjacent territories had been granted to Russia by the Chinese Government Replying to Mr Marks (March 31st), Mr. Curron said the Russian Foreign Mountain on March 46th had authorised 60th Minister on March 16th had authorised our Ambassador at St Petersburg to inform Her Majesty's Government that in the event of China consenting to lease to Russia Ta-lien-wan and Port Atthut both ports would be open to foreign trade like other ports in China. Our Ambassador was further authorised to assure the Government that there was no intention on the part of Russia to infringe the rights and privileges guaranteed by existing treaties between China and foreign countries, which privileges include the right, under the Treaty of Tientsin, to send ships of war to all ports within the dominion of the Emperor of China. Sil E. Ashmead Bartlett was informed by the Under Foreign Secretary that the Russian Ambassador's note of March 28th stated that the two ports would be occupied at once by Russian troops and the Russian flag hoisted by

the side of the Chinese flag. Lord C. Beresford was informed (April 5th) that the assurances given by Russia on March 16th, that Ta-lienwan and Port Arthur would be open to foreign trade, were only renewed in the note on Maich 28th with regard to Ta lien-wan; but on the attention of the Russian Minister for Foleign attention of the Russian Minister for Foleign Affairs being called to the omission, he replied that he held to the assurances previously given In reference to questions addressed to him (April 1st) regarding the Chinese provinces of Yunnan and Szechuen, Mr. Cui zon informed Mr. J. Walton that the French Government, under the Anglo-French declaration about Siam, agreed that all railway concessions and commercial and other privileges and advantages conceded or which may be conceded in those provinces should, as far as rests with France, be extended and rendered common to Great Britain.

Mr. Balfour, on the motion for adjournment over Easter (April 5th) maintained that the principles of Far East policy laid down by him in January had since guided the Ministry and were still guiding them. China had, he said, undertaken at our instance that the region of the Yang-tsze should in no circumstances be parted with or leased to any other power, that the successor to Sn Robert Hart should be an Englishman so long as the commercial predominance of this country gave us an equitable title to have an Englishman in that position. and to permit access by the steamers of all nations to the great waterways of China, while three new treaty ports were to be opened-at Chinwang Peitaiho in the Gulf of Pechi h, at Funning in the inlet of Samsa, and at Yo-chow, on the Tung ting Lake, this last being the first treaty port over opened in Hu-nan He beheved that the principle laid down by Russia, that our treaty ariangements should be in no way interfered with, would be carried out to the letter. Furning to points as to which he thought Russia had pursued an unfortuna e course, Mr Balfour remarked that it would have been well could Russia have confined her policy to the extension of her system to an ice free commercial port, but un fortunately her statesmen took a different view of their duties and interests, and resolved, in addition to a commercial port, to obtain the control of the port and harbour of Port Arthur Port Arthur was not a commercial port, but a naval port. The Russian Government had, in Mr. Balfour's view, given a shock to the Chinese Empire by taking a port which dominates the mailtime approaches to Peking Her Majesty's Government had, it seems, on news of the negotiations, officied, if Russia would abstain from taking Port Arthur, to give a corresponding pledge that they would take no port in the Gulf of Pechi-librance offer not being accepted, they had obtained from the Chinese Government Wei-Hai-Wei, with a right to navigation, after the Japanes should have left it, on the same conditions and for the same term of years as those obtained by Russia in the case of Port Arthur [Japan, it seemed, entirely concurred in this arrangement, Wei-hai-wei being the one port in the Gulf of Pe-chi-li which might be said to

made by the Duke of Devonshire to the Peers.

Important concessions to the demands of France were made by China in April. Mr. Balfour replying (April acth) to Mr. Maclean (who asked whether any notice was taken by the Government of an official statement that, in rieply to the British Minister's exhortation to China to make a stand against Russian threats, the Chinese Government said that a piomise of protection against Russia was the only thing that would help them) said the request was equivalent to a demand that we should guarantee Chinese territory, and this was certainly not a demand which in existing was certainly not a demand which in existing circumstances ought to be granted. It was stated (April 28th) that a portion of Ta-lien-wan Bay was to be fortified, and that the Government had spontaneously intimated to the German Government that it had no intention of calling in question the German rights or interes s in the province of Shantung. Sir W Harcourt (April 20th), after reviewing the despatches from the point of view of the principles of the Government, felt obliged to describe them as a record of continual failure at every point. Mr. Balfour, in course of his reply, maintained that the position of Russia with regard to China was meomparably better twelve months since than now. He warmly repudiated the suggestion that the British ships were withdrawn from Port Arthur in ships were withdrawn from Fort Arthar pursuance of a cowardly policy, stating that this was done in the ordinary course of Admiralty management. Mr. Brodnick announced (May noth) that the garriston of Hong Kong was being strengthened. The Earl of Kimberley. May 17th) put questions as to matters in the May 17(f) put questions as to maters in the lar hast, and made some references to Mr. Chamberlam's speech on May 13th at Birming ham, in which, in allusion to the negotiations with Russia, the Colonial Secretary had quoted the old proverb that "he who superwith the devil must have a long spoon." Mr. Curzon stated (May 237d) that a notification that the least house of where the consense. tion that no Englishmen or other foreigners would be permitted to land at Ia-hen-wan or Port Arthur without a passport wired by the Russian Corsil had been issued without the knowledge of the Russian Government, and that instructions had been given to withdraw it On June 6th Mi Curzon stated that the latest information received by Her Majesty's Government, so far from corroborating the success of the endeavours of the Russo-Chinese Bank to obtain, by means of a railway toan, the control of the sole railway from the north of China to Peking, was to the effect that a prehimmary agreement for the extension of the northern line of railway between Peking and New-chwang was signed on June 1st between the representatives of a British syndicate and the Chinese Director-General of Railways Foreign affairs generally, though with special reference to the Far East, were again discussed, June 10th, when the proceedings of the Government were criticised from their own side, and Mr. Chamberlain justified his Birmingham speech (see Sect. 29), and denied that there was any difference of opinion between him and the Prime Minister Loid Salisbury stated (June 13th) that a convention had been concluded balance the possession of Port Arthur Sin W. Harcourt said the polic, now enunciated was not that of the "open door", and other speakers continued the discussion at some length. A sight extension would be given to the colony of Hong Kong, and it would be made strategismilar statement to that of Mi. Balfour was

that the Government had every reason to hope that the distinguished officer who had already performed valuable duties in the Chinese navy would make arrangements with the Chinese Government by which he would be able to help them to reorganise their service. regard to the construction of railways in China, Her Majesty's Government would do everything to secure British capitalists concessions where they showed capacity for fulfilling the engagements they undertook. In reply to the Earl of Kimberley, who (Aug 15.) asked what steps the Government proposed to take to safeguaid Bitush interests as regards railways in the provinces bordering on the Yang-tsze-kiang, the Marquis of Salisbury said the Chinese Government had always been extremely well disposed towards Great Britam, and he was sure we should get concessions equal to those of other nations. Sir Claude Macdonald had been instructed to inform the Chinese Government that Her Majesty's Government would support them in resisting any Power which committed an act of aggression on account of granting concessions to make or support any railways or public work to a British subject Mr. Curzon on the same day said Her Majesty's Minister had been in saturated some time ago to press for the insertion in every concession granted by the Chinese Government, of proper provisions for the equal treatment of all nations als and trade. The policy of the Government was further criticised (Aug 2nd), when Mr. Balfour denied that the open door had ceased to exist either in Manchuria or elsewhere, and had been shut in ourface. As to the new railway policy of the Government, the concessions secured by us in Government, the concessions secured by us in China during the last few months were far greater than those obtained by all on invals put together. On Aug, 9th Mr. Curron stated that Sir Claude Macdonald reported by telegraph on July 25th that the Chinese Government had expressed their gratitude to Her Majesty's Government for the promise of sup-port which had been given to them, and added that no threat of aggression had been made. In answerto Mr. 1 Walton, the Under Serietary stated that instructions to resist picter ential treatment for foreign subjects on trade were sent to Sir Claude in March last Renewed and particular instructions with reference to railway concessions were sent to him on July 13th. Sii Claude Macdonald had, Mi. Cui 2011 into med Mi. Provand, telegraphed on Feb. 18th that Ge, many had opposed a scheme for a trunk railway from Trentsin to Chin-kiang, on the ground that no railway could be constructed in the province of Shantung with-out an arrangement with them, but it had been explained that the demand put forward was merely to the effect that if the Chinese Government desired to obtain foreign assistance for the construction of railways in the province, they should in the first instance offer the work and supplies to German industry and German trade. No exclusive privileges had been claimed, and no attempt had been made to exclude other nations from free competition in exclude other nations from free competition in the province. The situation was further discussed on Aug. 10th, Mr. Balfour denying that the open door had been closed anywhere. On Aug. 11th, the day before the protogation, Mr. Balfour informed Mr. Provand that on March.

ascertain whether German tenders could be obtained for railway construction on better terms than those made by Bittish capitalists, but that Her Majesty's Government could not admit a preferential right on the part of Germany simply on the ground of a projected line being in the province of Shantung. No reply had yet been received from the Chinese Government Mr. Yerbuigh asked whether the fact that the Tsung-h-Yamen had given a formal assent to the conditions imposed by M. Payloff with regard to the contract for the Niu-chwang Kailway extension loan, the said conditions being that the railway should not be mortgaged as security, and no foreign con-trol or interference of any description should be permitted, even in case of default; and whether these conditions were not in direct conflict with the terms of the signed contract. Mr Balloui replied that the facts were substantially as stated, and that the matter was orgaging the "serious attention" of the Government On the following day he could and nothing regarding the railway questions, though in answer to Mr Lowles, he stated that every legitimate commercial enterprise in thing would receive the support of Her Maiesty's Government.

[8] Education, England and Wales. Sir J Lubbock (March 22nd) moved a resolution declaims it to be desirable to assimilate the provisions of the English Education Code as provisions of the Engine Education Code as tegrals class and special subjects to those in the Scotch Code of '97. He proposed to remove a limitation in the Code upon the number of class and special subjects in which children in clementary schools may be presented. Millob seconded Sir J Gorst thought the present number of such subjects was enough for the children at the tender age at which they go to school in this country. The law relating to the attendance of children in Scotch schools was much more stringent than that relating to those in English schools, and in the Scotch schools they had older children and more teachers. Sir W. Harcourt said the mote teachers Si w rimcourt said the official answer to the demand of the mover and seconder was that we had not in this country the machinery for giving to English children a decent education, and hon-members should endeavour to awaken the minds of the English people to the greatest of all their deficiences. The resolution was withall then defici noises. The resolution was with-drawn. Mr. Lloyd George (April 19th) drew attention to the subject of public education, and moved "that it is essential to a just and efficient system of national education that there should be within reach of every child in I ngland and Wales a public elementary school under local representative management; and that there should also be provided increased facilities for the training of teachers in colleges free from sectarian control." This was seconded by Mr Alfred Hutton. Sir J Gorst, in opposing the resolution, said it was acknowledged that the present parliament could not pass a comprehensive measure for the development of national education, and it was necessary therefore that the fragmentary efforts of the Legislature should be made, not in accordance with some settled policy, but in order of their urgency. The most urgent reform was to get into the existing schools more children who Baltour informed Mr. Provand that on March were in a condition to receive instruction, and to keep them there until they were over age. the Chinese Government were at liberty to Sir W. Harcourt said our system of national education was inefficient from top to bottom. Mr. Knox opposed the resolution, which was rejected by 183 to 121. Str. J. Gorst, in pioposing the Education Vote for England and 'Wales (June 17th), said that in the sum asked for there was an apparent increase of £332,005 over the sum voted in the previous year, but the true increase was only £228,055 Adding to the sum voted by Parliament towards elementary education the sums derived from voluntary subscriptions (£845,000) and from the rates (£2,725,801), it might be assumed that in the current financial year a sum of upwards of 611,690,000 would be spent in England and Wales upon elementary education. There were however serious obstacles which prevented the expenditure of the elarge sums from fully obtaining the desired purpose. He included among these the early age at which children leave school, irregularity of attendance, the unfit condition of many children attending to receive instruction, the inferiority in great towns of the voluntary schools to the board schools, the inferiority of the rural schools, the want of teachers, and the want of an organi-sation of secondary education. In discussing these points he observed that if the Govern-ment liked to make the attendance at school really compulsory it could be done, and he had no hesitation in saving that in London Bible teaching in board schools was so superior to the teaching in voluntary schools that there was no comparison between them. Si W. Hancourt observed that the statement would have an immense influence on the House and the country, and asked why they were not dealing with these educational defects. The dealing with these end office for three years, and with a powerful majority, but what had they done to cure the defects in the education of the people beyond granting half a million to the voluntary schools and a trifle to the board schools? The view of the Archbrshop of Canter bury seemed to be that voluntary schools were to be manipulated as a machine for doctinal and sectarian teaching Mi. Balfour in reply warmly repudiated the statement that in the vast majority of the Church schools the ritual and doctrine were inconsistent with those of the Church. The vote was carried after further discussion Lord Hugh Cecil, on the report of the vote (June 24th), adverted to the speech of Sir John Goist, which he said had greatly offended a large number of the supporters of and teachers in voluntary schools Sir J. Gorst, in reply, explained that he had applied his remarks, not to voluntary schools generally, but only to voluntary schools in the great towns, and that he had often stated that voluntary schools in the country were as a rule better than Board schools. His remarks as to religious education had reference to Bible teaching only The Aichbishop of Canterbury (July 12th) asked the Lord President of the Council whether he could say on what authority of on what evidence the Vice-Piesident of the Council stated publicly that the teaching of the Bible in board schools in large towns was far superior to the teaching of the same subjects in voluntary schools in the same places. The Duke of Devonshire replied that the statement complained of was an expression. statement complained of was an expression of Sir John Gorst's own personal opinion, of Sir John Gorst's own personal opinion, After further discussion the resolution was and was not based upon any official or other authority, but on personal observation. The Exchequer, replying to Mr. Kimber (July 1st), opinion of Sir John Gorst was the opinion of said the fact that the lean or grant to Egypt

that gentleman only. The opinion of the Vice-President did not purport to relate to the religious instruction given in the schools of the country generally, but solely to that given in the schools of the Metropolis, and he did not see why it need have given rise to any very great alarm or annovance to managers of any voluntary As to a further statement in the schools speech of the Vice-President, based on a quotation from the report of one of the departmental inspectors, to the effect that the farmers and squires were no friends of the education of the agricultural labourer, the noble duke regretted that such in assertion should have been made by any official of the Department, and also that it should have been repeated in an official statement by the representative of the Education Department On Intv 28th complaint was made that after a Bill to confirm a provisional order of the Education Department, enabling the London School Board to acquire a number of pieces of land for school purposes, had passed through the unopposed committee, a paragraph relating to a scheduled site at Cam-ber well had been struck out without notice to the Board Sir John Goist said that the site had been struck out from a previous Bill, the department were not aware that it had been reintroduced into this Bill, and there was no time to give notice. Sin H Fouler moved the adjournment of the debate, but this was negative. tived by 148 to 92, further motion to recommit the Bill being also negatived, and third reading carried

[9] Egypt and the Soudan. The Chancellot of the I schequer informed Mr. John Ellis (May 17th), that £798,800 had been advanced to the Egyptian Government [as a grant in aid for the vent 'obor of the expenditure incurred in the year of the expenditure incurred in connection with the expedition to Dongola (see Session, seet 14, ed '98)], and was owing on March 13st, '98. The Egyptian Government had agreed to pry 2 per cent interest, but none had yet been paid. No date was fixed for the repayment of the sum advanced. The Chancellor of the Fxchequer (June 27th) moved a resolution in favour of remitting the advance of £798,800 made last year to the Egyptian trovernment, in connection with the operations in the Nile Valley. He said peace now reigned from Dongola to Berber, Kassala and Suakim, and this had been achieved at a total cost of no more than £1,850,000, of which £750,000 had been expended on most valuable assets, comprising hundreds of miles of railways and telegraphs. The Government did not contemplate the undertaking of any further military operations on a large scale or involving any considerable expense, after the power of the Khalifa had been broken, for the recovery of the great provinces to the south of Khartoum. the great provinces of the southern Relations hight be made by a gomboat flotilla to free the waterway of the Nik from any interfector, cuc with perfect freedom of commerce with the interior. The estimated additional cost of the operations would not exceed \$750,000, and if they remitted the loan of last year the Lgyptian Government would be able to provide all the extra funds necessary for the purpose Sir W Harcourt characterised the transaction as a most remarkable one, and entered his protest against it.

included the sum of £270,000 advanced for the purchase of material for the railway between Wady Halfa and Abu Hamed would not be overlooked in the settlement of accounts after the capture of Khartoum. The right hon the capture of Khartouii and light hon-gentleman informed Mi Dillon (July 4th) that the war expenditure south of the Assuan was being defrayed directly by the Egiptian was being defrayed directly by the Eg-pian Government. The extra charge for the British forces north of Assuan, including cost of transport thither, was being temporarily defrayed from Army funds, but would be refunded by the Fgyptian Government, who would also provide the expenses of the expedition to Khartoum.

[10] Gladstone (Mr), after a long and painful illness borne with her oic fortifude and patience, died at Hawarden Castle, Flintsbuc, on the morning of Ascension Day, May 10th, '98 At a large gathering of members being p esent, most of whom wore mourning, Mr. Ballour,
rising almost immediately after prayers, before
any other business had been entered upon,
said he thought it would be felt in all parts of the House that they ought to do fitting honour to the memory of that great man whose long and splendid career had just closed by ad-journing their business that afternoon. This was not the occasion on which to give utterance to any of the thoughts which naturally suggested themselves, that occasion would be presented to-morrow, when it would be his dutyto propose an address praying Her Majesty to grant a public funcial to Mi Gladstone, should that not be inconsistent with his expressed wishes and the wishes of those who had a right to speak on his behalf, and also praying Hei Majesty to give directions for a public monument to be erected at Westminster public monument to be erected at Westminster to his honour. Mr. Balfour their moved the adjournment of the House, and this having being seconded by Sir Wilham Harcourt, the proceedings, which had occupied only a few minutes, came to a close. The House being met on the following day, May 20th, the Speaker a mounced that he had received speaker a mounted that he had received messages of sympathy from the President of the Italian Chamber of Deputies and from the Norwegian Storthing. The message from Italy was as follows. "The news of the death of William Gladstone has been received with profound sorrow by the Italian nation, even mindful of the interest constantly shown by that great statesman in the cause of our national resurrection, and has awakened a heartfelt and solemn echo of grief in the hearts of my colleagues of the Chamber of Deputies. As the Chamber is now prorogaid, falls on me, in viitue of my office of President, to interpret their sentiments, and participation in its grief at the loss of so eminent a member, whose whole life was one constant expression of devotion to his country eonstant expression of devotion to his country.

Blanculer, President of the Chamber of Deputies." Subsequently (May 21d) the following further message of sympathy was read: "From the President of the Chamber of Deputies at Athens to the Right Honourable. the Speaker of the House of Commons, I ondon In the name of my colleagues of the Hellenic Parliament, I beg you to transmit to the honourable members of the House of Commons

Gladstone. He was entitled to the gratitude of the Greek people, and his name will ever be venerated by my 'ellow-countrymen' On May 24th urther messages were received from the Senare and the Pessident of the Chamber of Deputies of the Argentine Republic, the of Properties of the Argentine Republic, the former communication being as follows "Buenos Anes, 24th May —To he Most Honourable the Speaker of the House of Commons, Incident I have the honour to communicate to the Speaker that the Senate of the Aigentine nation, over which I preside, tose to its feet in honom of the great memory of William Fwart Gladstone, the glory of humanity, whose loss the whole world at this moment deploies, and who merits the post-humons homage of all the Parliaments of the free nations of the world - BARTOLOME MITRE A message of condolence from the Chamber of Peers of Portugal was sent to both Houses

The scene in the Commons on May 20th was deeply impressive. The House was absolutely full of members, while the accommodation for peas, distinguished visitors, strangers, and ladies was utterly exhausted. The Sycaker, in pursuance of the ordinary rule regulating public business, called upon the member whose name headed the list of includes the strangers. quines to Ministers, but in response to a cry from all quarters of the House of "No questions," the more serious and solemn procted ness of the sitting were forthwith entered upon Mr Balfour, I cader of the House, observed that this was not the place, this still more was not the time, at which to attempt any estimate of a carcel which began on the morrow of the first Reform Bill, and which the country went through a series of changes in secrec, changes theological, social, and political, and in all these phases of contemporary evolution Mr. Gladstone took the liveliest interest. How was it possible for any one to pretend to exhaust the many sided aspects of such a life, even on such an occasion as this? If he ventured to say anything, it was rather of Mr. Gladstone as the greatest member of the greatest deliberative assembly which so far the world has seen. There was no gift which would enable a man to move, to influence, to adorn an assembly like this, that Mr Gladstone did not possess in a supereminent degree From the conversational discussion appropriate to our work in committee to the most sustained eloquence befitting some high argument and some great historic occasion, every weapon of Pathamentary waitare was wielded by him with the sureness and ease of a perfect, absolute, and complete mastery. Mr. Gladstone's place in history, and the judgment they ought to pass upon the great part which he had placed in the history of his country and in the history of the world, were not to be discussed by him to-day, nor did he think that the final answer could be given to them, the final judgment prenounced, in course of this generation. But one service Mr Gladstone did—in his opinion incalculable—which was altogether apart from the judgment which they might be disposed to pass upon particular opinions, or particular views, of particular lines of policy which Mr Gladstone might from time to time Parliament, I beg you to transmit to the have adopted. He added a dignity and he honourable members of the House of Commons the expression of our grief at the loss of the House by his genius for which it was imposeminent statesman and friend of Greece—sible to be sufficiently grateful. The Leader

of the House concluded by moving the following, explaining that in drawing up its terms they had adhered closely to the forms of precedent —"That an humble address be opresented to Her Majesty, praying that Her Majesty will be graciously pleased to give directions that the remains of the Right Honourable William Ewart Gladstone be interred at the public charge, and that a monument be elected in the charge, and that a monument be elected in the Collegiate Church of St. Petes, Westminster, with an inscription expressive of the public admiration and attachment, and of the high sense entertained of his rare and splendid gifts, and his devoted labours in Pailiament and in great offices of state, and to assure Her

Majesty that this House will make good the expenses attending the same."

Sir W Hai court, in seconding, it maiked that the sincerity of Mr. Gladstone no man doubted, What he believed he intensely believed, what he wished he greatly wished; what he wrought he strenuously wrought. These were the con stituents of a great character, and these were the qualities which the judgment of history would crown with deserved fame, however people might differ as to the objects to which they were devoted. He concurred in Mi Balfour's testimony to what the House owed to the life of Mr Gladstone and to the natural powers of his genius. They felt, as the right hon gentleman had said, that he exalted the spirit of the assembly in which he was the undisputed chief, they felt that the House of Commons was greater by his presence, as it was by his memory. What he did for the House he did for the nation too. Sir William thought it was impossible to overvalue the influence, which the purity and the piety of his public and his private life had had upon the life of this country. It had exercised a lasting in-fluence upon the moral sense of the people at large. What Mi. Gladstone had preached he had practised. His life had been a lesson which was not, and would not be, forgotten There was not a hamlet in this land where his virtues were not known and felt. They felt that his heart was ever with the weak, the miserable, and the poor They remembered how much of his hie was spent in labours to allevate their lot. They knew him, they were almost his flesh and blood. His sympathies were not confined to narrow bounds. The strongest confined to narrow bounds. The strongest passions of his heart were for freedom and peace-freedom not only for his own, but for every race, peace with every people, glad tidings of great joy-the go-pel of the religion to which he was devoutly attached, and his voice with forth to all who were desolate and oppressed wherever they might dwell

Mr. Dillon, leader of the Irish parliamentary party, said he felt that he had a pecuhai right to join in paying a tribute to the great Figlishman who had died the day before for the later and-as all men agree-the most glorious years of his strennous and splendid life were dominated by the love which he bore to his the speaker's—nation and by the eager and even passionate desire to serve Ireland and give her liberty and peace Mr Alfred Thomas, on behalf of the members representing Welsh constituencies with whom he was associated, added their tribute to those so feelingly expressed by the speakers who had preceded him; and the resolution was then agreed to nemine contradicente.

scene was enacted in the House of Lords, where there was a large gathering of peers, ladies, and members of the other House who had found time to cross the building from that chamber to this. The Marquis of stom that chamber to this. The Marquis of Salisbury, in pipoposing a resolution similar in terms to that quoted above, said the most distinguished political name in this century had been withdrawn from the foll of the living. His history, his merits, his wonderful qualities, had been dwelt upon by many tongues and many pens, and there was no need to repeat them then, but the point which seemed to him remarkable, and which he thought would attract the attention of foreign nations and of future generations more than any other, was the universal consent of all persons, of all classes and of all schools of thought, in doing honour on this sorrowful occasion to a man who had been more mixed up in political conflict than probably almost any man ever known. What was the cause of this unanimous opinion? It was that men recognised in him a man guided-whether under mistaken impressions or not, it mattered not-in all the steps he took, in all the efforts hermade, by a high moral ideal. He left behind him, especially to those who had followed with deep interest the history of the later years one might almost say the later months of his life the memory of a great Christian statesman, set up necessarily on high, from which the sight of his character, his motives, and his intentions would strike all the world. It was situated so that it would have left a deep and most salutary influence on the political thought and the social thought of the generation in which he lived, and he would be long remembered not so much for the causes in which he was engaged or the political projects which he favoured, but as a great example, to which history hardly fur-

mishes a parallel, of a great Christian man.
The Earl of Kimberley, in seconding, said
keynote of the universal feeling towards the
statesman they had lost. The Duke of Devonshire, in expressing on behalf of the Liberal Unionist peers their sincere concurrence in what had been said by the two leaders, rewhat had been said by the two leaders, remarked that, deeply as they regretted the difference of opinion which caused the separation between Mr. Gladstone and many of those who had been his most devoted adherents, they nover doubted, and they did not then doubt, that in that, as in every other matter with which during his long public life he had to deal, he was actuated by no other consideration than that of a sense of public duty, and by his conception of that which was in the highest

The Earl of Rosebery, in course of a noble oration, cited the words which were used by Lord Salisbury when Mr. Gladstone resigned the office of Prime Minister, "that his was the most brilliant intellect that had been applied most billiant intersect that had been applied to the service of the State since Parliamentary Government began." That seemed to Loid Rosebery an adequate and noble appreciation but there was also a side which struck one more strongly in regard to Mr. Gladstone than in regard to any one else, and that was that

onstituencies with whom he was associated, dided their tribute to those so feelingly extensed by the speakers who had preceded im; and the resolution was then agreed by the labour of every day and almost every hour, until the last day of health possessed. There were two great features Almost immediately afterwards a similar of Mr. Gladstone's intellect: the first was his

enormous power of concentration, the second was the infinite variety and multiplicity of his interests. There was no man in the history of England, no man at any rate of recent centuries, who touched the intellectual life of the country at so many points and over so great a range of years But that was in fact and reality not merely a part of his intellect but of his character, for the first and most obvious feature of Mr Gladstone's character was the universality and one great feature of his character, but there was another with which the noble marquis had dealt, and that he would only touch on with a single word. He meant the depth of his Christian faith. The faith of Mr Gladstone obviously to all who knew him per vaded every act and every part of his life. It was the faith, the pure faith of a child confirmed by the experience and the conviction of manhood There was no expression so frequently on Mr Gladstone's lips as "manhood" It was obvious from all he said and all he did that the virile virtue of manhood, in which he comprehended courage, righteous daring, the disdain of odds against him-that virile virtue of manhood was perhaps the one which he put the highest. This nation loves brave men Mr Gladstone was the bravest of the brave. There was no cause so hopeless that he was afiaid to undertake it, there was no amount of opposition which would cow him when once he had undertaken it. Lord Rosebery thought the occasion ought not to pass without letting Mrs Gladstone (who not to pass without letting Mrs. Gladistone (wind for sixty years shared all the sorrows and all the joys of Mr. Gladstone's 11(e) know she was in their thoughts that day "Yet, putting that one figure aside," continued the noble Earl, "to me, at any rate, this is not an occasion for absolute and entire and unreserved lamentation were it indeed possible so to profine the inexorable limits of human life that we might have hoped that future years and even future generations might see Mr. Gladstone's face and hear his matchless voice, and i cceive the lessons of his unrivalled experience, we might indeed grieve to day as those who have no hope But that is not the case. He had long exceeded the span of mortal years, and his latter months had been months of unspeakable pain and dis-tress. He is now in that rest for which he sought and prayed, and which was to give him relief from a life which had become burdensome to him. Surely this should not be an occasion entirely for grief, when a life prolonged to such a limit, so full of honour, so crowned with glory, has come to its termination. The nation lives that produced him. The nation that produced him may yet produce others like him; and in the meantime it is rich in his memory, rich in his life, and rich above all in his animating and inspiring example Nor do I think that we should regard this example as limited to our own country or race It seems to me that, if we may judge from the papers of to-day, it is shared by, and is the possession of all civilised mankind, and that generations still to come through many long years will look for encouragement in labour, for fortitude in adversity, for the example of a sublime Christianity, with constant hope and constant encouragement, to the pure, the splendid, and the dauntless figure of William Ewart Gladstone." The resolution was then agreed to nomine dissentiente.

passed by both Houses was immediately compassed by both Houses was immediately com-nunicated to Her Majesty, who at once gave her assent to its prayer. Mr. Herbert Gladstone, in reply to a letter addressed to him by Lord Salisbury, "on behalf of his mother and the family, and with a deep sense of gratitude to Her Majesty and to both Houses of Parlia-ment," accepted this signal tribute from the nation to his father. Mr. Gladstone had in his will left the patitulars of his burd to his will left the paticulars of his burial to his executors, specifying only, "(a) that it is to be very simple, and also private, unless they shall consider that there are conclusive reasons to the contrary; (b) that I desire to be buried where my wife may also lie; (c) that on no account shall any laudatory inscription be placed over me" These "conclusive reasons" had in the judgment of the family been established by the offer conveyed to them, and by the marvellous manifestations of feeling in all parts of the Empire, and the necessary assurance had been given that the condition specified in (b) would be fulfilled. Both Houses accordingly passed be tuinlied. Both Houses accordingly passed a resolution that they would attend the funeral. What was virtually a memorial service was held in Hawaiden clinich on Ascension Day. The body lay in state on Tuesday, May 24th, in the study in Hawaiden Castle, and was 34th, in the study in Hawaiden Castle, and was 34th ymany thousands of peisons. On the Wednesday it was iemoved to Hawaiden church. In the evening the coffin, escorted by a long piocession of mouniers, was conveyed to Broughton railway station, and thence caried by way of Chester, Crewe, Stafford, Rugby, to London, great bodies of people being assembled to see the train as it passed sometimes through open country or as it slowed down through the great centres of traffic. From Willesden the train proceeded to Westminster Bridge station, whence the coffin was borne to Westminster Hall, which had been specially fitted up for the occasion, and where, lying on a catafalque, it was specially watched through two nights by was specially watched though two nights by foitty gentlemen who had volunteeled for the service, and levelentially viewed during two days—Thuisday and Filday—by some 300,000 mounters. On Saturday, May 28th, members of the two Houses assembled in their respective chambers, and in due course walked in pro-cession through Westminster Hall to Westminster Abbey, and there attended the funeral service

On August 2nd a sum of £2000 to defray the expenses of Mr. Gladstone's funeral was voted by the Commons; and on August 3rd Mr. Balfour informed Lord Balcaries that the commission for the national moriument of the deceased statesman had been entrusted to Mr Brock, R.A

[11] Greece, Turkey, Crete —Mr. Curzon, replying (Feb 1 th) to Sn E. Ashmead-Bartlett, said the Russian Government had informed the other Powers of their disposition to view favourably the candidature of Prince George of Greece as Governor-General of Crete, before recommending the Sultan to propose him. It was true that the Government of Great Britain and France had supported the idea of the candidatuie, but the Government were not aware that any attempt had been made by the Czar to force the candidatuse upon Turkey, It was stated (March 28th) that the Austroand the special of a special of a side of the comment of the comme

sufficient naval force for the protection of their consular authorities and their own subjects consular authorates and their own subjects
But this measure was not to imply withdrawal
from the European concert, nor any departure
from the policy followed from the first by
Austria-Hungary in the Cietan question. Mi
Balfour informed Mr. Legh (April 28th) that he
believed it was understood that the publication of the Greek Loan was fixed for May 2nd, and of the Greek Loan was lixed for May and, and the issue for May roth, and the evacuation of Thessaly would take place within one month of the former date (see sect 56). Mi Curon stated, in answer to Sn E. Ashmead-Bartlett (May 13th), that the Turkish Government had proposed the appointment of Karatheodon as Governor-General of Crete, and had been informed that the appointment of a Turkish subject was contrary to the declarations made by several of the Powers, and consequently ınadmıssıble

[12] Imperial Penny Postage. As the result the Imperial Conference on Postage early of the Imperial Conference on Postage early in July, it was agreed that letter postage of id per half-ounce should be established between the United Kingdom, Cauada, Newfoundland, Cape Colony, Natal, and such of the Crown Colonies as might, with the approval of the Government, be willing to adopt it Mr Hanbury stated (Aug. 9th) that the new scheme was to come into operation on Christmas Day, between Great Britany and say he of the

Day, between Great Britain and such of the British Colonies as are prepared to adopt it.

[13] India, Chitral and North-West Frontier operations. The Marquis of Salisbury, replying to observations made by the Earl of Kimberley during the debate on the Address (Feb. 6th) with respect to the Indian Frontier, said these wis a week on the Andress (Feb. 6th). there was no wish on the part of the Government to occupy a single position which was not in the judgment of the highest expert authorities absolutely necessary for the security of our Indian Empire and the fulfiment of our treaty obligations. It was stated in the Commons (Feb. 10th) that the estimated cost of the operations on the North-West Frontier, for the whole year '97-8, would amount to about £2,541,000 sterling Mi Lawson Walton moved (Feb 14th) an amendment to the Addiess, expressing disapproval of the policy pursued in the permanent military occupation of Chitial and the maintenance and fortification of the road from Peshawii through the territory of the independent tibes, and deploring the consequences which had followed from that policy, and further representing that from that policy, and further representing that the safety and prosperity of the Indian Empire would be best promoted by respecting the independence of the Frontier tribes and avoiding the occupation of their territory Lord G. Hamilton said the Liberal Government resigned before they had considered the alternative schemes which the Indian Government sent home. Had they considered those schemes they would, he believed, have largely modified their views. As to our future policy, there were two schools, the Sind and the Punjab; and the former of them, which aimed at establishing friendly relations with the tribes, was the more sympathetic and the more worthy of a civilised nation. If those who If those who came after him would devote their attention to the future and not the past, there would be reason to hope that the upshot of this debate

be applied with firmness in the treatment of the various difficulties respecting the question of the Indian frontier as they presented them-selves. Sir H. Fowler said it was again and again declared that the agency established at Chitral was only to be a temporary arrangement. Mr Asquith (Feb 15th) agreed that it was desirable to have continuity of policy with regard to the Indian frontier, but contended that what the Secretary for India had done was to defend a most direct and most violent reversal of the policy of one Government by another. After further debate, in which Mi. Curzon, Sir W Harcourt, and Mr. Balfour joined, the amendment was rejected by 312 to 208. Mi S Smith moved (Feb. 22nd) "that the expenditure involved in the recent operations beyond the frontier of India ought not to be charged entirely upon the revenues of India." Lord G. Hamilton said he could understand the House wishing to assist India in defraying the cost of some military expedition that was more Imperial than Indian in character, but it could not be contended that there was anything Imperial in the recent operations on the Frontier Sn H Fowler could not assent to the statement that this was not an Impenial question | The resolution was re-icted by 188 to 96 | Loid Role, is of Kandahar (March 7th) called attention to the papers recently presented to Parliament relating to British relations with the neighbouring tribes on the North-West Frontier of India, and the military operations undertaken against them during the year '97-8. In the territories lying between our borders and Afghanistan there existed 200,000 fighting tribesmen, who could make the fulfilment of our obligations to the Ameer eithers very casy or extremely difficult, if not impossible. The all-important question if not impossible. The air-important question for us, therefore, was how we could insure that that enormous military force might be used for us and not against us. The system of non-interference with the frontier tribes, and especially the Afridis, had absolutely failed, and he maintained that the forward policy was the only policy by which we could secure the allegiance of those was like and uncivilised laces The recent outbreak among them had not, he contended, been caused by the forward policy, but rather by that policy not having been pushed far enough, and by our half-hearted manner of dealing with the tribes. The forward policy had not been simply one of military subjugation, but had hitherto been mainly peaceful. In his opinion it was im-perative that we should occupy Chiral, the northernmost coiner of our frontier, because, though the chance of a successful attack on India from that direction was infinitesimal, the danger of allowing two or three thousand men to cross the passes would cause great excitement throughout Kashmin and the Punjab, and also have a very ill effect all along the frontier.
The Earl of Onslow contended that the Indian finances would not bear the strain of a forward finances would not bear the strain of a forward policy, and unged that matters should be allowed to remain in their present position, and that we should go on endeavouring to cultivate friendly relations with the frontier tribes. After further debate, in which the Earl of Northbrook and the Marquis of Lansdowne joined, the subject dropped. In course of a discussion (June 7th) on the resolution on which the East India Loan Bill (see sect. 50) was founded Sir H. Fowler indied with Lord might be that the country would know here-of a discussion (June 7th) on the resolution on after, no matter what party might be in power, which the East India Loan Bill (see sect. 50) was founded, Sir H. Fowler joined with Lord

George Hamilton in an appreciation, which he was sure was fully shared by the House, of the admirable manner in which Lord Elgin had the admirable manner in which Lord Eight had discharged the duties of his very troublesome Vice-royalty. Sir Henry also expressed the opinion that, now the operations on the Northee West Frontier were over, there should be an investigation into the causes of the outbleak and the circumstances under which that unfor-

tunate conflict was entered upon.

[14] India (Currency). Mr Vicary Gibbs (March 20th) moved a resolution proposing that a select committee or royal commission be appointed to consider the monetary condition of India and the effects of closing the Indian mints to silver on the different classes and interests affected thereby, to ic port on the suggested establishment of a gold standard in that country, and to make such recommenda-tions as they may think fit." This was seconded by Mi Maclean Mi Wylie moved by way of amendment "that this House being satisfied that the Indian Government has been and is giving due consideration to the monetary condition of India, awaits further communications from the Indian Government before taking any steps in connection with this subject." Lord G Hamilton said the Government believed that any attempt to reopen the Indian mints without some international agreement would be an act of lunacy He therefore could not associate himself with any inquiry which might lead to a reversal of the policy initiated in '93, but he was prepared to undertake an inquiry into the proposals which the Indian Government had proposals which the Indian Government had sent home, and would therefore move, in place of the motion and amendment, "That it is de-suable that a further inquiry be made into the monetary system of India, and into the pro-posals of the Government of India for the esta-blishment of a gold standard in that country." Sir W. Harcourt thought this proposal perfectly satisfactory, and the amendment having been withdrawn, and the original resolution nega withdrawn, and the original resolution lega-tived, the proposal of the Secretary for India was agreed to [The names of the members of the committee will be found at the end of

this article] [15] India (Press Law) Mr H Roberts (Feb 18th) moved on the Address an amendment setting forth that the House regarded with grave concern the policy of internal repression lately adopted by the Government of India, and especially the deportation and continued imprisonment of British Indian subjects without trial, the recent series of press prosecutions, and the present proposals to increase the severity of the law relating to sedition in India. Lord G. Hamilton stated that the Government had no intention of entering upon a policy of repression or coercion in India. As to the trial of certain gentlemen, they had published articles containing incitements to crime, there was not, however, the slightest intention to silence or curb the native press. Mr. Maclean expressed the opinion that the projected change in the law would suppress all kinds of free ex-pression of opinion in India. The amendment was negatived by 182 to 100 Mi. Herbeit Roberts reverted to the subject on the East India Revenue Accounts (Aug 11th), moving an amendment setting forth in biret that the recent alterations made in the law relating to sedition and the control of the press in India sedition and the control of the press in India some scheme ought to be propounded for the demanded the immediate attention of Parlia related the immediate attention of the prevailing destitution. Mr. G. Balfour fully acknowledged that the situation

clause of the Indian penal code merely confirmed the old law as judicially interpreted,

The amendment was negatived by 66 to 30.

[16] Iroland (Catholic University Education).

Mr. Dillon moved on the Address (Feb. 16th) an amendment representing that it was the duty of the Government immediately to propose legislation with a view to placing Irish Catholics on a footing of equality with their fellow-countrymen of other religious denominations in all matters concerned with University Education The hon member said the Roman Catholics did not ask for the endowment of any form of religion The amendment was seconded by Mr Harrington and supported by Mr Haldane and Mr T M Healy, but opposed by Mr Grant Lawon and Col Sanderson. Mr Lecky supported the principle of establishing an Irish Roman Catholic University, though he was unable to vote for an amendment which was directed against the Government, and declared that it was necessary to deal with the question in the present overcrowded session. Mr Balfour said the proposal, he understood, the leaders of the Roman Cathohic party in Ireland would be contented with, and which would meet the difficulty of providing higher education for the majority of the Irish population, was one that would not fence round the endowment given to any institution provided in Ireland with any more limitations than exist at the present moment in the case of Trinity College, Dublin, or which governed the great universities of England and Scotland He could not conceive how any Unionist could support Unionism in all its aspects if he is used to consider the petition of demand cannestly put before them by the representa-I Moley (feb. 17th), speaking for himself alone, assented to the amendment without pledging himself to any particular scheme until the details should be before him, though his idea was the establishment of a university without tests, restrictions, or limitations, and with a governing body elected by members of the university Mr Wallace (Edinburgh) opposed the amendment Mr Perks said the Noncontournists were opposed to the establishment and endowment of a Catholic university in Iteland Mr Lloyd George decply regretted that he was unable to agree to the amendment; but Mr. Lyttleton expressed sympathy with it, and Mr. Carson strongly supported the bringing home of University education to Irish people in a way that would be accepted. The amendment was negatived without a division.

Inebriates (see sect 58) [17] Ireland, Distress in. Mr. Davitt (Feb. oth) moved on the Address an amendment repremoved on the Addiess an amendment representing "that in large districts of Ireland considerable bodies of the population were on the very brink of actual famine, that the temporary relief measures proposed by the Government had been too long deferred and were entirely madequate, and urging the necessity, first, of applying measures of temporary relief on a large and generous scale to the suffering districts, and recondly of introducing heavier. districts, and secondly, of introducing legisla-tion calculated to avert the constant recurrence of famines in certain districts of Ireland." Mr. Hayden seconded, Mr. Dillon and Mr. Healy supported, and Mr. H. Plunkett thought

was grave, and called for exceptional measures. The Government had relaxed the conditions of out-relief, and where the provision for destitu-tion was likely to be la ge in the coming spring they would assist the guardians with public mone on certain conditions, the principal of which was that the union itself should subscribe some of the necessary expenditure. This system was already at work in five unions. The Government would also introduce a Seed Supply Act, and they had authorised the Congested Districts Board to spend additional money in the pool districts of Mayo and Galway The amendmen was (Feb 10th) rejected by 235 to 153 Mi Dillon (April 22nd) obtained leave to move the adjournment in order to call attention to the "acute distress now existing in certain districts in the west of Ireland, and the failure of the relief measures of the Government." Mr. G. Balfour said it was impossible to point to a single case of death from famine and starvation during the last three or four months The motion was negatived by 204 to 100. Mi Dillon (May 13th) on the vote for the office of Chief Secretary, diew attention to the prevalence of distress in parts of Ireland, observing that the condition of things in the west was a disgrace to the administration of the country. Mr. G. Balfour denied that he was unsympathetic in the matter, he had never denied that distress existed and was acute in certain localities in the west, but the result of his inquires had never beine out the statements that had been made to him of families being in a state of destitution and semi-starya Rehef was given in every case where the relieving officer came to the conclusion that it was necessary. The problem of preventing the recurrence of distress had aheady been solved to some extent by the Congested Districts Board, to which he had given an additional £10,000, and he hoped next year to do more in the same direction. Mr. Davitt adverted in the same direction. Mi. Davitt adverted (Aug. 9th) to the existence of distress in the west of Ireland, and Mi. Baltoni said he hoped we might gradually see in that quarter such a growth in the size of the holdings as might ultimately make these recurring distresses more and more rare, until they finally disappeared

[18] Ireland, Financial Relations of, with Great Britain Mi | Redmond (July 4th) called attention to the financial iclations between Great Britain and Ireland, and moved "That the disproportion between the taxation of Ireland and its taxable capacity, as compared with the other parts of the Kingdom, disclosed by the findings of the Royal Commission, constitutes a giveyance, and demands the carly attention of the Government, with a view to proposing a remedy." This resolution was, he said, submitted at the request of a conference of link members over which Colsaunderson presided, and which was representative of every political party in Ireland for mark a contribution of the conference of the contribution of the contributio For nearly a century there had been no great public question on which Irish opinion so unanimous as it was with regard to this Upon the report of the Commission Ireland! was overtaxed to the extent of nearly £3,000,000 a year. The resolution was seconded by Mr Lecky, who said it was undernable that for a number of years Ireland had been grievously and scandalously overtaxed. He was in favour of further grants for local services. The Chancellor of the Exchequer said the existing system was trades; and in reference to the question of

one of taxation, not of areas, but of individuals, irrespective of the place in the United Kingdom where they happened to reside. Taxation was absolutely fair as between all members of the community in whatever part memors of the community in whatever part of the United Kingdom they lived. There would be under the Irish Local Government Act an addition of \mathcal{E}^{t} 15,000 to the existing grants for local services. In the subsequent debate the resolution was supported by Mr. Plunkett, Sri F. Clarke, Col. Saundrison, and Loid Chatles Beresloid. Sir. W. Harcourt, in supporting the motion, felt that if they were to deal with this matter wisely and justly, they must devise some system which would have regard to the taxable capacity, first of the people of licland, and secondly of the people of this country, who were in precisely the same position, After further debate the resolution was (July 5th) negatived by 256 to 144 Included in the minority were Col Saunderson, Mi.
J. H. Campbell, Lord C. Beresford, Sir Thomas Lea, Mr. Lecky, Mr. Butcher, Mr. Y and other Conservatives or Unionists. Yerburgh.

[19] Ireland (Independent Parliament). Mr. J. Redmond moved on the Addiess (Feb. 11th) an amendment representing that the satisfaction of the demand of the Irish people for national self-government is the most urgent of all subjects of domestic policy, and that that demand can only be met by the concession of an Independent Parliament and an I'xecutive responsible for all affairs distinctively Irish, Sir William Harcourt could not support an amendment which, he said, asked the Liberal party to condemn and repudiate the principle of the supremary of the Imperial Parliament embodied in the Home Rule Bills of '86 and '93. Mr. Redmand asked too much when he called Mr Redmand asked too much when he called upon the Liberal party to support a resolution in favour of an Independent Parliament for Ireland Mr. Dillon said he could support the amendment, because the word "Independent" was ambiguous, while adhering loyally to the compionise in Mr Giadstone's Home Rule Bills The Nationalist party was still willing to accept a statutory legislature as a compromise and as full compensation for the national demand Mr Isalioui, in reviewing the debate, remarked that Mr. Redmond and Mr Dillon, though disagreeing, intended to Mr Dillon, though disagreeing, intended to vote together, and that Sir W Harcourt and Mr Dillon, though agreeing, were going to vote in separate lobbies. Proceeding, Mr. Note in separate lobbies. Proceeding, Mr. Baltour remarked that Mr. Dillon and his party were determined that if a Liberal Parliament. came in, Home Rule was to be first and foremost, but did the Liberal party, as a whole, accept that policy. Mr Flavin (N) here remarked that it would have to be their policy. Mr Balfour, continuing, said he thought it was possible and indeed probable Mr Clancy (P.) gave it as his opinion that Sir W. Harcourt gave it as his opinion that Sir W. Harcourt had that night abandoned Mr Gladstone's Home Rule policy. The amendment was negatived by 233 to 65, the minority consisting of Parnellites, Nationalists, and three Radicals; and the Front Opposition bench and the bulk of the unofficial Radicals present voting with the Government in the majority. A number of Radicals left the House nuts before the division Radicals left the House just before the division

was taken (see sect. 21)
[20] Lead Poisoning and Phosphorus-neorosis.
Sir C. Dilke, on the vote on account (March 4th),
brought forward the subject of dangerous

lead poisoning in the Potteries, the Home Secretary agreed that it was an urgent and pressing one, and stated that the chief inspector was considering with him fresh special rules. The Home Secretary (May 12th) promised Sir C. Dilke an inquiry into the use of yellow phosphorus in match-making. He added subsequently that, although he had power to regulate, he had no power to prohibit its use. On July 13th the Home Secretary informed Mr. Steadman of the steps he was taking and the inquiries he was making with regard to the use of this kind of phosphorus. Mr. Tennant (July 20th) moved to reduce the Home Office Vote in order to call attention to the inadequate steps which had been taken by the Department to deal with lead poisoning in the Potteries and phosphorus-necrosis in the minufacture of matches. This motion was seconded by Sir J. Stirling Maxwell, among the other speakers being Sir C. Dilkeand Mr. Diage Mr. Asquith urged that where raw lead was used young persons should not be employed, and that the Home Secretary should bring in a small Bill to so amend the law that special rules, instead of being a matter of aibitiation, should lie upon the table of the House for a certain period. Young persons ought, he considered, to be altogether excluded from the pottery industry.
Recent disclosures seemed to show that the system of our factory inspection had broken down, and the whole subject should be myesti-gated by a select committee. The Home Secretary, in reply, admitted the disastrous effects of lead poisoning in the Potteries, and, pending the result of the inquiry now going on, asked that they should proceed under the special rules he had laid down. On the question of raising the age, they must proceed gradually, because if they raised it at once they would exclude some thousands of young persons from their present employment. He believed that they were on the eve of discoveries by which the use of raw or fritted lead might be avoided, and with regard to phosphorus-necrosis he hoped they were within measurable distance of applying special rules to that industry as well as to the potteries. A motion for the reduction of the Home Office. Vote was, after further discussion, in which Mr. Woodall and

Mr. But its joined, rejected by 00 to 52.

[21] Losal Belf-Government for the different parts of the United Kingdom. Mr Heibert Roberts moved (March 15th) "That in order to relieve the congestion of business in the Imperial Parliament and in the various Public Departments, and in order to give speedici and fuller effect to local requirements, it is uigently necessary that there should be devolved upon bodies representative of the different parts of the United Kingdom a large measure of self government. Sin Robert Reid in seconding disclaimed absolutely any intention of aiming against the claim of Ireland for prior treatment. Mr. D. A. Thomas proposed and Mr. Lough seconded an amendment for the omission of the words "urgently necessary," and the insertion in place thereof of the words "desirable subject to the claim of Ireland for the prior consideration by Parliament of a measure of Home Rule." Mr. Dillon told Radical members that they would improve the prospects of their party, or further the policy of self-government for Sectland and Wales, by putting Home Rule in the back-

ground. Sir H Campbell-Bannerman gave the resolution his cordial support, though he had always recognised the prior claim of Ireland, and still did so. Mr. Balfour said this plan would*involve the creation of four legislative assemblies in addition to the Imperial Assembly and Ministry; and human ingenuity could not devise a more absurd plan on which to conduct the affairs of a great country. While the matter was under discussion the House was counted out •

[22] Navy. Mr. E Robertson asked (Feb. 15th) whether it had been decided that contractors whose work had been delayed by the lock-out are entitled to the benefit of the strike clause. Mr. Goschen replied that the time for considering the application of the clause in question was when the work contracted for was completed, and when the question of enforcing or not enforcing penalties for delay had to be decided. Mr. Goschen, in introducing (May 10th) the Navy Estimates, said the amount asked for, included with the sum taken under the Naval Works Act, reached the colossal total of £25,550,000. There would be a further nicrease of 6340 men of various ratings. The laboure troubles had put them back seven months in construction, but it did not follow that the contractors would ultimately be so much behind, as they usually allowed themselves a margin of time. In the coming finan-cial year, '98-9, it was proposed to commence 3 battleships, 4 armoured cruisers and 4 sloops, so that, including new orders, the following vessels would be under construction or completing during "98-9: 12 battleships, 16 first-class cruisers, 6 second-class cruisers, to third-class tunsers, 6 sloops, 4 twin-sciew gunboats, 4t torpede-boat destroyers, and a royal yacht. Mi. W. Allen moved "That this House desires to see a fuller provision for manning the Fleet This was seconded by Lord C. Beresford, but negatived after some conversation On March 11th Mr. E. Robertson called attention to the delay in carrying out Admiralty shipbuilding contracts, and asked for a full disclosure as to the way in which the Admiralty had dealt with the contractors who had locked out their men and had failed to complete their contracts, contending generally that the contract covered a strike, but not a lock-out Mr. Macartney replied that notices had been received from several contractors, and it was impossible now to say what course the Admiralty might pursue in regard to a set of circumstances which had not been completed. Unless mala fides on the part of the contractors could be shown, it was (according to a judicial decision) immaterial whether the strike clause contained the word "lock-out" or not. Sir W. Harcourt contended that if there were any doubt on a question of this kind it should be carried by the Govern-ment to a court of law. The Attorney-General replied, in substance, that it was not until the final payment came to be made that the question would arise as to whether the contract tion would arise as to whether the contract vessels had been completed within the given time or not Mr. Woods brought forward the question of the dismissal of four men from Portsmouth Dockyard. Mr. Goschen justified the action taken by the Admiralty, and declined to assent to the men's reinstatement. Mr. Goschen informed Sir E. Gourley (June 20th) that the Admiralty had sent instructions to the different ports to the effect that in view of the serious character of the strike among the South

Wales collieries it would be inexpedient to trench upon the reserves of coal for the Naval Manœuvres, and that therefore the customary partial mobilisation of the fleet would not take place. The Channel squadron and the coastplace. The Channel squadron and the coast-guard squadron would cruise as usual. We had never been in possession of a larger amount of coal actually in our hands, and this amount of coal actuary most manus, and measure was taken merely as a matter of prudence. Lord Hood of Avalon (June 23rd) called attention to the "very unsatisfactory condition" of the armament of seven of our first-class be used in protecting their secondary armaments. The Earl of Hopetoun replied that these ships were not entirely out of date, and were capable of meeting on equal terms all but the most modern ships of foreign powers Plans for the reconstruction of vessels of the Admiral class had been prepared, and were under consideration. Mr Goschen (July 22nd) explained his supplementary Naval Programme The original programme was considered suf ficient on the knowledge possessed by the Admiralty when the estimates for the year were presented, being based upon the principle that we must be equal in numbers and superior in power to the fleets of any two countries. What the Government proposed was not in the slightest sense aggressive, but in view of the steps taken by Russia to strengthen her fleet, he asked the committee strengthen her liest, he asked the committee to sanction the supplementary programme, consisting of 4 battleships, 4 cruisers, and 12 tol pedo-boat destroyers, the construction of which would involve an ultimate expenditure of £8,cco,oco, or, including the liability incurred at the beginning of the session, of £15,000,000 in all on new ships, ai mament and ammunition The payment of this sum was to be spread over a period not exceeding four years; and, as time was required to get the plans out, the Government did not find it necessary to ask for a supplementary estimate this year, though one was to be presented carly next session. Sir W. Harcourt complained of the hitherto unlical d-of introduction of a financial system under which, after the annual estimate had been presented, and upon a mere surmise that some country or other was about to build more ships, the First Lord came

forward and asked for another £8,000,000
[23] Peers at Elections. Mr. J Lowther
(Feb. 8th) again took objection to the renewal of the sessional order against the interference of peers at elections, on the ground that as long experience had shown that the House was unable to enforce it, it was a meaningless farce to renew it. Mr. Balfour defended the renewal of the resolution, arguing that its abrogation might be regarded as an invitation to peers to take part in elections The renewal of the take part in elections

order was carried by 319 to 100.

[24] Post Office Employees. Mr. S Woods moved on the Address (Feb. 18th), an amendmoved on the Address (reb. 18th), an amend-ment embodying certain grievances of Post Office servants which he asked should be rediessed. Mr. Lough seconded Mr. Han-bury, as representing the Post Office, main-tained that the rules of the Department were most reasonable. Servants of the Post Office

in order to unduly influence members of Par-liament. The amendment was negatived by 163

[25] Privilege (Guardians and Journalist E.P.). Mr. Patrick (l'Brien complained (July 26th) of the proceedings of the Board of Guardians of Mullingar, as reported in the Irish Daily Independent newspaper, on July 22nd, '98, containing threats against Mr. Hayden, M.P., on account of a speech made by him in the House against an amendment having for its object guns of greater power and less weight should lrish I cal Government Bill. According to the substituted for the motor guns which they report in the Individual trial according to the carry, and that the weight this said a little power in the Individual trial according to the carry, and that the weight this said a little power is the said a little power in the Individual trial according to the carry. the admission of clergymen to the county and should take action "in regard to the vile and anti-cleric speech made by Mi. John P. Hayden last week in Parhament, with a view of having his paper deprived of the advertisement here in intue, and himself and his reporter excluded from our meetings." The House icsolved "That the said proceedings of the Mullingar Board of Guardians as reported in the Irish Duily Independent newspaper on July 22nd, '98. constitute a breach of the privileges of this House."

[26] South Africa (British) Chartered Company, and Transvaal Mr Chamberlain informed Mr. 1. Bayley (bcb 22nd), the tall the costs incurred by the Government with 1 gaid to the lameson Raid, and to the subsequent native insurjection in Rhodesia, had been replaid by the Chartered Company, with the coption of some very trifling matters still under consideration Replying to Mr O'Kell, and Sir E. Ashmead-Battlett (April 28th, Mr. Chamberlain said he had not received a despatch from President Kruger dealining to recognise the Queen's suzeramty over the Transvaal. Mr. John Ellis (May 6th) called attention to the state of affairs in the territories controlled by the Chartered Company, and to the proposals of the Colonial Secretary for the better government thereof. The hon member condemned the policy of the Company, both commercially and in regard to the natives. Sir R Reid considered that it was very unwise to allow Mr Rhodes to resume his seat on the board of the Chartered Company, for M. Rhodes was the real author of the Jameson Raid Si W Harcourt said Mr. Rhodes would in future le the real administrator of Rhodesia, and he felt no confidence that the scheme of the Government for the administration of the country would render impossible the recurrence of the evils of the past Mr Chamberlain in reply said if ever it Should be proposed that the property of the Chartered Company should be taken up by the Crown, the Chancellor of the Exchequer would carefully examine the financial proposals that might be made before accepting them. proposal made by Mr Rhodes for a large extension of the railway through Rhodesia was under consideration, and the offer of Mr. Rhodes for favourable treatment of British goods had been accepted Under the Government scheme any accepted onder the Government scheme any repetition of the mistake made by the Company in regard to the administration of Rhodesia would be next to impossible. The right hon, gentleman stated in answer to Mr. Courtney that Sir Marshall Clarke, who had been Commissioner in Basutoland and Zululand, would be the Resident Commissioner in Rhodesia. Replying to Earl Carrington, who had suggested might vote at Parliamentary elections as they Replying to Earl Carrington, who had suggested pleased, but they were not allowed to combine the restoration of their commissions to the

officers who took part in the Jameson Raid, the Marquis of Lansdowne (June 13th), said that of the thirteen officers who were implicated in the raid, eight were discharged at the suggestion of the Attorney General, as having only obeyed the orders of their leaders, while the others were not expelled from the service, but permitted to resign their commissions, receiving the full gratuities to which their services entitled them. The Government were willing to allow that some of these officers might have been, to a certain extent, the victims of circumstances, but could not accept that view in regard to Sir John Willoughby. Nor could they accept it in regard to Colonel Rhodes, who took a very conspicuous part in the proceedings in Johannesburg. The other officers would be appointed to unattached half-pay in the rank they held when they left the army Captain Coventry, as a militia officer, would be allowed to return to his regiment in his old rank, though at the bottom of the hist. Earl Carington expressed dissatisfaction at the decision of the War Office, arguing that as the chird offender, Mr. Rhodes, had been forgiven, the same lennency should be extended to his agents. [After Parliament was prorogued, Colonel Rhodes had his commission restered to him.]

Supply The resolution of '96, which had been renewed in '97, was (Feb 21st) re-charted, and worked as successfully as it had done the two previous years. On the last day for committee (Aug. 8th), there were at ten o'clock 33 outstanding votes, and divisions were taken on 16 of them. The report stage of the votes was (Aug. 9th) disposed, of shortly after ten o'clock [27] Trawling. Mr. Buchanan (March 8th) moved "that it is the imperative Juty of the Government to see that the law with a world.

[27] Trawling. Mr Buchanan (March 8th) moved "that it is the imperative Juty of the Government to see that the law with regard to trawling in the waters round the Scottish coasts is properly enforced." Mr. Fonthison suggested the extension of the resolution to the waters round the "British" coasts, and the Loid Advocate accepting, the resolution as amended was carried by you to 80.

amended was carried by 101 to 89.

[28] Treason-Felony Frisoners. Mr. W. Redmond moved on the Addiess (Feb 11th), an amendment representing "that the time has come when the cases of all prisoners convicted under the Freason Felony Act, who are, and have been for many years, undergoing punishment for offences arising out of insurrectionary movements connected with Ireland, may be advantageously reconsidered." Fins was supported by Mr. W. Abraham (Cork), and also by Lord Charles Beresford. The Home Secretary said these men were treated in mist the same way as other prisoners. The amendment was rejected by 152 to 100. [Some changes were afterwards made in the treatment of life sentences generally, with the result that the sentences of these men came up for revision with others, and all or all but one of them has since been released]

[29] United States and Spain. The wai between these two countries received only a himited amount of public notice in Parliament. On April 19th Mt. Balfour informed Mr. Dalziel that the British Ambassador at Washington was, at the end of March, authorised to join with the representatives of other great Powers in a friendly representation to the Government of the United States in favour of peace, provided that he was first of all assured that such representation would be well received and

would be likely to be of use Pauncefote did, in consequence, join in the representation made to the President on April 7th. On April oth the British Charge d Affaires at Madrid joined the representatives of the other great Powers in a verbal and identical communication, expressing the opinion that the Spanish Government would do well to consent to a suspension of hostilities which might lead to an honourable peace in Cuba. Addressing his constituents at Birmingham (May 13th), Mr. Chamberlain, in the course of the memorable "long spoon speech" (see also sect. 7), remarked that "since the Crimean wir the policy of this country has been one of strict isolation. But a new situation has arisen. All the powerful states of Europe have made alliances, and as long as we keep outside these alliances, as long as we are envied by all and suspected by all, and as long as we have interests which at one time or another conflict with the interests of all, we are hable to be confronted at any moment with a combination of great Powers so powerful that not even the most extreme, the most hot-headed politician would be able to contemplate it without a certain sonse of uneasiness." The first duty of the Government in the circumstances was to bring all parts of the Empire closer together. The Government had not, Mr. Chamberlain went on to say, neglected that primary duty, and their next duty was to establish and manifest before the contraction levels of parts was to establish and manifest levels of parts was to establish and manifest levels. tain bonds of permanent amity with our kins-men across the Atlantic "Even war itself would be cheaply purchased, if in a great and noble cause the Stars and Stripes and the Union Jack should wave together over an Anglo-Saxon alhance." These remarks produced a strong and deep impression at home, on the Continent, and in the States Officially Great Britain had declared herself strictly neutral in the stringle, but the outspoken sympathy individually of many prominent Finghshmen, coupled with the declared "open door" policy of this country with regard to the Chinese poits, brought England and America closer together than they had ever been since before the War of Independence. A War Re-venue Bill was submitted to the American legislature, containing a clause greatly increasing the American tonnage dues. Several questions the American tonnage dues. Several question-regarding this proposal were addiessed to Ministers in the Commons, it was the subject of representations at Washington, and on May 24th Mi. Cuizon was able to announce that it had been struck out by the committee of the Senate. On June 7th Mr. Cuizon in-formed Mi. Dalziel that negotiations had taken place at Washington for the settlement of all winding questions, between Great Britain and pending questions between Great Britain and the United States by reference to a Commission

The text of the proposed arrangements had been despatched from Washington, but had not yet been received by Hei Majesty's Government

This was supplemented (June 10th) by a statement that the subjects it was proposed to refer to the Anglo-American Commission all relate to matters affecting Canada and the States, though some of them are of Imperial as well as of Canadian interest. In the course of a general debate, which was raised in the Commons the same evening (June 10th), Sir C. Dilke contended that Mr. Chamberlain's speech pointed to an alliance with Germany, and gave it as his opinion that any notion of a permanent alliance with Germany against Russia was a

will-o'-the-wisp. Mr. Curzon said the proposal for a treaty of arbitration with the States was not accepted, but it would be accepted at some future time. Although the Venezuela difficulty was not finally composed, it was an a fair process of settlement, and the Behring Sea question was about to be referred to a Commission. Sir W. Harcourt iemarked that if ever the Eastern Question was to be settled on a footing favourable to Great Britain, it must be settled in concert with Russia. No one was more eager for more friendly relations with the United States than himself. Mr. Chambellain, in reply, said there was no difference of opinion between him and the Prime Minister, and there was solidarity in the Cabinet. The object of the Birmingham speech was not to lay down a policy, but to state the facts and the conditions of the problem. He did not advise allances any more than he rejected them, but with one exception. He did say, in the strongest words he could use, that he most canestly desired clost, cordial, and intimate relations with the United States On June 10th it was amnounted, in answer to Sir G. Baden Powell, that the amount awarded by the Behring Sea Claim Commission was voted on the 1sth inst by a special Bill in the

American House of Representatives [30] West Africa. Among the supplementary estimates submitted for '97-8 was one of for,500, the largest item going to make it up being £130,000 to cover the initial cost of raising, aiming, and maint uning aforce "to be at present employed on the Niger Letritotics" It also included £20,000 for special expenditure for the administration and defence of the northern territories of the Gold Coast Protectorate, and £10,000 in aid of the cost of telegraphs in Lagos, in pursuance of an undertaking given by the Government to bear the cost of constructing the line not only in Lagos but on to Saki and Ogbomosho, and hence to the Niger, and then down the river to Forcados, roughly and then down the river to Forcados, foughty estimated to cost in all from £22,00 to £25,000 of which £10,000 was taken in '97.8 The estimate of £10,500 was discussed (Feb 24th), when Mi. Chambelam said the Government did not intend that the history of the Gambia and Sierra Leone should be repeated in the history of the Gold Coast and Lagos Germany and especially France had during the last three and especially trained had outing the last time pears carried out mithtary expeditions at an enormous cost, and had spread all over hinter land to which we had the most undoubted claim. If the expussion which France had undertaken were allowed to go on without any corresponding expansion on our part, the result would be that the colonies of the Gold Coast and Lagos would be strangled in the same way as the colonies of the Gambia and Sicria Leone had been. The Government sent agents into their hinterland to make treaties with the native chiefs, which they thought would secure them against any foreign competition, but had found that in spite of those treaties France and Germany had not thought themselves precluded from going into those territories and endeavouring to make treaties. Great expeditions had been sent from the French colonies like a fan all over those territories. Accordingly it had been decided to raise a frontier force, which would be put under the command of Colonel Lugard on the Lagos side In regard to this policy the Cabinet were from beginning to end absolutely united. Sir E Grey thought that, to

prevent any wrong impression getting abroad, they ought to support the vote. An amendment for the reduction of the vote proposed by ment for the reduction of the vote proposed by Mr. Labouchere was rejected by 234 to 27. Mr. Chamberlain announced (June 14th), that the Queen had approved the appointment of Sir David Chalmers, late Chief Justice of British Guiana, and formerly Chief Justice of the Gold Control and Poul Control Coast, as a Royal Commissioner to inquire into the circumstances that led to the insurrection in the Sieria Leone piotectorate, and generally into the state of affairs in the colony and piotectorate Replying to Mr. Knox and Sir C Dilke (June 24th) Mr. Curzon said the fiscal areas mentioned in article IX of the West Africa Convention, shortly summarised, include the lovey Goast and interior up to a point upon the oth parallel, the Gold Coast and interior up to the 1rth parallel, with a projecting triangle, the apex of which is Wagajecting triangie, the apex of which is Waga-dign. Dahomev and its interior up to the same parallel, and Lagos and the Niger terri-tories "as defined in atteles II, III., and IV of the Convention" French goods im-ported by way of the Ivory Coast, Senegal, or Algeria might be subject to any duty that the French Government chose to impose, but in the case of the Ivory Coast, which falls within the present area, such duties must be identical with those imposed upon British goods. Under the new treaty it would be goods that the new ready it would be impossible to give Chandla, and other colonies which might decide to admit British products on specially favoured terms, any reciprocal preferential advantages in the colonies of the find Coast, Lagos, and in the Coolines Coast Frotectorate, without extending the same advantages to the French, and, as a consequence, santages to the Figure, and, as a consequence, to all other powers with which most-favoured-nation treatiff existed. Mr. Curzon informed Mr. C. McArthin (July 181), that communications had been passing between the Government and the Royal Arger Company with a view to the assumption by the former of the administration between the Company with a view to the assumption by the former of the submitted translations of the Company with a contraction of the contraction of administration in the to carried on by the Company. In reply to a question by Mi. Hedderwick (July 15th) on the point whether the terms of the Niger Convention did not preclude the French from installing Government commissioners and troops within the enclaves which it was proposed to lease to the French monthly Lowel Niger. Mr. Curzon said the land upon the Lower Niger, Mr Curzon said the land which would be leased, if desired, to the French Government would by the lease which formed an annex to the Convention, be subject to the laws for the time being in force in the British Protectorate of the Niger districts.

[31] West Indies. Mr Chamberlain made

[31] West Indies. M. Chambollain made (Marth 14th) a statement on a supplementary vote of £120,000 which was made up of £90,000, a free grant to West Indian islands in aid of floating deficits, and of £30,000 to enable the island Governments of 5t Vincent and Dominica to make certain roads and to settle labourers on lands. The right hon gentleman had previously explained (March 7th) that the above sums did not cover the whole ground, being indeed legarded by the Government as relatively a small matter. Speaking on March 14th, the right hon, gentleman said the Government were engaged in negotiations with the United States and Canada, and hoped these negotiations might result in a reciprocity arrangement between those countries and the West Indian colonies for West Indian products, though he was unable then to state that the

negotiations had made much progress. Con siderable concessions were asked for by the United States in return for a reciprocity arrangement, and he was not sure that it would be possible for the West Indies to submit to the sacrifices which they were called upon to make. The Crown had in Dominica some 90,000 acres of land suitable for small cultivators, and the intention was to open that land by the construction of loads. An amendment to omit the item in aid of deficits was negatived by 296 to 78, and the further amendments of Mi. Labouchere to omit the item foi cost of making roads was after the proposed grant had been justified by Sir E. Grey, defeated by 222 to 46 Mr. Chamberlain (Aug. 2nd), made a further statement, in proposing a supplementary grant of £41,500 for the West Indian Islands, of which £20,000 was a grant in aid of local revenues, the balance being the salaries and expenses of an agricul-tural department, grants in aid of botanic gardens and agricultural instruction experiments, steamer subsidies, and the formation and working of central sugar factories. He said that the negotiations with the United States with regard to a reciprocity arrangement and in connection with a movement for the abolition of bounties had not yet resulted in any conclusive settlement, though he was not without hope that they might do so the proposals of the Government were based upon the report of the Royal Commissioners. The Agricultural Department would be placed under the direction of Dr. Morris, now assistant director at Kew. The steamer subsidy, for ant director at Kew. The steamer subsity, for improving the means of communication between the islands and the markets, was £5000 in the present year, but would be probably in the future £20,000 a year. It was proposed to establish direct steamship communication between the West Indies and munication between the West Indies and Canada and New York, and it possible between Jamaica and London. They had found the United States in the present negotiations on the sugar question very hard bargainers indeed, but Canada had met us in a spirit of liberality which the Dominion had always shown in so remarkable a way. It was proposed to arrange with private capitalists in this country to advance £750,000 for the purpose of a central sugar factory in each of the three smaller islands, a guarantee being given by this country of 3 per cent, interest for ten years Mr. Labouchete moved to reduce the vote of £30,000, but this was negatived by 178 to 40, the vote being then agreed to.

ACTS AND BILLS.

The following is a list of the public Acts of the session of '98'. Royal assent March 29th—Army (Annual) Act, '98 (6r Vict Ch. 1), Registration (Ireland) Act, '98 (Ch. 2), Consolidated Fund (No. 1) Act, '98 (Ch. 3); 10 assent April 1st—Greek Lean Act, '98 (Ch. 4), Public Buildings Expenses Act, 98 (Ch. 5); royal assent May 23rd—Special Juries Act, '98 (Ch. 6), Bail Act, '98 (Ch. 7); 10 assent 1 ulv 1st—Sheriff's Tenure of Office (Soutland) Act, '98 (6r & 6) Vict. Ch. 8), Reserve Forces and Militia Act, '98 (Ch. 9), Finance Act, '98 (Ch. 10), Builfragan Bishops Act, '98 (Ch. 17), Fublic Record Office Act, '98 (Ch. 12), East India Lean Act, '98 (Ch. 13); royal assent July 25th—Marchant Shipping (Liability and Shipowars) Act, '98 (Ch. 14),

the session Particulars of some of those promoted by the London County Council or otherwise affecting London will be found in sect 66. The measures mentioned in the following paragraphs, which were either intro-duced or afterwards taken charge of by the Government, have prefixed to them an . When a Bill was withdrawn or dropped, it is so stated, and cases in which the proceedings upon a measure lapsed are notified by the mark (-). The day on which royal assent was given is signified by the small letters r.a; and the date upon which the Act came or is to come into operation is also notified, though it should be thiderstood that where no date is set down the Act came into operation immediately after it was passed. In the absence of indication in the title or contents of the Bill the capital letter E. o. S. or I. is used to signify that the measure is specifically limited to a part of the United

Kingdom.
[32] Adulteration Bills. Two measures on this subject were laid before the Commons: one by Mi. Kearley, the Adulteration (Food Products Bill, which contained 46 clauses, and proposed to consolidate and amend the law relating to the sale of food and drugs; the other by Mr. Chaplin, the *Agricultural Products, etc. (Adul-teration) Bill, which contained to clauses, and was intended to make better provision against the adulteration of certain articles of agricultural and horticultural produce. Mr. Kearley could find no opportunity of discussing his Bill; and Mr. Chaplin's Bill was not introduced until July 22nd, when he stated that the only condition upon which progress could be made with it was that it should be wholly uncontentions. Withdrawn July 28th.

(33) Aliens. In moving second leading (May 23rd) of a Bill to regulate the immigration of aliens, the Earl of Hardwicke tated that the measure reproduced the provisions contained in the Bill submitted by Lord Salisbury four years ago, so far as they related to the restriction of the immigration of aliens whose presence in this country would be injurious It enabled ports in the United Kingdom to be designated in which an inspector would be empowered to board any vessel arriving with immigrant passengers and prohibit the landing of any alien "who in his opinion is either an idiot, insane, a pauper, a person likely to become a public charge, or a person suffering from any dangerous, contagrous, or infectious disease" (clause 3). The Earl of Dudley supported the broad principle of the Bill. Lord Herschell expressed serious doubts whether in out practical working the measure would not do British industry more harm than good. The Prime Minister spoke in favour of the principle of the Bill, second it ading of which was can fed by bit to 19. An amendment by Earl Grey to omit from the inspector's powers that of prohibiting the landing of an alien who was a pauper, or a person likely to become a public charge, was (June 20th) deteated by 79 to 32. The Bill was considered and amended by the standing committee, and from the amended clause 3 Lord Herries (July 5th) proposed to omit the added power to prohibit the landing of a person without means of support, but this proposal was defeated by 86 to 36. Bill sent to Commons (*-). of the Bill, second reading of which was carried

[34] Allotments (London) Bill was introduced by Earl Carrington, the object being to chable the London County Council to acquire land and let it for allotments. The Bill was opposed

by Lord Harris, and rejected by 87 to 25
[35] *Attendance at School (Scotland) Bill was introduced by Lord Ballour Under the present rules as to school attendance in Scotland, scholars leave school at an unduly carly age, when the effects of such education as they have previously obtained are not likely to be per-manent. In order to provide for their longer continuance at school the Bill proposed that covery school board might from time to time, with the approval of the Scotch Education Department, make by elaws to have effect within its district for all or any of the purposes following —(1) Prescribing (a) a higher minimum age, or (b) the passing of a higher standard, or (c) a higher minimum age and the passing of a higher standard, than is required, as the condition of the partial or total exemption, as the case may be, of children not more than fourteen years of age from the obligation to attend school, by or in pursuance of any Act of l'arhament regulating the educa-tion of children or their employment in labour; (2) Revoking or altering any bye-law previously made. Bill passed Loids, withdrawn in Commons, July 28th.

(36) *Bail Act. '98 (6: Vict., ch 7—r.a. May 23rd). The preamble recites that accused

persons are sometimes kept in prison for a see that there should be some security against

long time on account of their inability to find sureties, although there is no risk of their absconding, or other reason why they should not be bailed, and it is therefore expedient to amend sect 23 of the Indictable Offences Act, 48; and the measure enacts that where a justice has power, under sect 23 of the statute in question, to admit to bail for appearance, he may dispense with sureties if, in his opinion, the so dispensing will not tend to defeat the ends of justice

[37] Benefices Bills. Two measures with regard to the transfer and exercise of Church Patronage and the amendment of the Pluralities Acts were introduced to the Commons One of them was brought forward by Mr Lyttelton, who, when moving second reading (March and), stated that the object in view was to minimise the chances of having a bad paison appointed, and to increase the chances of the appointment of a good one—The Bill would extend the right of parishioners to object to unfit persons, and would slightly increase the power of a bishop to refuse to institute unsuitable persons, while it would also enable the bishop to get iid of a pai son who had proved himself unfit. The Bill would also abolish the sale of next presentations altogether Mr Ballom stated the Government artogether in Banoni stated the Government measure was based upon, broadly speaking, the same ground as this Bill. After some discussion, second reading of the Bill was agreed to, and it was referred to the sanding committee on law. Mr. Balfour introduced the Government measure, Benchices (No. 2) Bill, on the following day (March 31d), and second reading was taken on March 7th, Mr. Balfour terms kny in course of the discussion that the remarking in course of the discussion that the prohibition of the sale of advowsons was a question of vere great complexity, and expressing the opinion that this Bill was as far as ing the opinion that this bill was as lar as practical statesmen dealing with the subject could go. An amendment for the rejection of the Bill, which was proposed by Mr Brynnon Jones and seconded by Mi II S Foster, was negatived by 243 to 57, and the Bill referred to a standing committee on law, who took it as the basis of their proceedings and reported it with amendments on April 1st Mr Lyttelton's Bill was reported without amendment

On the Government Bill being considered as amended (June 16th), Mr. H. S. Foster proposed the rejection of the measure, objecting strongly to the Bill because in his view it proposed to confiscate private rights without compensation. The amendment was seconded by Mr Samuel Smith, who drew attention "to the prevalence of Roman Catholic practices in the Chuich," and contended for legislation in restraint of doctrines and practices which he said were now so prevalent amongst the clergy. Sir W. Harcourt, who afterwards spoke, said an allegation had been made, and he believed it was well founded, that there existed in the Church of England a conspiracy to overthrow the principles of the English Reformation If they were going to deal with the question of institution to a benefice, was there any ground upon which institution ought to be refused stronger than that of perjuly on the part of a priest who had taken an oath which publicly and secretly he was violating? He had seen no disposition whatever on the part of the bishops to discourage the appointment and promotion of persons by whom these practices were followed. It was the duty of the House to

the principles professed by the Established Church being deliberately violated in a secret and dishonourable manner. Mr. Balfour, in course of his reply, expressed regret that there were members who were willing to sacrifice the certain reform which the Bill contained in the hope that they might have at some future time a measure carrying out other objects, which, however desirable in themselves, were He did not complain of Mi Smith and Sir W Haicourt for taking advantage of this oppoitunity to raise controversies concerning ritual in certain London churches, but he did blame in certain London churches, but he did blame them for making the opportunity for a discussion upon certain questions of ritual a ground for rejecting a Bill which was intended to deal with an entirely different class of grievances. The amendment was rejected by 220 to 75. A number of amendments was 220 to 75. A number of amendments was afterwards discussed at this and subsequent sittings of the House Among them was a proposal of Mi. Bryn Robeits that only Welshspeaking cleigymen should be instituted to certain benefices in Wales, which was rejected by 185 to 99. An amendment of Mi Carvell Williams to abolish the sale of advowsons as distinguished from next presentations was defeated by 182 to 74. Mr. Samuel Smith (June 21st) moved an amendment giving a bishop power to refuse to institute or admit to a benefice a presentee who had within the five years next preceding his presentation taught doctrines contrary to or inconsistent with the 9 Articles of participated in ecclesiastical practices not authorised by the Book of Common Prayer. The present Bill ought, he said, to be used as an instrument to put a stop to a state of things which, if it went on much to a state of things which, if it went on much longer, would destroy the Naylonal Chuich The Attorney-General gave a blank denial to the allegation that many of the bishops were steeped to the lips in intudistic practices and held opinions equivalent to the doctrines of the Roman Chuich. This measure never or the Roman Church. This measure never burported to interfere with the power of the bishops with regard to ritual and doctrine Colleners connected with ritual and doctrine could now and ought to be dealt with as an objection to institution. Sin W. Haircourt said it could not be demied that there were hundreds and thousands of the ordained clergy of this country who were deliberately endeavouring to overthrow the law of the Retormed Church of England. The children of Protestant parents were computed by clergymen who not only taught them lessons which were abhorrent to the religious convictions of their parents, but who were themselves living examples of dishonour and of falschood, who demot alised all those amongst whom they dwelt, and whose existence was in itself a living he. Mr Balfour denied that he had endeavoured to minimise the importance of this subject. He had denied that the evils complained of existed to anything like the extent that the right hon gentleman supposed. As far as any evidence that had come before him showed, the deplorable practices referred to were limited in their practices referred to were limited in their extent, and the clergy who regarded them with approval formed but a very small minority of the clergy of the English Church. The amendment, if carried, would not have the slightest effect in checking ritualistic practices. Mr. R. Wallace (Edinburgh) characterised the amend-

popularity by raising a "No Popery" cry. The amendment was rejected by 215 to 103. On the third reading (June 28th), Sir W. Harcourt said the Act of Uniformity was the Act of Settlement of the Established Church. If the clergy of this country desired to be delivered from obligations which they might conceive to be oncrous and irksome, they could be discharged only by putting an end to the compact by which they held their preferments and their offices. As far as the present measure reformed abuses in the sale of patronage and prevented unfit men from obtaining benefices he had nothing to say against it, but its exclusion of misconduct in respect to doctrine and practice seemed to him to be wholly illogical and irrational Mi. Balfour retorted that Sir W. Harcourt had sought to avert the course of national legislation in order to arouse in the country a feeling which he admitted had much to justify it, but which nothing in the Bill touched even remotely, and with which the Bill ought not to be brought even remotely into connection. He repeated that the great into connection He repeated that the great majority of the clergy were loyal to the Church of England, as understood by them and by the general body of the latty Extreme ritualistic prætices were not only illegal but highly injurious to the Church At the same time it should be remembered that the Church had should be remembered that the Church had been a great blessing to this country, because it was tolerant of wide differences of opinion within its borders. He could never be a party to driving out of the Church any of those who obeyed the existing law, nor did he think anybody ought to desire, under any guise whatever, to narrow the boundaries of the Church Third reading was agreed to Second reading taken in Lords July 7th, the Archishop of Canterbury expressing approval of the measure, and the Marquis of Salisbury in replying to some observations by the Earl of Kinberley as to practices on the part of some Kimberley as to practices on the part of some of the clergy that had excited a feeling of disquietude, observing that he beheved the danger indicated was a real danger, but he did not think it pievailed largely, and many of the things about which excitement had arisen were of rather a trivial character. Bill passed through committee July 18th Considered as amended July 22nd, when further amendments amended July 22nd, when further amendments were made, the provision being added to clause it relative to fees paid in respect of proceedings in the court under the Act. Further amendments made on third reading (July 28th), and Bill returned to Commons Lords amendments considered and agreed to

but who were themselves living examples of dishonour and of falschood, who demortalised all those amongst whom they dwelt, and whose existence was in itself a living lie. Mr. Balfour denied that he had endeavoured to minimise the importance of this subject. He had demed that the evils complained of existed to anything like the extent that the right hon gentleman supposed. As far as any evidence that had come before him showed, the deporable practices referred to were limited in their extent, and the clergy who regarded them with approval formed but a very small minority of the clergy of the English Church. The amendment, if carried, would not have the shightest effect in checking ritualistic practices. Mr. R. Wallace (Edinburgh) characterised the amendment as a contemptible device to try to attain

in land of not less than 100 acres situate in the parish in which the benefice is situate or in an adjoining parish and belonging to the same owner as the advowson; and any person who offers any right of patronage for sale by auction in contravention of this section, or auction in contravention of this section, of who bids at any such sale, shall be liable, on summary conviction, to a fine not exceeding fico. (3) Any agreement for any exercise of a right of patronage of a benefice in favour or on the nomination of any particular person, and any agreement on the transfer of a right of patronage of a benefice—(a) for the re-transfer of the right, or (b) for postponing payment of any part of the consideration for the transfer until a vacancy or for more than three months, or (c) for payment of interest until a vacancy of for more than three months, or (d) for any payment in respect of the date at which a vacancy occurs, or (e) for the resignation of a benefice in favour of any person, shall be invalid. For the declara-tion set forth in the Clerical Subscription Act, '65, is substituted one scheduled with this Act, setting forth, among other things, that the presentee has not with respect to the presentation been party or privy to any agreement which is invalid under this Act: and it is made an offence to knowingly make any false statement in the declaration, or to commit any breach of the promissory part of his declaration.
The expression "transfer" in this section is defined to include any conveyance or assurance passing or creating any legal or equitable interest inter vivos, and any agreement for any such conveyance or assurance, but shall not include (a) a transmission on marriage, death, or bankruptcy, or otherwise by operation of law, nor (b) a transfer on the appointment of a new trustee where no beneficial interest passes.

Under sect. 2 a bishop may refuse to institute or admit a presentee to a benefice (a) if, at the date of the vacancy, not more than one year has elapsed since a transfer, as defined by the first section of this Act, of the right of patronage of the benefice, unless it be proved that the transfer was not effected in view of the probability of a vacancy within such year, or (b) on the ground that at the date of lapsed since the presentee was ordained deacon, or that the presentee was ordained deacon, or that the presentee is unfit for the character; grave misconduct or neglect of duty in an ecclesiastical office, evil life, having by his conduct caused grave scandal concerning his moral character since his ordination, or having, with reference to the presentation, been knowingly party or privy to any transaction or agreement which is invalid under this Act. A bishop shall not collate, institute, or admit any person to a benefice until the prescribed manner, that he proposes to collate, institute, or admit such person has been screed on the churchwardens of the parish, who shall publish the notice in the prescribed manner. There is under sect, 3 an appeal against refusal to institute on any ground included in the previous section, or of unifities or displacement of the distinct of the foresting of the supreme Court, who is to decide all questions of law and find as to any fact.

alleged as reason of unfitness or disqualification, and his decision on such questions of law and his finding as to any such fact shall be binding on the archbishop, who shall thereupon, (i) if the judge finds that no such fact sufficient in law exists, direct institution or admission, or (ii) if the judge finds that any such fact sufficient in law exists, decide if necessary whether by reason thereof the presentee is unfit for the discharge of the dutes of the benefice and determine whether institution or admission ought, under the circumstances, to be refused. Certain parts of statutes are repealed which prevent the Universities of Oxford and Cambridge from presenting or nominating to the benefices and livings therein mentioned persons all eady holding any benefice with cure of souls, provided that nothing be done in contravention of the other Acts regulating the holding of benefices in plurality.

A change is made in the constitution of the commission under the Pluialities Acts; and where a commission appointed under those Acts and this reports that the ecclesiastical duties of a benefice are inadequately performed, and that this is due to the negligence of the incumbent of the benefice in the performance of those duties, the bishop, if he thinks the appointment of a curate desirable, shall himself appoint a curate or curates, without requiring the incumbent to do so, and may also, if in his opinion the adoption of such a course is expedient in the interests of the benefice, inhibit the incumbent from performing all or any of those duties. The incumbent may appeal against the appointment of a curate by the bishop under this section and against any such inhibition to the court, constituted under this Act, within one month after such appointment or the 15 auc of such inhibition. On any such appeal the judge shall determine whether such appear the judge shan determine whether the incumbent has been negligent as aloresaid, and the archbishop shall thereupon—(i) if the judge finds that the incumbent has not been negligent as aloresaid, resend the appointment and inhibition, if any, or (ii) if the judge finds that the incumbent has been negligent as aforesaid, decide whether by reason thereof the said appointment should have been made, and also whether the incumbent should be inhibited from performing any and what eccle-siastical duties of his benefice, and shall give judgment accordingly, and that judgment shall be final. And this section of the Act provides that as regards meumbents presented or collated after the commencement of the Act, in certain cases of sequestration the benefice is to become There is a power to make rules under the Act (clause 11), and in framing them regard is to be had to making the procedure and practice as simple and inexpensive as possible. The fees paid in respect of proceedings in the court under this Act are to be paid over to the common fund of the Ecclesiastical Commissioners, who shall, out of such common fund, defray all the expenses of and incidental to the sittings of the court and the remunera-tion of its officers, and all expenses which are necessarily incurred in the execution of this Act in such proceedings provided that no portion of any fund destined for the relief of necessitous incumbents shall be applied to the payment of the aforesaid expenses. Every benefice with cure of souls which at the commencement of the Act is donative shall as

[39] Ganals Protection (London) Act, '98 (for & 6s Vict., ch. 16—r.a. July 25th—commences Jan 181, '99), was introduced by Mr. Holland. Within the administrative county of London the local authority may by written notice require a canal company to protect dangerous places on canals, and if the company refuse to comply with any such requisition, a court of summary jurisdiction may by order on complaint by the local authority determine, after due inquiry, whether any such danger exists, and whether the works required are necessary and such as the company may be reasonably required to carry out, and determine whether the costs for any such works and the future maintenance thereof shall be borne by the local authority on the company, or in what proportions between them. If the order be not complied with within the time limited, the local authority may execute the works necessary for compliance with the order, and may recover the costs thereof from the canal company, so far as payable by them. Any order is subject to appeal to quarter secssions.

to appeal to quarter sessions [40] *Golonial Loans Bill was introduced (July rath) with the object of creating a Colonial Loans Fund on the model of the Local Loans Fund for the purpose of granting loans to Crown colonies out of moneys to be raised either by the issue of Colonial guaranteed stock or by the issue of boulds. When a colony required a loan, application would be made to the Colonial Secretary, and would be considered by him and the Treasmy, if they were prepared to recommend the loan to Parlament, the rate of interest and the term of the loan would be fixed by them, and the colony would be required to pass an ordinance imposing a charge upon its revenues for interest, management, and repayment of capital by instalments. Full Parlamentary sanction would be required in every case. The resolution upon which the Bill was based was agreed to July 18th, and the Bill was based was agreed to July 18th, and the

Withdrawn July 30th.

[41] Golonial Marriages (Decased Wife's Sister)

Bill was int oduced by Lord Strathcona and
Mount Royal, and proposed that every marriage
between a man and his deceased wife's sister
heretotore of hereafter lawfully and validly
contracted in any British colony, dependency,
or possession should be deemed to have been
and to be lawful and valid for all purposes
within the United Kingdom, with a saving for
rights existing at the passing of the Act. Second
reading was moved July 5th, whereupon rejection of the measure was proposed by the
Lord Chancellor. The Bill was supported by
Lord lames of Hereford, Viscount Eshier, and
the Earl of Kimberley, and opposed by Viscount
Knutsford, second reading being in the result
carried by 129 to 46. Among the supporters
of the Bill were the Prince of Wales, the Dukes
of Devonshire, Bedford, Fife, Grafton, Portland,
and Westminster, the Marquises of Lansdowne and Ripon, Earls Carrington, Cowper,
Derby, Kimberley, Northbrook, Portsmouth,
Ravensworth, Spencer, Viscount Wolseley,
Lords Brassey, Burton, Farquhar, Glenesk,
Heneage, Lawrence, Mount-Stephen, Norton,
and Plunket. The minority against included
the Archbishops and seven Bishops, Viscount
Cross, the Dukes of Norfolk, iRichmond, and
Rutland, the Marquis of Salisbury, Viscount
Llandaff, and Lord Balfour. In committee

parties to any such marriage must be domiciled in the colony where it was contracted. Bill read a third time and sent to Commons July 28th (=).

[42] Cosamon Employment Abolition Bill was introduced by Sir Arthui Forwood, and proposed to abolish the defence of common employment in proceedings under the Employers' Liability Act, and to extend the liability to all cases arising from negligence by a fellowservant, whatever his status in the employ. The measure did not apply to any of the occupations to which the Workmen's Compensation Act, '97, applies, but the second of its clauses permitted employers whose trade is not included in the Act to engage their workmen subject to its terms. Mr. Asquith supported the Bill as far as it went, though he regarded it as falling seriously short of the 1 equirements of the case. The Home Secretary remarked that if the House desired to read the Bill a second time the Government would not object, though their own view was that the time was inopportune to raise important questions which were experimentally, settled by the Act of '97. Sir A. Forwood announced his willingness to withdraw in committee the second clause of the measure. On a division the second reading was carried by 215 to 59. Considered in committee June 15th, when on the motion of Sir A Forwood woods in clause i which limited the operation of the measure to proceedings under the Employers' Liability Act were omitted. An amendment of Mr. Renshaw for the omission of words whose object was to prevent contracting out of the Bill was supported by the Attorney-General, but defeated by 134 to 104. Some amendments were made in the Bill, but it was eventually withdrawn.

by 134 to 104 Some amendments were made in the Bill, but it was eventually withdrawn.

[43] Companies Act, '98 (or & 2 Vict, ch. 26-r 4 Aug. 2nd), was introduced by Sir John Lubbock, and enables the court to grant relief for non compliance with the Act of '67, where any shares credited as fully or partly paid up have been issued for a consideration other than cash, and at or before the issue of such shares no contract or no sufficient contract is filed with the Registrar and Joint Stock Companies, if the court is satisfied that the omission to file was accidental or due to inadvertence, or that for any reason it is just or equitable to grant relief. The object of the measure was stated to be to remove doubts caused by recent decisions of the courts, whether large numbers of shares honestly issued and taken up as fully paid or partly paid in manner intended.

[44] *Companies Bill, to amend the Companies Act, was reintroduced by the Earl of Dudley, and referred to a select committee, which further continued the inquiry that was commenced in '96 and carried on through '97, and reported the evidence taken this session (Aug. 8th), with a recommendation that if the Bill be again introduced into their Lordships' House a committee be again appropried.

downe and Ripon, Earl's Calllington, Cowper, Derby, Kimberley, Notthbrook, Portsmouth, Ravensworth, Spencer, Viscount Wolseley, Lords Brassey, Burton, Farquiar, Glenek, Heneage, Lawrence, Mount-Stephen, Norton, and Plunket. The minority against included the Aichbishops and seven Bishops, Viscount Cross, the Dukes of Notfolk, Richmond, and Rutland, the Marquis of Salisbury, Viscount Llandaff, and Lord Balfour. In committee words were inserted providing that both the

calculated to be injurious to the work of the Board, and rejected on second reading by 223

[46] Copyright. Two Bills on this subject were laid before the House of Peers, one by were laid before the House of Peers' one by Lord Monkswell, proposing to amend the law relating to copyright in periodical works, lectures, abridgments, and otherwise; the other by Lord Herschell, which was the measure framed by the Copyright Association as representing the interests of publishers as well as authors. Both were read a second time, and referred to a select committee, which took much interesting evidence, and reported (July 20th), stating that they had been unable to complete the inquiry, and recommending that if a Bill upon the subject be again introduced into their Lordships' House a committee be again appointed

[47] Corn Sales Bill. Mr Rankin proposed (April 20th) second reading of a Bill to provide for greater uniformity in the weights and measures used in the sale of coin Future measures used in the sale of coin future dealings were to be by weight only, and by the hundredweight of 112 lb, except in the case of any less quantity than the hundredweight, to which the Bill did not apply Ihe President of the Board of Agriculture suggested that, as the proposal to make the unit the hundredweight.

proposal to make the unit the mindledweight of 112 lb. met with much opposition, the second reading should not be piesed. On a division the Bill was rejected by 152 to 76 [48] Court of Oriminal Appeal Bill was intro-duced by Mr Pickersgill, and pioposed the cleation of a court of criminal appeal, to which there would be a right of appeal in capital cases and an appeal by leave of the court in non-capital cases where there had been a conviction on indictment. The Home Secretary could not support a measure which gave this general right of appeal in criminal cases. Mr. Asquith supported the second reading on the general principle that a court of appeal is desirable in certain cases, though we hout committing himself to the machinery of this particular matter.

The Bill was rejected by 180 to 116
[49] *Criminal Evidence Act, '98 (61 & 62 Vict ch 36—1 a Aug 12th—commences Oct 12th, '98
—E and S) This important measure, which enables (subject to certain provisoes) every person charged with an offence, and the wife on husband, as the case may be, of the person so charged, to give evidence for the defence, was at length placed on the statute book. It was presented by the Lord Chancelloi Feb 10th, and after being amended in some respects was sent atter being amended in some respects was sent to the Commons, where it was considered on second reading, April 25th Mi Pickersgill proposed the rejection of the measure, which was seconded by Mr J. L. Morgan. Mi. Lyttel ton, Mr. T. iM. Healy, Mr G. Bowles, Mi Atheries-Jones were among the other opponents of the measure, but it received the support of Sir R. Reid and Sir E. Claike, among others Second reading was in the result carried by 229 to 80 In committee an amendment of Mi. Bowles proposing that children under the age of 16 should not be competent to give evidence on their own behalf was negatived by 159 to 51, and amendments limiting the operation of the Bill to charges on indictment and to offences not triable by a court of summary jurisdiction

Ireland from the scope of the measure was the subject of an animated discussion, after which it was withdrawn. Some amendments were made on the report. The lejection of the measure was proposed on its final stage (July 26th), but the third reading was agreed to without a division Subjoined are the leading

provisions of the Act.—
Sect 1 "Every person charged with an offence, and the wife or husband, as the case may be, of the person so charged, shall be a competent witness for the defence at every stage of the proceedings, whether the person so charged is charged solely or jointly with any other person. Provided as follows.—(a) A person so that ged shall not be called as a witness in pursuance of this Act except upon his own application (b) The failure of any person charged with an offence, or of the wife or husband, as the case may be, of the person so charged, to give evidence shall not be made the subject of any comment by the prosecution (e) The wife or husband of the person charged shall not, save as in this Act mentioned, be called as a witness in pursuance of this Act except upon the application of the person so charged (d) Nothing in this Act shall make a husband compellable to disclose any communication made to him by his wife during the marriage, or a wife compellable to disclose any communication made to her by her husband during the marriage (i) A person charged and being a witness in pursuance of this Act may be asked any question in cross-examination not with standing that it would tend to criminate him as to the offence charged (f) A person charged and called as a witness in pursuance of the Act shall not be asked, and if asked shall not be required to answer, any question tending to show that he has committed or been convicted of or been charged with any offence other than that wherewith he is then charged, or is of bad character, nuless—(i) the proof that he has committed or been convicted of such other offence is admissible evidence to show that he is guilty of the offence wherewith he is then charged, or (ii) he has personally or by his advocate asked questions of the witnesses for the prosecution with a view to establish his own good character, or has given evidence of his good character, or the nature or conduct of the defence is such as to involve imputations on the character of the prosecutor or the witon the character of the prosecutor of the witnesses of the prosecution, or (m) he has given evidence against any other person charged with the same offence (g) Every person called as a witness in pursuance of this Act shall, nuless otherwise ordered by the court, give his evidence from the witnesses box or other place from which the other witnesses give their avidence. (b) Nethery withes Act shall offset evidence (h) Nothing in this Act shall affect the provisions of sect 18 of the Indictable Offences Act, '48, or any right of the person charged to make a statement without being swoin

Other sections of the Act provide that, where the only witness to the facts of the case called by the defence is the person charged, he is to be called as a witness immediately after the close of the evidence for the prosecution. In cases where the right of reply depends upon the question whether were negatived, but an amendment of Mi J. L. Morgan (now paragraph b of sect. 1 of the Act) was accepted. An amendment of a witness is not of their their to confer on the Mr, Carson to omit the proviso excluding

husband of a person charged with an offence under any enactment mentioned in the schedule to this Act may be called as a witness either for the prosecution or defence and without the consent of the person charged. [The enactments so scheduled relate to punishment under ments so scheduled relate to punishment under the Vagrancy Act for desertion of wife or family; sect. 80 of the Poor Law (Scotland) Act, 45; certain sections of the Offences against the Person Act and of the Married Women's Property Act, and any section of the Criminal Law Amendment Act, 85, and of the Prevention of Cruelty to Children Act, 94] Nothing in the Act is to affect a case where the wife or husband of a person charged with an offence may at common law be called as a witness without the

consent of that person

[80] East India Loan Act, '98 (61 & 62 Vict., ch. 13—r.a July 18t), authorises the Secretary of State in Council of India, at any time or times, to raise in the United Kingdom, for the service of the Government of India, any sum or sums not exceeding in the whole £10,000,000 sterling. On the money resolution on which the measure is based Lord George Hamilton (June 7th) made an interesting financial statement (see headed article India), explaining, in regard to this particular proposal, that the money was required to redeem obligathat the moley was required to reaction of the approaching maturity, to provide capital for railway extension, and to give a certain reserve resource to the Secretary of State, so that in the case of any exceptional disturbances in India, or in the event of a famine or war that would educe the revenue, he would have something behind him to temporarily meet the difficuity. Three millions of 32 debenture stock would mature in August, and would be replaced by bonds bearing a lower rate of interest. The total amount required to replace existing obligations was £3,184,000, and £2,615,000 would be wanted to meet disbursements and for railway capital to be raised in

ments and for railway capital to be raised in this country for India.

[61] *Elementary School Teachers (Superannustion) Act, '98 (or & & vict., ch 57—r.a Aug 12th—commences on April 1st, '98, or on such day, not more than three months later, as may be fixed by her Majestyin Council—E. and S.). The measure applies *(a) to elementary school teachers certificated after the commencement of the Act and (b) to existing teachers. "(e) teachers certificated after the commencement of the Act, and (b) to existing teachers, "cei-tificated teacher" meaning a teacher who is recognised under the Education Code as a ceitificated teacher for public elementary

achools.

A teacher certificated after the commencement of the Act is not to be recognised by the Department as a certificated teacher until the Department are satisfied, in the manner to be prescribed by jules, of his physical capacity. There is to be compulsory retirement at 65, subject to exceptional continuation of service, without option of retirement in good health at an earlier age. The teacher is, while serving in recorded service, to contribute to the deferred annuity fund at the rate, if a man, of \mathcal{L}_3 , and, if a woman, of \mathcal{L}_2 a year, or at such increased rate as may for the time being be fixed by the Treasury in accordance with this Act. On retirement at or after 65 he is to be entitled, out of the deferred annuity fond, to such annuity for the remainder of his life in respect of his contributions to the fund as may be fixed by the tables to be proposed under the Act; but he is not to be entitled to any return

of contributions or to any benefits in respect of his contributions other than the annuity. His actual superannuation allowance will, however, be the annuity which the total amount of his own contributions will produce plus a State pension. If he has contributed to the deferred annuity fund in accordance with this Act, and has years of recorded service are not less than half the number of years which have elapsed since he became certificated, the Treasury grant will be an annual allowance calculated at the rate of ros. for each complete year of re-corded or actual service. There is a proviso for increasing the rate of contribution to the fund should the average salaries of the teachers exceed a certain sum, and of reducing it if the average emoluments have been so reduced as no longer to justify that increase. "Recorded service" for the purposes of this Act has a wide definition, though it does not include service in

an evening school.

Where a teacher satisfies the Treasury in the prescribed manner that he has served a number of years of recorded service not less than to and not less than half the years which have elapsed since he became certificated; and has not at the date of the application been for more than the prescribed time unemployed in re-coided service, and has become permanently incapable, owing to infirmity of mind or body, of being an efficient teacher in a public clementary school; and is not excluded by the prescribed disqualifications,—the Treasury may grant to such teacher out of moneys pro-vided by l'arliament a disablement allowance not exceeding, if the teacher is a man, £20 for 10 complete years of recorded service, with the addition of £1 for each complete additional year of recorded service; and if the teacher is a woman, Lis for 10 complete years of recorded service, with the addition of 13s. 4d. for each complete additional year of recorded service But in no case is the pension to exceed the superannuation to which the teacher might have been applied on the superannuation of the superannuation have been entitled on serving to the age of and such pension is to cease if at any time the conditions upon which it was originally awarded are no longer fulfilled, or on subsequent mar-riage of the pensioner, or if he become in such a position as not to be in pecuniary need of the allowance. The contributions under the Act from certificated teachers are to be paid to the Department by the teachers or their employers, and paid by the Department to the National Debt Commissioners and be invested by them so as to form the deferred annuity fund.

The Department is to give to each existing teacher the option, within the prescribed time, not being inore than one year after the commencement of this Act, of accepting this Act. If an existing teacher does not so accept this Act, it shall not apply to him. If an existing teacher does so accept this Act, it shall apply to him with the modifications that the rate of ros. upon which the State allowance is calculated may be augmented in the case of a man by 3d., and in the case of a woman by 2d., for each complete year of recorded service served before the commencement of this Act, that if the teacher has at the date of the acceptance attained the age of 65 years or any greater age, and has served in recorded service throughout the seven years next before the commencement of this Act, the provisions with respect to the expiration of the certificate shall apply as it the date of the acceptance were substituted for

the date at which the teacher attained the age of 65 years; and that if the teacher has not at the date of the acceptance attained the said age, he must serve in recorded service after the commencement of this Act, and where, during any part of the seven years next beloie the commencement of this Act, he was not in re-corded service, the duration of the recorded service after the commencement of this Act must not be less than the said part of the seven years. Nothing in this section is to authorise the grant of any allowance to any teacher who at the commencement of this Act is in receipt of a pension out of moneys provided by Parliament for the service of education. The Treasury and the Education Department may make rules for carrying into effect this Act, and shall provide thereby, amongst other things, for permitting certificated teachers to pay contribu-tions to the deferred annuity fund during any interval not exceeding six months in which they are not employed in recorded service, and for reckoning the time in respect of which such contributions were made, as if it were recorded contributions were made, as if it were recorded service. Provision is made for forfeiture, in case of misconduct, of any disablement allowance or superannuation allowance. Every assignment of or charge on, and every agreement to assign or charge on, and every agree-ment to assign or charge any annuity or allow-ance to a teacher under this Act, whether payable presently or at some future date, shall be void; and provision is made for the case of

banki uptcy.

[52] *Education (Board of) Bill. The Duke of [62] "Education (Board of) Bill. The Dirke of Devonshine presented (Aug 1st) "a Bill to provide for the establishment of a Board of Education for England and Wales, and for matters connected therewith," and "a Bill for the registration of teachers," though not with matters connected discretion, though not with a view of asking their loidships to make any progress with them this session, even to the connection of the masses of the ma extent of giving them a second reading. The first of these measures did not aim at the present creation of local educational authorities, although the Government were perfectly well aware that the establishment of such authorities must come, and below long. It proposed to establish a central educational authority; to establish a celetral selections authority, bring the Education Department and Science and Art Department together, and to make them divisions of one office, and probably under the control of one permanent secretary, to put an end to the Committee of Council and to the office of Vice-President of the Committee of Council, and to create a Board of Education on the model of the Board of Trade, the Local Government Board, and the Board of Agriculture If the Education Minister should be in the House of Loids, the President of the Council would be President of the Board, and the Department would be represented by the Vice-President of the Board in the House of Commons, but if the Minister of Education should be in the Commons, he would have the office of President, and there would be no Vice-President, though the Department would be represented in the Lords by some such an angement as had been found practicable in the case of other departments. The new central responsible Department would be charged with the supervision of secondary as well as elementary education, and of all the agencies appertaining to both. It would be entirely a mistake to suppose that there was any intention of simply merging the Department of Science and Ait into that of Education. The Education

Department itself might probably under the Government plan require some reorganisation, Some of the duties performed by it-such as those in relation to training colleges, to training pupil teachers, to the higher-grade schoolspertain rather to secondary than to elementary education, and it might be that it would be found expedient to group those functions which are now discharged by the Department with others which are now discharged by the Science and Art Department under a Secondary Education Department proper, while a third division might possibly be charged with the supervision of the more technical branches of science and ait instruction, and at the same time the control and management of the science and art museums which exist both in the Metropolis and the provinces. So far as administration was concerned, he saw no reason why the Government plan should lead to any increased expenditure; he rather thought it would tend towards economy. The administration of charitable trusts and the framing of schemes under the Findowed Schools Acts by the Charity Commissioners would remain untouched, except that an instruction would be given to the Commissioners to frame schemes, so far as they were educational, in consultation with the Education Board, and the Education Board would have power to move the Charity Commissioners to promote or alter schemes where such promotion of alteration was necessary. The educational examination of these endowed schools, which was provided for in all schemes, and their administrative inspection, so far as it relates to educational matters, would be transferred to the new Department. As to the transferred to the new Department As to the registration of teachers, for the purpose of form registration of teachers, for the purpose of forming and mainfaining a registry, the second Bill proposed to provide a separate council, though for this council would be nominated by the Crown and some by the Universities, though ultimately it would contain members directly representative of the registered teachers them-But the Covernment had not seen silves. their way to give to this council or to any other council wide statutory powers. They recognised, however, that the advice of educational of Education, and they had taken power to authorise the President of the Board of Education to appoint an educational committee to advise the Board on such matters as might be referred to it Such a committee in all probability would be largely tounded on the registration council. The Earl of Kimberley expressed regret that so small a change was to be made as to the powers of the Charity Commissioners, but added that his satisfaction would be great if it should be found that there was a general approval of the scope of the measures which the noble duke had proposed,

measures which the noble ruke had proposed. Bills read a first time (=)

Evidence in Criminal Cases Bill (see sect. 49).

[53] *Ex-Officio Justices of the Peace (Sootland)

Act, '88 (6) & 62 Vict., ch 29—r a. July 25th), enacts that any ex-officio justice of the peace in Scotland who has been re-elected to the office in respect of which he became a justice of the peace on the expiration of other determination of a pievious term of office, and who has taken the oaths required by law to be taken by justice of the peace, may continue to act as a justice of the peace without again taking such

oaths.

[54] *Factories and Workshops Emergency Processes Bill. The object of this measure was explained to be to meet the difficulties which have arisen in connection with exemptions granted by the factory and Workshop Acts to trades which deal with perishable goods. These difficulties have arisen chiefly in the fish curing trade and in creameries. It was proposed by the Bill to repeal all the existing exemptions, and to enable the Secretary of State to grant, subject to certain provisions, such exemptions as seemed necessary from the provisions of the Factories and Workshops Acts with respect to the times of employment of women and young persons. The measure was introduced June 20th, but indications of rather strong opposition were manifested to it, and later on the Home Secretary stated that he had no intention of pressing the Bill unduly on the House, though he hoped it would be regarded as a non-contentious measure. With-

drawn July 15th
[55] *Finance Act, '98 (61 &62 Vict, ch. 10— 1 a. July 181), gives effect to the reduction of the tobacco duty and the alteration in the standard of mosture proposed in his Budget (see article Financi, National) by the Chancellor of the Exchequer, continues the tea duty at 4d per lb, and enacts that a person shall not subject any cask to any process for the purpose of extracting any spirits absorbed in the wood thereof ["grogging"], or have on his premises any cask which is being subjected to any such process, or any spirits extracted from the wood of any cask. The provisions of the Stamp Act in reference to the composition for stamp duty chargeable on transfers of certain colonial stocks are extensed to the stock of any British protectorate or protected state to which the Colonial Sock Acts are applied. Though continuing the income tax at 8d, the Act gives relief by a new graduation where the income does not exceed \$\int_{700}^{\infty}\$, and exempts from land tax an owner in possession who has been allowed a total exemption from income tax by reason of his income not exceeding £160, ic-mitting one-half of the amount of the land tax where an acatement of meome tax has been allowed by reason of the income not exceeding allowed by lesson of the income not exceeding A400. With regard to estate duties, an addition is made to sect. 5, sub-sect. 2, of the Finance Act, 94, and it is also enacted that, where in the case of a death occurring after the commencement of this Act settlement estate. duty is paid in respect of any property con-tingently settled, and it is thereafter shown that the contingency has not arisen and cannot arise, the said duty paid in respect of such pro-perty shall be repaid. When the Bill was before the Commons, Col. Milward, on second read-ing, moved an amendment declaring that any readjustment of taxation should include a remission in favour of clergymen whose income is wholly or in part derived from tithe, and in whose case it should be shown that they are contributing more than their due share to local taxation. This was seconded by Viscount Crantaxation. This was seconded by Viscount Crainborne, and supported by Major Rasch, among others. The Chancellor of the Facheque replied that the matter 50 talsed formed part of the great question of local taxation now before the Royal Commission, and if any proposal

ment was negatived by 215 to 27. In course of further proceedings on the Bill, Sir William Harcourt approved on the whole of the proposal regarding the income tax, but thought that with the present administration there had been too little remission of taxation and congreat an increase of expenditure. The Chancellor of the Exchequer, in reply, admitted that the expenditure on the Army and Navy was very large, but maintained that the increase was due, not so the Government, but to the practically unanimous demand of the people. The motion for second reading was agreed to In committee Mr. J. A. Pease (June 13th) moved the omission of the clause for the teduction of the duty on tobacco, expressing himself in favour alternatively of a reduction of the duty on tea, but after some conversation the clause was agreed to. Mr. Pease later on proposed to reduce the tea duty from 4d to 23 to 103. Third reading of the Bill was (June 2.th) carried by 150 to 30.

carried by 150 to 30. [156] "Greek Loan Act, '98 (61 Vict, ch 4-7 a. April 1st), enables her Majesty to carry into effect a convention entered into with the Governments of France, Ru sia, and Greece containing articles guaranteeing a loan of £6,80,000 to be issued by the Government of the £2cheque, in moving (Maich 24th) the financial resolution on which the Bill was based, said Greece was unable to pay the war indemnity to Turkey without a loan, and this the Powers had guaranteed, recognising the importance of the exacution of 1he saily by furkey. Of the total amount of the loan £3,800,000 would be required for the indemnity and for compensation to persons moured during the war by Greek troops, and £1,200,000 was needed to meet the defect for '978, £1,000,000 was needed to meet the defect for '978, £1,000,000 was needed to meet the defect for forther the thoating debt of Greece, and £800,000 would be resued as might be necessary for differ's espected to arise subsequently to '98. For the first five years Greece will pay an annuity of 25 per cent of the nominal amount of the loan resued, and thereafter will pay a fixed annuity of 30 per cent of the nominal amount of the loan resued, and thereafter will pay a fixed annuity of 30 per cent of the nominal amount of the loan resued, and thereafter will pay a fixed annuity providing for the gradual amortisation

of the loan [57] Industries (Ireland) Bill. The Farl of Mayo moved (June 21st) second reading of a Bill the object of which was to facilitate the establishment of electrical industries in Ireland by the employment of unused water-power in that county. After a discussion the measure was withdrawn, Loid Mayo agreeing to a suggestion of Loid Crambrook that the question involved in the Bill should be investigated by swheet (our mittee).

ing, moved an amendment declaring that any readjustment of taxation should include a remission in favour of clergymen whose income is wholly or in part derived from tithe, and in whose case it should be shown that they are contributing more than their due share to local taxation. This was seconded by Viscount Cramborne, and supported by Major Rasch, among others. The Chancellor of the Exchequer replied that the matter so raised formed part of the great question of local taxation now before the Royal Commission, and if any proposal were made by the commission which might alleviate the position of the clergy, the Government should introduce legislation dealing with the subject, and amend and extend the librates Act, '89. The Home Secretary stated in course of the evening that he proposed to introduce a measure before very long. Bill brought in, and duly became law—alleviate the position of the clergy, the Government should introduce a great can be present condition of the law relating to commission, it is unsatisfactory, it is desirable that the Government should introduce legislation dealing with the subject, and amend and extend in particular the Habitual Drunkards Act, '89, and the linebinates Act, '89. The Home Secretary stated in course of the evening that he proposed to introduce a measure before very long. Bill brought in, and duly became law—in a first proposed to introduce a measure before very long. Bill brought in, and duly became law—in a first proposed to introduce a measure before very long. an offence punishable with imprisonment or penal servitude, if the court is satisfied from the evidence that the offence was committed under the influence of drink or that drunkenness was a contributing cause of the offence. and the offender admits that he is or is found by the jury to be a habitual drunkaid, the court may, in addition to or in substitution for any other sentence, order that he be detained for a term not exceeding three years in any State mebriate reformatory own any certified mebriate reformatory the managers of which are willing to receive him. Any person who commits any of certain offences specified in the Act, and who within the twelve months preceding the date of the commission of the offence has been convicted summarily at least three times of any offences so mentioned, and who is a habitual drunkard, shall be liable upon conviction on indictment, or if he consents to be dealt with summarily on summary conviction, to be detained for a term not exceeding three years in any certified mebinate reformatory the managers of which are willing to receive him The offences in question include being found whether a building of not, or or hichese being found in a highway or other public place, whether a building of not, or or hicensedopte mises, being drunk while in charge, in any public place, of any carriage, horse, cattle, or steam engine, being drunk while in possession of any loaded fricarns, refusing or failing when drunk to quit beensed premises when

requested, etc., etc.

The Secretary of State may establish State. mebriate reformatories, and may make regulations for their rule and management, subject to any adaptations, alterations, and exceptions made by such regulations, the Prison Acts (including the penal provisions thereof) are to apply to every such reformatory, but no regulation shall authorise the infliction of corporal punishment in any such State establishment. The Secretary of State, on the application of the council of any county or borough or of any persons desirous of establishing an inchriate reformatory, may, if satisfied as to the fitness of the reformatory and of the persons proposing to maintain it, certify it as an inclinate reformatory, he may make regulations as to the establishment, management, maintenance, and inspection of such institutions, the classification, treatment, etc., of the inmates, and the application of their ennings, and the transfer of inmates from one reformatory, State or otherwise, to another A county or borough council may contribute such sums as they may think fit towards or may themselves undertake the establishment of a reformatory certified or intended to be certified under the Act Officers of these establishments are to have all the powers, protection, and privileges of a conf stable, and persons escaping from the reforma-tories may be arrested without was ant and brought back. Power is given to recover expenses against an inchinate's estate it he has property more than sufficient to maintain his family, if any Licensing powers under the Inebriates Acts, as amended by this Act, are reported to the sufficient of transferred to the borough council in boroughs, and elsewhere to the county council, and any such council may contribute towards the establishment or maintenance of a retreat under these Acts. In sect. 10 of the Habitual these Acts Drunkards Act, 79, a term not exceeding two years is substituted for a term not exceeding

substituted for two justices as the attesting authority to the signature of an applicant; and a person who is or has at any time been detained in a retreat may have his term of detention extended, or be readmitted. Regulations made under the Act are not to come into effect until they have lain before each House of Parliament. The Act is adapted to Scotland and Ireland

[59] Irish Surnames. Mr. MacAleese introduced a Bill to enable any person of Irish birth or extraction to adopt and use the prefix "O before their surnames. It consisted of three clauses (1) permitting such use of the prefix on the person making known in writing his intention in Great Britain to the Home Secretary and in Ireland to the Chief Secretary, (2) enacting that proof that such intention was duly communicated should be held to satisfy iccising barristers, registrars, and all others that the prefix was a legal portion of the surname, and (3) repealing all ancient statutes Attorney-General for Ireland (March 30th) moved to omit clause 1 on the ground that, as there was really no law to prevent the use of either prefix, the clause was unnecessary. The clause was struck ont, and clause 2 was on the motion of the right hon and learned gentleman also omitted. The Attorney-General for Ireland asso united. The Attorney-General for Feland next moved to omit clause 3, and to msert, "So much of any statute as prohibits the use of 'O' or 'Mac before any surname is hereby tepealed." Mr. Mac Aleese asked whether, if there was no law against the use of "O's" and "Mac's, "Mac's," it was necessary to propose the clause at all. He complained of the attitude of the Attorney-General, and moved to report

progress Dispiped [60] "Land Charges. A Bill of the Lord Character to amend the law relating to charges or land, by the substitution of a charging order for a writ of elegit, and to matters connected therewith, passed the first House, but was withdrawn in the Commons.

1613 Land Law (Ireland) Acts Amendment.

It layin (March 16th) moved second reading of a Bill to amend the Irish Land Acts in certain important respects, including a reduction of the statutory term of a judicial rent from 15 to 10 years, and a provision for the restoration of exicid tenaits in Ireland to their holdings. Mr Dillon, Mr W Redmond, and other Irish representatives supported the Bill. Mr Johnston, Conservative member for South Belfast, proposed the rejection of the measure, and the Chief Secretary for Ireland, in also opposing, said the land law in Ireland was more taxonable to the tenant than the land law in any other country in the world. Bill rejected by 243 to 1.8

[62] Libraries Offences Act, '98 (6) & 6) Vict, (h 5)—1 a Aug 12th—E), renders any person who in any public library or reading-room, to the annoxance or disturbance of any person using the same, behaves in a disor derly manner, uses violent, abusive, or obscene language, bets or gambles, or who after proper warning persists in remaining after closing hours, hable on summary conviction to a penalty. Was introduced by M. Ha wood.

'LOCAL GOVERNMENT (IRELAND) ACT, '98.

years is substituted for a term not exceeding [63] (61 & 62 Vict., ch. 37-r.a. Aug. 12th), twelve months, and one justice shall be 15, in each administrative county, to come into

operation as to rural district councils and guardians on March 25th, '99, and as to county councils and urban districts April 18t, '99, and as to all other matters on April 1st, '99, or on such other day, not more than twelve months carlier or later, as in any case the Local Govern-ment Board (but after the election of county ment Board (but after the election of county councillors for such county and on the applica-tion of the county council) may appoint, either generally or with reference to any particular provision of the Act; and different days may be appointed for different purposes and different provisions of the Act, but the enact-ments relating to the registration of local government electors, or to the elections, or to any matter required to be done for the purpose any matter required to be done for the purpose of bringing the Act into operation on the ap-pointed day, came into effect on the passing of the Act. This measure, to quote Loid Ash-bourne (the Lord Chancelloi of Ireland), follows the main lines of the legislation adopted for England and Scotland, accompanied only by such variations as are necessary owing to the special circumstances of Ireland. Up to the passing of this Act there was, as the term is understood in Great Britain, practically no system of free local self-government in Ireland Counties were ruled by a grand jury, a county-at-large presentment sessions, and baronial presentment sessions. Each county was divided into baronies, which was the smallest existing unit for administrative purposes. The grand jurois were selected by the High Sheriff mostly from among the larger landholders, the baronial sessions was composed of the local baronial sessions was composed of the local grand juror, the local mapter acy and a number of selected local cess (or rate) payers. For poor-law purposes the country was divided into unions, each board of guardians being composed, one half of magistrates, the other half being elected on a system which included the cumulative vote. The occupier paid the whole of the country rate or cess, and half the poor rate, the landlord paying the other moiety, but in the case of tenements valued at under £4 per annum the landlord paid the under 64 per annum the landlord paid the whole of the poor rate

The new Act, as in England and Scotland, casts the duties of local government upon bodies popularly elected, but it does not provide for the establishment of parish councils, because never in that country has the parish been made the area of local administration. Henceforth the local administration will be in the hands of four bodies-(a) county councils, (b) urban district councils, (c) rural district councils, and (d) boards of guardians; but these may be narrowed down to three in the majority of cases, because members of the rural district councils will also represent the area for which they are elected as guardians, and where the union is within an administrative county the union will be coincident with the rural district, so that the boards of guardians will be really, as in England, the district councils acting under another name.

The franchise in every case is the parlia-mentary franchise with the addition of peers and ratepaying women, which follows the Scotch precedent and also, as far as district councils and parish councils are concerned, the English precedent. The qualifications are the same as in England, save that ministers of any religious denomination are not entitled to sit on any of the bodies created under the Act. Baronies in Ireland will no longer be centres

of government. Although, as in Scotland, there are no alderman members of the county councils, each council may choose from persons qualified to be councillors one or two persons who are to be additional councillors during the term of office of the first council To the county councils are transferred the financial and administrative powers and duties at present enjoyed by the grand juries, and also those exercised by the county-at-laige Gresentment sessions, also the business of the guardians as to making and levying the poor rate in so much of the county as is not comprised in an urban county district. and as to cattle diseases and explosives. grand jury business respecting compensation for mulicious injuries is transferred to the county court, who may either refuse any application or make a decree against the county council, an appeal being given in certain cases to a judge of assize. To the rural district councils are handed over the duties at present discharged by the baronial presentment sessions and the powers of rural sanitary authorities Fspenditure on roads and other public works payable by the rural district countils will be proposed by those councils, but will be subject to the veto of the county council: while as a further check upon extravagant expenditure, without the express consent of the Local Government Board no expenditure on roads in a rural district may receive the sanction of the county council, if it exceed by 25 per tent, the expenditure during the three years before the standard year. The expression tent. the expenditure during the three years before the standard year "fhe expression "standard year" means the twelve months ending, as 1, gards the poor rate Sept 29th, '97, and as regards the country cess June 30th, '97, Chairmen of county and district councils and of town commissioners are to be ex-officio justices of the peace. The chairman of every rural district council will be an additional member of the county council, so that there will be a close connection between the two bodies. The county council will now provide and maintain sufficient accommodation for the lunatic poor and manage by a committee their asylums, though certain powers of control are reserved to the Lord Licutenant, and he also retains the power of approving the appointments or dismissals made by the county council of resident superintendent and assistant medical officers With regard to exceptional distress the county council may on the representation of the guar-dians of any union authorise the guardians, subject to certain conditions, to administer outrelief for any time not exceeding two months; and one-half of any expenditure incurred in pursuance of this provision is to be levied on the county at large, provided that the total amount so levied in any one year shall not exceed 3d. in the pound on the ratable value of the county, and the guardians may with the consent of the Local Government Board obtain temporary advances for the purposes of this enactment. This provision was framed with a view of obviating the necessity for special acts of parliament whenever there is a recurrence of exceptional distress; but it was stated both by the Lord Chancellor of Ireland and Mr. G. Balfour that it is possible there may be occasions when the powers of Parliament may have to be invoked. The county councils are also to appoint coroners, and have powers as to infirmaries and fever hospitals, and to oppose bills in par-liament. The tenure of office of county councillors is three years, and they are to retire

The county electoral divisions are all together. to be fixed by the Local Government Board, but the district electoral divisions will be the present poor-law divisions. Each rural electoral division will elect two councillors to the district council, who will also be the guardians district council, who will also be the guardians for that division Eural district councils may choose not more than three persons as additional members, and who are to be also additional guardians. The six cities of Dublin, Belfast, Cork, Limerick, Londonderry, and Waterford are each made admistrative counties called county boroughs, but no substantial change has been made in the government or status of these towns, although the wider franchise set up by the Act is extended to them. The urban district councils become the road The urban district councils become the road authorities, and levy all the rates. In rural areas the duty of collecting and levying the poor rate is transferred to the county council, and in urban areas to the urban council. The occupier is to be liable for both the county cess and the poor rate in both the jural districts and the towns, and they will both be collected in one consolidated rate. If any decrease of the one consolidated rate. If any decrease of the rate accrues, it will go to the benefit of the occupiers, and any increase will of course equally be paid by them. The agricultural rating grant is made on the same principle as in England (though there is no limit to its duration, as there is in the case of the English and Scottish grants), and is estimated to amount to £730,000, being a sum equal to half the county cess and half the poor rate, taken for the purposes of the Act to have been paid for the purposes of the Act to have been paid in respect of agricultural land in the standard year. The benefit of the grant is intended for the rural occupier as legards the county cess, and for the owner as regards poor rate. The owner thus becomes relieved of his share of the poor rate, the State paying his half, while the other moiety, subject to any decrease by economy or increase by additional expenditure, is to be paid by the occupier. The first payments under this provision to the Local I axa-tion Account are to be made during the six months ending March 31st, '99, so as to meet the half-yearly payments on account of the six months next ensuing. There are included in the Act provisions for the temporary adjust-ment of rent by the Land Commission arising out of these changes. The charges for extra police, compensation for malicious injuries, iailways, harbours, navigation, and public health are excluded from the calculation of the standard rate. In addition to the £730.00 Exchequer grant, the proceeds of the Local Taxation licence duties collected in Ireland, and amounting to £200,000, are to be handed over to the local authorities, and as certain grants in aid are to be abolished when the duties are handed over, an additional sum of \$\frac{17}{279,000}\$ is given in heu thereof. These grants in aid were mainly grants for lunatics and exceptional grants for poor-law charges which are now thrown on the new governing bodics. Half the cost of a trained nurse in every union in Ireland is to be defrayed by the Government. The first election under the Act of county and rural district councillors and guardians is to be held on March 25th, 99, or on such day fourteen days before or after that day as the Local Government Board may appoint. The first elections under the Act of aldermen and councillors in county boroughs and urban districts by the Government, but carried by 67 to 62; an are to take place on Jan. 15th, '99. Provision amendment of Lord Clonbrock, by which each

was duly made with respect to the registration of electors for the purposes of the above Act by the "Registration Ireland Act, '98 (61 Vict. ch. 2—r.a March 29th).

The provisions of the Bill were explained by the Chief Secretary for Ireland and it was read a first time (Feb. 1st). On the motion for second leading (March 21st) Mr. Lambert moved an amendment disappi oving any scheme of Irish local government "which necessarily involves a large permanent which necessarily involves a large permanent grant out of the Imperial funds for the relief of one class alone." This was seconded by Mr. Logan, but rejected by 167 to 20. Second reading was agreed to. The clauses of the Bill were under consideration at sixteen sittings of the House, and in course of the proceedings Mi. Dillon (May 4th) took objection to the clause giving county councils certain powers as to exceptional distress, contending that its effect would be to transfer the responsibility of relieving such distress from the British Government to the Irish ratepayers. The Chief Secretary said it might be an incidental consequence of the proposal that some expenditure now defrayed by the taxpayers of the United Kingdom would be thrown on the county council, but it was not intended to exempt the Freasury in bearing its share where exceptional relief appeared necessary. He agreed to limit the amount the county council might contribute in any one year. The clause was carried by 179 to 104 Mr Strachey moved an amendment limiting the duration of the agricultural rating grant to five years, but this was (May 16th) negatived by 258 to 107. An amendment by Mr. Lambert by 25 to 107. An amenument by Mr. Lambert for the omission of the provision for the pay-ment of the landloid's share of the poor-rate was defeated by 235 to 70; an amendment by Mr. McKeina, illocating the relief from the poorrate to the occupier instead of to the landlord was rejected by 251 to 78, and an amendment by Sn C. Dilke for the omission of the provision disabling cleigy men from serving as county or district councillors was (May 231 d) negatived by 146 to 68 Among the amendments brought forward on the report stage was one by Sir J. Willox (July 6th) proposing that at all meetings, other than committee meetings, of county or district councils, accredited representatives of the newspaper press should be permitted to attend, and should receive reasonable facilities for obtaining reports of the proceedings, but this was rejected by 288 to 77. An amendment by Mr. H. Plunkett, providing that two counciliors instead of one should be returned for each county electoral division, was negatived, though the Chief Secretary said that if the question were raised in another place, and a very strong opinion was expressed by those who were specially entitled to be heard on the matter, the Government would not resist the change Bill reported July 14th, third reading agreed to July 18th. Read a first time in the Lords (July 19th), and discussed on second reading (July 21st), when Earl Spencer remarked that, although he would have preferred another line of action in regard to Irish local government, he hailed with pleasure and satis-faction the broad and liberal lines on which this Bill had been drawn. Considered in committee (July 25th) and amendments made. An amendment of Lord Morris for including Galway City in the list of county boroughs was objected to

electoral division in a rural district would return two members instead of one, was re-luctantly assented to by Lord Sahsbury, and carried by 78 to 15; but a proposal of the Earl of Dunraven, to omit the provision disabling clergymen from being eligible as members of county or district councils, was defeated by 62 to 26. On the Bill being returned to the Commons, the Galway amendment was dis-allowed by the Speaker on the ground that its insertion by the Lords infringed the privileges of the Commons, and the double-member con-

stituency amendment was agreed to by 116 to 64 [64] "Local Taxation Account (Scotland) Act, '98 [62] "LOOM I LANGUON ACCOUNT COUNTY AND ACCOUNTY COUNTY CO applied-in distributing £20,000 among county councils and parish councils in Scotland as an addition to, and in the same proportion as, the amounts distributed to them under the principal Act of '96; £25,000 among the police authorities for pay and clothing, in addition to the amount already distributed, £15,000 for providing and maintaining vessels for marine superintendence and otherwise for the enforcement of the Sea Fisheries laws, the balance to be applied for purposes of secondary or technical (including agricultural) education

[65] Looomotives Act, 98 (61 & 62 Vict, ch 2)
--1.a. Aug. 2nd -commences Jan. 1st, '99—E),
introduced by Mi Griffith Boscawen, amends the law with respect to the use of locomotives on highways, and with respect to extraordmary traffic. The Bill was based on the report of the Select Committee on Traction Engines on Roads, '90, and its object is to remove vexations restrictions on the use of traction engines. while at the same time giving ample protection to the ratepayers and others interested in the maintenance and use of public highways. It is concerned with heavy engines only, and does not affect in any way light locomotives known

as motor cars [66] London Bills. The London Municipalities Bill promised in the Queen's Speech was never introduced, but Mr. Baltour assured Mr. W. F. D. Smith (June 10th) that it should be brought in at the earliest possible date next session. The Commons discussed (May 4th) a Bill of the LC.C. for making a trainway over Westminster Bridge and along the Victoria Embankment to Blackfirars Bridge, it being stated in the discussion that it would be left to the committee to which the Bill might be refer to to say how tar the line should be actually carried. The measure was thrown out by 248 to 129. The General Powers Act of the Council enables, them to make a new street in continuation of Rochampton Street, Westminster, a widening of York Road (Battersea and Wandsworth), a widening of the Albert Embankment (Vauyhall), and to reconstruct Rosemary Branch Bridge (Hoxton) over the Regent's Canal, Another Act of the Council has reference to the recep-tion of sewage into the main dramage system from Acton, and provides for payments therefore by the Acton Council in respect of such future use. A third statute amends the Building Act in various respects, including the service of summonses and orders relating to dangerous or neglected structures. The Moncy Act of the Council enables them to raise on capital account during the handcal period April 181, 298. to Sept. 30th, '99, the sum of £9,427,750, but

in this total there are included re-grants o borrowing powers previously granted to the amount of £5,034,328, so that the net aggregate amount of £5,034,320, so that the net aggregation mew borrowing powers amount to £4,334,422, o which £2,364,507 are for the purposes of the Council, and £2,028,915 for loans to other bodies The Council were empowered to increase the possible outlay on the Greenwich tunnel to A 155,750 in accordance with amended estimates. A Bill was brought forward by private undertakers for extending the Thames Embankment from the Victoria Tower Gardens to Lambeth Bridge, and giving powers to acquire property and largely reconstruct the neighbourhood westward, but the measure was rejected (April 25th) by 336 to 84. It was stated that when the new Vauxhall and Lambeth Bridges were completed the County Council itself would be prepared to extend the Embankment. A Bill for the election of a new bridge at Kew, in heu of the existing structure, with approaches, became law. A measure for authorising the became law A measure for authorising the election of buildings in extension of King's Bench Walk upon a portion of the land which had been reclaimed from the foreshore of the Thames and thrown into the Lemple Gardens Induces and thown must be reinjie Gardens was 'strongly opposed and thrown out by a Lords' Committee. A private Act, which became law, authorises the Southwark and Vanithall Water Co to acquire lands, and Constitut additional works, take additional water from the lateral was a constituted. from the Thames, and Luse additional capital, but if the undertaking be purchased within ten years of the passing of the Act by any public body, no additional value shall be deemed to be given to the undertaking by the powers conferred by the measure other than actual expenditure The Middlesex County Council obtained further powers for improving the condition of the Bient and other streams. Second reading of a Bill providing for the conversion of the stock of the Gaslight and Coke (o was carried by 171 to 89 (Maith 10th), and duly considered by a committee. Mr Pickersgill, on the consideration of the Bill, moved (lune 9th) a new clause providing that the conversions of stock authorised by the measure should not take effect until the Company had reduced the pine of their gas to 25 fd. per thousand cubic feet, and that it should not be lawful for the Company to raise the price so reduced except by order of the Board of Trade. Mi Johnson-Ferguson, who was chairman of the committee which considered the Bill, opposed the clause, which was, in the result, incgatived by 214 to 109 (see sect 104) Among other measures which also became law was one for the reconstruction of the capital of the Crystal Palace Co.

London University Commission Bill (see sect, 96). [67] *Lunacy Bill, introduced by the Lord

(87) "Lunary Bill, introduced by the Lord Chancellor, the object of the measure being mainly to safeguard the urgency-order part of the lunary system. Withdrawn in Commons [68] Marriage Act, '98 (61 & 62 Vict., ch. 58— r a Aug 12th—Commences April 1st, '99—E), was introduced by Mi. Perks. The object of this measure is to enable marriages to be solemnised in Nonconformist places of worship without the attendance of the registrar, should the persons intending to be married so desire, There are provisions in the Act enabling parties who prefer a registrar to attend to require such attendance. The Attorney-General, in assenting to the second reading (March 23rd), observed that there were matters of principle

involved which must require consideration later on. The hon and learned gentleman afterwards proposed amendments, which were atterwards proposed amendments, which were duly made in the measure before it became law; and the Government afforded it facilities for passing through the Commons. Where a mariage is solemnised under this Act, each of the parties contracting the marriage is required in some part of the ceremony to make the following declarations, in the presence of the clergyman authorised to solemnise the marriage and of two or more witnesses marriage and of two or more witnesses "I do solemnly declare that I know not of any lawful impediment why I, A.B., may not be somed in matrimony to CD". And each of the parties shall say to the other the words following "I call upon these persons here present to witness that I, AB., do take thee, CD., to be my lawful wedded wife for husband]," or in heu thereof the words following "I, AB., do take thee, CD. to be my wedded wife for his words with the CD. to be my wedded wife do take thee, CD, to be my wedded wife (or husband)

[69] Merchant Shipping (Liability of Shipowners) Act, '98 (61 & 62 Vict, ch 14—1 a July 25th), introduced by Mr W Allan The Merchant Shipping Act, '94, limits the hability of the owners of a ship, British or foreign, in respect of damages and occurrences happening or taking place without their actual fault or privity in the manner and to the extent set forth in the Act. A ship owned by British subjects is, however, not recognised under the Act as a British ship until registration, and the owners thereof cannot therefore claim the benefit of the limitation of liability in respect of anything happening previous to registration.

This Act extends the limitation of hability from and including launching of a ship until the registration thereof, provided that the owners, builders, or others interested are not to benefit

for more than three months after the launching [70] *Merchant Shipping (Mercantile Marine Fund) Act, '98 (61 & 62 Vict, ch. 44-r.a Aug rath-commences April rst, '99), abolishes the Mercantile Marine Fund and constitutes a General Lighthouse Fund to which is transfered ferred certain light dues and charges tecs are to be paid in respect of the registration, transier, and mortgage of British ships as the Board of Frade, with the consent of the Treasurs, determine, not exceeding those specified in the Act. The general lighthouse authorities are to levy light dues with respect to the voyages made by ships or by way of periodical payment, and not with respect to periodical payment, and not with respect to the lights which a ship passes or from which it derives benefit, and the dues so levited are to take the place of the dues now levited by those authorities. A scale of light dues is set out in the Act. On proof that the vessel has carried, in accordance with the scale and regulations to be made by the Board of Frade, boys between the ages of lifteen and nineteen, there shall be paid to the owner out of moneys to be provided by Parliament, an allowance not exceeding one-fifth of the light dues paid during the year in respect of the dues paid during the year in respect of the ship, but no such payment is to be made in respect of any boy unless he have enrolled himself in the Royal Naval Reserve and agreed to present himself for service when called upon Mr. Ritchie (March 17th) explained on second reading that the complaint of the shipping Vic, ch 38-r.a Aug. 12th), enables a parish industry, that money which was collected for the purpose of lights had been applied to the payment of certain establishment charges engines with their appurtenances and firemen

having nothing to do with lights, would be removed by the passing of the measure. It was impossible altogether to abolish the light dues. Mr G. Bowles moved an amendment declaring that no measure dealing with lights would be satisfactory to this House which did not provide that the expenses of maintaining lights, buoys, and beacons on the coasts of the United Kingdom should be defrayed out of public revenue. This was opposed by Mr. Ritchie, and rejected by 184 to 35. The new clause relative to allowances for boys was inserted at the instance of Mr Ritchie (July 27th), who then stated that no less than 30 per cent, of the petty officers and seamen serving on British merchant vessels were foreigners. Government allowance would be equal to 20 per cent of the light dues in each year in respect of a vessel carrying boy sailors on the following scale -Under 500 tons, one boy; between 500 and 1000, two, up to 2000, three; and an additional boy for every 1000 tons. The scale may be modified from time to time. The clause was carried by 189 to 37

[71] Militia Ballot Law Amendment Bill, was introduced by the Larl of Wemyss. The clauses of the Bill were, he said, taken verbatim from those relating to the milita ballot that formed an integral part of Mr. Cardwell's "Army Regulation Bill" as introduced in '71, though they were afterwards dropped out of that measure. They were made to apply to the whole male population from the age of 18 to 35, but I ord Wennys, in moving second reading of ins Bill (July 181), and he would propose in committee, should the Bill reach that stage, to limit its operation to make sof the age of 20 years only who are not at the time serving voluntarily in some other force than the militia. The Marquis of Eursdowne, who had on a previous occasion described the machinery for setting the ballot in motion "as somewhat ancient, and as in all probability requiring revision, undertook to examine the machinery of the ballot during the autumn. The Government saw no reason for introducing compulsion in any shape, but they recognised that the power of enforcing service in the infiltra at a time of emergency, when the security of the country was threatened, was available one. Withdrawn.

Nonconformist Marriages (Attendance of Regis-

[72] *Outdoor Relief (Ireland) Act, '98 (61 and 62 Vict, ch 57-1 a Aug 12th), makes temporary provision for relief of distress in Ireland by extending the power to grant outdoor relier in food and fuel, confirming expenditure previously incurred by the guardians, and in-

demnifying them
[73] *Parish Churches (Scotland) Bill. principal object of this measure was to adapt the ecclesiastical arrangements of parishes in Scotland to the changes which have taken, and are still taking place from time to time owing to the large extension of towns, and to the migration of the population from one portion of a town or district to another Introduced by Lord Balton, passed Lords, with amend-ments, opposed on second reading in Commons, but second reading carried by 90 to 28. With-

drawn July 28th
[74] *Parish Fire Engines Act, '98 (61 and 62

provided by such bolough or district council shall be used for extinguishing fires in the

parish.

(75) Pharmacy Acts Amendment Act, '98 (for and 6z Vict., ch. 25-r.a. July 25th—E. and S.).

Introduced by Mr. W. F. D. Smith, the object of the measure being, among other things, to render every person whose name appears on the Register of Chemists and Druggists eligible to be elected a "member" of the Pharmaceutical Soutety of Great Brutan.

Society of Great Britain.
[76] *Poisons Bill, to regulate the sale of certain poisonous substances such as butter of antimony, carbolic acid, chloride of zinc and its solutions, hydrochloric, miric and sulphunic acid, unless diluted in manner prescribed by the Pharmacopous, and substances sold for poisoning insects or vermin. Introduced by

the Duke of Devonshire, passed Lords, diopped

in Commons.

[77] *Poor Law (Sootland) Act, '98 (61 & 62 Vict., ch. 21-ra. July 25th—commenced Oct. 1st, '98). The objects are to reduce in Scotland the period for acquiring a residential settlement to three years, and to make English and Irish boin paupers irremovable from Scotland after five years of residence, and in the case of other English and Irish paupers and all Scotland paupers to give an appeal against removal to the Local Government Board for Scotland

[78] Foor Law Unions Association (Expenses) Act, 98 (6) & 62 Vict, ch 19—ra July 25th), was introduced by Mr. W. F. Lawrence It provides for the establishment of a Poor Law Unions Association in England and Wales for the purposes of consultation as to their common interests, and the discussion of matteristelating to the poor law and other wise to their powers and duties, and enables boards of guardians to contribute to the expenses of the Association. The guardians of any union may, when empowered by, and subject to any regulations made by the Local Government Board, pay any sum not exceeding £5 in any year as a subscription to the Association, as well as the reasonable expenses of the attendance of not more than two representatives at meetings of the Association.

[79] "Post Office Guarantee Acts, '98 (61 and 62 Vict, ch. 18 and 59-1 a July 25th and August 15th—L) The first of these measures extends the exercise of the powers previously conferred upon a rural district council, parish council, and parish meeting respectively of undertaking to pay any loss out of the provision of additional postal or other facilities provided by the Postmaster General within their own area to facilities provided outside their boundary it such council or meeting shall be of opinion that the additional facilities are for the benefit of the contributory place, while the other act extends to borough and urban district councils the guaranteeing powers already possessed by rural councils.

[80] 'Prisons Bill. Sir M W. Ridley, in moving second reading (March 24th), adverted to what had been done by the Prisons Commissioners on the recommendation of the committee of which Mi. H Gladstone was chairman (whose services and those of the committee he on behalf of the Government cordially acknowledged). The Bill was designed to make certain amendments in the laws relating to prisons. As a preliminary to the general consideration, and as a first step towards consolidation, it was

proposed to give statutory recognition to the virtual amalgamation of the administration of convict prisons and local prisons. The principal amendment proposed concerned local or shortsentence prisons only. It was proposed that the Secretary of State should be invested in the case of local prisons, as he was already in the case of convict prisons, with the power of making the code of rules, subject only to the veto of Parliament. This power would include the regulation of the nature of the hard labour, with some regard to the varying characteristics with some regard to the varying characteristics and circumstances of prisoners. Proposals were also included for a better classification of prisoners, remission of sentences by way of reward for good behaviour, and allowing part payment of a fine to be equivalent to serving a proportionate part of the sentence of imprisonment in default Mr. Atherley Jones moved the rejection of the measure, and Sir C. Cameron seconded the amendment. Mr. H. Gladstone welcomed the Bill as an instalment. Mr. Dillon, Mr. Davitt and others (March 28th) criticised the measure. Mr. T. P. O'Connor (April 4th) condemned what he described as the starvation diet given in prisons. Mr. Asquith approved the clause of the Bill which enabled the principle of discrimination in the treatment of prisoners to be applied with far greater flexibility than at present, and suggested greater flexibility than at present, and suggested that the Home Secretary should make a special inquiry into the subject of starvation diet and into the allegations as to sleeplessness. The Home Secretary in reply said the Committee appointed by the last Government suggested many sweeping changes, and he thought he night fairly claim that a great proportion of them had been carried out. He could not admit that there was starvation diet. could not admit that there was starvation diet, but thought some dietary improvements might be made, and promised that an inquiry into the subject should be instituted. He also undertook to consider various other questions, in-cluding the diminution of the period of solitary confinement. The Bill was read a second time, and afterwards referred to the Standing Committee on Law. In the Giand Committee an amendment of Mr Davitt proposing that one of the Prisons Commissioners should be a medical man skilled in mental diseases was cairred against the Government by 35 to 8. The Home Secretary in course of the proceedings made concessions on the question of the administration of corporal punishment On the report stage the Home Scaretary moved to ount the words requiring that one of the Prisons Commissioners should be a medical man skilled in mental diseases, and the omisson was carried by 178 to 81. As the *Prison Act, '98 (or & 62 Vict, ch 41, the measure received 1.a Aug 12th 1t commences Jan. 1st, '99, though sects. 6 and 9 begin to operate on the date when the first rules made under the Act come into force—E) Makes the Prison Commissioners directors of convict prisons; enables the Secretary of State to make prison rules for the government of local prisons as well as of convict prisons, which are to be laid on the table and are subject to the veto of either House; provides for the appointment of boards of visitors for convict prisons; and enacts that the mode in which sentences of penal servitude or imprisonment with or with-out hard labour are to be carried out in prison may be regulated by prison rules, and that in making such rules regard shall be had to the

sex, age, health, industry, and conduct of the

prisoners.
Prison rules shall not authorise the infliction of corporal punishment-(a) except in the case of a prisoner under sentence of penal servitude, or convicted of felony, or sentenced to haid labour; nor (b) except for mutiny or incitement to mutiny, or gross personal violence to an officer or servant of the prison; nor (c) except by order of the board of visitors or visiting committee of the prison, after inquiry on oath held by them at a meeting spenally summoned for the purpose, and consisting of not less than three persons, two of them being justices of the peace provided that the Secretary of State may, if he thinks fit, appoint a metropolitan police magistrate or stipendary magistrate to take the place of the board or committee, and the magistrate shall in any such case have the same powers as the board or committee order under this section shall not be carried into effect until it has been confirmed by the Secretary of State, to whom a copy of the notes of evidence and a report of the sentence and of the grounds on which it was passed shall forth-with be furnished. Such report shall be embodied in the annual report of the Prisons Commissioners

Prisoners not sentenced to penal servitude or hard labout are to be divided into three divisions. Where a person is sentenced to imprisonment without hard labour, the court may, if it thinks fit, having regard to the nature of the offence and the antecedents of the offender, direct that he be treated as an offender of the first division or as an offender of the second division, though if no direction is given the offender is to be treated as an offender of the third division. But any person imprisoned for default in payment of a debt, including a civil debt recoverable summarily, or in default or in lieu of distress to satisfy a sum of money adjudged to be paid by order of a court of summary jurisdiction, when the imprisonment is to be without hard labour, is to be placed in a separate division and treated under special prison rules, and is not to be placed in associaton with criminal prisoners, not to be com-pelled to wear prison dress unless his own clothing is unfit for use. Any person im-prisoned for default of entering into a recognisance or finding sureties for keeping the peace, or for being of good behaviour, is to be treated under the same rules as an offender of the second division, unless he is a convicted prisoner, or unless the court direct that he be treated under the same rules as an offender of the first division. Provision may be made by prison rules for enabling a prisoner sentenced to imprisonment, whether by one sentence or cumulative sentences for a period prescribed by the rules, to earn by special industry and good conduct a remission of a portion of his inprisonment, and on his discharge his sentence shall be deemed to have expired. Under sect 9, where a person is committed to prison for nonpayment of a sum adjudged to be paid by the conviction of any court of summary jurisdiction, then, on payment to the governor of the prison, under conditions prescribed by prison rules, of any sum in pair satisfaction of the sum so adjudged to be paid, and of any charges for which the prisoner is liable, the term of imprisonment shall be reduced by a number

which the prisoner is sentenced as the sum so paid bears to the sum for which he is so liable. [81] "Private Bill Procedure (Scotland) Bill. The

[81] *Private Bill Procedure (Socilard) Bill. The object of the measure was to provide for improving and extending the procedure for obtaining par hamentary powers by way of provisional orders in matters relating to Sociland Discussed on second reading (March 31st and April 4th), much sympathy being expressed with the object in view, but objection being taken to the method by which it was proposed to attain it Bill referred to a select committee, who reported the Bill with amendments, and made a special report in course of which they stated that, apart from matters of detail, there remained only one question of difficulty and importance—viz, the constitution of the tribunal which was to conduct the local inquiry provided undur the Bill. A substantial minority was of opinion that the tribunal should be composed of members of the two Houses, but various objections to this were put forward, and the disadvantages in the view of the majority made it expedient to prefer a tribunal composed of persons who are not necessarily members of either House

persons who are not necessarily members of either House [82] "Public Buildings Expenses Act, '98 (6) Vict ch 5-ra April 18th, provides for the application out of the realised surplus of the financial year 1897-98 (see article Finance, National) of the sum of \$\mathcal{L}_{1,5}\$-50,000 towards defraying the expenses of the purchase of idand and buildings, and the construction of buildings and works in connection with certain public departments, as follows—

by the rules as an offender of the first division. Provision may be made by prison rules for enabling a prisoner sentenced to imprisonment, whether by one sentence of computative sentences for a period prescribed by the rules, to earn by special industry and good conduct a remission of a portion of his imprisonment, and on his discharge his sentence shall be deemed to have expired. Undersect 9, where a person is committed to prison for monitoring of a sum adjudged to be paid by the conviction of any court of summary jurisdiction, then, on payment to the governor of the prison, under conditions prescribed by prison rules, of any sum in pair satisfaction of the sum so adjudged to be paid, and of any charges for which the prisoner is liable, the term of imprisonment shall be reduced by a number of days bearing as nearly as possible the same proportion to the total number of days for

[83] *Public Works Loans Act '98 (61 and 62 Vict. ch. 54—r.a. Aug. 12th) authorises the (a) for the purpose of loans by the Public Works (a) for the purpose of loans by the Tublic Works Loan Commissioners, of any sum or sums not exceeding in the whole £5,000,000, (b) for the purpose of loans by the Commissioners of Public Works in Ireland, any sum or sums not exceeding in the whole £80,000 Also authorises the Public Works Loans Commissioners to lend in Great Britain in respect of any work for which the managers of asylum districts or of school districts are respectively authorised to borrow under the Acts relating to the relief of the poor.

Registration (Ireland) Act (see sect 63)

[84] "Reserve Forces and Militia Act, '98 (61 & Vict ch o-ra July 1st) enacts that any man belonging to the first class of the army reserve, whose character on transfer to the army reserve is good, shall, if he so agrees in writing, be hable during the hist twelve months of his service in that reserve to be called out on permanent service without such proclamation of communication to or meeting of Parliament as is mentioned in and required by the Reserve Forces Act, but the number of the men so hable is not at any one time to exceed five thousand, and the power of so calling out men is not to be exercised except when they are required for service outside the United Kingdom when wailike operations are in preparation of in progress, a man so called out is not to be hable to serve for more than twelve months, any agreement under the section may be revoked by three months' notice in writing. and any exercise of the power of calling out the men is to be reported to Parliament as soon as may be. The Act also authorises the employment of any member of the militia volunteering to serve in any place outside the United King-dom for a period not exceeding one year whether an order embodying the militia is in force or not at the time

[85] *Revenue Act, '98 (61 & 62 Vict, ch 46-1 a. Aug. 12th), makes numerous detailed amendments in the laws relating to customs and inland revenue tit, for instance, adds to the customs table of prohibitions and restrictions, fictitious stamps and instruments or materials for marking them, and advertisements or notices of foreign lotteries, and provides for the forfeiture of used stamps denoting the payment of Inland Revenue which are in the possession of any person who is a maker of seller of any dutiable article, and who might thus use them again.

[86] *Seed Supply and Potato Spraying (Ireland) Act, '98 (61 & 62 Vict, ch 50-1,a Aug 12th), provides for the supply of seed potatoes, seed oats, and spraying machines and material to occupiers and cultivators of land in Ireland, and for the employment of instructors in the use of such machines and material.

[87] Service Franchise Bill. Mr Marks introduced this Bill, the object being explained to be to prevent large classes of persons, such as constables and shop assistants, being deprived of the tranchise by reason of the restricted interpretation put on certain provisions of the Representation of the People Acts in some the Representation of the People Acts in some recent decisions. Discussed on second reading, March and, when Mr. Knox, Sir C. Dilke, Mr. W. Allen, and Mr. McKenna opposed it, and Mr. McKenna opposed it, asing, etc., exercisable by universities and and Sir J. B. Maple and the Solicitor-General

expressed approval of it. Debate adjourned.

Dropped.
[88] *Sheriff's Tenure of Office (Scotland) Act, 198 (61 & 62 Vict., ch. 8—r.a Iuly 1st), provides for the 1-moval of a sheriff by order of the Secretary for Scotland upon a report prepared at his instance by the Loid President of the Court of Session and the Lord Justice Clerk declaring that the sheriff is by reason of inability or misbehaviour unit for his office. such order to be laid before Pai hament and to be subject to veto by either House. If the sheriff is removed before he has completed ten years' service on ground of inability, an annuity may be granted him by the Treasury.

[89] Societies' Borrowing Powers Act, '98 (61 & [89] Societies Borrowing Powers act, so on & 62 Vict, (A 15—1 a July 25th), was introduced by M1. Horace Plunkett, and empowers a society, as defined by this Act, by rule duly registered, to provide that it may receive deposits and borrow money at interest from its market. In the processor, "Societies" members, or from other persons. "Society means a specially authorised society registered, or seeking registration, under the Friendly Societies Act, 1896, having for its object the cication of funds to be lent out to the members of the society of for their benefit, and having in its rules provisions that no part of its funds shall be divided by way of profit, bonus, dividend, or otherwise among its members, and that all money lent to members shall be applied to such purpose as the society or its committee of management may approve [90] Solicitors (Ireland) Act, '98 (61 & 62 Vict.,

ch 17-1 a July 15th), was introduced by Mr. Hemphill, and amends and consolidates the laws relating to solicitors and to the services of indentured apprentices in Iteland. The measure seeks to place Irish solutions and their apprentices and clerks in the same position as their English brethren.

[91] Special Juries Act, '98, was introduced by Mi Waii (61 Vict, ch. 6—1 a May 23rd), repeals the provisions of a section of the Common Law Procedure Act, 1852, requiring the sheriff to summon a sufficient number of special jurymen "not exceeding forty-eight in and enables the High Court to make rules with respect to special juries, and thereby to repeal or after any rules made under any previous act with respect to special juries.

[92] *Suffragan Bishops Act, '98 (61 & 62 Vict.,

ch 11-ra July 1st), by explanation of the Act of Henry VIII makes it lawful to appoint as suffragan bishop a person already consecrated as a bishop, in which case the letters patent presenting him shall not require his consecration.

Secriation.

Teachers' Registration (see sect. 52)

Teachers' Superannuation (see sect. 51)

[93] "Telegraph (Money) Act, '98 (on & 62 Vict, ch. 33—1.a Aug. 2nd), provides for a grant of £1,000,000 (making £2,300,000 in all) for the development of the telephanic system

[94] "Union of Benefices Act, '98 (or & 62 Vict, ch. 22—1. Illy 2xth, chages that a scheme for

ch 23-1 d. July 25th), enacts that a scheme for the removal of a church or parsonage under the Union of Benefices Act, 1800, may be made if it provides for the erection of another church or parsonage for a benefice within or partly within the Metropolitan Police District.

not to be exercised without the consent of the Board of Agriculture; makes provision for the application of capital money; and in other respects amends the Universities and College Estates Acts, 1858 to 1880.

[96] "University of London Act, '98 (or & 62 Vict., ch. 62—r.a Aug. 12th), makes provision for the reconstitution of the University of

London as a teaching as well as an examining body, and for the appointment of a statutory pody, and for the appointment of a statutory commission for the purpose. These commissioners are to consist in the first instance of I ord Davey (chairman), the Bishop of London (Dr. Creighton), Sir William Roberts, M.D. Fellow Univ. Lond., Sir Owen Roberts, D.C.L., Richard Claverhouse Jebb, Regius Processes of Great High Carbon, Michael Factors. B.C.L., Richard Clavernouse Jeob, Regius Fro-fessor of Greek, Univ. Camb, Michael Foster, M.D., F.R.S., Professor of Physiology, Univ Camb, and Edward Henry Busk, M.A., LL.B. Chairman of the Convocation, Univ. Lond Her Majesty may appoint a secretary to the Her Majesty may appoint a secretary to the Commissioners, and may appoint a person to fill any vacancy occurring among the Commissioners, but the name of every person so appointed a Commissioner is to be laid before Parliament. The Commissioners may, with the consent of the Treasury as to number, appoint or employ such persons as they may think necessary for the execution of their duties under this Act; and there shall be paid to the secretary and to any persons appointed or employed by the Commissioners such remuneration as the Treasury may assign, which remuneration and all expenses of the Commissioners incurred with the sanction of the Treasury are to be paid by Parliament. The powers of the Commissioners are to continue until the end of the year 1899, but may be con-tinued, though not beyond the year 1900 The Commissioners are to make statutes and regulations for the University in general accordance with the scheme of the report of the Commissioners appointed to consider the diaft charter for the proposed Gresham University, but subject to certain modifications specified or indicated in the schedule to this Act, and to any other modifications which may appear to them expedient after considering the changes which have taken place in London education of a university type since the date of that report, and any representations made to them by or on behalf of the Senate or Convocation or any fifty graduates of the University, or by or on behalf of any body or person directly offected. When any thetate or regulation has or on behalf of any body or person directly affected. When any statute or regulation has been made by the Commissioners, a notice of its having been made, and of the place where copies of it can be obtained, is to be published in the London Gazzite, and the statute or regulation is to be laid before Parliament; it is not to be valid until it has been approved by Her Majesty in Council, and if either House present an address praying the Queen to withhold her assent from the statute or regulation, or any nart thereof, no further proceedings or any part thereof, no further proceedings shall be taken on it, or on the opposed part of it, though this shall be twithout prejudice to the making of a new statute or regulation. The Senate or Convocation of the University. or any other person or body directly affected by such statute or regulation, may petition Her Majesty in Council to withhold her approval, and Her Majesty in Council may refer any such petition to the Privy Council, a committee of which may hear the petitioner personally or by counsel and report on the matter. After the

expiration of the powers of the Commissioners the Senate of the University may make statutes and regulations for altering of supplementing any of the statutes or regulations made by the Commissioners, but this power is subject to the foregoing provisions, and any statute must be communicated in draft to Convocation, be communicated in diant to Convocation, whose opinion thereon is to be taken into consideration. For the purposes of this Act the South-Eastern Agricultural College at When is to have such privileges as it would have had if situated within the administrative county of London; nothing in the Act is to affect the rights or pivileges of any of the Inns of Court or of the Incorporated Law Society, and exist-ing fellows, though retaining their fellowship for life, are no longer to be, as such, members of the Senate The provisions of the schedule to the Act to which effect is to be given by the Commissioners in framing statutes and regula-tions have reference to, among other things, the constitution of the Schate, and are against the adoption or imposition of a religious test,

or the imposition of disability on ground of sec. [97] *Vaccination Bill. Mr Chaplin, in asking leave to introduce this measure (March 18th), remarked that one of the recommendations of the Vaccination Commission related to the kind of lymph which ought to be used in future. There had been some remarkable discoveries in recent years in regard to the results which it was proved were obtained by the preservation of lymph taken from the call in glycerine, and if they took advantage of them they would go far to revolutionise the whole of they would go far to revolutionise the whole of the present system of public vaccination. The inquiries of the Royal Commission had been strengthened and confirmed by further investi-gations conducted by Sn Richard Thorne and Di Copeman, on behalf of the Local Government Board, into the system in practice abroad. Those gentlemen found in the hist place that when the lymph was mixed with glycerine all extraneous organisms were destroyed; such as the microbes of tubertle, crysnelas and as the microbes of tubertle, crysipelas, and diphtheria, secondly, that the lymph could be kept for long periods, and upon an emergency large quantities could with facility be supplied; and thirdly—which was a matter of the first importance—the necessity of arm-to-arm vaccination, and consequently all risk and possibility of inoculation with syphilis, whatever it may have been heretofore, wholly disappeared. While the Bill provided that vaccination would continue, as at present, to be obligatory, vaccina-tion by anything but call lymph would cease to be obligatory. And, as vaccination from arm to aim would cease to be compulsory, there would be no necessity for the attendance of children at the stations to provide the required lymph for others. On this point the Government adopted another recommendation of the Comadopted another recommendation of the Commission—viz that vaccination should be domiciliary, and accordingly the Bill provided that the vaccinator would be required to attend at the house of the child. In this way they would assimilate as mearly as possible the law and practice in England to what it is in Scotland, where vaccination has never been the difficulty that it is sometimes with us. In addition to this it was proposed that where children must now be vaccinated within these

nation at twelve months than at three. He had been unable to accept the recommendation that any one objecting to vaccination might escape obligation by simply making a statutory de-claration to that effect. It seemed to him that this would make vaccination a dead-letter, and nothing could be more unfortunate or injurious to the community. He observed that the Com-missioners themselves were not united on that point. Where they were agreed, and where the Government were disposed to meet them, was in the recommendation that where people conscientiously objected they might be relieved from the imposition of repeated penalties. Bill duly introduced. On second reading (April 19th) Sii W. Foster said he regarded the proposed extension of the age limit, the regulation as to where vaccination was to be performed, and the use of a new form of lymph as valuable provisions, but he thought it would be advisable to abolish compulsion altogether and allow to aboust compuision atogether and allow parents with conscientious scruples to escape from penalties on making a formal declaration before a court that they objected to vaccination. Mr. T. Bayley, in inoving the rejection of the measure, expressed the belief that sanitation, measure, expressed the benefit that sanitation, isolation, and cleanliness would do more to prevent disease than vaccination. Mr Steadman seconded the amendment. The debate was resumed on May oth, when Mi. Hazell said public opinion against compulsory vaccinations. nation in his constituency of Leicester was as nation in his constituency of Lettester was as-strong as it had ever been. In course of further discussion Mr. Channing, Mi Labouchere and Mr. Ascord also expressed themselves as adverse to compulsion. The motion for second leading was carried by 277 to 23, and a further motion to refer the Bill to the Standing Committee on Law was adopted by 201 to 50. In Grand Committee the period within which the child was to be vaccinated was, on the motion of Mr. Carlile, shortened from the twelve months proposed in the Bill to six months.
Considerable discussion arose at more than one sitting of the Committee on an amendment of Sir W. Foster similar in effect to that which he afterward's proposed in the House, only that it met the case of the conscientious objector by enabling him to merely make a statutory declaration and deliver it to the local registral of births. Several amendments to this amendment were moved. One of them, proposing that a declaration should be made before not less than two magistrates in petty sessions, or before any of the persons authorised by Act to administer oaths, was rejected by 28 to 15, and Sir W. Foster's proposal itself was defeated by 26 to 24 (June 21st). The sub-section relative to children in any infirmary or institution was inserted at the instance of Mr. Channing, and words were put in providing that the vaccinator should offer to vaccinate the child with should one to vacchate the thin with glycerinated calf lyinph, "or such other lymph as may be issued by the Local Government Board." The new clause as to the treatment of prisoners as first-class misdemeanants was added on the motion of Mr. Channing (July 1st). Sir Wm. Priestley moved (July 1st) that no proceedings should be taken against any parent or person who had been convicted on account of the same child until after it had reached the age of five years, and no such parent or person should be liable to a penalty under the section

the clause but it was carried against him by 20 to 11, the age of "four" being then substituted for "five." The clause as amended was added to the Bill. Bill considered by the Commons 41s amended July 19th, when Sir W. Foster moved the insertion of the following clause:—"Where a child is by this Act required to be vaccinated within six months from the birth of the child, the parent of person having the custody of the child may, not less than twe months before the expiration not less than twe months before the expiration of the six months from the birth of the child, make a statutory declaration and conscientious objection to the vaccination of the child before onlection to the vaccination of the testing sensions, and if the statutory declaration is, within seven days after its date, delivered to the vaccination officer for the distinct in which the child resides, the vaccination officer shall register the same, and shall, if required, deliver to the parent or other person making the declaration a certificate of such registration, and thereupon an order shall not be made or proceedings taken with reference to the non-vaccination of the child

mentioned in the certificate.' M1. Chaplin felt unable to accept this, but it Mi. Chaplin felt unable to accept this, out it was supported from his own side by Capt. Chalone, Mr Wharton, Mr. Carlile, and others, and Mr Balfour at length suggested a compromise (offering at the same time to limit the operation of the Bill to five years), which Mr. Chaplin on the next day moved as follows:— "No parent or other person shall be liable to any penalty under sect. 29 or sect. 31 of the Vaccination Act of 1867 if within four months from the birth of the child he satisfies two justices in petty sessions that he conscientiously believes that vaccination would be prejudicial to the health of the child, and within seven days theteafter delivers to the vaccination officer for the district a certificate by such justices of such conscientious objection. Si justices of such conscientious objection. Sin W Foster proposed to substitute for the words "satisfies two justices," "makes a statutory declaration before two justices," but this was rejected by 158 to 101, the ministerial clause being then agreed to (It was subsequently slightly amended) Mr. Balfour, in course of the proceedings on the clause, said it would not be the duty of the magistrate to cross-examine the paient as to the grounds of his objection to yaccination. The magistrate would objection to vaccination. The magistrate would have to be convinced, not whether a man's belief was well or ill founded, but whether as a matter of fact the belief existed and was a genuine one All the words of Sir Wm.
Priestley's clause after "four years" were
omitted, on the motion of the Solicitor-General, by 247 to 61. Mi. Chaplin, replying to Mr. Labouchere (July 25th), stated that the obliga-tion to satisfy two magistrates of conscientious objection to vaccination must be undertaken by the person in custody of the child, and if the father was prevented by unavoidable causes from performing the duty, its performance would naturally fall entirely on the mother. Mr. James Lowther, on third reading (July 30th), moved to re-commit the Bill in respect of clause 1 (vaccination within six months after birth), clause 2 (provision against repeated penalties), and Mr. Chaplin's conscience clause. Mr. Vicary Gibbs seconded the motion, which should be liable to a penalty under the section if he satisfied the court that he conscientiously believed vaccination would be prejudicial to believed vaccination would be prejudicial to tellers, consisted of 25 Cenord reading of the Bill was agreed to in the House of Lords Aug. 2nd On the order for committee (Aug. 4th) the Marquis of Ailesbury proposed the rejection of the measure. Lord Lister contended generally that it would be better to pass the Bill as sent to them from the Common than to have the to them from the Commons than to have no Bill at all. He, however, regarded the failure to deal in the measure with revaccination as a serious omission. Lord Harris said during the recess the Government would con-sider whether they were in a position to bring in a Bill next year on the subject of revaccination The amendment for the rejection of the Bill being negatived, the House went into committee, whereupon the Earl of Feversham moved to omit the conscience clause. After a debate, in which the Prime Minister spoke in defence of the course taken by the Government, the committee divided and struck out the clause by 40 votes to 38. Third teading was (Aug. 5th) agreed to, after Lord Feversham had observed that he still thought it a pity that some compromise could not be come to with respect to the conscience clause. Late in the same evening, on the Bill being returned to the Commons, Mr. Chaplin moved in effect to reinstate the conscience clause, and in the result the motion was carried by 129 to 34. On the Bill being again before the Peeis (Aug 8th), Lord Harris moved that their lordships should Lord Rocket that their lordships should not insist upon their amendment striking out the clause—Lord Rookwood, Viscount Galway, Lord Zouche of Haryngworth, Lord Stammote, Lord Glenesk, the Earl of Feversham, Lord Aldenham, and the Earl of Pottsmouth, who are all in the ordinary way supporters of the Government, successively joined in opposing the reinstatement of the clause. The Marquis of Salisbury strongly urged their lordships to agree with the Commons, and in the result the motion for reinstating the clause was

carried by 55 to 45.
[98] As the *Vaccination Act, '98 (61 & 62 Vict , 1983 As the "Vaccination act, so (or co 2 vice, ch 49), the Bill received ra Aug 12th, and it commences, except as specially provided, Jan 1st, '99, and remains in force until Jan 1st, 1904—E. The period within which the child is to be vaccinated is extended from three months to six months from birth the requirement to take the child to a public vaccinator is repealed, and the public vaccinator shall, if the parent or and the public vaccinator shall, it the parent or other person having charge of the child so require, visit the home of the child for the purpose of vaccinating the child. If the child is not vaccinated within four months after birth, the public vaccinator, after at least 24 hours notice to the parent, shall visit the home of the child, and shall offer to vaccinate the child with all varieties of times he and the child with glycerinated calf lymph, or such other lymph as may be issued by the Local Government Board The public vaccinator shall not vaccinate a child if, in his opinion, the condition of the house in which it resides is condition of the house in which it resides is such, or there is or has been such a recent prevalence of infectious disease in the district, that it cannot be safely vaccinated, and in that case shall give a certificate of postponement of vaccination, and shall forthwith give notice of any such certificate to the medical officer of health for the district. No regulation of any infirmary or institution shall compel a parent to cause or permit the vaccination of a child at any time earlier than six months from

Vaccination Act of '67, if within four months from the birth of the child he satisfies two justices, or a stipendiary or metropolitan police magistrate, in petty sessions, that he conscien-tiously believes that vaccination would be prejudicial to the health of the child, and within seven days thereafter delivers to the vaccination officer for the district a certificate by such justices or magistrate of such conscientious objection. This section shall come into operation on the passing of this Act, but in its appli-cation to a child born before the passing of this Act there shall be substituted for the period of four months from the birth of the child the period of four months from the pass-ing of this Act." An order directing that a child be vaccinated shall not be made on any person who has previously been convicted of non-compliance with a similar order relating to the same child. No proceedings shall be taken against any parent or person who has been convicted on account of the same child, until it has reached the age of four years. Persons committed to prison on account of non-compliance with any order or non-payment of fines or costs under the Vaccination Acts shall be treated in the same way as first-class mis-demeanants. The Local Government Board may by order, in exceptional circumstances, require the guardians to provide vaccination stations for the vaccination of children with glycerinated calf lymph or such other lymph as may be issued by the Local Government Board, and modify as respects the area to which the order applies, and during the period for which it is in force, the provisions of this Act requiring the public vaccinator to visit the home of the child otherwise than on request of the parent. The cleik of any sanitary authority which shall maintain a hospital for the treatwhich shall maintain a hospital for the treat-ment of small-pox patients shall keep a list of the names, addiesses, agos, and condition as to vaccination of all small-pox patients treated in the hospital, and shall at all reasonable times allow searches to be made therein, and upon demand give a copy of every entry in the same on payment of a fee of 6d. for each seatch and ad for each eary

and 3d for each copy
[99] *Vagrancy Act, '98 (61 & 62 Vict., ch. 39—
r a Aug. 12th—commenced Oct. 12th, '98: E), enacts that every male person who (a) knowingly lives wholly or in part on the carnings of prostitution, or (b) in any public place persistently solicits or importunce for immoral purposes, solicits of importants for immoral purposes, shall be deemed a rogue and vagabond within the meaning of the Vagrancy Act, '24, and may be dealt with accordingly. If it is made to appear to a court of summary jurisdiction by information on oath that there is reason to suspect that any house or any part of a house and the property of the court 15 used by a female for purposes of prostitution, and that any male person residing in or fre-quenting the house is living wholly or in part on the earnings of the prostitute, the court may issue a warrant authorising any constable to enter and search the house and to arrest that male person. Where a male person is proved to live with or to be habitually in the company of a prostitute, and has no visible means of subsistence, he shall, unless he can satisfy the court to the contrary, be deemed to be knowingly to cause or permit the vaccination of a child any time earlier than six months from birth.

"No parent or other person shall be liable to any penalty under sect. 29 or sect. 31 of the was struck out by the Lords, and on the return of the Bill to the Commons a motion of the Home Secretary agreeing with the action of

the Lords was carried by 117 to 40.
Colonel Dalbiac introduced (Feb. 11th) a
Criminal Law Amendment Bill whose object
was to punish souleneurs and souleneuses, and there was a short discussion on it (Maich rith).

there was a short discussion on it (Maich IIIII). Dropped.

[100] Working Men's Dwellings Bill, brought in by Sir A. Hickman "to provide facilities for the acquisition by working men of their own dwellings" Sir H. Vincent having proposed second reading (June 8th), Mr. McKenna moved an amendment declaring that in any measure for facilitating the acquisition of dwellings for the working class by the use of public money, the freehold should be vested in public bodies and not in the individual. After speeches by and not in the individual. After speeches by Mr. Buins, Mr. T. W. Russell (who on behalf of the Government agreed to the second reading with a view to the measure being sent to a Select Committee), Mr. Asquith, and others, the amendment was negatived by 18; to 82, Second reading was then agreed to, but, on objection being taken to the proposed reference to a select committee, the further proceedings stood adjourned. Dropped.

REPORTS OF COMMITTEES.

[101] Burial Grounds .- A committee on this subject which sat in the session of '97 and took evidence was reappointed March 14th, '98, the terms of reference being "to inquire into the subject of burial grounds provided by local authorities, under the Public Health (Interments) Act, 79, and other Acts, to inquire whether any alterations in the existing law are necessary, especially in regard o the consecration of the ground, the provision of chapels, the allocation of fees, and the appointment of chaplain, and to repoil thereon." Mr. Jebb was reappointed chailman The committee in their repoil (July 27th) state that they have taken evidence from 28 witnesses, religious official energy and the local control of the including offic al representatives of the Local Government Board and the Home Office, ministers of religion, members of local authorities, and other persons. The committee give an outline of the provisions of the existing law an outline of the provisions of the existing law so fai as they relate to the subject of this inquiry, and in course of their report set forth that the objection of Nonconformists to the consecration of burial grounds is to certain legal consequences which consecration carries with it. "If a Nonconformist is buried by a Nonconformist minister in the consecrated part of a cemeter y (under the Burral Acts), his friends must pay the fees to the incumbent, although must pay the rees to the incumbent, authough the latter is not present, and renders no service of any kind. Before a Nonconformist burnal can take place in the consecrated part, forty-eight hours' notice must be given to the incumbent. These seem to be in practice the matters which cause most complaint." The committee express the opinion that the existing laws relating to burial should be consolidated. simplified, and amended, and that their administration should be concentrated in a single

to apply for the consecration of any part of a cemetery, and if a demand for consecrated ground should be made by a reasonable number of parishioners, then the Local Government Board should intervene, and apply for consecration. There should also be a right of appeal to the Local Government Board as to the extent and situation of the ground to be consecrated. In such cases the legal fees for consecration should be paid by those who have demanded it Consecration should not prevent the performance in the conseciated ground of such Christian and orderly services, other than the service of the Church of England, as may be desired by the relatives of the deceased, in accordance with the Burial Laws Amendment Act of '85. Having regard to the proposals which the committee make in the interests of those who desire consecrated ground, they recommend, on the other hand, that in the unconsecrated ground the system of allotments under the Burial Acts should be continued. Under this enactment portions of the unconsecrated ground of cemeteries have frequently been allotted to a particular religious body, and the Home Office holds that such allotment confers an exclusive right on the religious body to which it is granted. In every cemeter y the chapel of chapels which may hereafter be erected at the cost of the ratepayers should be unconsecrated, and be open to all. A religious body should have power, with the consent of the local authority, to eject at its own cost a chapel for services according to the rites of that body; and if the local authority should refuse consent, there should be an appeal to the Local Government Board. "All ecclesiastical fees, other than fees for services rendered, should be abolished in cemeteries which may hereafter be provided by local authorities. With regard to existing cometeries, we recommend that the present fees should be continued until the next vacancy, or for fifteen years, whichever period should be the longer; but if there should be a desire sooner to commute such fees by local agreement under proper safeguards, facilities to effect that object should be afforded. The fees chargeable Should be afforded. The fees chargeable should be of the same amount in the consecrated and the unconsecrated parts of a cemetery. The scale of fees to be paid for services rendered should be fixed by the local authority, subject to an appeal to the Government Department, and such fees should be paid to the ministers of all religious bodies alike. Fees to clerks and other ecclesiastical officers should be abolished, but equitable compensation should be given to existing holders of those offices." The parochial clergy should be bound to officiate in consecrated ground where the service of the Church of England is required, subject to their statutory light to appoint a duly qualified substitute. right to appoint a duly qualified substitute. The local authority should have no power to appoint a chaplain. The forty-eight hours notice to incumbents, at present required under the Burial Laws (Amendment) Act, '85, should be abolished, and the local authority should have power to determine what notice ministration should be concentrated in a single Government depailment, which should be the Local Government Board. The committee and to unconsecrated ground. Subject to the Local Government Board. The committee foregoing provisions, the existing power of suggest, among other things, that the local authority should have discretionary power to apply for the consecrated ground should be retained. The existing law, which secures apply for the consecrated ground against being converted and that if the local authority should decline

equal protection should be given to uncon-secrated as to consecrated ground The existing inequalities in parochial rating for the provision of parochial cemeteries should be considered. Further provision should be made for the compulsory acquisition, when necessary, of land for parochal conteries, and the exist-ing law should be simplified. In discussing the draft report in committee Viscount Cran-borne proposed the insertion of the words which appear in the report, recommending, with regard to existing cometenes, that the present fees should be continued until the next vacancy, "or for fitteen years, whichever period should be the longer," etc., whereupon Mr. Carvell Williams moved the omission of

the words quoted, but was defeated by 5 to 4 [102] Election Petitions A select committee was (March 22nd) appointed to inquire into the procedure and practice on Parliamentary election petitions, and to report if any changes were desirable therein. The Solicitor-General was called to the char, and the committee examined ten witnesses. In their report (Aug 211d) the committee make a series of detailed recommendations and suggestions They think that in England, at all events, the rota of judges for the trial of petitions should be rather differently constituted, that all proceedings on a petition should be taken only before a judge of judges on the rota, and as far as possible before the same two of the rota The committee do not recommend that any alteration should be made in the amount any alteration should be made in the amount required to be deposited or secured when a petition is presented—viz., £1000. This sum should be deposited before the petition is allowed to be filed. All sums required for security should be provided in cash and not by recognisances, but power should be given to order the release of part of the original deposit of only a recount is claimed, or a short and mexpensive case is made, or whenever it appears that that sum is likely to be more than sufficient to cover those entitled to the benefit of it. Both in releasing part of the deposit and in ordering further security the possibility of securing the respondent should not be the only consequence to be regarded. Consideration should also be given to the desirability in the public interest of encouraging attempts to secure purity of election, even at the occasional risk of individual loss

The sitting member the occasional risk of individual loss

The sitting member the occasional risk of individual loss

The sitting member the occasional risk of individual loss

The sitting member the occasional risk of the occasional risk occasio nisk of individual loss. The sitting member should be at liberty to attend the inquire without being made liable for costs, unless the conduct of himself or his agent forms part of the subject matter of the inquiry. Some doubt having arisen as to whether persons are en-titled to be heard by counsel before they are reported as being guilty of corrupt or illegal practices, the committee think that, if eresh legislation is deemed desirable, the Act should be so amended as to enable them to be heard either by themselves or by counsel, and to call The position of the Public Prosecutor evidence is, in the opinion of the committee, at present unsatisfactory, as he has not sufficient power to fulfil the functions he was intended to discharge, and the committee make suggestions on this point. The respondent or any person who may be entitled to be paid costs, charges, and expenses by the petitioner, should be entitled from time to time, until the trial has actually begun, to apply to the judge who has control of supply. In the case of nowers being given for the case, to order such further sum to be the erection of a generating station outside the deposited in court as he may think right, in area of supply, powers may properly be given

order to secure the costs of such person; and it should be the duty of the judge, so far as he can, to order that adequate provision is made to secure payment of all costs likely to be awarded. In case of non-compliance with an order to further deposit cash as a security, not being the result of a corrupt or collusive arrangement, the judge should be enabled to order the petition to be removed from the file and proceedings to cease, and all money previously deposited to be applied to the pay-ment of the respondent's costs already incurred or to be incurred, unless-(1) some other person who might have been a petitioner in respect of the election to which the petition relates, and who is able to find further security, applies to become substituted as a petitioner; or (2) the Public Prosecutor elects to continue the petition with all the liabilities of a petitioner as to costs, etc. In other of these cases the sum in court held as security should be applicable to secure the costs of the respondent. Recriminatory charges should be placed exactly on the same tooting for all purposes as original charges, but the time for delivering particulars of them according to the present practice being only six days before trial, the committee think it should be extended. Under seet, 44 (1) of the Corrupt and Illegal Practices Prevention Act, '83, if it appears that the respondent was not personally cogmisant of corrupt practices, and took care to prevent them, but that corrupt practices extensively prevailed, the county or borough may be ordered to pay the costs, in whole or in part. It is conceived that such orders might be made more freely, and the power might be extended to cases where illegal practices extensively prevailed. The relief obtainable under seg. 22 of the 46 & 47 Vict, ch. 51, instead of being limited as at present to treating and undue influence, might be extended to the cases of all corrupt and illegal practices committed without the cognisance of the candidate of his election agent. Finally appears that the respondent was not personally the candidate of his election agent. Finally the committee suggest a codification of the various statutes which relate to Parliamentary elections and corrupt practices and election petitions

[103] Electrical Energy (Generating Stations and Supply). A joint committee of Peers and Commons, appointed in March, considered several specified matters submitted to them in connection with this subject, and reported in May Viscount Cross was chairman of the committee. There were several Bills pending in Parliament in which effect was proposed to be given to new developments of the electrical industry, and these measures were brought to the notice of the committee, but the committee did not conside them in detail nor take any evidence upon them. The committee consider that the proved public advantages of electrical energy in the generation of light and power warrant the granting to undertakers of compulsory powers for acquiring sites for generating stations and lands or easier that the provide and provide a ments for pipes and mains therefrom, and other works. They also think that compulsory powers for the acquisition of land for a generating station, and lands or easements for pipes and mains and other works to the area of supply, may also properly be given where the proposed site is not within the area of supply. In the case of powers being given for the erection of a generating station outside the for laying the mains in streets leading from the generating station to the boundaries of the area of supply. In such case the local authority liable to maintain these streets should have the same option of themselves breaking up and leinstating the streets at the undertaker's expense as is now given within the area of supply. While it may be advisable to maintain the veto of local authorities as to the erection of overhead wires, now given by law in respect of other electric wiles, it is not advisable that in the case of overhead wires for traction purposes the local authorities at the case of overhead wires for traction purposes the local authority, other than the London County Council and county boroughs, should have an absolute veto. Where sufficient public advantage is shown, powers may be given for the supply of electrical energy over an area including districts of numerous local authorities, and involving plaint of exceptional dimensions and high voltage. Such undertakings may properly be authorised on conditions differing in some respects from those

ontions differing in some respects from those imposed under existing Acts.

The committee think the provisions of the Electric Lighting Act, '88, enabling the local authority to purchase an undertaking after a term of years, mappheable, as a general rule, to the case of an undertaker supplying energy in bulk at high voltage, but there may be special cases where it is desirable that the local authorities should have the right to purchase reserved to them. Exemption from hisbility to compulsory purchase would not prevent local authorities from applying for powers to purchase. In cases of the exemption from hisbility to purchase, it would be specially expedient in the interest of the consumers that some kind of shding scale, as in the case of gas undertakings, should be imposed. In connection with this question of purchase under sect 2 of the Act of '88, evidence was given to the effect that, with a view to secure in London one and the same time for the execution of the powers, the Board of Trade have in some cases imposed upon undertakers a less term than at years within which they are hable to be purchased. The committee suggest that if the full period of 42 years is not granted, and if a substantially shorter period is imposed by the Board of Trade, the terms of purchase should in each case be reconsidered. The committee consider that the provisions of the Electric Lighting Act, '88, which require the consent of the local authority as a condition precedent to the granting of a Provisional Order, should be amended. In their opinion the local authority should be entitled to be heard before the Board of Trade, but should not have, so to speak, a provisional veto, only to be dispensed with in special cases by the Board of Trade.

Boaid of Trade
[104] Gas Companies (Metropolitan Charges).
On June 21st it was ordered that a select committee be appointed "to inquire into the powers of charge conferred by Parliament on the Metropolitan gas companies, and to report as to the method in which those powers have been exercised, having regard to the differences of price charged by the various companies." The committee was nominated Aug. 1st. At a formal meeting on Aug. 4th Sir John Dorington was chosen chairman, and the committee on the same day reported that it was not possible to commence the inquiry at that period of the session, and recommended that the investigation be resumed at the com-

mencement of the next session. (See also sect. 66.)

sect. 66.)
[105] Money-lending.—This committee, which [105] Money-issaurg.—Inis committee, which if its sat in '97, was reappointed Feb. ich, '98, though with a slightly different and wider order of reference. In' 97, it was directed 'inquire into the alleged evils attending money-lending transactions at high rates of interest, or under oppressive conditions as to repayment, between the poorer classes and pro-fessional money enders"; in '96 the order was "to inquire into the alleged evils attendant upon the system of money-lending by pro-fessional money-lenders, at high rates of interest, or under oppressive conditions as to repayment," and to report thereon The members of the committee were—Messrs. Ascroft, Thomas Bayley, Caldwell, Captain Chaloner, Messrs, Garfit, Hazell, Jeffreys, Lloyd-George, A K Loyd, Dr M'Donnell, Price, T.W. Russell, Warr, George Whiteley, and Yerburgh. On the reassembling of the committee Mr. T. W. Russell was re-elected chairman. In course of the inquiry upwards of forty witnesses were examined. The evidence shows, the committee say, in their report (June 29th), that money-lending transactions frequently owe their inception to misiepiesentation of a fiaudulent character, they advert to well-known facts in character, they advert to well-known facts in this connection, give cases of high rates of interest, and allude to the steps taken to enforce the fulfilment of "unconscionable bargains." In course of further observations the committee say "After carefully considering the evidence which has been given in legical to particular transactions and the general expressions of opinion of persons so well qualified to form a judgment as Sir Henry Hawkins, Sir James Charles Mathew, Sir George Lewis, the Inspector-General in Banktupicy, and the county count judges, your tipley, and the county count judges, your committee have unhesitatingly come to the conclusion that the system of money-lending by professional money lenders at high rates of interest is productive of crime, bankruptcy, unfair advantage over other creditors of the borrower, extortion from the borrower's family and friends, and other serious injuries to the And although your committee are satisfied that the system is sometimes honestly conducted, they are of opinion that only in rare cases is a person benefited by a loan obtained from a professional money-lender, and that the cyll attendant upon the system far out-weighs the good They their efore consider that there is urgent need for the interposition of the Legislature with a view to removing the evil. Turning to the question of remedies, the committee regard it as of the utmost importance that no legislation should interfere with leg timate trading, and it has therefore been necessary for them to consider in what way transactions of professional money-lenders may be distinguished from ordinary commercial transactions. Their conclusion on this point transactions Their conclusion on this point is that the transactions will be sufficiently distinguished by the expression "transactions between the beautings of a with persons carrying on the business of a money-lender in the course of such business." The two fundamental proposals which were made to the committee are: (1) that Parliament should enact that any interest above a certain rate on loans advanced by professional moneylenders should be irrecoverable at law; or (2) that the courts should have power to go behind any contract with a money-lender, to

inquire into all the circumstances of the original loan and of the subsequent transactions, and to make such order as may be considered reasonable. As regards the first suggestion the committee consider that a high suggestion the committee consideratiat a night rate of interest is not in itself incompatible with fair-dealing, and that no limit of in-terest could be prescribed which would be adapted to the widely different conditions under which these loans are contracted. For these and other reasons they do not recomthese and other reasons the do not recom-mend any statutory limitation of interest. "After carefully considering the whole of the evidence and opinions, your committee have arrived at the conclusion that the only effective remedy for the evils attendant upon the system of money-lending by professional money-lenders is to give the court absolute and unfettered discretion in dealing with these transactions. They therefore recommend that all transactions, by whatever name they may be called, or whatever their form may be, which are, in substance, transactions with persons carrying on the business of a money-lender, in the course of such business should be open to complete judicial review. That in all legal proceedings to enforce, or ier any relief in respect of, a claim arising out of such transactions the court should have power to origine into all the current ances of such trans-actions, from the first transaction up to the time of the judicial inquiry. That in such pio-ceedings the court should have power to reopen any account stated in the course of such transactions, to direct that an account be taken upon the basis of allowance of such a rate of interest as shall appear to be reasonable, having regard to all the circumstances, and to make such order as the court may think fit. That, having regard especially to the fact that money-lenders frequently take from borrowers promissory notes or bills of exchange, which are negotrable, and to which, consequently, the borrower will have no defence against the claims of a holder in due course, as well as to other considerations, it is necessary to provide, in order to do complete justice between the parties, that the court should have power to direct repayment by the money-lender to the borrower of any amount which, upon taking the account, may appear to have been paid by the borrower to such holder over and above the amount which the court may direct to be reasonably which the court may direct to be reasonably due to the money-lender under all the circuin-stances. That aborrower from a money-lender should be enabled, notwithstanding any provision or agreement to the contrary, to apply to the court at any time to redeem any security, or for relief on the part of himself and any other percent who are as as well as and any other person who acts as surety, or otherwise, upon payment of the principal sam advanced and such interest as the court may consider reasonable. That the discretion sugconsider reasonable. In at the discretion sig-gested should be exercisable by any judge of the High Court or any judge of a county court. That from any decision given under these powers, by the judicial authority, there should be no right of appeal by either party except by leave of the court. That no transaction between a judgment debtor and a judgment creditor by way of a renewal of the loan should

borrower of any publicity of the transactions with them, into which his misfortunes have led him. They are satisfied that borrowers will often submit to almost any degree of oppression in order to hide the consequences of their folly or misfortunes. The committee therefore or misfortunes. consider that, to render the remedies proposed really effective, it is essential that wherever it may appear to the court desirable the court should have power to hear any money-lending case in private." In addition to the two fundamental remedies already dealt with, the committee had under their consideration proposals for the alteration of the law in regard to bills of to the attention of the law in regal to mine sale, bankruptoy proceedings, and other matters connected with money-lending, and also certain suggestions as to the legisliation and heen-sing of money-lenders, and the desnability of establishing co-operative banks.

Among the recommendations of the committee with regard to the first point are that goods assigned under a bill of sale, made or given by way of security for the payment of money advanced by or through a person carrying on the business of a money-lender, should not be removed by the grantee without a county court judge's order; that every bill of sale should be attested, and fully explained by the registral of the county court or the district in which the of the country control in district in which who bottower resides, and that the money should be handed over to the grantor in the presence of the registrar, or proof other wise given to the satisfaction of the registrar that the whole amount secured by the bill of sale has been districted with the sale with the registrar of the sale with bond hde paid over to or on account of the grantor that every bill of sale made or given in consideration of any sum under £50 should be void, and that the instrument should also be word if the borrower does not actually receive and enjoy the use of the full sum stated to have been advanced. The evidence shows that been advanced. money-lending transactions are conducted by means of absolute bills of sale, accompanied by a line-purchase agreement. In such cases the money-lender is in possession of the goods, and is enabled to serve them immediately default is made in the payment of any of the instalments under the hire-purchase agreement. The committee consider that, in the event of the system not being illegal, it should either be declared so, or the hire-purchase agreement should be legistered with the bill of sale Warrants of attorney and cognovits have been and still may be instruments of oppression, and the committee recommend that the use of such documents should be abolished in connection with all loans advanced by persons carrying on the business of a money-lender in the course of such business. As to procedure, in all cases where proceedings are taken in the county court, the money-lender should sue only in the county court or the district where the borrower resides Statutory declarations in connection with money-lending transactions should in future be made only before the registrar of the county court, who should be required to fully explain their purport to those making them In bankruptcy proceedings the committee would give full power to review the whole transaction with the money-lender. In regard to Soottish procedure under summary diligence, they think this process should not be applied by the connection with any transaction with any transaction with any transaction. be valid so long as the judgment remains un-satisfied. Your committee are satisfied that money-lenders often take into consideration as part of their security for payment for unjust claims, the dread of the consequences to the

Evidence was submitted to the committee showing that the garnishee summons may be and is used by some money-lenders as an instrument of oppression against clerks and persons ment of oppression against ciers and persons in similar positions; and the committee re-commend that the protection granted by the Act of '70 to the wages of servants, labourers, and workmen should be extended to any person whose wages or salary, together with any other income, does not exceed the sum of £200 per The committee make a series of annum. recommendations regarding the registration of money-lenders, suggesting among other things that it should be declared an offence for any money-lender, individually or in partnership, to carry on the business of a money-lender under the name of "bank," "trust," "corporation," on other misleading title, or to issue or publish any false or misleading prospectus, circular, or advertisement, and that it should be the duty of the registrar of each county court to report to the Public Prosecutor any such offence which may be brought to his knowledge or of which he may become cognisant; that on conviction for any of these offences it should be competent to the court to strike the name of such money-lender off the register for any period, and to impose a penalty to be prescribed by statute, that no money-lender should be capable of recovering any debts incurred in connection with money-lending transactions connection with money-lending transactions during the period for which he has been struck off the register. Any money-lender carrying on such business without being registered should be incapable of recovering any debt incurred in connection with money-lending transactions. A further safeguard to which the committee attach some importance is that every person or company carrying on the business of a money-lender should be required to keep regular and strictly accurate accounts of each transaction, and to furnish to the borrower, each transaction, and to turnish corners on every date when an instalment falls due, a clear statement of his account up to date money lender should be required to furnish to the borrowers and to the sureties, if any, at the time each transaction is entered into, copies the time each transaction is entered into, topics of every document signed by him or them, and any failure to do this should render the moneylender liable to lose his right of recovery of any money lent. The committee received important evidence as to the operation of co-operative banks on the Continent and in some parts of the United Kingdom. It appears, they say, that the establishment of such banks has been of great use in abolishing or largely diminishing the trade of lending money at exorbitant rates of interest to the poorer classes. The committee were impressed with the extreme usefulness of these institutions, and are of opinion that they meet a real want, especially in agricultural districts. They do not, however, recommend any State intervention in connection with them at the present time.

[106] Museums of the Science and Art Department. The committee which sat in '07 to inquire into and report upon the administration and cost of these museums, and presented reports with special reference to the protection of the South Kensington collections from fire, was reappointed March and, and presented a first report on April 26th. They were unanimously of opinion that the whole area on the east side of Exhibition Road (except that occupied by the Royal College of Science, which cannot be sacrificed except at great cost) should be exclusively

devoted to the Art Museum and the Art Library, with provision for the conduct of the business connected with loans of art objects and the art schools, and that provision for the whole of the Science Collection, the Science Library, for loans of scientific objects, and for the science schools, should be made on the west side of the Exhibition Road. They also unanimously recommended that the Geological Museum in Jermyn Street be no longer occupied for the same purposes as now; and that the collections there exhibited be removed to the collections there exhibited be removed to me west side of Exhibition Road and made part of the Science Collections. The second report of the committee, which was presented on July 29th, appears to have been the subject of much detailed controversy. A draft report of Lord Balcarres was brought forward, but the motion that the draft of the chairman (Sir F. Bancally be read a second time was agreed to Powell) be read a second time was agreed to. The final question that the report as amended be the report of the committee to the House was carried by 7 to 3, Sir I. Gorst being one of the minority. As regards the Bethnal Green Museum, the committee cannot say that as it stands it is of adequate use to the community Properly organised it would become an effective agen v for the improvement of technical in-struction in the East End The Edinburgh Museum suffers from the centralising tendency of South Kensington, and the head of the Edinburgh department should be allowed greater initiative. The same remarks apply equally to the Dublin director. Without making any definite recommendation, the committee are of opinion that a good case has been made out for extending the advantages of science and out for extending the advantages of science and art collections in the Principality, and in the event of the Bethnal Green Museum being removed from the control of the Department, the money so saved might be devoted advantageously to museum purposes in Wales. With a view to the efficient and economical management of the museums in London, to say nothing of other educational advantages not within the order of reference, the committee deem it of paramount importance that there be an Education Minister of Cabinet rank, having an Education Minister of Capiter tails, nating a seat in the Legislature, aided by a Parliamentary secretary. They recommend that the Secretary for the Science and Art Department, like the Secretary of the Education Department, have his office at Whitehall, that there be advisers or visitors who would assist the Department by suggestions of information in matters affecting the museums, but would not lessen the responsibility to Parliament of the Parliamentary chiefs, that admission to all the museums be always free; that negotiations be carried forward with a view to transferring to some local authority the site and structure of the Bethnal Green Museum, the Dixon collection of pictures, and any other objects specially dedicated by donors under their wills or otherwise. They are of opinion that meanwhale collections are the second of while more changes in the objects exhibited might be made with advantage to the district The committee, however, call attention to the evidence of the difficulty, if not impossibility, of obtaining subscriptions from the ground landlords and industrial capitalists. They are should only be given to meet corresponding contributions from local sources, by way either of rates or of private subscriptions.
[107] Petralsum. The protracted inquiry into

the sufficiency of the law relating to the keeping, selling, using, and conveying of petroleum and other inflammable liquids, and petroleum and other inflammable liquids, and the precautions to be adopted for the prevention of accidents with petroleum lamps, was brought to a close, and the report of the committee presented on July 13th, the investigation having extended over four sessions, in course of which the committee held 53 sittings and examined 85 witnesses. The late Mr Mundella was chairman of the committee interescentification. in three sessions. Mr Josse Collings, Under-Secretary for the Home Department, succeeded him when the committee reassembled in March '98. After the evidence had been concluded, the chairman in the ordinary course presented, the chairman in the ordinary course presented, on June 17th, a draft report, which was duly read a first time. After this a draft report proposed by Mi Ure was also read a first time. The Chairman's draft of 174 painting. graphs contained a paragraph recommending that a Bill be brought in to remedy the defects in the existing law, and expressing an opinion in favour of the adoption of the present flash point—viv, 73° (Abel)—as the dividing line between petroleum oil and petroleum spirit. The diaft also dealt with many other spirit. The draft also dealt with many other points, including the manufacture of lamps Mr. Ure's set forth, among other things, that, practically, complete immunity from lamp accidents would be attained it only oil with a flash point above 100° Fahr were in common use as an illuminant. The question that the draft report proposed by the chan man be read draft report proposed by the chairman be read a second time paragraph by paragraph was carried by 8 to 5, Mr Uic's draft being accordingly set aside. Twenty paragraphs regarding "past legislation and Parliamentary inquiries" were omitted from the chairman's draft by 7 to 6. On June 24th Mr. Ure moved to leave out "73°" from the paragraph in the chairman's draft i relative to the flash point, and to insert "100°," and this was carried by 8 to 6 against the chairman Certain changes were also made as regards the proposed examptions against the chairman Certain changes were also made as regards the proposed exemptions. On a subsequent occasion Mr Fortescue Flannery proposed to add a provision under which, subject to the exemptions which had been adopted, petroleum spirit flashing above 73° and below roo's might be kept on registered premises and otherwise specially regulated, but after the committee had struck out 73° from and declined to insert 85° in the amendations of the committee had struck out 74°. ment, the proviso was withdrawn, so that the previous decision of the committee in favour of raising the flash point to roo was upheld A series of modifications was afterwards made in the report. This document as presented sets forth the conclusion of the committee that in the interests of public safety legislation is necessary for the control and regulation of petroleum oil as far as storage, transport, and sale are concerned, and that, with regard to petroleum spirit, the present law is not adequate for the public safety, and law is not adequate for the public safety, and should be amended. The committee therefore recommend that a Bill be brought in to remedy the defects in the existing law. In order to carry out this recommendation, the committee are of opinion that it will be necessary to make the following provisions with respect to petioleum—(i) To secure legislative control for petroleum generally, and admixtures of the same with other substances, certain heavy oils being exempted. (2) To adopt a flash point—viz., 100° (Abel close test)

-as the dividing line between petroleum oil and petroleum spirit. (3) To provide that, with the following exemptions, petroleum oil shall be kept only on premises registered or incensed under the Act, and petroleum spirit only on premises licensed under the Act. Spirit not exceeding 5 gallons; when oil and spirit kept together and not exceeding 5 and spirit kepit together and not exceeding 5 gallons of spirit and 40 gallons of oil; oil (for private use only) not exceeding 130 gallons. The committee think it will be also necessary to make proxisions that registered premises should be at a safe and suitable distance from "protected works", to limit the amount of oil (subject as above) on registered premises, and generally to make regulations for registered premises, to establish a system of licensing for the storage of petroleum spirit (subject as above) in all cases, and for the storage of petroleum oil in cases where it cannot be petroleum oil in cases where it cannot be petroleum oil in cases where it cannot be conveniently kept under registration, and generally to regulate licensed places, to make regulations as to conveyance or hawking of such oil and spirit, to regulate the keeping and use of petroleum for the purpose of motive power, to provide for an efficient system of testing, for adequate supervision and administration by local authorities; and that official inquiries be made into the causes of accidents arising from the storage, transport, or use of inflammable liquids. The committee find that there is a consensus of opinion, among nearly all the witnesses who gave evidence on the subject, that lamp accidents are mainly due the subject, that tamp accidents are mainly due to gross carelessness and recklessness on the part of a certain class of users of lamps, and ignorance as to the character of petroleum oil, and they are persuaded that no legislation is possible which can effectively guard against accidents which result from such careless and wilful acts as they describe. The committee came to the conclusions that the number of lamp accidents has not increased out of proportion to the vast increase in the number of lamps in use, and on account of the volatile character of petroleum it is necessary, in order to prevent or performing tracessary, monter to present accidents, that ordinary care should be taken in the use of it, whether the flash point be 73 or 10%, that to place such legislative testrictions on petroleum oil below 10% (Abel close test) as are placed on petroleum spirit would have as an enacte on period an spirit would have the effect of preventing the use of such oil for domestic and trade purposes. [This paragraph was inserted by the easting vote of the chairman], that it is in accordance with the evidence that if immunity from accidents is to be secured it will be necessary to prevent the use of all petrolcum below 120° flash point (Abel close test), and that the effect of such legislation would be to materially increase the cost of petroleum to the consumer. The committee cannot, therefore, recommend legislation of this kind, but are of opinion that an effective remedy might be found in another direction. All or nearly all of the

statutory power should be given to the Secretary of State to issue an order for their Secretary of State to issue an order for their enforcement, with power to vary the order from time to time, if found necessary, such order to affect the importation of lamps and parts of lamps. They also think that the dissemination of information as to the nature of petroleum generally, and as to the filling, cleaning, and management of lamps, through the local authorities and school managers would tend to remove the ignorance which is the cause of so many accidents

[108] Shop Glubs, Compulsory. The Home Secretary placed on the paper, towards the end of the session, a notice for the appointment of a select committee to inquire into and report

a select committee to inquire into and report a select committee to inquire into and report upon the alleged grievance of the Friendly Societies in regard to the action of employers of labour in compelling their workpeople, as a condition of hiring, to join benefit clubs or societies established by the employers, and to cease their membership with any friendly society to which they may belong. Objections were taken to the points in the terms of reference. He afterwards announced that, having seen the representatives of the Friendly Socieseen the representatives of the rijendity Socie-ties and clearly ascertained their wishes, he proposed, especially in view of the late period of the session, not to proceed with his motion then; but, meanwhile he would do his best, by way of forming a departmental committee

way of forming a departmental committee or otherwise, to make careful inquiry into the matter during the recess.

[109] Telephones. Mr. Caldwell (April 181) called attention to the position of the Post Office with regard to telephone licences, and moved, "That the continued refusal of the moved, "That the continued refusal of the Post Office to grant licences to and allow municipal corporations and other responsible municipal col porations and other lesponsible bodies to compete with the National Telephone Company is contrary to the Freasury Minute of May 231d, 1892, is inconsistent with the letter and spirit of the agreement entered into with the telephone companies when the Post Office took over the trunk lines; and is calculated to the contract of the contrac lated to prevent the establishment of a cheap, adequate, and efficient telephone service in the United Kingdom of Great Britain and Ireland, and to increase the difficulties and costliness of any arrangement for the assumption by the State of the whole telephone systems, should that step ultimately be considered desirable Mr. Hanbury, as representing the Post Office, discountenanced any idea of buying out the company at its present market price, but stated that the company's licence would expire in 1911. and that in the meantime the Department was and that in the meantine the Department was entitled to compete, with the same opportunity of canvassing for subscribers as was open to its itvals. On the question of municipal compe-tition he promised a select committee. It was duly ordered (May oth) that a select committee be appointed "to inquire and report whether the telephone service is or is calculated to become of such general benefit as to justify its betong undertaken by municipal and other local authorities, regard being had to local finance, and if so, whether such local authorities should have power to undertake such service in the districts of other local authorities outside the area of their own jurisdiction, but comprised wholly or partially in the same telephone area,

they presented their report on Aug. 9th the committee had held twenty sittings and taken much evidence. In the opinion of the commuttee the telephone service "is not at present of general benefit, either in the United Kingdom at large, or even in those limited portions of it where exchanges exist; is not likely to become of general benefit, eithen in the country as a whole, or in existing or future exchange areas, so long as the present practical monopoly in the hands of private company shall continue, and as it has already become of much more general benefit in other countries, affording less scope for its development than is afforded by the greater density of population and the greater wealth and commercial activity of the United Kingdom, so it is fitted to become in this country, if worked solely or mainly with a view to the public interest, a valuable instru-ment in further developing the trade and social life of the nation, towards which new means of communication have always hitherto so largely contributed "They think "that a service already so essential to commercial men, and so well calculated under other conditions to benefit directly or indirectly all classes of the community, ought no longer to be treated as the practical monopoly of a private company, a course for which no legal or moral necessity appears to exist, and especially ought not to be worked on a system and under conditions which confine its benefits to a limited class in which comme its benefits to a limited class in selected areas, per mit preferential rates to be charged, and allow a private licensee of a public monopoly to refuse the use of a business necessity to one tradesman and giant it to his competitor under similar circumstances, impose no limitation of charges, and leave the public at large dependent on a service which is in its large dependent on a service winch is in its turn wholly dependent upon innumerable way-leaves held upon very precarious tenure, and nearly all liable to be terminated after six of twelve months' notice." The committee had next to consider whether municipal and other local authorities should have power to undertake a telephone service, regard being had to local finance. They, however, felt bound, before dealnnance. They, nowever, test bound, before dearing with this question, to fully satisfy themselves that the Post Office is not prevented either by legal agreement o by good faith from limiting or ending the monopoly of the company. On the right of the Post Office to compete in any area, when we for hy means of licensees the either itself or by means of licensees, the written agreement between the Post Office and the company is distinct and unmistak-able; and documents laid before the committee, in their view, placed beyond doubt the entire absence of any limitation, whether by verbal understanding or otherwise, upon the un-restricted right of the Post Office to allow the cullest competition. The right to compete being thus made clear, the committee had next to consider whether competition was expedient, and if so, whether local authorities should be empowered to undertake a telephone service. Competition appears to be both expedient and necessary, but competition by a local authority must differ in many ways from competition by a private company, it requires special provision to meet the special conditions of the case; and a local authority must also submit to conditions to which the company is not subjected. From and what powers, duties, and obligations ought the point of view of local finance, the committee to be conferred or imposed upon such local are of an opinion that a telephone service authorities." The committee met on May 1sth; would be as successful as has been the supply Mr. Hanbury was called to the chair, and before of gas, water, tramways, and electric light by

local authorities. So far, therefore, as the legal or equitable rights of the company, or the imancial or other interests of the locality, are concerned, the committee see no reason why licences should not be granted to local authorities. On reviewing the whole of the authorities. On reviewing the whole of the evidence, the committee is strongly of opinion that general, immediate, and effective competition by either the Post Office or the local authority is necessary, and consider that a really efficient Post Office service affords the best means for securing such competition They further consider that when in an existing area in which there is an exchange the local authority demands a competing service, the Post Office ought either to start an efficient telephone system itself, or grant a licence to the local authority to do so With regard to areas in which there is no exchange and districts which are not accas, they think some provision should be made beyond what is now offered by the National Telephone Company for giving a service when there is a reasonable local demand. In such cases the Post Office should either start a service of its own, or should grant licences to the local authorities to do so, subject to proper regulations the committee in thus recommending a Post Office service assume that it will constitute a real and active competition, and that concessions to the company not required by the agreement will cease. Such a competition should, in their opinion, be carried on by a distinct and separate branch of the Department, and in future be conducted under strictly businesslike con-ditions, and by a staff specially qualified for such a duty.

ROYAL COMMISSIONS.

The following Royal (ommissions have been appointed, and had not (Nov. 21st) presented reports.

reports —
Indian Finance: see separate article Indian Finance:

Licensing Laws: see separate article Licens-

Local Taxation: see separate article Local

GOVERNMENT
London University Commission. For names of the commissioners appointed under the Act of '98 see seet, 96 (supra) Since the passing of the Act Mi. T Bailey Saunders, ballister-at-law, has been appointed secretary to the Commissions.

London Water Supply: sec separate article London Water Supply

Sewage Disposal: see next article.

Sewage. Disposal of A Royal Commission was appointed during '98 to inquire and is port or — (1) What method or methods of iterating and disposing of sewage (including any liquid from any factory, or manufacturing process) may properly be adopted consistently with due regard for the requirements of the existing law, for the protection of the public health, and for the economical and efficient discharge of the duties of local authorities; and (2) if more than one method may be so adopted, by what rules, in relation to the nature of the volume of the sewage or the population to be served, or other varying circumstances or requirements, should the particular method of treatment and cisposal to be adopted be determined; and (3) to make any recommendations which may be

deemed desirable with reference to the treatment and disposal of sewage. Earl of Iddesleigh, C.B., Sir Richard Thorne Thorne, K.C.B., Medical Officer of the Local Government Boaid, Major-General C. P. Carey, C. P. Cotton, Esq., Michael Foster, Esq., M.A., Professor of Physiology, Cambridge, Col. T. W. Harding, T. W. Killick, Esq., W. Ramsey, Esq., Professor of Chemistry, University College, London, J. B. Russell, Esq., M.D., and Frederick J. Willis, Esq., Secretary.

Sevchelles Islands, or Mahe Archipelago

Seychelles Islands, or Mahé Archipelago are situated in the Indian Ocean, about 950 miles north of Kauritius, of which British colony they are politically a part. Pop. 16,500. The chief and largest island is Kahè, upon which is Port Viotoria, the capital, harbour, and headquarters of H.M. East Airican squadron. Government is administered by a Chief Civil Commissioner and a Board, subordinate to the Governor of Mauritius. Exports: cocoanut, cocoanut oil, sperm, vanilla, coffee, and cloves. For financial statistics see British Empire (table).

Shah of Persia. See Muzaffer-ed-Din.
Sherborne School, Dorsetshire. Refounded by Edward VI. (the eathest school founded by that monarch), 1550, reorganised 1870. Accommodation for 350 pupils. An Exhibition to either Univ of £40 for four years falls vacant every year, pupils may also compete for Huiah Exhibitions of £50 for four years; this privilege is allowed to three other public schools only. Ihrre are also numerous Foundation, House, and other Scholarships and Pitzes. Head Master, Rev. F. B. Westcott, M.A., late Fellow Tinn Coll. Camb. Clerkto Governors, Mr. James Douglas Motto (royal arms of Ed. VI.), Honsout qui mad y pense. Bome Alumni, Vice-Chancellor Knight-Bluce, Rt. Hon. Montague Bernard, Sir Lewis Morris, Dr. J. M. Neale, Sir D. Forsyth, Wm. Forsyth, Q.C., etc.

Shipbuilding. See Trade, '98.
Shipping. See Mercantill Marine, and Trade, '98.

Shipping of the United Kingdom, The Chamber of. This consists of twenty-five Shippowners' Associations, located in London and the chief ports of the United Kingdom. Its work is largely parliamentary, and consists in watching bills affecting shipping. The affairs of the Chamber are managed by an executive council, to which each affiliated association elects one member. This Council is presided over by a president and vice-president, annually elected at a meeting held in London in February. President, Mr. Edward Pembroke, London; Vice-President, the Hon. James C. Burns, Glasgow; Secretary, Mr. W. H. Cooke. Offices, 5, Whitington Avenue, Leadenhall Street, E.C.

Shorthand. Recent educational legislation has given a remarkable impetus to shorthand teaching, especially in evening continuation schools. In many higher grade schools and colleges there are facilities for learning, and shorthand schools meet the needs of different classes of students. Shorthand is included in the subjects for both Oxford and Cambridge Junior Local Examinations, and for the College of Pieceptors' certificate examinations. The system almost universally taught is Pitman's shorthand, in which about 95,000 students receive instruction annually. The system is

employed for nearly the whole of newspaper reporting—4300 reporters in the United King-dom using Pitman's system, and 100 twenty-three other systems—for the bulk of legal and commercial work, and by 34 of the shorthand writers in the law courts, Taylor's, Gurney's, Mavor's, Purton's, and Lewis's systems being employed by a total of 36 writers; while the system used by the historic house of Gurney is employed for official note-taking in parliamentary committees. In the autumn of 97 the Sexagenary of Phonography was celebrated in London, the system identified with his name having been introduced by the late Sir Isaac Pitman in '37. Of periodicals published in the interests of shorthand, the oldest extant is the weekly Phonetic Journal, established in '42 Throughout the country about 100 associations exist for the practice and propagation of Pitman's system, and shorthand writers are represented by the following societies—The Incorporated Phonographic Society, established '90, of which Mr Alfred Pitman is president, has established districts in many large towns, and has examined and granted diplomas to 517 shorthand teachers. The secretary is Mr H. W. Harris, 100, Mattison Road, Firsbury Park, N. The Institute of Shorthand Writers, practising in the Supreme Court of Judicature registered), established 82, has for its object the promotion of efficiency in note-taking in connection with legal proceedings, and admits members by examination. The hon secretary members by examination The hon secretary is Mr. M. Levy, and the office 4, Seile Sticet, Lincoln's Inn, W.C.

Shrewsbury School. Founded by King Edward VI. in 1551, augmented by Queen Elizabeth in 1571. One of the seven schools reorganised by the Public Schools Act in '68 The school was moved to a new site (covering an area of 50 acres) in 82. Since 82 its numbers have increased from 170 to 300. Head Master, Rev H. Whitehead Moss, M.A. Motto, Intus sirveta, ne labora Distinguished alumni include, among others: Sir Philip Sidney, Loid Brooke, Marquis of Halifax, and, in the present century, Charles Darwin, Dr. Friaser (Hishop of Manchester), Professor B. H. Kennedy, Dr. Scott (Dean of Rochester), Dr. Thomson (Archbishop of Vork), the late Bishop of Wakefield, Sir D. was moved to a new site (covering an area of of York), the late Bishop of Wakefield, Sir D Lysons, Lord Thring, Sir C. T. Newton, Eail Cranbrook, and many others.

SIAM.

Siam is a kingdom embracing part of the Indo-Chinese and part of the Malay peninsula Indo-chinese and part of the day process in the territories have dwindled very much in recent years, through the action of France, Agreements made between Siam and France, in '93, and between Great Britain and France in '95, recognised as belonging to Siam all 4 '96, recognised as belonging to Siam all the region lying between Burma and Tenasserim on the west and the Mekong on the east, roughly speaking. Kiang Sen, on the Mekong, marks the northernmost point of Stamese territory, and from a point just below Stung-Treng the boundary leaves the river and passes in a S.W. direction to the coast. The two Powers agreed not to operate by their military or naval forces, except in concert for the maintenance of the independence of Siam which is comprised within that portion of Siam which is comprised within the drainage basin of the Menam, and of the coast streams of a corresponding longitude. They also independent to securior

within that area any privilege or commercial facilities which would not be extended to both of them. It was expressly stated that, though this portion of Siam was marked out for special treatment, no doubt was thrown upon the complete title and rights of the Siamese to the remainder of their kingdom, Area about 20,000 Sq. miles; pop. estimated at 12,000,000, including Siamese 2,000,000, and Chinese and Malays about 3,000,000. Capital, Bangkok, pop. about 200,000, situated on the delta of the river Menam, the great natural and economical centre of the kingdom. The royal dignity is nominally hereditary, but each sovereign appoints his own successor. The ruling sovereign is Chulalongkorn. Executive power is exercised by the King in conjunction with a Council of Ministers. The Legislative Council consists. of the Ministers, certain members appointed by the King, and six princes of the royal house There are forty-one provinces, each admin-istered by a governor. The country is very madequately developed, chiefly owing to the condition of the inhabitants, who are virtually seris, and to a system of debt-slavery which obtain. Forcign trade centres at Bangkok, find is almost whelly in the hands of foreigners. The first railway in Siam-the Bangkok-Paknam line (narrow gauge), 25 miles long—was opened by the King in April '93. The Bangkok-Khorat railway, 163 miles in length, was inaugurated by the King, March 27th, '97, and is now making slow progress; the earth and rock work, it is hoped, will be finished by the end of '88. Chief exports. rice, teak-wood pepper, and fish. The King's revenue amounts to about £2,000,000 a year. The standing army is small, but there is a general enrolment of males as militia. Buddhism is the prevailing religion. Western ideas of civilisation are spieading to some extent, and a few of the Siamese youths are sent to Europe for their education. Imports, '97, £4,485,807; exports, £3,201,218. See DIPLOMATIC, and INDO-CHINA—History, '98. The King was received with an address of welcome on his return after. Paknam line (narrow gauge), 25 miles long-was an address of welcome on his return after his European tour, and replied (Jan. 3rd) that the development of the country would help to increase its prosperity, but that it would take time to get rid of existing abuses.

Siberia. A Russian province, larger than Europe, which is only separated from the rest of the empire by the low-lying Ural hills, a slender barrier which is now being broken down by the extension of the Russian railway system into Siberia, and by incorporating the West Siberian governments with the European Russian administrative system. A uniform system of public justice was instituted in July '97 by order of the Czar, in place of the existing arbitrary administration of autocratic officials Trial by jury was not conceded, but justices of the peace are appointed by the Crown, and they also act as juges d'instruction. The higher tribunals consist of eight circuit Courts in the towns of Tomsk, Tobolsk, Chita, Krasnoyarsk, Irkutsk, Yakutsk, Blagovestchensk, and Vladivostock, and a Court of Appeal or Palace of justice above these at likutsk. Area, 4,833,496; population, 95, 5,140,000 ag m. Valuable gold-Trial by jury was not conceded, but justices of population, '95, 5,140,000 sq m. Valuable gold-fields have been discovered in the Government nance of the independence of Siam, of Yeniseisk, and in the basis of the Obi, that portion of Siam which is comprised the drainage basis of the Menam, and coast streams of a corresponding longiThey also undertook not to acquire and nearly all the fertile soil free of forest able deliberation the Government Railway Commission decided in favour of a complete railway, the length of which will be over 4700 miles. The total cost, including relling stock, etc., has been variously estimated between 53 and 55 millions sterling. The first sod was cut at Vladivostok, on May 24th, 'or. Io facilitate the work of construction, the line was divided into three parts. The first starts from the European frontier in the Ural, and runs eastward; the second from Vladivostok, on the Pacific, running west; while the third is the middle section, near Lake Baikal, and is to join the other two. The opening of the line from Tchelyabinsk to the river Obi (886 miles), able deliberation the Government Railway from Tchelyabinsk to the river Obi (889 miles), and the branch from Tchelyabinsk northward to go. A report of the United States Consul-peneral at St. Petersburg (198 miles), took place Oct 27th, 36. A report of the United States Consul-peneral at St. Petersburg (reproduced in this country in the summer of '07) gave a summarly of the report of the committee which manages he construction of the railway as to the work ione in '96. The committee found is practicable o fix the cost of the Northern Ussuri line at 2,231,800; the second section of the Central siberian line at £5,160,200; and the branch line of the city of Tomsk at £190,000. Uctails are tiven as to the exploration and improvement of he rivers Shilka, Ussuri, Amur and Angara, and the choice of the bay of Gold Horn on the acific for the establishment of a commercial port Lieut. General Duchoffskoi, on Oct. 14th, y, laid the foundation stone of the commercial ort which is to be built at Vladivo-tok. The Pravitelstuent Viestink of Feb. 24th, '98, resorted that at a joint meeting of the Railway committee and the Financial Department of he State Council, held on Dec. 10th, '97 (old tyle), the Isar presiding, a detailed report of he Minister of Roads and Communications on he progress of the undertaking was presented, nd concluded "The general progress of the ork for the three years 95-7 can be expressed s follows —Earthwork executed, 100,000,000 bit yards; rails laid, 2550 yersis; ballast eposited, 3051 yersts. On April 1st, the first rans-Siberian express train left the Moscow lation at St. Petersburg for Tomsk. The ain, which is unique in its accommodation, as timed to run the six days journey to omsk twice a month. A Times telegram from tenna, June 8th, contained a report of an iterview with M. de Walujeff, Director of the iberian Railway, who said that on its comple-on in 1904 it would be possible for a traveller go round the world in thirty days. By that me they were confident they could complete te line from Tchelyabinsk to Vladivostok; it as already practically finished as far as Krasoyarskoi, on the Yenisei river, a distance of oversts, a bridge of 1000 metres was being allt across the river, and on the other side out 650 versts were then complete. He spoke ry hopefully of a large export of Siberian corn.

Renter's telegram from Tomsk, published ept. 15th, announced that a regular service of aina between that place and irkutsk had been bened. As to the Landburian deviation, we we details in our last edition of the concession

and outside the steppes has been occupied. A new sea route through the Kara Sea to Siberia has been lately opened up, chiefly by English enterprise, Captain J. Wiggins being the pioneer. The railway confection between Russia and Siberia forms the greatest railway scheme in the world. After consider Pekin correspondent of the Times on March 7th St. Petersburg, published early in '96. The Pekin correspondent of the Times on March 7th gave a long and elaborate description of the whole undertaking. Writing under date Dec. whole undertaking. Writing under date Dec. 20th, '07, he came to the conclusion that another season would be required before the final route could be decided upon. The short cut, which was the last proposed, was from Metrophanof (on the Trans-Siberian Railway, reached by steamer on the Amur from Stretensk), through Hailar, Petuna, Kirin, Ninguta, and Poltafka to Vladivostok, it was estimated at 1440 miles, of which 68 miles had been constructed. According to news to hand in the autumn the line was being pushed on vigorously. line was being pushed on vigorously. The Siberian railway, it appears, is expected to reach Stretensk by the middle of '09, and thus a combined steamboat and iail route from the Baltic to the Pacific may be opened in five years -cutting down the journey from London to Shanghai to not more than twenty days. The Times of Oct. 20th contained a long article by Mr. Arnot Reid, of the Straits Times, Singamoscow, which he carried out between Sept. 28th and Oct 6th—three hours less than twelve days and nights of continuous travel for the tea-caravan route, and struck the railway works at Masova, on the castern side of Lake Barkal. On this side, he says, the alignment has been diverted. Although grading has been done for Soo miles to Strelinsk, it is now proposed to turn off at Chital 500 miles from the lake, to Port Arthur, and thus the railway to Vladi-vostok will be to all intents and pui poses a branch line Lietvenitchaia is the name of the station on the western side of the lake, and from here to Masova the ice-breaking ferryboar will run, but a railway route round the head of the lake will be begun next spring, to be worked in addition to the ferry. Mr. Reid got on the line at the likutsk station, which is on the opposite side of the river from the city. To Krasnovarsk, 660 miles from Irkutsk, there was no first-class travelling, and the trains were not equal to the traffic; from that point to Moscow, 2600 miles (nia Thelyabinsk), there was every comfort. For the former he paid, second-class fare, 30 roubles, and for the latter, first-class fare, 53 roubles. The rates come down to a fourth class. Within the last few months an order has been issued to lay a siding every seven versts, apparently to leave the main line clear for strategical purposes. Mr. Reid, who reached Moscow on the fiftieth day after leaving Pekin, observed a large influx of immigrants along the railway. See China

Sierra Leone, a British colony on the West African coast, founded in 1807. It includes two districts called British Quiah and Sherbro, two districts called British Quian and Sherbro, the Isles de Los and Mannah. Sierra Leone proper is a peninsula, containing about 300 square miles, but the colony has a coast-line of 180 miles in length. Area, 30,000 sq. m.; pep. about 350,000. It is bounded on the north by the Grand Scarcies river, which separates it from the French settlements, and on the south by Liberia. On the east the frontier was settled by an agreement made between Great

Britain and France in Jan. '95. All possibility of British extension to the east was by this agreement done away with; the colony relinquished all control of the head waters of the Niger, and became inclosed on every side. The interior is divided into 5 districts—Karene, Rometto, Bandajuma, Koinadugu, Pangoma, each under a District Commissioner. The each under a District Commissioner. The leading tribes are the Timmans in the north, the Mendis in the south, and the Yonnis in the middle districts. In Nov. '95 a staff for the construction of a railway was sent out from England. Replying in the House of Commons on Feb. 1st, '97, Mr Chamberlain, Secretary for the Colonies, said that the terminal depot at Freetown, with landingpier, etc., had been completed, 21 miles of the line surveyed, the earthworks and bridges for a length of 42 miles finished, and the permanent way put down for 3 miles. It was expected that a considerable section of the railway would be open for traffic in June '98 More recent reports show that the enterprise railway would be open for traffic in June '98 More recent reports show that the enterprise is being pushed on. The capital is Freetown, with a population of over 40,000. The chief exports are palm oil, palm kernels, hides, and rubber. The colony is administered by a Governor, an Executive Council of six members, and a Legislative Council consisting of the Executive and four nominated members. See Berryll Evenper (table) and Dividentation See British Empire (table), and Diplomatic

—History, '98. Serious disturbances in the historiand, arising from the collection of a hut tax of five shillings imposed on the natives, which came into operation on Jan. 1st, were reported (Feb. 24th). It was alleged, however, reported (F86. 24th). It was alleged, nowever, that, beyond the objection to the tax, great discontent was caused by the resolute attempts made by the authorities to put down slavery and savage practices generally. The frontier police and the military force engaged in the repression of the disturbances were met. with the stoutest resistance, especially by Bai With the stoutest resistants, capeans, and Bureh, a chief in the Karene district, and disturbances spread southwards and coastwards; factories were burned, raders and others were murdered in large numbers, and others were murdered in large numbers, and matters aeemed in April to have reached a critical stage. The Governor's Council ordered the establishment of a volunteer force to protect the capital, and H.M ships and men of the West India Regiment were brought of the West India Regiment were brought up to aid in the re-establishment of order. Sir David P. Chalmers was appointed by the Imperial Government as her Majesty's Commissioner to inquire into the insurrection and the general affairs of the colony and protectorate (June 20th). He was given full powers, and was directed to specially inquire into the allegations that the insurrection at its commencent was caused by the inquire into the sinegations that the insurrec-tion at its commencement was caused by the imposition of a hut tax, which was peculiarly obnoxious to the customs and feelings of the natives, and by the brutal and insulting way in which the collection of the tax was carried out by the native police. As in the later phases out by the native police. As in the later phases of the insurrection, which were accompanied by murder and outrage, and which extended into the colony as well as the protectorate, the question of the hut tax was not prominently raised, he was directed to seek for other explanations of the simultaneous outbreak of savage violence over a large tract of country, and to inquire into the operations of secret has led an active literary life. During societies, both in the colony and in the pro-

tectorate. With regard to the colony and the protectorate, he was to inquire into the work ing of the scheme of administration which had been adopted, and especially the best methods of raising the revenue required for maintaining of raising the revenue required for maintaining peace, order, and good government in the protectorate, and the manner in which the land should be dealt with so as to promote the development of the country while preserving the rights of the natives, and protecting them from being deirauded by speculators who have sought, or may seek, to acquire land from them on inequitable terms. The operations against the rebels were suspended during the rainy season, but were resumed in September, a West

season, but were suspended curing the rainy season, but were resumed in September, a West African Regiment having by this time beer enrolled. The patrolling of the disturbed country soon had a good effect, and Bai Euret was captured in the Karene district (Nov. 13th). Silver Question, The See Bimstrallism. Strating. The presiding body in this branch of sport is the National Stating Association founded in 1879 at Cambridge, and transferred in '94 to London. The Presidents are the Duke of Devonshire, the Earl of Leicester, and the Lord Lieutenant of Cambridgeshire; the Acting President. W Hayes Fisher, Esq., M.P.; and the Hon. Secretary and Treasurer, Mr. H. Elling ton, London Rowing Club, Putney, S. W. Sladen, Douglas, the son of Mr Douglas Brooke Sladen, was b. in London, Feb. 5th 1856, and educated at Cheltenham College and Frinity College, Oxford, where he took a first

1850, and educated at Cheltenham College and Frinity College, Oxford, where he took a first class in history. He also holds the degrees o B A and LL. B. from Melbourne University and has held the Chair of History at the University of Sydney, N.S.W. He is well known as an author and reviewer, and in hiterary work there are evidences of his extensive trayels in langua. China Australia Canada. sive travels in Japan, China, Australia, Canada the United States, and South Europe. He is a constant contributor to the Queen, the Literap. the United States, and South Europe. He is a constant contributor to the Queen, the Literan World, and other papers, and amongst his books are "The Admiral," "On the Cars and Off," "The Japs at Home," "A Japanese Marnage," "Australian lyrics," "A Poetry c Exiles," "Edward the Black Prince," "Leste the Loyalist," "The Admiral," etc. He hadted "Australian Ballads and Rhymes, "A Century of Australian Song," "Younge American Poets," etc. He is hon. secretary of the Authors' Club, joint hon. secretary of the New Vagabonds Club, and editor o "Who's Who." Address. 22 and 34, Addisoi Mansions, Kensington, W.
Smith, Goldwin, D C.L., was b. at Reading Berks, 1832. Ed. at Eton and Oxford, graduating first class in classics 15; Fellow of Univ. Col Oxford '56. He was Assistant Sec. of the Roy, Commission of Inquiry into the condition of the Univ. of Oxford 50, Secretary to a subseque commission, under which important University reforms were introduced, and a member of the Education Commission, under which important University reforms were introduced, and a member of the Education Commission in "Reging Profess."

Commission, under which important Universit reforms were introduced, and a member of the Education Commission in [58]. Regius Profess of History [58] to [66] at Oxford, and was brough prominently into notice by his lectures, whis were characterised by great vigour and originality. He championed the cause of the Norin the American Civil War, at the conclusion which he visited the United States on a touth [58] he accepted an honorary Professerah of History at Ocraell Univ., New York, of whit University he is now an Emeritus Professe Since [7] he has resided at Toronto, where [1]

Question," "A Trip to England" in '92, a "History of the United States" in '93, "Oxford and her Colleges," "Bay Leaves: Translations from Latin Poets," "Specimens of Greek Tragedy," Essays on Questions of the Day," in '94, and "Guesses at the Riddle of Existence" ('96).

Smith, Rev. Walter C., M.A., D.D., Ll.D., was b. 1824 in Aberdeen. Educated at Aberdeen University and New College, Edinburgh, he was ordained in '50 minister of the English Presbyterian Church in Islington, London, and subsequently became minister of the Free Church of Scotland in Orwell (Kinross), Roxburgh (Edinburgh), Tron (Glasgow), '62, and High Church (Edinburgh), '76. In '67 he was tried for heresy, but the charge was dismissed by the General Assembly. The alleged heresy was contained in his lectures on "The Sermon on the Mount." In '93 he was appointed Moderator of the Assembly. He has now retired, and lives near Dunblane, Perthshire. Dr. Smith is best known as a devout and cultured poet. His chief works are "The Bishop's Walk" '(61), "Hymns of Christ and the Christian Life" (67), "Oling Grange" ('22), "Borland Hall" ('74), "Hilda" ('75), "Raban" ('84), "North-Country Folk" ('83), "Kildrostan" ('84), "Thoughts and Fancies for Sunday Evenings" ('87), and "A Heretic" ('91).

SOCIALISM.

Socialism, primarily and broadly, is the name given to the doctrine which proclaims the equal inght of all to the material conditions of existence—that is, to the enjoyment of the necessaries, comforts, and luxuries of life—and at the same time the equal duty of all to labour in relatively equal proportion (so far as may be needful) for the manitenance of those material conditions. Socialism is thus, in its first intention, an economic doctrine. But by most schools of Socialists this has been, and is, regarded as the necessary foundation of a reconstruction of human life generally—i.e., of a complete readjustment of political, religious, and domestic relations, involving the abolition of their present forms. In the following article the Socialist organisations in England and abioad are briefly reviewed.

are briefly reviewed.

Englished.—The English societies representative of Socialism are: the Social Democratio Federation, Sec., H. W. Lee, 337, Strand, W.C.; the Fabian Booisty (g.v.), Sec., E. R. Pease, 276, Strand, W.C.; and the Independent Labour Party, Sec. John Penny, 53, Fleet Street, E.C. The Social Democratic Federation had in '97 134 branches in existence, with a membership of 11,000. The Independent Labour Party was formed at a conference held in Bradford early in '93, and attended by delegates from various Independent Labour organisations already formed, from branches of the Social Democratic Federation, and from the Fabian Society. The object of the party is the realisation of an industrial commonwealth founded upon the socialisation of land and capital. "The true object of industry being the production of the requirements of life, the responsibility should rest with the community collectively. Therefore, the land, being the storehouse of all the necessaries of life, should be declared and treated as public property; the capital necessary for industrial operations should be well-stream.

wealth resulting therefrom should be equitably distributed over the population. As a means to this end, we demand the enactment means to this end, we demand the enactment of the following measures:—(1) A maximum eight-hour working-day and a six-day week, with the retention of all the existing holidays and Labour Day, May 1st, secured by law. (2) The provision of work to all capable adult applicants at recognised trade—union rates with a statutory minimum of 6d. per hour. In order to remuneratively employ the applicants, particle district horsely and county councils. parish, district, borough, and county councils parish, district, borough, and county councils to be invested with powers to (a) organise and undertake such industries as they may con-sider desirable, (b) compulsorily acquire land, purchase, erect, or manufacture buildings, machinery, stock, or other articles for carrying on such industries; (c) levy rates on the rental values of the district and boi row money on the values of the district and borrow money on the security of such rates for any of the above purposes. (3) State pensions for every person over so jears of age, and adequate provision for all widows, orphans, sick and disabled workers. (4) Free maintenance of children while at school or university; free primary, secondary, and university secular education. (5) The raising of the age of child labour with a view to its ultimate abolition. (6) Abolition of indirect taxation, and the gradual transference of all public burdens on to unearned incomes, with a view to their ultimate extincincomes, with a view to their ultimate extinction, municipalisation and popular control of the liquoi traffic. The Independent Labour party is in favour of every proposal for extending electoral rights to both men and women and democratising the system of government." The political "red of the party is summed up in the single sentence, "The Independent Labour Party is in favoar of every proposal for extending electoral rights to both men and women and democratising the system of government." Stringent regulations have been drawn up for the guidance of candidates elected to the House Stringent regulations have been drawn up for the guidance of candidates elected to the House of Commons, and also to guard the movement against being financed in the interests of any other party. Over the greater part of Lancashire and in other parts of the country branches have for part of their constitution a clause prohibiting members from voting for any candidate put forward by the Liberal, Liberal Unionist, or Conservative Parties. The organisation claims to have over soo branches and '12,000 members. Chairman, Mr. Keir Hardie; Treasurer, Mr. France Littlewood General Sooretary, Mr. John Penny. The Federa-General Secretary, Mr John Penny. The Federation have declared that there was no need for the separate existence of the Independent Labour Party, the proper place for conscien-tious Socialists being inside a revolutionary Socialist organisation like the Social Demo-cratic Federation. Recent events seem to have brought both bodies more together, and the question of the fusion of the two organisations is now under discussion by their respective branches.

object of the party is the realisation of an industrial commonwealth founded upon the socialisation of land and capital. "The true object of industry being the production of the requirements of life, the responsibility should requirements of life, the responsibility should rest with the community collectively. Therefore, the land, being the storehouse of all the necessaries of life, should be declared and treated as public property; the capital necessary for industrial operations should be necessary for industrial operations abould be per cent. of the total votes recorded, at the '88 or an industrial operations abould be per cent. of the total votes recorded, at the '88 or an industrial operations about the production of the total votes recorded, at the '88 or an industrial operations about the production of the total votes recorded, at the '88 or an industrial operations about the production of the total votes recorded, at the '88 or an industrial operations about the production of the

election, an advance of 334,000 since '93, and secured the return of 56 members to the Reichstag. The number of party organs is 76, 22 of which are dailies. They denounce the so-called State Socialism as a system of halfmeasures dictated by fear, and aimed merely at undermining the hold of the Social Democracy over the working classes by means of petty concessions and palliatives. State Social Emocracy they say, is Conservative; Social Democracy essentially revolutionary. Therefore the two are irreconcilably opposed. At the '97 Congress Herr Bebel carried a resolution repeating the party regulation which prohibited Social Democrats from taking part in elections for the Prussian Chamber, but it was plainly laid down that no compromise or alliance with any other party should be made. See Germany, POLITICAL PARTIES OF

France.—French Socialists are organised into at least four distinct bodies. The first of these is called the Workmen's party, and is led by M. Jules Guesde, who is an ardent follower of Marxist and collectivist theories. It took its rise from the National Worknien's Congress at Marseilles in '79, and its programme is "the political and economical expropriation of the capitalist bourgeoise and the socialisation of all the forces of production. In 66 at the Lille Congress this was put a little differently, thus: "The abolition of the capitalist system by means of the conquest of political power by the proletariat, the substitution of social for capitalist property, and the international agreement of working men. It recognises no national obligations that would interiere with its objects, and is at one with most of the Socialists on the Continent. It claims to socialists on the Continent. It claims to include 450 associations, with about 300,000 members, and its strength has been proved in municipal and parliamentary elections. The Possibilist party derives its numbers almost entirely from Paris, and is practically a segment of the Workmen's party, from which it separated in 8s. The Blanquist party is also a Parisian society, and derives its title from the old revolutionist Blanqui. It professes itself "atheist, materialist, transformist, republican, revolutionist, communist, and finally internationalist." Its organ is the Parti Socialiste, and its members call themselves Communists, as a distinctive title from the collectivist Workmen's party. There are about 10,000 members. The Socialist Republican party consists of Radicals who have evolved into Socialists. MM. Millerand and Goblet are its most prominent members, and its organ is the

Petite Republique.

Austria.—In Austria the Socialist party a strongly organised. There is a powerful propaganda carried on through the Press, and the influence of the party is very marked in the elections. In Bohemia and Silesia the movement has made great way, but not so much in the Alpine districts, though in Feb. '98 it was reported that an anti-clerical and socialistic body, called the Styrian Peasants' Leggue, had 10,000 members. The party is split up into two sections—one led by Dr. Adler, with the Gleichheit as its special organ, and the theories of Karl Marx as its creed; and the other led by Herr Hanser, with the Volkspresse as its organ. It should be said that a great incentive

of the empire. Therefore Socialism in Guessian series very much of a political force, rather than adherence to Communistic principles.

Belgium.—The grant of universal suffrage in Belgium brought the Socialists of the country into great and unexpected prominence at the general elections in Oct. '9. No less than 29 Socialist and Radical candidates were returned, and between them and the Clericals the moderate Liberals and the Progressists were almost annihilated. The Socialist victories were won chiefly amongst the Walloons. The Socialists have since well maintained their ground in spite of the efforts directed against them by the Clericals.

Denmark. - Socialism in Denmark is of the Marxist order; but here again, as in Austria, political discontent has driven many to join the Social Democratic Federation. These form the moderate section, and tend to join the Radicals, the extreme revolutionary section

being very small in numbers.

Sweden and Norway. - The Socialist Nivedess and Nonversy.—The Socialist movement has made little impression on these countries, but the party in Norway numbers about 56 unions, with a total membership of 6000. Its avowed aims are to abolish the private ownership of land and of the instruments of production. In the towns of Sweden the movement has made some little headway, but it languishes for lack of funds. A tact and the services between the Socialists and the alliance exists between the Socialists and the

Radicals of Norway.

Netherlands,—The Socialist Revolutionary
party is the leading body in this country. By a
decree of the Cour de Lassation the Socialist

decree of the Cour de Cassation the Socialist League was dissolved in '94 as an illegal association; but 52 branches of it united to form the new body. An official organ was established in '95, with M. Domela-Nieuwenhuis as editor. mencing in November, are open to all artists, and the principle of selection is the same as at the Royal Academy (q v). President, Frank Walton, R.I., Yuce-President, S. Melton Fisher, Secretary, W. T. Blackmore

Sociology. This is the science of the origin,

organisation and development of human society. Of individual workers in sociology Herbeit Spencer undoubtedly stands first in this country. The completion of his great systematic work was accomplished during '56 by the publication of the third volume of 'Principles of Sociology' In America Major Powell, Lester Ward, Professoi Giddings, and the Rev Samuel Dyke are active workers, and many of the American universities have organised separate schools or departments of sociology. Much valuable work on definite and specific problems (such as Railways, Frusts, Wages, etc.) is being done in the American schools, notably at Lennsylvania University, under Mayo Smith Apart from individual workers and the teaching of the Positivist societies, respectively headed by Dr. Congreve and Mr Frederic Harrison in this country, and the special societies concerned with anthropology and economics—apart from these there are as yet few successful attempts to found schools of sociology. The Parts and the Edinburgh Schools were fully de-Saris and the Eminburgh schools were fully oscibled in the $\frac{1}{2}$ 4 ed (q v), and the American School at Hariford in $\frac{1}{2}$ 5 ed. (q v) The General Secretary of the International Institute of Sociology is Dr Rene Worms, 35, Rue Quancampoix, Paris The third international constants. campoix, Paris The third international congress of Sociology in connection with the Paris Institute was held at Paris in July '97, under the presidency of Paul Lihenfeld, Russian senator. An institution bearing the title of The London School of Economics and Political Science was started in Oct. '95, with the co-operation of a number of the leading English economists, and with the aid of the Society of Arts and the London Chamber of Commerce. As a further development of the school an attempt is now being made to establish a great central Library of Political Science and Bureau of Statistical Information in connection with the School of Economics and Political Science (see Powers, and Egypt (map).

ECONOMICS AND POLITICAL SCIENCE, LONDON SCHOOL OF). The proposal is to set up in London an institution somewhat similar to the Musec Social of Paris. The library will include a systematic collection of all available material bearing on the structure and function of public administration, central and local, in all parts of the world. All communications, either in regard to the library or to the school, should be addressed to the Director, 9, John Street, Adelphi, London, W.C. A bibliography of contemporary productions in sociologic study ond in the American Journal of Sociology (pice 2s od per number), published by the University of Chicago Press

SOUDAN.

The Soudan is that section of Africa which lies immediately south of the Sahara. Its limits are immediately south of the Sanara. Its limits air variously defined. It may be said to be bounded by the Sahara on the N., by the Abyssinian highlands on the E., by the lands draining to the Congo basin on the S., and by French West Africa on the W. Within these limits it which the war within these limits of a pop estimated at from 80 to 90 millions. Lying mainly between 5° and 18° N lat., it is entirely within the tropics. Western and Contral Soudan within the tropics. Western and Gentral Soudan are divided into the states of Gando, Sokoto, Adamawa, Bornu, Baghirmi, Wadai and Kanem These have mostly been absorbed into the provinces carryed out by the European Powers Gando, Sokoto, and part of Boi nu are included in Nigeria, under British rule Kuka, on the western shore of Lake Chad, is the capital of Bornu, and has a population of about 60,000. It is a great meeting-place of caravan routes. Adamawa falls in the Cameroons, a German territory, Baghirmi lies mostly within the limits of French Congo, but Wadai and Kanem are so far independent. Wadai extends from Darfur to Kanem, and from French Congo to the Sahara. It has an estimated area of about 150,000 sq. miles, and a pop. of about 1,000,000 The Mabas, a Mahomedan negro race, are the ruling tribe; but there are many Arabs also, and these carry on a wide commerce Kanem 18 a vassal state lying between Wadai and Lake Chad, with an area of about 30,000 sq m and a pop. of about 100,000 Rabeh, a former slave of Zebehr l'asha, has established himself as supreme in part of Bornu and Baghirmi His capital is Dikwa in Baghirmi

Eastern Soudan comprises Darfur, Kordofan, Senaar, the Equatorial Province, and the rich Bahr-ei Ghazal Province The whole territory, covering an area of 900,000 sq. miles, with a population of over 10,000,000, was under Egyptian rule more or less until 82, when the revolt of the Ma.d. altenated it, and broke it up into various districts. After the death of the Mahdi, one of his heutenants, known as the Khalifa, succeeded to his power. and with Omduiman as his capital, has since Darfur and other districts have asserted their independence of him The Bahr-el-Ghazal province consists of the entire district watered by the southern tributaries of the Bahr-el-Arab and Bahr-el-Ghazal. It was subjugated for Egypt by Gessi Pa ha, one of Gordon's lieutenants, in 78, and ruled by him till 81, and by Lupton Bey from that time till the Mahdist rebellion cut off the province from Khartoum and Egypt. It is said to be the lichest and most fertile province in the Soudan, ivory and rubber being abundant Slatin Pasha has rubber being abundant Slatin Pasha has declared that the geographical and strategical position of the province renders its possession of the greatest importance. British influence, by agreements concluded with Germany and Italy in go and or, and apart from her position in Egypt, extends over Darfur and the greater part of the Equatorial Province. Indeed, the

for the reconquest of the revolted provinces were in a sufficiently forward state to allow of expeditions into the districts under the Khalifa's power. The country as far as Berber was reoccupied, and Kassala was taken over from Italy by the end of '97, and in '98 the power of the Khalifa was utterly broken, and Khartoum and Omdurman, were recaptured. France, however, has for some time been credited with a desire to establish herself in the Eastern Sg idan, and rumours were prevalent during 95 that from her possessions in French Congo and in the French Soudan an expedition was being pushed forward by her into the Nile valley. Such an expedition, said Sir I dward Grey, in the House of Commons-in March '95, England would regard as an unfirendly act. However, in '97, from the Ubangi province of French Congo again, and from Obok on the Red Sea, expeditions were despatched towards the Nile, and it was arranged that they should meet at Fashoda, the port of Southern Kordofan. The expedition from Obok failed, but the other, led by Major Marchand, succeeded; and when the British forces beat the Khalifa a gunboat expedition, which was sent down the river, found Major Marchand precariously established at hashoda. His retreat was cut off by a British force, which was at once posted there, and the settlement of the matter was left to the Governments of France and Great Britain For further details see Egypi and France A map showing the present state of affairs will be found on p 218.

French Soudan includes the whole hinterland

of Senegal, and the countries to the north of the Niger Territories, while by an agreement made with Germany in '94 a line of communication with French Congo has been secured. The Niger Convention, which was signed in '98, finally settled the boundaries between Fiench territory and the Gold Coast, Lagos, and Nigeria (For details see articles under those special headings) The territory is by no means organised, and consists chiefly of protectorates, covering an area of about 300,000 sq. m, with a pop. of 5,000,000. In '94 300,000 sq. ni, with a pop, of 5,000,000. In 94 the French reached Timbuctoo, and established themselves there. The administration is in the hands of a Military Commandant, who is under the control of the Governor of Senegal. See Africa, NIGER TERRITORIES, and FRENCH CONGO

South African Republic. See Transvaal.

SOUTH AUSTRALIA.

South Australia is a colony comprising the central section of Australia, and stretching agross the entire continent from north to south. The older portion, South Australia proper, lies between 129° and 141° E. long, and from the sea to 26° S. lat. To this was added in 1863, the Northern Territory, lying between 129° and 138° E. long, stretching up to the Indian Ocean, and containing an area of 23,3500 sq. m. I he capital is Palmerston, on the noble harbour of Port Darwin. The Ferritory possesses a coast-line, counting the chief inlets, of 2000 miles. Mineral and agricultural resources considerable. The population is estimated at Anglo German agreement of 90 recognised the British sphere as extending from Uganda as far as the confines of Egypt. In '96 and '97 the preparations which had long been made

colony, thus constituted, contains 903,600 sq.m.; pop. 361,483. Capital, Adelaide, pop., with surrounding suburbs, 133,252. The settled part in the south of the colony is divided into 44 counties, and 3 pastoral districts. About 200 miles north of Adelaide begins a dry region separating the fertile south from the farther north, which is subject to tropical rains. Three considerable mountain chains traverse the considerable mountain chains traverse this part. There is much fair pasture-land; but the soil and climate of the south are chiefly adapted for the growth of wheat, which has already made the colony the "granary of Australasia," for vine and olive, both of which are now ex-tensively planted. The mulberry thrives, but sericulture has yet to be introduced. Climate of the south one of the most agrecable and healthy in Australia. The chief minerals are copper, gold, silver, and lead, copper being easily first. Executive, the Governor and responsessing the composition of the control of the copper. sible Ministry. Parliament consists of Legisla tive Council and House of Assembly. Council consists of twenty-four members, who sit for four electoral districts, and are elected for 9 years, two from each district retiring every 3 years. \$\int_{50}\$ freehold or \$\int_{20}\$ annual leaseholds, or \$\int_{25}\$ annual rent with a 6 months' registration qualifies for the franchise. The Assembly qualifies for the franchise. The Assembly contains 54 members, representing 27 electoral districts, and is elected triennially by adult suffrage. Membersof both Council and Assembly suffrage. Members of both Council and Assembly are paid \$L200 per annum. The colony is represented in the Federal Council of Australasia The Church of England, the Roman Catholics, and Wesleyans, are the principal denominations. Education is secular, free and compulsory. Wool is the staple export There are 1867 miles of railway and 14,280 miles of telegraph. Bevenue, '07-8, \$L2,506,611, expenditure, \$L2,505,939, imports, '07-8, \$L6,444,28, exports, \$L6,513,347; public debt, \$L24,408,535. See Australia, British Empire (table), and DIPLOMATIC DIPLOMATIC

History, '98... The popular vote on the Federation question showed 25,659 votes for the Bill, and 15,121 against (June 4th) The Budget statement (Aug. 18th) showed that the revenue for the year was £2,649,899, and the expenditure £2,619,220 The public works, including railways, which represented half the public debt, were returning satisfactory interest and the outlook was encouraging

SPAIN.

Alfonso XII. of the House of Bourbon, the late monarch, died in '86, and his posthumous son, Alfonso XIII., born May 17th, '86, will, when he comes of age, be King. Meanwhile the kingdom is under the Queen Regent Maria Christina, who governs during the minority of her son. By the constitution of 1876, Spain is declared. declared a constitutional monarchy, with executive power vested in the King, and the legislative power in the Cortes with the King Cortes consist of Senate and Congress. The Benate is composed of three classes those who sit by right of birth or official position, members nominated by the Crown (these two classes not numbering more than 180 together), and 180 elected by the largest taxpayers of the kingdom and certain corporate bodies. The Congress contains 431 deputies, elected by relations between the two countries at this citizens of 25 years of age who have enjoyed time will be found. The Pope offered his full civil rights in any municipality for 2 years.

Each province has its own parliament, and each commune its own elected ayuntamiento presided over by the alcalde, for municipal and provincial administration. Religion, Roman Catholic. Public worship of any other creed forbidden. Education is free but inefficient. The principal products are wine, cereals, minerals, and cotton textiles. Area, including the Baleau c and Canary Isles, each considered a province, 197,670 sq m.; estimated pop. 17,650,234. Estimated revenue, 97.8, £43,591,638; expenditure, £42,597,469; public debt, £309,698,700,000 of Cuban debt; importa, 97, £31,733,044, experta, £36,997,447. See Col.onles of Europi-An Powers, Cuba, Dipplomatic, Foreign Armies, Foreign the Baleanic and Canary Isles, each considered DIPLOMATIC, FOREIGN ARMIES, FOREIGN NAVIES, and Philippine Islands.

Political Parties.—Parties have been

for years much broken up and intermingled. The Liberals under Schor Sagasta won the general election of '93, and held office for two years Their adherents numbered 322. years Their adherents numbered 322.
Opposed to their were 48 Conservatives, led by by the late Señor Canovas del Castillo, 13 dissident Conservatives, 23 extreme Republicans, 16 moderate Republicans or Possibilists, led by Señor Castelar, and 6 Carlists. The Possibilists afterwards joined the liberals and 2000 for the possibilists. afterwards joined the Liberals, and soon after Senor Castelar gave up politics and retired into private life. Disagreements in Senor Sagasta's cabinet led to the accession to office of Senor Canovas del Castillo in '95 At the General Election in April '96, about 300 Conservatives, 100 Liberals, 10 Carlists, 10 Independents, 40 dissident Conservatives, and 3 Republicans, were returned. Party distinctions were to a learn return to Party distinctions were to a learn return to be a conservative believed of the remarks. large extent obliterated afterwards by the difficulties in which the country found herself owing to en nts in Cuba and the Philippines. cwing to emits in Cuba and the Philippines. On the death by assassination of Señor Canowa del Castillo in '97, there was considerable disagreement among the Conservative majority, and a Liberal (abinet under Schör Sagasta eventually took office. This Cabinet held office through the war, and conducted the peace negotiations, but was evidently weakened by the humiliations thus necessarily inflicted on the countries bearing the service of the second of the countries bearing the service of the second of t the country Senor Gamazo retired from the Cabinet in Oct. '98, and formed a new division

of the Liberal party

**History, "9N.-Much unrest was caused by the position of affairs in Cuba, and the possibility of American interference threatened by the Jingoes of the U.S.A. awoke great resentment. Matters, however, remained quiet till the Spanish ambassador at Washington, Senor Dupuy de Lome, had to resign, owing to the publication of an indiscreet letter of his reflecting on the President The Government officially disclaimed his letter, and he was succeeded by Schor Polo Bernabe (Feb. 14th). Immediately on this incident followed the disship Maine, lying in Havana harbour (15th), and the relations between the two countries distinctly worsened. The inquiry into the affair made by the Spanish Government resulted in a report that the cause of the explosion lay inside the ship, but the American report was in direct opposition to this, though the responsibility for the explosion was not actually attributed to Spain. In the articles on CUBA and the UNITED STATES a fuller account of the relations between the two countries at this time will be found. The Pope offered his

ties should be suspended. The great Powers also intervened, recommending that hostilities in Cuba should cease (oth). To this the Government agreed, and telegraphed to General Blanco to proclaim a truce. Before anything effectual could be arranged, however, the President's message to Congress led to a demand from the United States Government that Spain should at once evacuate Cuba. The Spainsh Government, before receiving this demand, which took the form of an ultimatum, broke off diplomatic relations, and a state of war forthwith existed (21st). The Budget for '98-9 showed an estimated revenue of 866,014,869 pesetas, and expenditure estimated at 865,008,774 pesetas. In view of the war the Government were empowered to issue new currency notes up to ties should be suspended. The great Powers empowered to issue new currency notes up to 250,000,000 pesetas, and to take other means of raising money. The first serious blow of the war fell at Manila, where the Spanish aquadron, having only obsolcte vessels and inefficient ordnance, was completely destroyed by Admiral Dewey. This caused much depression in the country and a Cabinet crisis, which ended (May 16th) in the reconstruction of his ministry by Senor Sagasta, who got rid of those of his colleagues who had desired peace, and replaced them by men who were professedly prepared to continue the war with energy. Spanish naval power in Cuban waters was crushed with the destruction of Admiral Ceivera's fleet, which, after being shut up in Santiago for some time, made a gallant attempt Sanjago to secape—only, however, to be sunk or captured (July 3rd). A second fleet, destined for the l'hilippines, had passed through the Suez Canal by this time, but on receipt of this news was recalled (8th). These disasters naturally suggested the window of presented they suggested the wisdom of peace enegotiations, suggested the wisdom of peace and containing, but such differences of opinion prevailed in the Cabinet that Sehor Sagasta and his colleagues presented their resignations (11th). They still continued, however, to exercise their functions, and a decree was published (15th) suspending the constitutional guarantees, and proclaiming military law. Meanwhile the invasion of Porto Rico by an American force under General Milestook place (25th). The landing was made at Guanica. Overtures for peace were then made at Washington by the Government through the French ambassador (26th), and were accepted The American terms were that Spain should relinquish and evacuate Cuba, and cede l'orto Rico and the other Spanish islands in the West Indies, and certain islands in the Ladrones, to the United States. The United States, more-over, were to hold Manila city and bay pendover, were to note manife city and bay pending the conclusion of a treaty of peace, which should determine the control, disposition, and government of the Philippines (Aug. 2nd). The Government accepted these terms (10th), and a protocol embodying them was signed at Washington (12th). Hostilities were formally suspended by a proclamation from the President, but before this proclamation could reach Manila it was bombarded and captured by the joint action of the sea and land forces under Admiral Dewey and General Merritt (13th). The Cortes reassembled (Sept. 5th), and Senor

the war, and declaring that the constitution had been infringed by the signing of the peace preliminaries without the previous consent of the Cortes (8th). This was discussed in secret session, after at the Republicans, Carlists, and followers of Señor Romero Robledo withdrew in a body as a protest against the action of the President of the Chamber. the action of the President of the Chamber.

The Bill authorising the cession of territory was, however, passed by the Cortes (14th), and the session was then closed. The Peace Commissioners met at Paris early in October. The American Commissioners declared that the United States refused to assume either the sovereignty over Cuba, or responsibility for the Cuban debt in any form. They also demanded the absolute cession of the Philippine Archi-Io the first declaration the Spanish Commissioners strongly demurred, but eventually accepted provisionally, and Jan. 1st, '99, was fixed as the limit of time for the evacuation of Cuba They declined, however, to discuss the question of the cession of the Philippines, and, to avoid a rupture, suggested that the matter should be referred to arbitration (Nov 16th). To this, however, the American ommissioners declined to agree (18th).

Spanish Colonies. See Colonies, etc.,

OF EUROPEAN POWERS.

Speaker. The title of the presiding officer of a legislative assembly. The Speaker may hold office until a dissolution. Should the office become vacant during a session, the new Speaker then elected is presented for the royal approbation, but does not claim the privileges of the House. This great officer has a residence in the Palace of Westminster, and received a salary of \$\(£_{500}\) per annum; he r\(\text{ank} \) as a first Commoner, and is usually awarded upon retirement a pension of \$\(£_{400}\) and a peerage. There was no contested election for Speaker from 1839 to '95. The following have filled the office since the meeting of the first reformed Parliament: Sir C. Manners-Sutton (first elected '17), '33-5; Mr. J. Abercromby, '35-9, Mr. C. Shaw-Lefevre (the late Viscount Eversley), '39-57; Mr. J. E Denison (afterwards Viscount Ossington, and since deceased), '57-72; Sir H. Brand (the late Viscount Hampden), '72-84, Mr A. W Peel, now Viscount Peel, '84-95, Mr. Gully since April '95. The Chairman of Ways and Means acts as deputy Speaker in the unavoida salary of £5000 per annum; he ranks as first Means acts as deputy Speaker in the unavoidable absence of Mr Speaker. The Speaker of the House of Lords is the Lord Chancellor for the time being. The Charman of Committees and several other peers are authorised by commission to act as deputy Speaker in the absence of the Lord Chancellor; and should none of these be present any lord may be chosen to act. See Commons, House of, and PARLIAMENT AND PARLIAMENTARY PROCES DURE.

Spencer, Herbert, was b. at Derby 1820. by his father, a teacher of mathematics at Derby, and by his uncle, a clergyman. Became a civil dent, but before this proclamation could reach Manila it was bombarded and captured by the joint action of the sea and land forces under Admiral Dewey and General Merritt (13th). The Cortes reassembled (8ept. 5th), and Senor Sagasta read a decree empowering the Government to bring in a Bill authorising the renunciation by Spain of her sovereignty ever her colonial possessions in conformity with the terms arranged with the United States. The Republican party introduced a motion condemning the Government for its conduct of conformity editions and has been translated into many languages. In '82 he visited the United States. Among his other important works are: "First Principles"; "Principles of Biology," 2 vols.; "Principles of Sociology, 3 vols.; "Principles of Ethics," 2 vols.; "The Study of Sociology"; "Essays," 3 vols.; "The Man versus The State." The third volume of the "Principles of Sociology," completing the scheme of the great philosophical work—a system of synthetic philosophic—which he had set himself, was published in Nov. '96, and a number of distinguished men of letters and of science combined to mark the occasion by requesting Mr. Spencer to suffor his portrait requesting Mr. Spencer to sit for his portrait requesting Mr. Spencer to sit for his potential to Mr. Herkomer, with a view to its being placed in one of the national collections. Mr Spencer consented to the request. The portrait was exhibited at the Academy exhibition 198. Despite chronic ill-health, Mr. Spencer is bespite enrone ill-neatth, Mr Spencer is now devoting himself to the preparation of a revised and enlarged edition of his "Principles of Biology," of which the first volume has recently appeared Mr Spencer has always declined academic and other honours. Address The Athenæum, S.W., and 5, Percival Terrace, Brighton

The London Spiritualist Alli-Spiritualism ance, Ltd., was founded in 1884, in succession anoe, Ltd., was founded in 1884, in succession to other societies of the same nature, which had preceded it; and was incorporated in '96 The chief work of the society has been to maintain and expound the principles of Spiritualism, viz, a belief in the existence and life of the spirit apart from, and independent of, the material organism, and in the reality and value of intelligent intercourse between spirits em-bodied and spirits disembodied. While it has listened to other investigators who expound other views, and has offered a free platform at its meetings to those whose opinions, however interesting, it does not feel able to accept, it has been the nucleus of old Spiritualists, who have proved their faith, and desire to maintain it. To their body has been added year by year agradually increasing number of new inquirers The Offices of the Alliance are at 110, 5t Mai-tin's Lane, WC The organ of the Society is Light, founded in 1881, the recognised exponent of educated thought in this country on the subjects of which it treats. Circulating in subjects of which it treats. Circulating in every country, the world through, it conveys an impression, which nothing else can, of the rise and progress of Spiritualism. The first President of the London Spiritualist Alhance and editor of Light was, until his decease, Mr. W. Stainton-Moses, M.A. (Oxon), whose writings, "Psychography," "Spirit Identity," "Spirit Teachings," etc., etc., are well known The present President of the Alliance, and editor of Light, is Mr. E. Dawson Rogers. A valuable library of works on psychic science A valuable library of works on psychic science is available at the offices at St. Martin's Lane Meetings are held for the discussion of matters of interest to students of psychology, and information can always be obtained by inquirers In the United States, according to a recent census report, the number of Spiritualists has increased till there are now

England, being incorporated by royal charter in 1701. On the Society's list there are 744 ordained missionaries, including 11 bishops; and of these 249 are labouring in Asia, 171 in Africa, 29 in Australasia and the Pacific, 209 in North America, 48 in the West Indies and South America, and 38 (chaplains) in Europe—the number of languages in which the Gospel is preached being 54. In the Society's colleges there are about 3200 students; and 2900 lay teach(1)s are employed in the various Missions. Neally 40,000 children are receiving instruction in the Mission Schools in Asia and Africa. tion in the Mission Schools in Asia and Africa.

Sprigg, The Rt Hon Sir John Gordon,
P.C., K.C.M.G., D.C.L. (Oxon), is a son of the late Rev. James Sprigg, A M, of Jpswich, and was born in 1830. After working in the House of Commons as a member of Messra. Gurney's of Commons as a member of Messrs. Gurney's staff, he went for reasons of health to South Africa in 58 and settled there Elected in 69 to represent East London in the Cape Parliament, he soon gaine do ffice, and has been three times Prime Minister of the colony. His second term of office closed in '90, when Mr. Rhodes succeeded him; but in '93 he became Finance Minister under Mr. Rhodes, on whose fall in Jan '96 he became Prime Minister for the third time He came to England as the representa-tive of the Cape at the Jubilee festivities in '97. He resigned with his fellow-Ministers after a vote of want of confidence had been carried by

Note of want of confidence had been carried by a majority of 2 votes by the House on reassembling after the general election (Oct. 21th), '98. Stalker, Rev. James, D.D. was born in 1848 at Crieff, and educated at Edinburgh University, where he graduated M.A. His theological studies were carried on at the New College (Edin.), and at Beilin and Halle. In '74 he was ordained minister of St. Brycedale Free Church, Kirkealdy, and after a very successful pastorate was translated to Free St. Matthew's, Glasgow, in '87. Dr. Stalker is one of the most popular was translated to Free St Matthew's, Glasgow, in '87 Dr. Stalker is one of the most popular religious writers of the day His works are: "The New Song," "Life of Christ," "Life of St. Paul," "Imago Christi," "The Preacher and his Models" (being the Yale Lectures on Preaching), "The Four Men," "The Frual and Deuth of Jesus Christ," and "The Two St. Johns." Address 6, Claremont Gardens, Claremont Gardens, Johns." Address 6, Claremont Gardens, Glasgow "
"Standard, The" First published in 1827.

It is in the front rank of the political journals that rose into importance almost immediately after the abolition of the Paper Duty (for, lts political principles are Conservative; but it reserves, and often exercises, the right of sharply criticising the action of the Conservative party. During the American Civil War, the letters of its correspondent "Manhattan" the letters of its correspondent "Manhattan" were very popular. Among its war correspondents have been Mr. G. A. Henty and Mr. Cameron, the latter of whom was killed in the Bayouda desert. The present editor is Er. W. H. Mudford The Evening Standard (1857) is an evening edition of the morning paper.

Standing Committee. See l'Arliament AND PARLIAMENTARY PROCEDURE.

Standing Orders This term was originally applied to certain Orders made by either house of parliament to regulate its own procedure. Orders made by either house may in respect of their time for remaining in force be classified.

spiritualists has increased till there are now a spiritualists has increased till there are now a spiritualists here are local organisations in almost all towns of any importance. "S. P. G." (Society for Propagation of the Gospel in Poreign Parts). The oldest Missionary Society connected with the Church of the control o

are permanent regulations, although liable to be suspended upon extraordinary occasions—s.g., to secure the rapid passing of bills of a pressing nature. (2) Sessional Orders, which continue in force only during the session in which they were made, although they may be renewed from year to year. (3) Orders indefinite in their duration. Of these three classes the Standing Orders are the most important for purposes of procedure. The Roll of Standing Orders of the House of Lords has been regularly published at intervals. But until 1854 the Standing Orders of the House of Commons, with the exception of those relating to private bills, had never been published by authority. The Commons Standing Orders relative to public business were revised and reprinted in '88 (see Parliament and Parliamentary Procedure) and the Lorde Standing Orders were considered and amended in '89.

"Star, The." A Radical evening paper, devoted to the interests of the advanced Democratic movement both in Great Britain and Ireland. It first appeared Jan. 17th, 88, and has attracted attention by its promptness in obtaining information, its outspoken articles, large size, and wide circulation. The daily sale was certified in June '96 to exceed 210,000 copies Office, Stonecutter Street, EC State Children's Aid Association.

State Children's Aid Association The object of this Association is to obtain individual treatment for children under the guardianship of the State. It therefore seeks to obtain the dissolution of large aggregated schools, so that the children may be brought up, where possible, in families; to dissociate the children from all connection with the workhouse and the officials who have to do with pauper cases, and to obtain for the State further powers of control over neglected children. The Charman is Viscount Peel; the Hon. Sec., Mrs. Francis Rye; the Sec., Miss Pechey, and the Office 6. Old Broad Street F.

the officials who have to do with pauper cases, and to obtain for the State further powers of control over neglected children. The Charman is Viscount Peel; the Hon. Sec., Mrs. Francis Rye; the Sec., Miss Pechey, and the Office, 61, Old Broad Street, E (

State, Great Officers of (1) The Lord High Steward, (2) The Lord High Chancellor, (3) The Lord High Chancellor, (3) The Lord High Chancellor, (3) The Lord High Council, (5) Lord Frivy Seal, (6) Lord Great Chamberlain, (7) Lord High Constable, (8) Earl Marshal, and (9) the Lord High Constable, (8) Earl Marshal, and (9) the Lord High Admiral. They are always of the Privy Council, and the first five take precedence of all dukes who are not of the blood royal, while the others have place of all peers of their own degree. Nos. 1 and 7 when existing, and Nos. 6 and 8, have no share in the government of the country, and the duties of Nos. 3 and 9 have long been performed by commission. See Chancellor, Treasury, and other articles.

State Pensions. For an exhaustive article on this subject, see eds. '93 and '94. See also OLD AGE PENSIONS

Stationery Office (Princes St., Westminster) provides the public offices and Parliament with books, stationery, etc., and arranges for the greater part of the printing required by them in Oct. '88 the Controller of the Stationery Office was appointed by Letters Patent, under the Great Seal, to exercise all rights and privileges in connection with copyright, the property of Her Majesty. Controller, T. D. Pigott, C.B. (£1500), Assistant Controller, E. P. Plowman

Stationery Office Publications. The vast number of papers issued to the public under the superintendence of Her Majesty's Stationery Office renders it impossible to enter much

into detail; but they comprise books affecting the military, naval, and civil services, reports of the scientific results of the voyag: of H.M.S. Challenger calendars of State Papers, chronicles and memorials, and publications of the Record Commissioners, rules under the various Acts of Parliament, papers issued by, or affecting, the Board of Trade, the Education, and Science and Art Departments, and the Local Government Board, Explosive, and Factory Books and Forms, Customs Forms, Survey publications, and Customs Forms, Survey publications, and numerous miscellaneous books. The following are a few of the most important books issued since our last edition: Vol. xiii. of The Revised Statutes, covering the years 1868 to 1871, and containing all the unrepealed Acts of that period; Statutory Rules and Orders of a public and general character issued during 1897; and the cheap edition of the Public General Acts passed in 1898. On Geology we have Memoirs on Berwick-on-Tweed, Bognor, Bournemouth, and on Soils and Subsoils from a Sanitary Point of View. Papers and books of passing and permanent interest, from all departments, have been constantly appear-ing. The Board of Trade Journal (monthly) contains useful information for merchants and others, while the Kew Bulletin (monthly) ought to interest a large circle, containing as it does such valuable notes on Economic Produce and Plants, and the Journal of the Board of Agriculture and the Labour Gazette appear Agriculture and the Labour Gazette appear regularly. Of the Record Office publications we have Calendars of the Reign of William and Mary, vol. ii; State Papers on Venice, vol. ix., Mary, vol. 11; State Papers on Venice, vol. 1x., Treasury Papers, vol. v11, and several vols. of Patent and Close Rolls of Edward 1, Fdward 11, and Acts of the Privy Council of England, vol xv11. The publishers, who also supply all Parliamentary publications, including the Reports of the Historical Manuscripts Commission, are Messrs. Eyre & Spottiswoode, East Harding Street, London, E.C., Messrs. Menzies & Co., 12, Hanover Street, Edinburgh, and Messrs. Hodges, Figgis & Co., Ld., 104, Grafton Street, Dublin. Fice Public Libraries are supplied by these agents at a discount of 25 per cent from published prices The Admiralty Charts and other Hydrographic Publications are obtainable from Mr J D Potter (sole agent for the sale flom Mr J D Potter (sole agent for the same of the Admiralty Charts), 31, Poultry, E.C. The Geological Survey Maps are published by Mr. E. Stanford, Charing Cross, London, S W, Messrs. Menzies & Co., 12, Hanover Street, Edinburgh, and Messrs. Hodges, Figgis, & Co., Ld, 104, Grafton Street, Dublin. Patent Specifications are only to be obtained at the Patent Sale Office, Cursitor Street, Chancery Lane, London, E.C. Stead, William Thomas, is the son of Rev. W. Stead, Congregational minister, Howdon-

W. Stead, William Thomas, is the son of kev. W. Stead, Congregational minister, Howdon-on-Tyne, and was b July 5th, 1849; married '73; ed privately and at Silcoates; apprenticed (63) to commercial house at Newcastle Quay. Appointed editor of the Northern Echo '71; and assistant-editor (80) to Mr. John Morley (then editor of the Pall Mall Gasette); succeeded him as editor-in-chie '83; interviewed Gordon at Southampton (Jan. '84); wrote "The Truth about the Navy" (Oct. '84), "The Maiden Tribute to Modern Babylon" (July '85), "No Reduction no Rent," a record of a visit to Ireland in the autumn of '86, "The Langworthy Case" (78), "Truth about Russia," written after a visit to that country in May and June '88, and "A Guide to the Paris Exhi.

bition" (89). Went in October to Rome, to gather material for a series of "Letters from the Vatican," published in book form under the tule of "The Pope and the New Era." Resigned the editorship of the Pall Mall Galette on his foundation of the Review of Reviews, of which he is the editor, and of which three independants addited edities are published in London. noundation of the review of reviews, of which he is the editor, and of which three independently edited editions are published in London, New York, and Melbourne. In July '03 he published a new periodical, Borderland, devoted to the subject of Psydmical Research, but this was suspended in Oct. '97 In '95 he began the publication of the "Masterpiece" Library, with a weekly issue of the Penny Poets, of which in the first four months 2,000,000 copies were sold. The Penny Popular Novels, of which more than 9,000,000 have been sold, followed. His Christmas publications in '96 and '07 dealt with the Jameson Raid and the State of New York. In '98 he undertook the editing of "The Russian Library," No ibeing a translation of Pobedmostical's "Reflections of a Statesman," and in the autumn visited the capitals of Europe en route for Russia, and afterwards published a volume Russia, and afterwards published a volume containing the results of his journey.

Steel. See TRADE, '08

STOCK EXCHANGE MOVEMENTS, '98

The year was a very trying one for the Stock Exchange-wars, rumours of wars, and prepa rations for war, strikes, and monetary disturbances following one another in continual succession. In the very early part of the year events in the Far East gave rise to a fear of international complications. During February and March the relations between the United States and Spain became very strained, but it was not till April 21st that was was actually declared, and curiously enough this was the signal for a recovery in American railway shares, which had fallen heavily on the prospect of war. Not was it Spanish and American stocks alone that were affected; for it was during April that Brazilian bonds, Mexicans, talians, and indeed all classes of stocks, from consols downwards, were very much depressed, the Bank of England raising the minimum rate of discount on the 7th of the month from ; per October 14th, to 4 per cent., in order to check the drain of gold to America. Nearer home quoted ridin, and although there were other troubles such included the recovery from the worst, the prices were dispute with France about the delimitation of and indeed all first-class securities, were

frontier in West Africa—a trouble which was, however, got over through mutual concessions. This settlement, however, hardly improved the position of the markets, owing to the continuance of the struggle for supremacy in China; but some improvement occurred when the announcement was made that this Government had come to an understanding with Russia as to the pait each was to play, and the markets further took courage when it became known that England and Germany had come to a friendly agreement on certain points in South Africa, and for a time the markets were almost buoyant, the Bank 1 ate having in the meantime diopped to 1½ per cent on May 26th, to 1 per cent on June 20th In September, however, the continued demand for gold from Berlin necessitated a fiesh advance, and on Sipt 22nd the rate was again rused to 3 per cent, followed by a further move to 4 per cent on Oct 30th, the banks and discount houses responding by naving their allowance on deposits at short notice to 21 per cent, a figure which had not been reached for several years. All these causes, monetary and political, tended to check speculative business on the Stock Exchange; yet, comparatively speaking, the prices of the good class of stocks were fairly well maintained, the demand for dividend-paying investments being more prominent than ever

Consols did not fluctuate more widely than usual, so far as regards the difference between the highest and the lowest points touched are concerned, but the changes were more sudden, though the tendency was downwards ever since the beginning of the year. During the depression of April the price went as low as 100%, but recovered to 112 during May, afterwards falling away again until the latter part of October, when, on the Fashoda incident reachabout 1001 to 165, the latter figure being reached on the 25th of the month. This was followed by an immediate rally to 1072, and in a few days the price was again 1001, and afterwards 110, for although the political situation had not cleared, money became much easier as soon as November turned India stocks and Colonial bonds showed the same drooping tendency, for invariably the best prices were

distinctly easier Rupee paper was steady during the whole year, which is due to the fact that the fluctuations in the price of silver has been comparatively slight, while the measures adopted by the India Government tended to keep the rate of exchange at about is 4d.

Foreign Government stocks moved a good deal so far as the lower-priced lot are concerned, but the Maine disaster in February sent the modes on the Paris Bourse; so far as the lower-priced lot are concerned, but the Maine disaster in February sent the modes of the price improved to nearly 63, were to the Maine disaster in February sent the modes of a first which there was a sent the price which there was a sent the reason of the paris Bourse; so far as the lower-priced lot are concerned, but the Maine disaster in February sent the modes of a first which there was a sent after the first after which there was a sent after the first after which there was a sent after the first after which there was a sent after the first after which the sent after which the sent after the first after which the sent after the first so far as the lower-pinced lot are concerned, but, considering the great interests involved, such stocks as Russians, French. Egyptians, Turkish, and Hungarian kept very steady, the changes representing little more than the periodical deduction of the interest. One feature to be an obticed is the disappearance of the Turkish moticed is the disappearance of the Turkish in a mail fluctuations, but generally the price was small functions, but generally the price was small functions, but generally the price was small functions, but the Spanish Finance Turkish debt and placed the control of the actually held by foreigners and those held at home, the interest on the former only being paid in gold; and these bonds had to be stamped for verification, and these only could be dealt in on the London Exchange. Portuguese, although in no way affected by the war, fell to 16½ in April, but September saw them up to nearly 25 upon a rumour that England had acquired from Portugal the territory of Delagoa Bay, and in consideration thereof would guarantee the Portuguese debt; but, in the absence of confirmation, the price soon gave way again Greeks were dull in the beginning of the year, but steadily improved, and touched the best on the successful issue of the new indemnity loan in May, the rise being pretty well maintained. Italians fell to 88½ in April, and were not strong at any time, and especially during the Milan riots in May, but thoughout the maiket has been supported artificially. Argentines fluctuated a good deal, but recovered from the depression of the early part of the vear, the gold premium falling to 138 in the beginning of November. Chilians went very flat in April, and were rather affected by the boundary dispute with Argentina, but improved in August Brazils, after being flat with other stocks, improved on the publication of the funding scheme in June, and kept steady. The Chinese loan for £16,000,000 was very feebly subscribed, and the price went to a discount, but later on recovered to an extent, Japan loans also improving, after being easy.

proving, after being easy. In Home railways the year opened buoyantly, owing to the expectations formed from the large traffic increases during the second half of '97, but when it was found that these did little more than cover the extra cost of working prices began to give way, and although there was afterwards a recovery, in most instances the best prices were at the beginning of the year The great feature was the announcement that the South-Eastern and the Ohatham companies had agreed to work together, pooling the traffics from certain places, and air anging a joint service in others-in fact, an amalgamation of sending Chatham ordinary stock up to 24, both the preference stocks also improving, the second especially, as the profit allowed a dividend at the rate of 23 per cent. The advance was, however, to some extent lost, and it was to be noted that Dover "A" stock, instead of improving with Chathams, began to iecede, and after being 117, alowly fell away until it changed hands on Oct. 25th at 1013, though quickly recovering to 105. The coal strike in South Wales cost the forsat Western over £200,000 in the first six months, and reduced the dividend to 2½ per cent.; and for the first four months of the second half-year there was a further loss of £146,000, the Taff Vale road also suffering so severely that it and the Rhymney had to pass the taff where dividend entirely. The other treds cell their dividend entirely The other stocks call for no special notice, although the fluctuations were rather wider than usual, especially when the fact is taken into account that there was very little speculation in those stocks Traffic for coal on the Great Central was opened in July, and for passengers in the beginning of November, but it had but little effect on the price The City and Waterloo electric railway was opened in August, but apparently it did not reduce the South-Eastern traffics. The dividend announcements for the first half of '98 were not at

being even more marked than in the second half of '97. The demand, however, for railway stocks for investment was so well maintained that the quotations did not recede very far, and in the early part of November this was so marked that those sellers who could not deliver the stock sold had to nay for the delay.

the stock sold had to pay for the delay.

The year opened very hepefully as regards both Grand Trunk stocks and Canadian Pacific; and although there was in the early months commenced a cate war, traffics increased to such an extent that great hopes were entertained that Trunk first preference stock would receive a dividend. This was, however, not the case, because expenses were greater than anticipated, and Trunk firsts, after advancing to 763, fell away to a little over 60—from which, however, there was a quick recovery when traffics again began to show increases. Canadian Pacific had in the meantime, after rising to 93, fallen back to 74, in spite of a dividend of 23 per cent., but again recovered to 84, on the probability of an early settlement of the rate war. Algentine rails moved with the harvest prospects of the country, although political movements were not entirely absent from the calculations, quotations fluctuating with the changes in the gold premium at Buenos Ayres. Ottoman rails were very disappointing, the fall on the dividend announcement being very severe.

American railway shales to a great extent reflected the phases of the war with Spain. In the carly part of the year the tendency was buoyant, but soon the Spainsh, or rather the Cuban, question became active, and after a good deal of sensation war was declared on Apiil 21st. But before this prices had fallen very severely, so that as soon as war was declared they began to lecover, the improvement going on with slight interruptions until the final collapse of the Spanish fleetat Santiago, when prices were generally above the quotations on January 1st, although below the best of the year. Business was fairly brisk throughout, until in November the market was really buoyant, prices showing a decided disposition to advance when the tenor of the speech of the Prime Minister, Lord Salisbury, at the Mansion House banquet on Nov oth, was made known, and later on the result of the Congressional elections, which gave the Republicans a majority in both Houses.

Mine shares were not a prominent feature at any time during the year. There were the usual ups and downs, but at no time was there any real buoyancy. A good deal of interest centred in Chartered shares when the crushing results of one or two mines in Rhodesia were expected, but they did not, when known, have any effect on prices. Most mines advanced more or less, but on the whole the mining-market was very stagnant, nor do the alternations in prices call for much comment. Dealings in mine shares were not actually dead, but the public held aloof from the market, and indeed the stagnation was such as to prohibit fresh ventures to any extent.

coal on the Great Central was opened in July, and for passengers in the beginning of November, but it had but little effect on the price. The City and Waterloo electric railway was opened in August, but apparently it did not reduce the South-Eastern traffics. The dividend announcements for the first half of '86 were not at all satisfactory, the growth of the working cost 'teatures, but they failed to hold the best price!

reached. Cycles collapsed with Hooley, but afterwards recovered, though not to the extent of the collapse. Russian oil shares were a feature for a time, but failed to sustain interest. Altogether the stock markets were anything but active or good; but, considering all things. business was fairly active, and taking into account the adverse influences at work for nearly the whole of the year, prices sustained themselves remarkably well, for the extreme lowest prices were really more nominal than real.

Stonyhurst College, near Blackbuin. Directed by the Jesuit Fathers. First founded in 1992 at St. Omers in Flanders; transferred to Stonyhurst in 1794. Rector, the Rev. J Browne, S.J. The course of studies includes the street of the state o classics, mathematics, science, philosophy, modern languages, preparation for the Oxford and Cambridge Certificate Examinations, the London University degrees, and for the Army The Observatory attached to the College tuns out excellent solar and other work. The centenary of the College's existence at Stonyhurst was celebrated in July '94.

Straits Settlements. A British Crown colony in the Malay Peninsula, deriving its

name from the Straits of Malacca, which separate the Malay Peninsula from Sumatra, and form the great trade route between India and China. Area about 1472 sq. m.; pop. 549,000 The capital of the colony and seat of government is Singapore. The Governor is assisted by Executive and Legislative Councils, the first consisting of nine official members, and the second, of these with seven non-official members, two of whom are nominated by the Chambers of Commerce of Singapore and Penang. The constituent parts are as follows Singapore, an island off the southern extremity of the Malay Peninsula, area 205 sq m, pop 184,554. It is hilly and forested, fertile, and not unhealthy for Europeans. Chief local products, pepper and gambier The city of Singapore is a great commercial centre for the East a commodious harbour, protected by fortifica-tions. It is the headquarters of H M military and naval forces in these regions The usual and naval forces in these regions. The usual garrison consists of a battalion of infantry and two batteries of artillery .- Penang, or Prince of Wales' Island, lies 360 miles north of Singapore, and about two miles off the coast of Province Wellesley. Area 107 sq m, pop. 123,886 The port and capital is Georgetown, better known as Penang. A Resident Councilor con-trols the administration.—Province Wellesley is politically one with Penang. It stretches 45 miles along the coast of the mainland. Area 270 sq. m., pop. 108,117.—The Dindings, about 80 miles south of Penang, consist of the island of Pangkor and a small strip of territory on the mainland. Politically this settlement is a part of Penang.—Malacoa is a town and territory ato miles south of Penang. Its coast, rocky and barren, extends 42 miles. Area 505 sq m. pop. 92,170. It is ruled by a Resident Councillor, subject to the Governor of the colony— Included in the administration of the Straits Settlements are the Cocos (or Keeling) Islands, Settlements are the Goose (or Koeling) Islands, that the total receipts were 75,607,000 fr. (or a small coral group lying some 700 miles south-west of Java (area 9 8q. m., pop. 560), and Christmas Island, which lies 200 miles S.W. of Java.—The Protected States. On the mainland there are several protected Malay States which, though not part of the colony, are subject to the supervision of the

Governor. These countries are rich in natural resources, and for several years Perak and Selangor have exported the greater part of the Straits tin. The soil is fertile, and there are vast areas of forest land available for conversion into plantations; but mining at piesent makes agriculture a secondary consideration. Perak, on the western coast of the pennsula; area 10,000 sq. m., pop 214,254. Capital Taiping. The ports are Taluk Anson and Port Weld Selangor; area 3500 sq. m., pop 81,502 The capital is Kwala Lumpur. Sungei Ujong and Jelebu, together with Megri Sembilan, the name given to a federation of nine small states lying to the north and east of Malacca, are administered by one Resident. Area 3000 sq m, pop. 68,000. Planting, especially of coffee, is progressing here. Pahang, the latest acquired of the Malay States, contains a lot of gold, but needs funds or its development Area 10,000 sq. m., pop 64,000 Johore is an independent Malay State under Sultan Ibiahim, at the southern extiemity of the peninsula Area 9,000 sq. m., pop about 200,000 Capital Johore Bharu. Perak, Schangoi, Pahang and Negri Sembilan agreed to foim one administrative federation under a British Residut/General as Like Sec. under a British Resident-General in July '96. See British Empire (table) and Divionatic.

Stubbs The Very Rev C. W., D D., Dean of Ely, comes of the same Yorkshire stock as his kinsman Bishop Stubbs, and was born at Liverool 1n '45 He was educated at the Liverpool pool in '45 Me was educated at the Liverpool Royal Institution School, and Sidney-Sussex College, Cambridge, of which he was an exhibitioner. He took his degice in Mathematical Honours in '68 He also took the Le Bas University prize for an English cssay He was ordained in '68, and became a curate at 5t. Mary's Church, Sheffield In '71 he was appointed vicar of Grandborough, Bucks, in '84, vicar of Stokenham, Devon, and in '88 rector of Wavertree, near Livetpool. He was select preacher tree, near Liveipool. He was select preacher at Cambridge in '81, '94, and '96, Lady Margaret Preacher '96, select preacher at Oxford in '83 and '98, and has attracted much attention by his sympathy with the workers of the country and his sermons on social subjects. He is a Broad Churchman and a well known Liberal. His published works include "God and the People," published works include "God and the People," a volume of selections from the writings of Mazzim, "Village Politics," "Land and the Labourers," "Christ and Democracy," "For Christ and City," "Christ and Economics," "Christus Imperator!" a "Creed for Christian Socialists," "Historical Memorials of Ely Cathedral," and "Charles Kingsley and the Christian Social Movement."

Suez Canal (For history of the canal see previous eds.) The report presented to the annual meeting held at Paris on June 7th, '98, when the Prince d'Arenberg presided, showed

with 191,215 passengers. Of these 2103 were merchant ships, 727 mail steamers, 31 vessels in ballast, 112 war vessels and military transin ballast, 112 war vessels and military trans-ports, 3 steam yachts, 8 tugs, and 2 dredgers; 1905 vessels were English, 325 German, 206 Dutch, 202 French, 78 Austrian, 71 Italian, 48 Spanish, 48 Norwegian, 44 Russian, 36 Japanese, 7 Turkish, 3 Chinese, 3 Egyptian, 3 American, 2 Danish, 2 Siamese, 1 Mexican, 1 Portuguese, and I Swedish. The aggregate net tonnage was 7,899,373,841. In '96 the number of vessels was 3409, and the tonnage 8,560,283,609 The decline was attributed to commercial depression. The average duration of the transit was given at 15 hours 36 minutes, or a further reduction of 17 minutes. On behalf of what 18 known as "the Defence Committee," Baron Delort de Gleon denounced the London programme for the reduction of the rates, pointing out that the dividend had fallen from 1051 fr. in of to 92 ft 36 c. in 92, 90 ft. 37 c. in 93, 90 fr. in 94, 92 ft in 95 and 96, and now 90 ft after drawing on the reserve. The chairman, after stating that the widening of the canal was being carried out, said that the present year's receipts promised to show an increase of 8,000,000 or 9,000,000 fr. The four retiing directors were re-elected.

SUFARTHUM SEYMOUR, WAS D. IN

Sullivan, Sir Arthur Seymour, was b. In London, 1842. His father was a military bandmaster. As a choir-boy at the Chapel Royal he gained the "Mendelssohn Scholarship" at the Royal Academy of Music, in '56, and there continued his musical education He went to Leipzig from '58 to '61. His music to Shakespeare's "Tempest" at once attracted to Shakespeare's "Tempest" at once attracted public favour on his return in '62 Constantly writing cantatas ("Kemlworth," '64, etc.), oratorios ("Prodigal Son," '69; "Light of the World," '33), anthems, songs, etc., he yet remained without any specially extensive popuremained without any specially extensive popularity, till he hit upon a vein of buriesque operetts, which he produced in conjunction with W. S. Gilbert, who wrote the librettos The first of these was "Tral by Jury" ('75), followed by "The Sorcerer" ('77); "H M '> Pinafore" ('78), which ran for 700 consecutive nights, and was undoubtedly the greatest success in England and in the United States of any work of the kind; "Pirates of Penzance" (80), "Patience" ('81); "Iolanthe" ('82); "Princess Ida" ('84); "Mikado" ('85), revived in '88; "Ruddigore" ('87); and "The Yeomen of the Guard" ('88). For the Leeds Festival, in Oct '86, he wrote the "Golden Legend." "Ivanhoe" was produced in '91, and in Sept. '92 a new was produced in 91, and in Sept. 92 a new opera, "Haddon Hall," the libretto of which was written by Mr. S. Giundy, was brought out at the Savoy, and gamed fresh distinction the great composer. The association with Mr. Gilbert was iesumed in '93 with "Utopia Limited," and in '96 with "The Grand Duke." In '95 "The Chieftain" was produced at the Savoy, the libretto being by Mr. F. C. Burnand, and in '98 "The Beauty Stone," the libretto by Messrs. Comyns Carr and A. W. Pinero. Sir Arthur was knighted in '83 he also possesses the Legion of Honour, the House of Coburg Royal Order, the Medjidieh, and the Royal Victorian Order. He received the honorary degree of Mus. Doc of Cambridge in '76 and of Oxford in '79. out at the Savoy, and gamed fresh distinction

"Sun, The," originally started as a Radical evening paper, changed hands in the early days of '97, and is now independent in politics, with strong Unionist leanings. The Editor is Mr. A. Clifton Kelway. It devotes much attention to sport and finance, as well as to general and political news, and its cricket and football editions have achieved much popularity.

Sunday School Association, The, founded in 1833, existing connection with the Unitarian and Free Christian Churches. Its objects are the publication of suitable books for Sunday-schools, and the promotion generally of Sundayschool education It seeks to teach the young that the discoveries of modern science and the results of the best Biblical criticism are not foes to be resisted but friends to be welcomed. President, John Dendy; Hon. Secretary, Mr. Ion Pritchard; Busness Manager, Mr. B. C. Hare. Office, Fesex Hall, Essex Street, Strand, W.C. Sunday School Union. This Union was

founded in 1803, and its objects are to stimulate and encourage Sunday-school teachers, at home and abroad, to greater exertions in the promotion of religious education; by mutual communication to improve the methods of instriction; to ascertain those situations where Sunday schools are most needed, and promote their establishment, to supply the books and stationery suited for Sunday schools at reduced pieces President for '99, Alexander J. Sciutton, Esq., Chairman of Council, F. F. Belsey, Secretaries, W. H. Groser, B.Sc., J. Edmunds, C. Robottom, and J. Tillett. Treasurer, Mr. S. Hope Morley Organ, Sunday School Chronich (Benevolent Department), 56, Old Bailey, E.C.; (Publishing and Retail Departments), sy and 59, Ludgate Hill Sunday Society, The, was founded in '75, to promote the opening of museums, art galleries, libraries, and gardens on Sundays. In '96 II M. Government arranged for the Sunday opening of the great National Museums and Galleries in the Metropolis. These institutions continue to be opened on Sundays, and in addition there are now over a hundred instruction; to ascertain those situations where

and in addition there are now over a hundred museums, art galleries, libraries, and gardens opened every Sunday by the municipal authorities throughout the country. By the Sunday opening of the National Museums in London the first object of the Society has been secured, but as the Lord's Day Act of Geo 111 stands in the way of Science and Art collections being opened, or concerts being given, on Sundays by private enterprise, the Society is now advocating a repeal of this old statute, and the passing of a new Act that will give freedom for the

of a new Act that will give freedom for the enjoyment of literature, science and ait, whilst safeguarding Sunday from becoming an ordinary working day. President, Rev. Canon Barnett, M.A. Hon Beeretary, Mark H. Judge, A R. I.B.A., 7, Pall Mall, S.W.

Supply. The sums necessary to defray the charges for the Army, Navy, Civil Services, Customs, Post Office, etc, are voted annually by the House of Commons in Committee of Supply. The sums required are granted for the financial year ending on March 31st; and although a vote or votes on account are somealthough a vote or votes on account are sometimes granted during the session for a part of the year, the whole sum voted during the session or in a case like that of '95 in the two consecutive sessions, for any service is for the full period of twelve months. The Estimates, framed by the respective departments and approved by the Treasury, are laid upon the

table soon after the commencement of each of the Rolls, who are members ex officso, and table soon after the commencement of each session, and any items which may be subsequently found insufficient, or any unforeseen charges, are provided by the Supplementary Estimates. Votes of credit for military and naval expenditure of an urgent character are also voted in Committee of Supply. On the resolution embodying the vote for the number of men for the army is founded the Army (Annual) Bill, which provides, during twelve months and no more, for the discipline and regulation of that force. The system of granting supplies for only twelve months involves a supplies for only twelve months involves a niceting of Parliament every year, and provides at once a safeguard against the permanence of the military establishment and a means of conthe military establishment and a means of continuing it periodically in such strength as the House itself may deem to be necessary. A new rule for discussions in Committee of Supply was adopted in the Session of '96, and was again adopted in '97 and '98. Supply is made the first order of the day on Friday, unless the House order otherwise, directly the Committee of Supply is appointed. Twenty-three days of Supply is appointed. I wenty-three days are allotted for the business of Supply, and if these have all been given and occupied by Aug 5th, all outstanding Votes are put forthwith by the Chai man on the morning of the twenty-second day, and on the twenty-third day the Speaker puts all the outstanding reports of Supply. The great ment of the scheme is that it gives private members an opportunity during the effective parliamentary months of bringing important questions for-ward and having them discussed. For the ward and having them discussed. For the Civil Service estimates for '98-9 see Finance, NATIONAL.

Supreme Court of Judicature. The Supreme Court was formed by the consolidation of all the superior courts of the kingdom tion of all the superior courts of the kingdom of England, excepting only the House of Lords and the Judicial Committee of the Privy Council. It replaces (a) the Courts of Common Law, the Queen's Bench, Exchequer and Common Pleas, together with the Court of Appeal known as the Court of Exchequer Chamber; (b) the Court of Chancery and the Court of Appeal in Chancery; (c) the Court of Admiralty, (d) the Court of Yrobate and Court for Divorce and Matrimonial Causes, which replaced the old ecclesiastical courts dealing with similar matters; (e) the London Court of Bankruptcy; (f) the Court of Common Pleas at Lancaster and the Court of Pleas at Durham. The Supreme Court replaces all these by a The Supreme Court of Fleas at Durham. The Supreme Court replaces all these by a single court of first instance known as Her Majesty's High Court of Justice, and a single court of appeal known as Her Majesty's Court of Appeal. The High Court of Justice, again, Bench Division, in which have been merged the Courts of Queen's Bench, Exchequer, and Common Pleas. It consists of the Lord Chief Justice of England, who is the president, and inferen puisne judges; (b) the Chancery Division, of England, and having five puisne judges; (c) of England, and having five puisne judges appointed in on the east by French Guiana, on the west president, and the junior ranking as a puisne by British Guiana, and on the south by the judges appointed is no mountains which separate it from Brazil. It foundation of the Supreme Court bear the is governed by a governor and council of four same title and receive the same salary. Her immembers, all appointed by the sovereign. There is a representative body called the Chancellor as president, the Lord Chief Justice, Colonial States, partly elected. A modification

of the Rolls, who are members ex office, and of five ordinary members, known as the Lords Justices. As the three dignitaries first named are usually engaged elsewhere, the working Court of Appeal commonly consists of the Master of the Rolls and the five Lords Justices. The distribution of business between the several divisions of the High Court rests on the general principle that any action may be brought in any one of them. But this rule is modified by law and practice as follows:—
(a) The oriminal jurisdiction of the Court is exercised solely by the judges of the Queen's Bench Division. (b) Jurisdiction over causes of the following classes is exercised solely by judges of the Chancery Division (1.) actions for the administration of the estates of deceased persons; (11) actions for the dissolution of partnerships, (iii) actions for redemption or foreclosure of mortgages; (iv.) actions for the raising of portions or other charges upon land, or the sale of land subject to any charge; (v.) actions to enforce execution of trusts; (vi.) actions for the rectification, setting aside or cancelling of written instruments; (vii.) actions to enforce specific performance of contracts; to enforce specific performance of contracts; (vii.) actions for the partition or sale of real estates; (ix) actions concerning infants and their estates (o) Jurisdiction over all such causes as would have come before the old Courts of Admiralty, Probate, and Divorce is exclusively exercised by the judges of the Probate Division. To the above general rule there are other executions of less importance. Probate Division. To the above general rule there are other exceptions of less importance. The procedure of the High Court has been formed by a process of selection and improvement out o. the different forms of procedure observed by the old Courts which have been merged in it. The only differences of procedure now to be observed in the different divisions are such as have a practical value in the despatch of their different business. In all despaces of their different business. In an divisions every cause is as far as possible dealt with by a single judge, in whom are vested all the ordinary powers of the Court. The same forms of pleading are prescribed by the rules, although not adopted in practice by all the divisions alike. In all the divisions evidence is given by word of mouth or by affidavits, as may be most expedient. Firal by jury is becoming infrequent in all civil causes, otherwise tall most experience. although still most infrequent in the Chancery Division. The Court of Appeal is the same for all causes, and observes an absolutely uniform procedure, although for the more rapid despatch of business it is divided into two courts, each commonly consisting of three members. The procedure of the High Court and Court of Appeal is set out at large in the Bules of 1883 These, although irregular in form and incomplete in substance, constitute our nearest approach to a code of civil pro-cedure In the year preceding, the various branches of the Supreme Court were for the

same title and receive the same salary. Her members, all appointed by the sovereign. Majesty's Court of Appeal consists of the Lord There is a representative body called the Chancellor as president, the Lord Chief Justice, Colonial States, partly elected. A modification president of the Probate Division, and Master in the government and financial arrangements

was announced by Queen Wilhelmina in opening the States-general Sept. 20th, '96. The capital is Paramaribo. The chief products are sugar, cacao, fruits, coffee, rice, etc. Some gold mining is carried on also. Area, 46,060 sq. miles. Pop, about 65,000. See Colonies of European Powers.

Surveyors' Institution, The, incorporated by royal charter to secure the advancement and facilitate the acquisition of that knowledge which constitutes the profession of a surveyor—viz., the art of determining the value of all descriptions of landed and house property, and of the various interests therein, the practice of managing and developing estates; and the science of admeasuring and delineating the physical features of the earth and of measuring and estimating artificers' work. The Institution has about 300 members, and con sists of fellows (F.S.I.), professional associates (P.A.S.I.), associates, honorary members, and Colonial fellows, with a class of students attached. The annual subscriptions are Students, £1 1x.; associates and professional associates, £2 2s.; and fellows, £3 36. An entrance fee of £3 38. Is paid by both classes of associates, and one of £5 55. by fellows President, Mr. Robert Vigers, Secretary, Mr Julian C. Rogers. Offices, 12, Great George Street, Westminster, SW. Temporary Offices (during rebuilding), Savoy Street, Victoria Embankment, W.C.

Swaziland. A small native state in South Africa, almost surrounded by the Transvaal on the north, west, and south, but bounded on the east by the Delagos Bay territrop of Portuguese East Africa and Tongaland, which intervene between it and the coast. Area, 8,500 sq m; pop. 60,000. It is a mountainous tract stretching along the Limpopo range, with richly fertile valleys, and its mineral wealth is great, valuable fields of gold and coal being included in it while its agreating and pastoral rein it, while its agricultural and pastoral reof the Zulu race At the conclusion of the war with the Transvaal Boers, their boundary was swaziland agreed to. The Transvaal, however, claimed that the country was theirs by a convention made in 81, whereby it was ceded to them in consideration of their preventing all Boer treks into Mashonaland. Ultimately, by the convention of Dec. '94, the Transvaal Government was secured "in all rights and powers of protection, legislation, jurisdiction, and administration over Swaziland and the inhabitants thereof," and a Special Commissioner was appointed to superintend the administration. The young King Bunu, however, was appointed to superintend the administration. ever, was recognised as paramount Chief, and it was agreed that the management of the internal affairs of the natives should be administered by the native chiefs in accordance with their own laws and customs, and the natives were guaranteed in their continued use and possession of their land and of all their and possession of their land and of all their grazing and agricultural rights. Provision was also made against the imposition of any excessive hut tax, and against the sale or supply of intoxicating liquors to the natives. The capital is Embekelwini. A proclamation was instant (Except (2008)) issued (Feb. 20th, '98) repealing all former laws with two small exceptions, and applying the Transval laws, except as to customs, to the country. See Transval (map).

SWEDEN AND NORWAY.

Under Oscar II., of the house of Bernadotte, in oner oscalling of the notice of bernatotte, in 1815, the kingdom of Sweden was indissolubly united with the kingdom of Norway without prejudice to separate constitution, government, and the laws of either. If the throne become vacant, the Diets of both kingdoms elect, and in default of agreement an equal number of Swede and Norse deputies make an absolute nomination. Affairs common to both kingdoms are administered by a Council of State, on which both nations are represented. -Sweden. Under the Swedish Constitution of 1809 the executive power is lodged in the king, who also possesses legislative power in matters of political administration; in other respects such power is exercised jointly by the Diet, which possesses a veto on all legislation, and the sole right of taxation. Diet consists of two chambers, the first of 150 members (elected by provinces and municipalities for nine years), the second of 230 members (150 representing rural and 80 urban constituencies), elected directly on a property qualification for three years. Local affairs are administered through representative bodies elected in the communes and in the 24 governments into which the country is divided. The State religion is Lutheran; all others, except the Jesuits, are tolerated. Elementary education is compulsory, free, and well organised. The chief exports are timber, cattle, minerals, and corn Area, 172,876 sq. m.; estimated pop. 4,919,260; estimated revenue and expenditure, '97, £6,212,300; debt, £16,200,000; imports, '94, £19,510,000; exports, £16,550,000 — Norway. The Norse Constitution of 1814, several times modified since, vests the legislative power in the Storthing, which has 114 members, who are elected indirectly, the people choosing delegates who elect the Storthing For business purposes it is divided Storthing For business purposes it is divided into the Odelsthing, composed of three-fourths of the members, and the Lagthing, consisting of the remainder; all new bills originate in the former. If the two divisions do not agree, the combined house deliberates, and the measure must be passed by a two-thirds majority. The King has the right of vetoing the laws passed by the Storthing, but if the same bill pass three Storthings separately and subsequently elected, his veto is overridden. The executive power is in the hands of the King with a Council of State For local government the country is divided into twenty counties. and these into urban and rural communes, all and these into urban and rural communes, an with representative government. The State Church is Lutheran. Education is compulsory, the towns chiefly providing the cost, with subsidies from the state. Of the total area, 26,320 sq. miles are under forest, and only 3 per cent., is cultitivated. Timber, animal per cent., is cultitivated. Timber, animal produce, skins, and tallow are the chief exports. area, 124,405 sq. m; estimated pop. 2,000,000.
Estimated revenue, '07, £3,504,450; expenditure,
4,594,450; debt. £8,500,000; imports, '05,
£12,350,500; exports, £7,6-27,000 See DiploMATIC, FOREIGN ARMIES, FOREIGN NAVIES, and NORWEGIAN POLITICAL PARTIES.

Political Parties.—A grave constitutional struggle has arisen between the two countries, from the demand for greater independence for Norway in her foreign policy, which is energetically backed by the Liberals, led by M. Steen. In June '92 the Storthing passed a resolution in favour of independent consulates,

which King Oscar refused to sanction, and the ministry in consequence resigned. A deadlock ensued, and in July a resolution was passed asking M. Steen to remain in office, and deferring the consulate question sine ties. In '93 M. Steen resigned, and M. Stang, the Conservative leader, succeeded him, although he was in a minority. The general election of '70 resulted in the return of '79 Radicals and 35 Conservatives and Moderates, as against 59 Radicals and 55 Conservatives, in the former Storthing. In Sweden there are three parties—the Conservatives, the Radicals, and the Moderates, who incline to the Conservative side and strongly oppose the Norwegian demands History, '98.—Sweden. The Swedish

Mistory, '98.—Sweden. The Swedish section of the Committee on the union with Norway reported in favour of a common Foreign Minister, residing at Stockholm, with a Council of State for Foreign Affairs consisting of two Councillors from each country. The Foreign Minister should not be a member of the Rikadag nor of the Storthing, but might be impeached before a tribunal consisting of six Senior Judges of the Supreme Courts of both countries, and 12 members each of the Rikadag and Stotthing. A minority repoet was also presented, mainly as to the responsibility of the Foreign Minister to the legislatures.—Norway The Norwegian Ministry resigned office (Feb. 12th), and M. Steen was given the task of forming a new Cabinet, which he accomplished (17th). The Norwegian section of the Committee on the union with Sweden reported to the Storthing (March 7th). The majority recommended that the contribution from each country for Foreign Office expenditure should be in proportion to population, and that the Consular representation should be common for 15 years; after that time being dissolved, if either country so demanded. The Swedish proposals as to common defence were flatly rejected. A minority of the Committee, however, recommended separate Foreign Ministers, with diplomatic and consular representatives, for each country. A motion to introduce a purely Norwegian flag, without the symbol of union with Sweden, was carried by the Storthing (Nov. 11th).

Swimming, '98. The swimming contests were as numerous as usual, and the Water Polo matches greatly increased, and are evidently much more popular than they were. The Cliristmas morning 100 yards Handicap on the Serpentine had to be put off owing to the ice until Jan. 1st, on which morning E. Hawkins won a very good race. The Boxing-Day 100 Yards All-England Handicap of the N.S.A. had to be postponed, but was held a few dsys afterwards at the same place in a dense fog, when W. Harrisons won in 1 min. 335 sec. In the matches between Oxford and Cambridge, the distances being 50 yards, 120 yards, and 1-mile, each University socred 5 points in each race, and consequently the result was a tie. In the 1000-Yards Championship of the Northern Counties, at Rochdale, J. H. Derbyshire, the holder, was beaten by P. H. Lister in 15 min. 288 sec. On July 8th J. H. Welsh won the 150-Yards Breast-swimming Championship in 2 min.

Championship at the same time. The annual display of the Life-Saving Society at the West India Docks was abandoned this year; but on July 5th a display was given at Highgate Bathing Pond, in addition to which the National Constill Diving Champion by the Care of the Care Graceful Diving Championship was decided, when H. S. Martin, St. James' S.C., who won in '95 and '96 defeated last year's winner, V. Sounemans, of Brussels, the diving took place from three heights, 3 ft., 15 ft., and 30 ft. On July 9th J. H. Derbyshire won the *Mational 100-Yarda Championship in the world's record time of 645 sec. besting Fuer's previous record time of 60 sec, beating Iyer's previous record of 61 sec, and on July 16th Tyer's record for one mile was reduced by J. A. Jarvis, who won the Mile Amateur Championship in 26 min. 37 sec. The Long-Distance Amateur Championship The Long-Distance Amateur Championship was decided over a course measuring 5 miles 60 yards, from Kew Bildge to Putney, on July 23rd, when J. A Jarvis won in 1 h. 7 min. 58 sec. Cavill swam this same course in 1 min. 23 sec. shorter time. Jarvis also won the Amateur ½-Mile Championship at Leicester in the new record time of 12 min 52 sec. In the team race between England and Ireland, held at Blackrock, co. Down, England won easily. The Ulph Challenge Cup, over 1000 yards in the sea at Great Yarmouth, was won by S. T. Pugh, Otter S C, who beat Jarvis, the long-distance champion. At Weymouth Jarvis won the 1-Mile Salt Water Championship in 6 min 32 sec. Mr Frank Holmes, the well-known swimmer, essayed to swim across the Channel on Sept. 8th, but owing to fog and wind he was obliged to relinquish the attempt when only 6 miles from the French coast, he was not the least exhausted when he left the water. On Sept 17th the Professional Long-Distance Championship in the Thames, over a course of 5 miles 60 yards, was won by Greasley in 1 h. 16 min. 30 sec The Mersey 1 Mile Champion-16 min. 30 sec The Mersey i Mile Championship was won on the same day by N Potter—time 33 min. 30 sec. J H. Jarvis won the 300 Yards Championship of England. The following were the principal Water Polo Match results England beat Scotland, Wales, and Ireland; I iteland and Wales drawn; Cambridge beat Oxford, Surrey beat Kent, North v South drawn, Midlands beat the South of England; the Palace and the Manchester. Osbornes tied in the final for the English Club Championship; and Lancashire beat Leicester. Championship; and Lancashire beat Leicestershire for the County Championship.

shire for the County Championship.

Swinburne, Algernon Charles, son of Admiral Swinburne, was b. in London 1837. Ed. at Balliol Coll., Oxford ('57). Visited Florence, and passed some time there. His first productions were two plays, "Queen Mother" and "Rosamond" ('61). These were followed by two tragedies, "Atalanta in Calydon" and "Chastelard," and "Poems and Ballads," which met with severe criticism. His later works are "A Song of Italy," "William Blake, a critical essay"; "Songs before Sunrise" ('71), in which he glorifies Pantheism and Republicanism; "Studies in Song" ('81); "A Centuryof Rondels" ('83); "Life of Victor Hugo" ('86); a poem on "The Armada" (88); "A Study of Ben Jonson" ('90); "Astrophel, and other Poems," "Studies in Prose and Poetry" ('94), and "The Tale of Balen" ('96).

Switzerland. A Confederation of nineteen

bolder, was beaten by P. H. Lister in 15 min.

188 sec. On July 8th J. H. Welsh won the 150
189 sec., and C. Martin won the Back-swimming constitution of 1874 vests supreme legislative

and executive authority in two chambers-viz. (1) a State Council of 44 members, chosen two for each canton and one for each half-canton for three years; and (2) a National Council of 147 delegates of the Swiss people, chosen also for three years, directly by manhood suffrage, one deputy for every 20,000 of the population. The united chambers form the Federal Assembly, to which is confided the supreme govern-The executive authority is deputed to a Federal Council of seven members, elected for three years by the Assembly, the president and vice-president of which are the first magistrates of the republic. The principles of the Referendum (q.v.) and of the Initiative are in force. The latter signifies the right of any 50,000 citizens to demand a direct popular vote on any constitutional question Civil and criminal law, Justice, police, public works, and schools are all left under the jurisdiction of the cantonal authorities, while labour legislation may be initiated either by the Confederation or by the cantons. Complete liberty of conscience prevails. Education is free and compulsory The neutrality of the country is guaranteed by the Treaty of Vienna as indispensable to the general interest of Europe The Swiss agree to this, but yet claim the right to make

alliances, and even to declare war. The chief occupation is agriculture, though there is much manufacturing industry. The principal exports are textiles, silk, clocks and watches, and food broduce. Area, 15,976 sq. m.; pop., '95, 2,986,848. Revenue, '97, £3,398,800; expenditure, £3,356,200. The various cantons have their own budgets of revenue and expenditure, and their own debts the latter always covered by their own debts, the latter always covered by cantonal property, chiefly in land. The aggregate cantonal debts imounted, in '97, to (2),234,630. Imports '96, £39,719,846; exports, £27,531,591, See Foreign Armies; and for Council see Diplomatic—History, '98. M Ruffy was elected President of the Confederation, and M Muller Vice-President (Dec. 15th, '97) nation was moved to deep grief and indignation by the assassination of the Empress of Austria at Geneva (Sept. 11th) by an Italian anarchist. The murderer confessed that his intention was to kill Prince Henry of Orleans, but as he could not find him, he chose the Empress as his victim. He was condemned to penal servitude for life (Nov 10th). By 260,000 votes to 100,000 the Federal Government were authorised to decree the unification of the civil and penal codes (13th)

Tasmania. An island south of Australia, separated from it by Bass's Stratts, 160 miles across. Formerly called Van Diemen's Land Extends 210 miles north to south, and 200 miles west to east, containing 26,375 sq. m, with a pop. of 175,000. Capital, Hobart, pop. 90,375, in the south. Second city, Launceston, pop. 20,172. Several groups of islands are looked upon as being within the colony, including the Furneaux group, King Island, and Bruce Islands. As to religion, the Church of Kurthad Roman Cetholicant Washers. of England, Roman Catholic and Wesleyan Methodist are the chief denominations, numbering respectively 30,810, 87,148, and 11,630 adherents Education is unsectarian, and compulsory for all children between 7 and 14 Small fees are levied upon those able to pay. Tasmania is divided into 18 counties, within which are electoral districts, parishes, and municipalities. Ruled by a Governor and responsible Ministry. There are also a Legislative Council of 18 members elected for a term of six years, and a House of Assembly of 37 members elected for three years. Members are paid £100 per annum The colony is repreare paid £100 per annum The colony is represented in the Federal Council of Australasia, and a popular vote on the question of Federation showed 13,496 votes for the Federation Bill and 2900 against it (June 4th, '88). The climate is most healthy and temperate. The minerals found are gold, tin, coal, and silver Wheat, oats, and hay are largely produced, and agriculturists are beginning to turn their attention to fruit and hops. Revenue, '97, £43,500; expenditure, £785,026; imports, '97, £43,57,608; experts, £1,744,461; public dobt, £7,776,220. See BRITISH EMPIRE (table); and for Ministry, etc., see DIPLOMATIC.

Tea. See Trade, 98
Teachers' Guild, The, was established as a registered society in 1885. The members of the Guild number about 4250, of whom about 1800 are in the Central Guild and the rest in the 30 local branches. The work upon which the Council are at present especially engaged is the attempt to raise teaching to the rank of a learned profession through registration, and the establishment of an efficient test of teaching power, and to provide for the organisa-tion of Secondary Education in harmony with the views of teachers. Chairman, The Rev. the Hon. Canon F. Lyttelton, M.A., Head Master of Haileybury College; General Secretary, H. B. Garrod, M.A.; Women's Agency, Miss Cooper. Offices, 74, Gower Street, W.C. Telegraphs. See Post Office Statistics,

Telephones. Under the provisions of the Telegraph Act, '92, the Post Office authorities have acquired the ownership and control of all the trunk wires throughout the kingdom. They also have the sole right of constructing new ones, and the intention is ultimately to provide a complete system of communication between all the important towns in the king-dom, leaving the telephonic communication in the towns themselves to the National Tele-phone Company, which has gradually absorbed all other telephone companies into itself. The Company holds a licence which expires in 1911. The Company now has 819 exchanges and 1429 call offices in the United Kingdom, with upwards of 113,000 subscribers, transmitting annually some 450,000,000 messages over its wires. Considerable pressure has of late been brought to bear upon the Government in order to induce them to grant licences to municipal authorities to set up services competing with the Company, and Glasgow has actually obtained such a licence. The Postmaster-General said (Oct. 30th, '98) that under no circumstances would a licence be granted to any other new company, nor would an extension of any licence be granted beyond the year 1911. See also Post Office Statistics, '98, and Session, sect 109, for the report of the Select Committee on Telephones.

The following table gives the telephone rates in the different countries of Europe, and states whether the telephones are in the hands of private companies or of the state:—

Country.	Whether Private or State	Price of yearly subscription
	State State	L8 to L14. L12 L4 16s, with limit of 400 calls per annum. L16. L6 14s to L9. State, L4 8s. Private Co, L5 11s. L4 8s Not given. Not given. L10 Not given. L7 10s In provinces, L5 to
		Lio In London, Lio to Li7.

Tenniel, Sir John, artist, was b 1820. Showing the possession of artistic taste at an early age, he may be considered as entirely self-taught. He was a successful candidate in one of the cartoon competitions for the decoration of Westminster Hall (45), and painted a fresco for the Palace at Westminster. His illustrations of books, although not comprising many, have always been characterised by great taste. When "Alice in Wonderland" made its appearance, some portion of the notice it obtained may fairly be attributed to Mr. Tenniel's illustrations. In '51 he joined the staff of Punch, with which newspaper he has ever since beging connected, and for which he draws the cartoon Knighted in '93. He lives at 10, Portsdown Road, Maida Hill, W.

Ternina, Milks, the celebrated dramatic sopiano, is a native of Croatia. After studying under Dr. Josef Gansbacher, of Vienna, she acquired experience in Leipzig, Graz, and Bremen. In '90 she became prima donna in Munich, where her success was great. Her talents have been recognised throughout Germany, and she is a favourite in Russia and America. She first appeared in England at Covent Garden Opera House as Isolde in '98, and further attracted attention by exceptionally fine impersonations of Brünnhilde and Fidelio.

Terry, Miss Kilen, was b. at Coventry, Feb. 27th, 1848, and made her first appearance on the stage during Charles Kean's Shakespearian revivals in '58, playing the parts of Mamillius in "The Winter's Tale" and Prince Arthur in "King John." When only fourteen she was a member of Mr. Chute's Bristol company, which included Miss Kate Terry, Mr. William Rignold, Mr. George Rignold, Mr. Charles Coghlan, Mrs. Kendal Mrs. Laburcher Kate Bashon, and Kendal, Mrs. Labouchere, Kate Bishop, and several other now prominent members of the profession. She reappeared in London March 63, as Gertrude in "The Little Treasure," and until Jan. 64 played Hero in "Much Ado about Nothing," Mary Meredith in "Our American Cousin," and other secondary parts. In that Cousin, and other secondary parts. In that year she married and left the stage, but reappeared again in Oct. '67, in "The Double Marriage" at the New Queen's Theatre, London. She afterwards joined Mr. and Mrs. Bancroft at the Prince of Wales's Theatre, where she She afterwards joined Mr. and Mrs. Bancroft at the Prince of Wales's Theatre, where she acted the part of Portia. On Dec. 30th, '78, she made her first appearance at the Lyceum, and has since, in conjunction with Mr. Irving, played in the longest runs ever known of "Hamlet," The Merchant of Venice, "Romeo and Juhet," and "Much Ado about Nothing." She has also appeared as Viola in "Twelfth Night," Henrietia Maria in "Charles I.," Camma in Iennyson's tragedy of "The Cup," Ruth Meadows in "Eugene Aram," as Marguerite in W. G. Wills' "Faust" (revived in 94), as Lady Macbeth in "Macbeth," as Lucy Ashton in "Ravenswood," as Queen Catherine in "Henry VIII.," as Codelia in "King Lear," as Rosamonde in "Becket" (93), as Imogen in "Cymbelin e" (96), as Madame Sans-Gene (97), and in "Peter the Great" (98) She accompanied Mr. Tyving on his American tours in 87, 93, 94, and '95 Miss Terry's son plays under the name of Gordon Craig, and her daughter under that of Edith Craig

Thames Conservancy. The Conservators of the River Thames were constituted a body corporate by Act of Parliament in 1857, and their powers extended by various Acts from time to time. In '04 an Act was passed to

Thames Conservancy. The Conservators of the Kiver Thames weie constituted a body corporate by Act of Parliament in 1857, and their powers extended by various Acts from time to time. In 94 an Act was passed to amend the constitution of, and consolidate, amend, and extend the statutory powers of the Conservators, to make further provision for the preservation and improvement of the inver for purposes of navigation for profit and pleasure, and as a source of water supply for the Metropolis and the suburbs thereof, and for other purposes. The Act increases their powers in several respects, especially with a view to the prevention of pollution. The Conservators have now for this purpose jurisdiction over all the tributaries of the river within its catchment area (extending over 3800 square miles) except a part of the river. All the provisions of the existing law as to rights of navigation, removal of obstructions, piers, and landing-places, beacons and lights, pleasure boats, steamlaunches, house boats, etc., are re-enacted, and in some cases strengthened, and power to dredge as far as the Nore is conterted. No further powers of taking water from the Thames than might previously be legally exercised are given by the Act to the water companies; but they are to contribute an additional amount to the sums formerly paid by them. The constitution of the Conservators consists of the following thirty-eight members: The County Councils of Middlesex.

Surrey, Kent, Essex, Oxfordshire, Berks, Bucks, and Herts each appoint one Conservator; the Gloucestershire and Wilts County Councils jointly appoint one; the County Boroughs of Oxford, Reading and West Ham each appoint one, and the Metropolitan Water Companies, one, the Admiralty two, the Board of Trade two, Trinity House two, ship-owners three, owners of sailing barges, lighters, and steam tires two dock-owners one whatfingers. steam tugs two, dock-owners one, wharfingers one, Corporation of London six, and London County Council six. The offices of the Conser-vancy are on the Victoria Embankment, near Blackfriars Bridge, E.C.

THEOLOGY, '98.

As a rule there are few theological movements or discussions at the present time that excite interest in other than purely ecclesiastical circles. This is not because the intelligent laity care nothing for such subjects; it is rather owing to their belief that the great doctrines of the Christian faith are securely based and perfectly defined, and that discussions on other points are of little practical importance During the year, however, a ritual controversy has affected the whole body of the people to an extent to which we can of late years find no parallel save in the earlier stages of the Oxford movement. The newspapers have been flooded with letters on the subject, numerous pamphlets published, public meetings held, and in several ritualistic churches Divine service has several itualistic churches Divine service has been violently interrupted by Protestant demonstrators, and the clergy have had to seek police protection. Even Parliament has been moved by the agritation, as the discussion on the Benefices Hill has amply proved The controversy has shown that English Churchan controversy has snown that Engish Church as a body are profoundly appreciative of the service rendered by the High Church party in raising the standard of worship throughout the Chuich and in adding new dignity and beauty to her services. The majority of Churchmen have no objection to a moderate ritual or to the use of symbolism in worship, and many of them cordially approve of the main principles of the Catholic revival But if the controversy has brought out anything with clearness, it is the fact that the laity of the Church are at heart soundly Protestant, and view with suspicion and even abhorrence any practices in the Church that are contrary to the Book of Common Prayer and the teaching of the English Reformers. But it is not a little suggestive to find that in this controversy the real crux of the whole question has very seldom been clearly seen. The usual subject of discussion has been the lawfulness of certain ritual actssuch as the eastward position in Communion; the use of altar lights and ornaments, inceise and vestments; the observance of feasts and ceremonies unauthorised by the Book of Common Prayer (e.g Corpus Christi and the Adora-tion of the Cross) and the reservation of the sacrament Such ritual acts, however, are in themselves trifling matters, on which liberty of action may be granted, or which might be settled in case of dispute by an Anglican College of Rites, as the Archisshop of York auggested in his sermon to the Church Congress at Bradford. It is otherwise with the doctrines of advanced ritualists, especially with United Presbyterian have been advanced several stages during the year, and there seems theories are condemned by the so-called Black every certainty that the Union itself will be

Rubric in the Prayer Book, and their adoption by the Church would go far to undo the work of the English Reformation. The crux of the whole question lies here. This has been whole question lies here. This has been brought out with great clearness in the reply of Cardinal Vaughan and fifteen Roman Catho-lic bishops of the Province of Westminster to the Archbishops of Canterbury and York's reply to the Papal Bull on Anglican Orders. The Roman bishops assert that a priest is such in their communion solely because he has the "power of effecting the Real Objective Presence on the altar of the True Body and Blood of Jesus Christ, and thereby offering Him up in sacrifice." They point out that no such power is conferred upon Anglican priests in ordination, nor hitherto has such power been claimed by them.

An attempt is being made to revive Broad-An attempt is being made to the base of the observed and discipline and esprit de corps in which they have hitherto been lacking. For some time past a scheme has been under discussion in Broad-Church circles, and at the recent Church Congress in Bradford it has been matured. The new organisation is styled "The Churchmen's Union for the Advancement of Liberal Religion. Thought," and its objects are the reform of abuses within the Church, the assertion of the right of laymen to an adequate share in Church government, a conclustory attitude towards Nonconformists with a view to make the Church of England inclusive and truly national, and the frank acceptance of ascerrand truth though affecting dogmatic interpretations. The official organ of the party is The Church Gazette. The inaugural meeting of the Union was held at the Church House, Westminster, on Oct. 31st.

Desire for the reunion of Christendom is one of the characteristics of our time, and is the hope of the best minds in every section of the to Rome by the Papal decision anent the "nullity" of Anglican Orders, the Church of "nullity" of Anglican Orders, the Charles England has turned with renewed expectation to the Orthodox Greek Church, and especially to that branch of it located in Russia. It is understood that many prelates of the Russian Church are favourably disposed to the Church of England, and that a deputation of these is about to visit this country with a view to confer with the Anglican bishops Following the recommendation of the Lambeth Conference of '97, a committee of Anglican bishops is at present inquiring into the validity of the orders of ministers of the Moravian Church and the history of the episcopate in the Lutheran Church of Sweden, with a view to see if the friendly recognition of these churches by the Church of England is possible. In Scotland an important step towards the union of the Presbyterian Churches has been taken by the publication of The Church Hymnary. This book has been compiled by committees representing the Established, Free, and United Presbyterian Churches in Scotland, and the Presbyterian Church in Ireland. Several of the Colonial Churches have also intimated their intention of adopting the book, which seems destined to form a bond of union amongst all English-speaking Presbyterians. The union negotiations between the Free Church and the consummated in the beginning of the coming

century.

The Doctrine of the Immortality of the Soul has been the occasion of a lively controversy in the Wesleyan Methodist Church, and has brought about a surprising result. Professor Agar Beet, one of the best known of Wesleyan theologians, had published a book in which he asserted that the immortality of the soul was not a Christian but a pagan belief, that the doctrine of everlasting punishment was not supported by Scripture, and that the teaching of his own and other orthodox churches on these points was unbiblical and misleading The ministers of the Wesleyan Church as-sembled in their Conference have contented themselves with inducing Professor Beet to withdraw his book from circulation and to promise that he will say nothing further on the matter. This attempt to stille free theo-logical inquiry is foredoomed to failure, and may have most serious consequences for the Wesleyan Connexion. The latty are protesting against the action of their ministers, and the doctrine itself is being subjected by them to vigorous and uninstructed criticism. It is already evident that Professor Beet's views have many sympathisers both within and without his own Church; but it is very doubtful if such persons are prepared to accept the serious consequences that mevitably follow the demal of this great doctrine

Apart from the foregoing, there is little else in the theology of the year that calls for special comment. In Biblical criticism, that on the Old Testament continues to be radical, while that on the New is conservative, if not re-actionary Of the criticism generally, it may be said that it is too much concerned with minutize and too little with principles, it seizes on farts, but does not always distinguish their bearings and relations In theology proper there is one tendency that is growing more marked of late years It was long a reproach to theology that it was built, as a mathematician might handle his formulæ and symbols, with no reference to the actualities and facts of life This reproach is no longer deserved, for theologians of our day (including in that term preachers and religious teachers have constantly before them the instincts of morality, the needs of humanity, and the realities of life. Every doctrine is tested to see if it harmonises with what is best in human life and thought. This tendency is already modifying certain doctrines, chiefly by giving prominence to their ethical aspects, and it promises to exert a greater influence in the near future.

Theosophy. The chief agent in founding the Theosophical Society was Madame H. P. Blavatsky, who, with Cof. H. S. Olcott, Mr. W. Q. Judge, and others, established it in New York in 75. The headquarters was in 79 transferred to Madras, and much arduous but successful work was accomplished in India. In 87 the movement received a fresh stimulus from the presence of Madame Blavatsky in London, from which epoch dates the great literary activity that has recently characterised it. There are now over 300 branches in Europe, India, America, and the colonies, and a large literature. The Society has three declared ebjects: viz.,—(1) To form a nucleus of the universal brotherhood of humanity,

without distinction of race, creed, sex, caste, or colour; (3) to encourage the study of comparative religion, philosophy, and science; (3) to investigate unexplained laws of nature, and the powers latent in man. The society is therefore quite unsectarian, and no articles of faith need be subscribed to by an adherent, the only condition of membership being an assent to the first object. No dogmas are forced upon members, as is the case with religions, and the teachings which are promulgated are merely propositions which can be verified by the student in the course of his progress in the study of occultism. Any individual member has a right to make any declaration of personal belief he pleases, on the understanding that the Society is not implicated. Some of the more important teachings of the Society will be found summarised in eds. '95 and '96. The chief books on Theosophy are "The Secret Doctime," "Isis Unveiled," "The Key to Theosophy," by H. P. Blavatsky; "Esoteric Buddhism," "The Occult World," and "The Growth of the Soul," by A. P. Sinnett, "Theosophical Manuals" Nos. 1, 11, 111, 117, and '171, "The Ancient Wisdom," "The Self and its Sheaths," "The Building of the Kosmos," and "The Berstand Evolution of the Soul," by A Nos. V and VI, by C. W. Leadbeater. Information may be obtained in Europe from the Secretary, Place, New York City, U.S.A; in India from the Secretary, Souldings, Lower Queen Street, Auckland, on the Scandinavian from the Secretary, 30, Nybrogatan, Stockholm; and in Holland from the Secretary, 30, Nybrogatan, Stockholm; and in Holland from the Secretary, 30, Nybrogatan, Stockholm; and in Holland from the Secretary.

Thibet is an Asiatic country, which, in spite of all explorers efforts, still remains practically unknown to Europeans, and unexplored by them. It lies on the slopes of the Himalayas, between Kashmir and the Chinese province of Szechuen It is a dependency of China. Its area is 650,000 sq m, and its population about 6,000,000. The capital of the country is Lhasa. 6,000,000. The capital of the country is Lhasa. The people are of the mildest character, but they obstinately icfuse to allow travellers to explore then country, which—by reason of its physical characteristics alone, its great mountains, and its height above the level of the sea, ains, and its height above the level of the con-which has caused it to be called the roof of the world—is of extreme interest. The country is under the rule of the lamas or priests, and the religion is that of Buddha. There are two Chinese Residents at Lhasa, who represent the Chinese Covernment in the country. with the condition of a treaty of commerce concluded with I hibet early in '94, Yatung, a town on the Indian-Thibet frontier, was opened for trade, with an Indian Government official and a Chinese official stationed there By the terms of the treaty, all articles, except munitions of war, drugs, and intoxicating liquors, are to pass free of duty for the first five years. The import free of duty for the first five years. The import of tea from India is prohibited for the same period. A considerable export of wool from Thibet is anticipated in due course. The chief imports are cotton and woollen goods, metals, maize, and tobacco. For books on Thibet published in '58 see Literaturf (Travel). Thistle, The most ancient and most noble Order of the. Originally established in 1540, and remodelled in 1687, and again in Queen Anne's reign (1703). It was by the statute of 1827 declared that this Order should consist of the Sovereign and 16 kinghts. Its abbreviation is K.T., and its badge a green ribbon, with motto Nemo me impune lacessit. There are at present twenty-one K.T.s. including the Sovereign and princes of the blood. the subjoined being a list of them :-

The Sovereign.

D. of York. Prince of Wales
Duke of Saxe-Coburg and Gotha (D. of Edinburgh). D. of Cambridge.

D. of Argyll. D. of Buccleuch. L. Napier and Ettrick. E. of Stair. M. of Lothian. D. of Montrose. D. of Athole.
E. of Southesk.
M. of Lorne.
L. Colville of Culross. D. of Fife. E. of Galloway.
E. of Crawford and
Balcarres. E. of Rosebery M. of Bute.

M. of Bute.

M of Tweeddale.

Dean of the Order, Very Rev James Cameron Lees, D D.; Secretary, Sir Duncan Alexander Campbell, Bart , Lyon King of Arms, J Balfour Paul; Gentleman Usher of the Green Rod, Hon Alan David Murray

Thun, Count Franz, is a member of a Tyiolese family which has been settled in Bohemia ever since the Thirty Years' War, and is one of the principal large landowners in that province. He was b. in 1848, and is married to a daughter of Prince Charles Schwarzenberg. After his education had been completed, berg. After his education had been completed, he took up the study of the law, served for a time in the army, and then was elected to the Bohemian Diet, where he joined the Conserva tive and Czech large landed proprietors. At first he was in great favour with the Czechs, but in '89 he was appointed Governor of Bohemia, and in that position had to deal with the disturbances which followed the attempt at what was called the Czecho-German compromise in '90 He resigned his position when Count Badeni became Prime Minister in '95 after the fall of the Kielmansegg Ministry, and accepted the post of Grand Master of the Court of the Archduke Franz Ferdinand, heir to the throne. He presided at the '97 session of the Delegations, and at that time regained the good opinion of the Crechs. When Baron Gautsch resigned office in March '98, he was entrusted with the formation of a Ministry, and the details of his attempts to deal with the very difficult state of affairs in the Reichsrath will be found under Austria Hungary.

Timber. See TRADE, '98

"Times, The." The chief English political "Times, The." The chief English political daily paper (price 3d.). First published under the title of The Daily Universal Register, Jan 1st, 1785, at 23d., which name was changed to The Times Jan. 1st, 1788. Editors have been:—Dr. Stoddart, Thomas Barnes, J. F. Delane, Prof. Thomas Chenery, G. E. Bukke (q.v.) (present editor), 1884. The Centenary of The Times occurred in Jan. '88. The Mail (2d.), whilehald three times and week jumples a published three times each week, furnishes a summary of the contents of The Times for two

an International Literary Journal (6d.), edited by H. D. Traill, is a weekly literary review. In connection with *The Times* are issued, in a convenient form, the Times law reports, and separate reports of commercial cases, and occaseparate Reports of commercial cases, and occasional summaries of subjects of special public interest. During '05 an admirable Atlas, known as "The Times Atlas," was ssued in 15 weekly parts, and during '98 The Times reprint of the inith edition of the "Encyclopædia Britannica," Palmer's "Index to The Times" provides a convenient means of identifying any particular subject or event.

Tobago, a small island in the British West Indies, new attached to Trinidad, from which it is distant only is miles, but formerly connected with the Windward Islands. Area. 114 9q. m., pop. 19,534. Scarborough is the chief town, and the staple crop is sugar, though the cocoanut palm, coffee, and cocoa are also being cultivated. The island is administered by a Commissioner appointed by the Governor of Trinidad, and its financial arrangements are kept separate. For statistics see British EMPIRE (table).

Togoland. A German protectorate on the Slave Coast in Upper Guinea, between the Gold Coast Colony on the west and Dahomey on the east, proclaimed in 1884. The protectorate includes Little Popo and Porto Seguro. The coast-line is only 32 miles long, but inland it broadens considerably Area, 23,160 sq. m; pop. 2,500,000. It is administered by an Imperial Commissioner. Capital is Lome, but Togo is the chief native town, and has 8000 inhabitants. Chief exports palm oil and ivory. A Convention with France, signed in July '97, gave to Togoland the fertile country of Sansanne Mangu, in the hinterland, and a geographical frontier in the neighbourhood of the coast; and to France the vast country of Gurma, the chief advantage of which was that it established communication between French Soudan and Dahomey, See NIGFRIA (map).

Tolstoi, Count Lyof Nikolaivitch, usually called Count Leon Iolstoi, the most eminent living Russian novelist, was b Aug. 28th, 1828, at Yashala Pollana, in the government of Toula, where he still lives Entered the army when 23, served in the Caucasus and at Sebastopol. First made literary reputation by his vivid sketches from Sebastopol. Leaving the army soon after the close of the Crimean war, he devoted himself to literature. His "War and Peace," a tale of the invasion of Russia by Napoleon in 1812, is regarded by Russians as his masterpiece; but his "Anna Karenna," which appeared in '76, is better appreciated abroad. "The Cossacks" is another admirable abroad. "The Cossacks" is another admirable work. He has written much on education, and published many short tales and reminiscences of childhood and youth. Latterly he has devoted himself to religious teaching. He makes "Resist not evil" the keystone of the Christian faith, and insists that the literal interpretation of the Sermon on the Mount is the only rule of the Christian life. His religious views are set forth in "Christ's Christianity" and "My Religion." Translations of his "Kreutzer Sonata" appeared in '90. In Oct. '92 he deposited his Memoirs and Diaries with the Curator of the Rumyanzoff Museum on the condition that they should not be published till ten years after his death. In November he legally made over his days, the Times Weskly Edition (2d.) contains death. In November he legally made over his a summary of the week's news; and Literature, whole fortune, including his real and personal

estate, to his wife and children. He married in 61, and has nine children living. During 93 he wrote "The Kingdom of God Within Us," an important work on the social question; in 94 a powerful criticism of the Franco-Russian alliance, entitled "Patriotism and Chrystianity". Russian aniance, entitled "Patriotism and Christianity," appeared; and in '95 he published "The Four Gospels Harmonised and Translated" by himself.

Tonbridge School was founded 1553, and was reorganised 26. The new buildings were opened in Oct. 95. Governors: the Worshipful Company of Skinners. Four exhibitions from Loo to Loo for four years fall vacant annually, and are tenable at any place of higher education that the Governors may approve of; four others are tenable only at Oxford or Cambridge Pupils, 450. Head Master, Rev. Joseph Wood, D.D. Motto, Deus dat incrementum.

Tonga Isles, The, in the Friendly Islands, are governed by an hereditary monarch and a legislative assembly of two orders—viz, 31 nobles, and 31 elected representatives of the people, with an executive consisting of a ministry nominated by the King. Three groups of islands, called Tonga, Haapan, and Vavau, constitute the kingdom The British Deputy Commissioner for the Western Pacific is Vice-Consul in Tonga Area 385 sq. m.; pop. 23,000. Capital, Tongatabu.

Tonquin. A country of Indo-China, which was formerly a province of Annam, but was made a French colony in 1884. The name is also spelled Tong-king It is situated to the north of Annam, and lies to the east of the Shan States of Burmah, and to the south of the Chinese province of Yunnan. Area, 122,000 sg. m; pop. 12,000,000. Capital, Hanoi, on the Hanoi or Song-koi river, pop. 150,000. Principal port and chief seat of trade, Hai-phong. At Hongay, near Hai-phong, and at Kebao, there are coal mines worked by French companies The other products of the country are silk, sugar, cotton, and rice. The country is ruled by a Resident under the French Council of Indo-Tonquin. A country of Indo-China, which cotton, and rice. The country is ruled by a Resident under the French Council of Indo-China The army of occupation is about 19,000 strong. See Annam, China (map), Colonies, etc., of European Powers, and Lyce China China (map), country and country of the country Indo-China.

Tortola. A West Indian island of the Virgir group, and chief of the Presidency of the Virgin in the British federal colony of the Leeward Islands. Area, 26 sq. m.

Tower Bridge, London. See Engineering.

TRADE, '98.

In this article the trade of the year is dealt with under its principal divisions. To enable a broad summary to be made of the position, the following figures, showing imports and exports month by month, are useful It will be seen that on the whole the year has presented similar features to its pic decessor in energy of the Dingley tariff in the United States are still acutely felt by British producers, and political unrest in various parts of the world has checked enterprise and induced a feeling of caution and hesitation. This was particularly the case in the spring months, but latterly there has been a better tendency. The import similar features to its piedecessor The effects there has been a better tendency. The import the importance of the stuffs, and particularly wheat (q.v.). The figures stuffs, and particularly wheat (q.v.). The figures the importance of the stuffs, and particularly wheat (q.v.). The figures the importance of the importanc

The outlook for the coming year is fairly satisfactory, and there is no evidence of any very marked change

Butter - I hat less than a third of the butter consumed in this country should be of home production is an unsatisfactory feature to which we have previously called attention. The value of our imports of this product in 'gr was only a inttle under Lo₁o₂o₂o₂o₃ about one-third coming from our colonies and two thirds from foreign countries, principally France and Denmark. During the first ten months of the year there was a slightly falling off in the imports as compared with the same period in '96-7, the total being 2,087,888 cwts, as compared with 2,714,589 cwts. in the pievious year. It is by the method of co-operative production, which has been as some still in Henrylk that has been so successful in Denmark, that the British farmer must attempt to improve his present position. So long as butter is made in small chains instead of in factories, it is impossible for the British farmer to obtain his due share of this important trade.

Coul -Prices have shown but little variation during the past year, as during the summer months the South Wales coal strike tended to check the usual fail. In addition to this the effect of the new Workmen's Compensation Act was in the same direction. The wholesale quotation for best Walisend in the early part of November '97 was 16s od., the price advanced From the middle of May until the middle of August the quotation remained steady at 16s. After that it rose to 17s., and in the early part of November it stood at the last-named figure. Apart from the South Wales dispute there have been no striking features in the trade. Our exports for the first tem months of the year were slightly higher than during the same period of '07. France is still our largest customer, and bought an increased quantity during '98. Italy comes second and Germany third. There has been an increase of about 10 per cent, in the shipments to Sweden and Norway.

cent. in the shipments to Sweden and Norway. *Copper.*—We pointed out last year that cincumstances were favourable to a rise in the price of copper, and during the last twelve months a distinctly upward movement has taken place. In the early part of Nov. '97 the price for G.M.B. was \$\mathcal{L}47\$ 155. per ton, it had risen by the end of the year to \$\mathcal{L}48\$ 55. per ton, and by the beginning of March the quotation was over \$\mathcal{L}50\$ In April it stood at \$\mathcal{L}52\$ 3\pi\$, receding somewhat during the summer months and falling as low as \$\mathcal{L}49\$ 155 in the middle of July. Since then the upward movement has been resumed, and the price in the early part of Nov. '98 was \$\mathcal{L}55\$ 2\sigma\$. The statistical position of copper is very strong. Both in England and on the Continent the demand for engineering and shipbuilding purposes is rapidly growing, while the extended use of electricity involves an increased demand for that purpose Stocks are extremely low, only amounting to \$25,79\$,000 tons at the end of Oct '98, while the rate of production does not increase nearly as rapidly as the demand. Under all these circumstances the prospect is that a further increase in price will take blace.

Cotton.—During the past year the cotton industry has been considerably depressed, though the demand from In a chas shown an improvement. The course of prices has been a good deal influenced by the prevalence of political uncertainty and by the prospect (now realised) of an unusually large crop, considerably exceeding that of any of the previous eight years. In the early part of Nov '97 Middling Upland stood at 332, but by the close of the year it had fallen to 3.72. In February and March firmer rates prevailed, and by the middle of the latter month 310, the highest point of the year, was touched. Thereafter there was a slight decline until the middle of April, when the price stood at 31 d. In June and July the markets were very mactive, and at the end of the latter month the quotation was only 359. After that there was a little recovery, but in the early part of October the price was down to 36, and in the early part of November it stood at 3. Below will be found particulars of the American and Canadan corps the comments. American and Canadian crops, the former season ending on Sept 1st and the latter on June 30th.

Year.			India.

'97-8 .			11,180,060	3,100,000	

As regards the distribution of the American crop, the proportion taken by Great Britain continues to decrease, and that taken in the United States shows a very large increase, indicating a considerable development in cotton manufactures there. The figures given below show five-year averages except in the last three lines.

Proportional Distribution of American Cotton Crops.

	Great Britain.	Ĺ	- Contine	nt.	United States
	%		%		%
'80-5	42'83		25 53		31 64
'85-90	. 41'23		25'94		32.83
'90 -5 .	. 37.28		29.67		33.02

' 96 -7	. 32 90		33.23		33'58
'97 8	31'35		36 go		31'75

As regards our exports there is a slight improvement in cotton yain and twist, the figures for the first ten months of '98 being 205,082,800 b, as compared with 203,796,000 lb, during the same period in '97 Germany is still our largest customer, taking nearly the of the total export on the actual figures, and really considerably more, as shipments coming under the head of Holland are made to a great extent for German consumption. There has been a slight increase in Indian requirements and also in shipments to China, but a falling off in the case of Japan. In piece goods there has been an increase of about 9 per cent, as compared with the previous year, the total shipments being 4,289,106,000 yds. as compared with 394,1903,600 yds during the same period of the pieceding year. India is still our most important customer and shipments thither showed a decided increase during the year. China, our second best customer, took less, but there was a marked improvement in the case of Japan Turkey still buys from us, though there is a slight diminution as compared with '97. Shipments to the United States were about 28 per cent less than during the previous year. Very little has been done in the way of developing new markets.

Iron and Steel—The engineering strike, after lasting six months, came to an end in the early part of '98, and the year has been one of steady prosperity with few drawbacks. Early in Nov '97 Scotch warrants were quoted at 45° 60′ have remained pretty steady in the neighbourhood of that price until the end of that year and through Jan and Feb. '98 Through March and April the quotation was about 46° 60′, isning in the middle of May to 47°. In the last price, however, was not maintained, and during June and July the quotation was in the neighbourhood of 46°. In August a rise to 47° again took place, and atthe end of September as high as a rate as 48° 60′ had been reached. The quotation in the early part of November was 49° cd. The statistical position is a very lavourable one, stocks at the end of September being less than half as much as at the same date of '97, and there is no present prospect of material decline. Shipments of hardware and cullery for the first ten months of '98 show a decline as compared with the previous year, this being particularly marked in the case of the United States, which took a little more than one-tenth as much as in '97. Germany and France were also poorer customers, and the

demand from all parts of South America fell off considerably Increased shipments to South Africa were very marked, and poorer orders were placed by India and Australia. The only notable increase occurred in the case of Russia. Pig-iron shipments have shown a decline of about oper cent., the total for the first ten months of the year being 889,672 tons as compared with 1,019,664 tons in the first ten months of '97. Here again shipments to Russia have increased, but those to Germany, Holland and Belgium have fallen off considerable. In really property they be been determined. ably. In railway material there has been a drop of about 20 per cent. as compared with '97, shipments to Japan, Mexico, and ports of the East Indies and Australasia having notably declined. There was a slight improvement in the case of Russia, and in that of Sweden and Norway exports of hoops, sheets, etc., are also poorer, but galvanised sheets registered a slight advance. In tin plates there was a slight decline, and it is notable that at the present time the United States, which used to be the main market for these goods, now takes less than 25 per cent, of our exports. As regards locomotives there has again been a marked inclease, especially in the case of India and Australasia, which are our best customers In machinery and mill work there was a slight improvement as compared with '97, but the export of cycles fell off very considerably, and is now little more than half as much as it was

Jule -Prices of jute have been very steady during the past year. In the early part of Nov. 97 medium jute stood at £14, declining to £13 tos towards the end of the year. Early in Jan '98 a rise to £13 155 took place, at which rate prices were steady until May, when

Year.	Bales
'92-3	2,443,000
'93-4	2,210,000
'9 4 -5	2,917,000
'95-6	2,990,000
'96-7	2,780,000
'97-8	3,550,000

There appears to be some prospect of a shortage of supplies, as the forecast for the season is age of supplies, as the forecast for the season is only 4,500,000 bales as compared with 6,800,000 last year. The consumption in India is expected to be about 3,000,000 bales, and it is probable therefore that the amount available for Lurope will be very small. Our exports of jute yarn showed a slight improvement in '98, being 41,246,700 lb as compared with 40,618,000 lb. during the first ten months of '97

Shipments to Germany have fallen off considerably after the great increase of last year, and there has been a great diminution as regards Spain, but in other directions increases have taken place. The export of piece goods has considerably declined, mainly owing to a great diminution in shipments to the United States. Those to South America and British North America show an improvement.

Linen and Flax. - The flax market has been quiet during the year, and prices have shown comparatively little deviation Exports of yains are about the same as in '97, but in linen piece goods theie has been a considerable diminution, the figures for the first ten months of the year being only 14,354,000 yds., as compared with 15,001,700 yds. In the same period of 97 There has been a great falling off in shipments to the United States, but the Continental and Indian demand has been slightly larger.

half .- Exports this year have again shown improvement, for which a larger demand from India is in the main responsible. The trade is, however, very much smaller than it was ten years ago, before the Salt Union was founded. as will be seen from the following table :-

First ten months.		Tons
'8 8 .		738,000
'90		638,758
'95		630,45
'96		544,958
'97		572,604
'98		608,440

Shipping and Shipbuilding .- Freights have been low during the year, but on the whole rather better during '97. Black Sea whole rather better during '97. Black Sea quotations have varied between 85 6d. and which rate prices were.

124 became the quotation, and this was maintained during the following five months. In the early part of November the price stood at C12. The following are the figures of the shipments of jute from Calcutta for Europe during the past six years

125, 6d, the following in May, In the middle of Cotober the latter in May, In the middle of October the States were at their lowest point in August, when 25 6d was reached, mainly they have stood between 35 and 45, and the quotation in the middle of October was 45. 3d. As regards shipbuilding, the output during the present year has been very considerable, and the vessels under construction at the end of September were, as the following table will show, very much larger than at the same period of '97, though that in its turn had shown a consider-able increase over '90 Shipbuilding in the United States is also very active, and it appears clear that before long there will be considerable competition for freights from that quarter. On the whole, therefore, there is no prospect at the present time of any material increase in freight rates

Sugar.—Mainly in consequence of a sound statistical position, sugar prices have been much steadier in '98 than during the previous year, though they are still at a very low level. A conference was held at Brussels during the year for the purpose of negotiating for the abolition of the bounties. It came to nothing, however, owing to the opposition of France and the condition of the West Indian sugar industry. It is, therefore, very unsatisfactory, in spite of the grants in aid proposed by Mr Chamberlain The pince of 88 per cent, bect in the early part of Nov. '97 was about 88 6d, and it lose steadily until the end of that year, standing at about 98.6d, on Jan 1st Fluctuations since then have been only a few pence either way, the quotation in the early part of November being 9.84d The most trustworthy estimates of the coming beetroot crop are as follows, the actual results for last year being given in the first column for compari-

Tea.—Tea has been fairly steady in price during the past twelve months. Both the quality and quantity of the Indian output for 1978 proved poorer than usual, and this accounts for a slight failing off in our imports from there during the first ten months of the year as compared with the same period of 197 We append a table which shows how very nearly Indian and Ceylon teas now monopolise the British market. It is satisfactory to find that efforts are being made successfully to cultivate trade with other parts of the world. Itade is being steadily developed with Australia, North Ame. i.a, Russia, and elsewhere, and the danger, therefore, of production being in excess of consumptive requirements seems to be lessented.

Tea entered for Home Consumption.

Timber.—We noted last year a very considerable increase in the imports of timber, owing to the activity of the building tiades, and to the special demand for jubilec celebrations. In '96 builders have been less busy than they were in '97, with the result that the demand has considerably fallen off, especially for hewn

timber, of which 1,994,271 loads were imported, as compared with 2,466,942 loads during the same period of '97; while as regards sawn timber the figures were 5,618,020 loads as compared with 6, 182,606 loads. The imports of mahogany were about on the same level in '98 as in the preceding year, which had shown a great increase on its predecessors. The following are the London stocks of plain timb. r at the end of September in each year:—

. at the ch	E or oct	, com	oci ili caci
Year.			Pieces.
'94			12,622,000
'95			12,270,000
'96			14,949,000
'97			17,565,000
'98			20, 215,000

The demand for West Australia, Jarrah and Karii wood foi sticet paving purposes continues to grow steadily, and by the operations of limited companies and otherwise the import of this class of timber is increasing, and is likely to increase much more rapidly within the next few years.

Wool.-The sixth and last series of London Colonial wool sales in '97 opened on Nov. 25th, Closing on Dec 17th Values showed a slight decline as compared with the previous series, amounting to about 5 per cent, mainly owing to the fact that home buyers, were less in evidence than usual, owing to the lessened American demands for piece goods and to the engineering strike. The first series of '98 opened on Jan, 18th and closed on Feb 2nd. The available total for disposal was only small, and the tendency of the sales on the whole were favourable-an advance of fully 10 per cent upon Australian merino wools having been obtained in the early portion of the auctions. This rise in price was due to no improvement in the manufacturing position, but to a scarcity of supply. The second series took place in March, when supplies were again short, and a further advance of 5 per cent, in merinos and finer wools generally took place. At this sale South African sorts attracted more attention than usual. The third series opened on the than usual The third series opened on the May 31d, and was characterised by a somewhat weak tone, quotations showing a decline of about 5 per cent as compared with the previous series. Most buying was done in the home trade section, Continental operators showing a good deal of reserve. The fourth by a considerable animation, there being an average advance of 5 per cent on the May rates, while British merinos rose as much as 72 per cent The fifth series began on Sept 20th, closing on Oct 7th. In the interval since the previous sales there had been a general expectation of an advance in price owing to the statistical position, and this was realised in so far that a rise of about 5 per cent for good class wools took place at the opening. As the sale progressed, however, it was found that Continental buyers were operating separately, and that the competition from the home section tell off, while Americans were hardly in evidence at all, so that before the close prices had receded to the level of July rates. Practically the position throughout the year has been that short supplies have been concurrent with a limited consumptive demand, and that prices have fluctuated up or down as opinion has been impressed by the lack of

^{*} Ten months only.

the former or of the latter. We append our usual table showing the imports of wool into the United Kingdom during a series of years.

Woolleng and Worsteds. - Exports during '98 have not on the whole been of a satisfactory character. Woollen yarn shows a slight diminution, and worsted yarn a slight improvement during the first ten months, but the not every important. In woollen piece goods there was a marked decline, the total for the there was a marked decline, the total lot meter months being 39,361,300 yds as compared with 45,152,100 yds. in the same period of '97 That in its turn was greatly inferior to '90 A great decline took place in exports to the United States, which took only about one-sixth as much as in the previous year. An improve-ment was shown in the case of British North America owing to the Canadian tariff and in that of South Africa, but shipments to Australia were on a smaller scale. In worsted piece goods the decline during '98 was even more marked than in the case of woollen goods, the total for the ten months being 80,726,600 vds as compared with 115,011,400 yds and 117,291,200 vds in the same periods of '07 and '96 respectively. Here again the shipments to the United States were only about one fourth of what they were in '97, and though this was to a certain extent compensated for by an improvement of about 50 per cent, in the deliveries to British India, the trade with most countries was barely maintained or showed a decrease. Carpets were exported in rather larger quantities than in '97, but there was a great falling off in the shipments of blankets, which were very little more than half as much as in the corresponding period of '96 On the whole this brain hot trade, always hable to considerable fluctuations, is going through one of its adverse periods, and its future is in many respects very uncertain.

TRADE, BOARD OF.

The work of this Department is done by a President (Mr Ritchie, M P), a Parliamentary Secretary (the Earl of Dudley), a Permanent Secretary (Sir Courtenay Boyle, K.C.B.), four assistant secretaries, in connection with as many departments relating to mercantile marine, finance, railways, fisheries and harbours, a Comptroller-General for commerce, labour, and statistics, and a large staff of inspectors, surveyors, clerks, etc. Two separate Councils, for Trade and Foreign Plantations, were first established in 1660, and were consolidated into one Department in 1672, but this lasted for three years only. It was, however, revived in 1695. The present Department

owes its origin to an Order in Council of 1786; but its work has enormously increased since then, and every year sees some new administrative burdens thrown upon its shoulders. Two important additions were made in '83 and '88. The control of the Patent Office was transferred to it under an Act passed in transferred to it under an Act passed in the former year for granting patents, registering designs and trade marks; it was placed under the immediate control of an officer (the Comptiollei-General), who acts under the superintendence and direction of the Board, and was opened for business on Jan. 181. 84. The other new branch of departmental work which was added by the legislation of 83 was in regard to Bankruptoy. The powers of the Board under both these Acts have been explained and summarised under other headings in previous editions of this work Sec separate article on BANKRUPICY. By the Patents, Designs and Trade Marks Act, 184 the Fatents, Designs and Armor marks and 188 (51 & 52 Vict. of 50), it was enacted that after July 1st, '89, a person should not be entitled to describe himself as a patent agent unless registered under the Act by the Board of Liade, who were to make rules poard of Iriade, who were to make rules required for giving effect to this provision; but every person who proved to the satisfaction of the Board that prior to the passing of the Act he had been bona fide practising as a patent agent was to be entitled to be person knowingly describing himself as a patent agent in contravention of the section, was to be hable on summary conviction to a fine not exceeding \mathcal{L}_{20} "Patent agent" is defined to mean exclusively an agent for obtaining patents in the United Kingdom. A number of mendments of great importance to those interested were made in the Act of Changes in the amount of patent renewal fecs were made in '92 See Pari NTS

At the commencement of each session the At the commencement of each session the Department reports to Parliament upon all railway, canal, tramway, subway, gas and water bills which have been deposited by promoters, and upon applications made to it for provisional orders for tramways, electric lighting, etc. When the construction of a railway has been sanctioned by Parliament, the line cannot be opened until an inspector of the Board has certified as to its fitness. Railway bye-laws must be approved by the Board, and its inspectors inquire into and report upon all important railway accidents. It may order a railway company to make certain provisions for railway company to make certain povisions of the block system on all or any of their railways open for the public conveyance of passengers. Under the Railway and Canal Iraffic Act, '88, the two new Railway and Canal Commissions of the company of the two new Railway and Canal Commissions of the two new Railway and Canal Commissions of the Canal Canal Commissions of the Canal Canal Commissions of the Canal sioners were to be appointed by Her Majesty on the recommendations of the President of the Board of Irade. The same measure enacted that every railway company should submit to the Board a revised classification of merchandise traffic, and a revised schedule of maximum rates and charges applicable thereto; that the Board should consider the same and any objections which might be urged thereunto, and endeavour to arrange differences between the company and objectors; and that if after hearing all the parties the Board were unable to come to an agreement with the company, the Board might determine the classification which in their opinion ought to be adopted, and the schedule which in their opinion would be just and reasonable, and report upon the same to Parliament; such classification and schedule to be subsequently embodied in a provisional order confirmation bill, upon which the railway company might be heard. It was under this Act that the Board made the provisional orders which formed the subject of prolonged inquiries before a joint committee of the two Houses, presided over by the Duke of Richmond, and which orders, being amended by the committee and subsequently by the House of Commons, settled the rates and charges of the principal railway and canal companies. Under section 31 of the Act the Board of Trade was empowered to endeavour to settle amicably disputes as to railway rates, and further powers in this connection were bestowed upon the Board in the session of '94 with regard to rates increased since Dec '92 New powers with respect to the construction of Light Railways in Great Britain were conferred upon the Board by statute in '96. Tramways, upon construction, are subject to its inspection, and the use of electric, steam, or any mechanical power upon them is subject to its consent or supervision.

The rights of the Crown to foreshores are vested in it, and it has statutory powers as to pilotage, lighthouses and their maintenance, the inspection of salmon and fresh-water fisheries in England and Wales, and under the Sea Fisheries Acts in regard to oyster. mussel, crab, lobster, and other fisheries It may, on the application of a county or borough council, create a sea-fisheries district and council, create a sea-insieries district and local fisheries committee, whose byelaws are subject to its confirmation. The Board of Trade also administers important Acts for the enforcement of international regulations con-trolling the fisheries pursued in common by British and foreign fishering in the seas surrounding the British Isles. It is the guardian of the coasts, tidal waters, navigable rivers, harbour works, and tidal lands, when any works affecting any of them are projected by local authorities or railway of other companies. The harbours of Holyhead and Ramsgate are directly under it, and the President is a commissioner of the Mcrsey Conservancy. The Board supervises all matters relating to the mercantile marine (q v). Its officers may board vessels, inspect documents, muster crews, inquire into the cause of any accident or damage to vessels, see whether ships are in good condition, and take action for their detention if they be overladen or unseaworthy It manages the Mercantile Marine Fund, which is derived from various sources, including light dues; and is applied to the maintenance of lighthouses and beacons, the expenses con-nected with local marine boards and officers, engagement of seamen, etc. The subordinate department of the General Register and Record Office of Shipping and Seamen, London, is under the Board, and exists mainly for the purposes of the Merchant Shipping Acts in their relation to the title of ships and to the registration of seamen; also for the purposes of the Naval Reserve Act. It has the custody of records and returns relating to ships and seamen, and the registration and tabulation of particulars abstracted from these records and returns; and it is the duty of the Department to see that those documents which they receive give the which is to be particulars which they ought to give, and to in open court.

call for explanations of any apparent breach of Acts of Parliament or instructions of the Board which an examination of them may disclose. The Registrar issues certificates to masters, mates, and others who have complied with the required conditions as to service and the necessary technical knowledge. The Naval Reserve is, as regards enrolment and the fulfilment of conditions as to service under the Parenter.

conditions as to service, under the Registrar. The Standard Department was transferred to the Board from the Exchequer in '66, and in '77 the Permanent Secretary of the Board was appointed warden of the standards, without salary. It has the custody of the primary standards of length and weight, and its prin-cipal duty is the verification of local standards. The Board is empowered to cause such new denominations of standards for the measurement of electricity, temperature, pressure, or gravities, as appear to it to be required for use for trade to be duly made and verified. It may order a local inquiry with respect to the administration of the law relating to weights and measures within the jurisdiction of any local authority, and it may examine and grant certificates to inspectors of weights and measures Under the Companies Act, 62, the Board may in certain cases, on the requisition of a sufficient proportion of shareholders, appoint an inspector to examine into the affairs of a company. Certain applications for charters of incorporation are refeired to the Board by the Privy Council It verifies the apparatus used under the Petroleum Act to test the flashing point of inflammable nineral oils. Under the Metropolitan Gas Acts, the Board of Irade appoint the gas referees, chief gas examiner, and official auditor for the Metropolis, and the accounts of the companies are presented to Parliament The Board has its own legal branch. When commercial treaties are in course of negotiation, it is generally consulted by the Foreign Office. It publishes monthly returns regarding trade and naviga-tion, in addition to a mass of statistical information as to the commerce, shipping, railways, fisheries, taxation, population, and progress of the United Kingdom, the colonies, and many foreign countries Its Labour Department collects and disseminates information as to the state of the labour market at home and abroad The Board of Trade also publishes the Board of Trade Journal, containing much that is interesting to commercial men, and a labour gazette. By the Conciliation Act, '96, the Board is empowered to take certain action, either on application from one of the parties or otherwise, to promote the settlement of labour disputes—It also registers (onclusion Boards, By, an Act of the session of '31 the Board may undertake a prosecution under the Merchandise Marks Act of '87 in cases appearing to affect the general interests of the country, or of a section of the community, or of a trade; though this power has since, in cases which appear to ielate to agricultural or horticultural produce, been vested in the Board of Agriculture. Notice of accidents taking place in certain specified employments is, under an Act of '94, to be given to the Board of Trade, and the Board may by order schedule other employments, and may, in cases which appear to them to be of sufficient importance to require it, direct a formal investigation to be held, which is to be conducted by competent persons which is to be conducted by competent persons

TRADE UNIONS.

TRADE UNIONS.

The growth of Trade Unionism in recent years can be to some extent measured by the membership represented at the angual gathering of Unionists known as the Trade Union Congress. At the first congress, in '68, 118,367 were represented; in '78, 623,957; in '88, 674,634; in '90, 1,470,191; in '92, 1,219,934, in '94, 1,080,545, in '96, 1,076,000; and in '93, 1,176,896. From '68 to '94 the number of members represented included the members of Trades Councils, but since then the real representation of fully-paid-up members of Trade Unions has been insisted upon. Accurate statistical data of all the unions of the United Kingdom are not, however, even now obtainable. The figures given below, which have been revised and corrected to date as far as possible, relate only to the principal Trade Unions throughout the kingdom; and it must not be forgotten that there is a very large number of smaller Unions with less than five hundred members. Consult Reports of Trades Union Congresses, published by the Trades Union Parliamentary Committee

TRADE MARKS.

By the Trade Marks Registration Acts, '75, '76 and '77, the trade mark, and even certain trade names, might be registered, and for the first time, and upon such registration, the right to the mark or name became the property of the inventor. All the last-mentioned statutes have been repealed; but then provisions are re-enacted with amendments in the Patents, Designs and Trade Marks Acts, '83 By sect.' 76 of this statute, it is provided that the registration of a person as proprietor of a trade mark shall be prima facte cyldence of his right to the exclusive use of this symbol, and shall, at the end of five years from the date of the registration, be conclusive evidence of his title to the sole use of the mark. This mark, however, is only to be registered for particular goods or classes of goods, and is assignable and transferable only in relation to the goodwill of the business concerned with these goods, and ends with that goodwill. A register of trade marks 7 established, and by an amending Act, '88, a corresponding register has been established in Sheffield for Sheffield ware. By this same Act it is provided that for a trade mark to be registered thereunder, it must consist of, or contain certain essential particulars, which are mentioned in detail in this statute. The proprietor of a trade mark of trade name duly registered may now without proof of fraud obtain an injunction and damages for the unauthorised use of his trade mark or trade name, but the registration of such a mark when it has but the registration of such a malk when it has been registrated without sufficient cause may be ordered to be expunged on the application of any person aggrieved thereby. I rade marks remain in force the same time as patents—viz, 14 years; but the former may be renewed, as a matter of course, at the end of every 14 years on the payment of certain fees. By the Merchandise Marks Act, '87, it is provided that the forging of any registered trade mark or its false application to goods like those in regard to which the mark has been registered, as well as several other incidental acts of a similar false and fraudulent character, are punishable as criminal offences, unless it was shown that there was no intention to defraud Every article or thing by means of, or in connection with which, the offence has been committed is to be forfeited to the Crown, and these may be ordered to be destroyed or otherwise disposed of as the Court thinks fit By the Merchandise Marks Act, '91, the customs' entry respecting inspected goods is for the purposes of the Merchandise Marks Act, '87, to be deemed to be a trade description applied to the goods. Again, the Board of Trade is empowered to prosecute offenders under this statute in cases affecting the general interests of the country or of a section of the com-munity or of a trade. By the Merchandise Marks (Prosecutions), Act '94, the Board of Agriculture is empowered to prosecute offences under the '80 Act, relating to agricultural and horticultural produce. Much important evidence was recently taken by a Select Committee of the House of Commons on Merchandise Marks This testimony, and the report of the

properly marked foreign goods is sometimes injurious, "the balance of the evidence is in favour of retaining the greater portion of the Act." Many of the objections brought against it have been from persons engaged in the transit business, who allege that their trade is injured by the opening of packages, and the examination of their contents sometimes results in their permanent damage, and that such goods are there'y diverted to routes which do not pass through the United Kingdom Committee state that it would be misleading to attribute such a result entirely to the operation of the last-named statute, and add that the examination referred to "is ineffectual to prevent the fiaudulent use of British trade marks in goods passing from foreign ports to other countries or to British colonies, masmuch as besides, those cairied direct in toleign vessels, it has become a regular practice for both British and foreign steamships to take both British and foreign secondary as a part of their cargo abroad, and to complete their loading in a British poit. The cargo their loading in a British poit. The cargo loaded abroad thereby escapes examination here." The Committee recommend that goods in transit shall be exempted from the operation of the Act, but they consider it to be a most necessary condition that the Board of Customs should bring to the notice of the authorities in India or the Colonies that certain goods on board had been transhipped or loaded abroad. so that on arrival they might be challenged In 96 olders were given to detain foreign goods only when they bore marks raising a direct claim to British origin, or bearing a name or trade mark of some one known firm having its principal place of business in the United Kingdom without "qualification." These orders have given great relief. The Com-nittee think that the practice of the Customs should require the excision of offending marks rather than that of adding a "qualifying nather than that of adding a "qualifying" mark, which in many cases is a gratuitous, unnecessary, and undesnable advertisement of our foreign competitors. A great business has sprung up whereby atticles of general consumption are collected by commercial firms, who mark them with their own names whether they have been manufactured in this country or elsewhere But such marking or imported goods is held to be a violation of the Act. These firms state that their names are accepted as a guarantee of quality, and that the requirement of the name of the country of origin tends to deprive them of their business in respect of articles manufactured abroad, and this country generally of a profitable trade. The Committee are of opinion that it should not be unlawful for these traders to stamp goods, wherever purchased, with their own names and business addresses, provided that some such words as "sold by" be added. Much testimony has also been received of the advertisement of the merchandise and products of foreign countries on account of the present requirement of the specification of the particular country of origin, and of the disadvantage caused to British merchants and dealers by the consequent disclosure of trade secrets, and the loss and discouragement of British business enterprise The Committee think that this Committee on such, was published in October 'grevance would be substantially got rid of by 'gr. According to this report, the Merchandise Marks Act of '87 has stopped to a great extent the fraudulent practices against which it was directed. Although the competition of im-

THE TRANSVAAL AND ITS NEIGHBOURS.

marks or indications of British origin. The Committee recommend that foreign Governments should be induced to legislate on the lines of the Merchandise Marks Act, and in the spirit of the Industrial Property Convention. Important statements are annually published from the Comptroller-General of patents, designs and trade marks concerning these symbols. According to the Report of this officer respecting them for '97, the total number of applications for the registration of trade marks during that year (including 180 applications to the Cutlers' Company of Sheffield) was 10,624, as compared with 9466 in the previous year 111 '97, 3695 trade marks were advertised and 3358 were registered. The number of hearings which took place during the year was 2124, 120 notices of opposition to the registration of trade marks were lodged, and 46 cases of opposition were heard. In six of these there were appeals to the Board of Trade, all of which were referred by the Board to the court, and remain undecided. During the same year 58 appeals were made to the Board from decisions of the Comptroller. Of these 19 wile heard by the Board of Trade, 38 were referred by the Board to the court, and one has not yet been dealt with. Of the 19 appeals heard by the Board, 3 were allowed, 13 were dismissed, and 3 wile not decided. Of the 36 appeals referred by the Board to the court, 9 were abandoned by the Board to the court, 9 were abandoned by the Board to the court, 9 were abandoned by the Board to the court, 9 were abandoned by the Board to the court, 9 were abandoned by the Board to the court, 9 were abandoned by the Board to the court, 9 were abandoned by the Board to the court, 9 were abandoned by the Board to the court, 9 were abandoned by the Board to the court, 9 were abandoned by the Board to the court, 9 were abandoned by the Board to the court, 9 were abandoned by the Board to the court, 9 were abandoned by the Board to the court, 9 were abandoned by the Board to the court, 9 were abandoned by the Board to the court, 9 were aba

Transcaspia. A province in Central Asia, marked out by Russia as a Russian province, and including the Turkoman region between the Caspian and the Oxus. Area, 214,227 sq.m, pop. 360,000 The administrative centre is Askabad. The Transcaspian Railway (see Enginlering.) traverses the country, connecting Samarcand with the Caspian. See Turkestan.

TRANSVAAL

The Transvaal is officially known as the South African Republic It lies N of the Vaal river and S. of the Limpopo river. It is bounded W. by Bechuanaland; E. by Portuguese East Africa and Zululand; S. by Natal and Orange Free State. Swaziland, on the south-east, is a protectorate of the Republic A map clearly showing its position is given opposite. Area, 119,139 sq. m.; pop. about \$50,000, of whom some 250,000 only are whites The relations of the Republic to Great Britain are regulated by the Convention of London, 84, by which it was laid down that, although independent with regard to its internal administration, the State should conclude no treaty or engagement with any state or nation, except the Orange Free State, nor with any native tribe lying to the east or west, without the approval of H.M. the Queen. The Transvaal is ruled by a President (Mr. Kruger) elected for five years, with a Council of five members Legislation is effected by a Parliament of two Chambers, each of 27 members, called the First and Second Volksraad. Bills passed by the Second Chamber must be approved by the First before becoming law. The members of the First are elected for four years from and by first-class

burghers—i.e., all male whites resident in the Fransvaal before '76, or who fought in the war of independence in '81, or various campaigns since, including the Raid, and their children from the age of sixteen. The members of the Second Volksraad are elected for 4 years by and from the first and second class burghers -ic, the naturalised alien males and their children from the age of sixteen Naturalisation can be obtained after two years' residence. Second class burghers can become first class by resolution of the first Volksraad twelve years after naturalisation. The country is divided into twenty districts. The capital is Pretoria. In '97 the average number of children attending Government schools of all kinds was 11.436. In '86 gold was discovered on the Witwatersrand range of hills, and these are now, after a first rush and the collapse that mevitably followed, proving of immense value. (See GOLD FIELDS AND PRODUCTION) The centre of the gold fields is Johannesburg, which has a popula-tion of over 100,000, including over 50,000 whites, most of whom are debarred from the franchise, although the revenue of the State is almost entirely derived from them. The political discontent amongst the Utilanders reached a crisis in Dec. 36 The National Union of Johannesburg issued a manifesto setting forth the Utilanders' grievances, and claiming an equitable franchise and fair representation for all residents in the Fransvaal, with other administrative reforms. It was pointed out that, though the Uitlanders constituted the majority of the state, owning more than half the land and at least nine-tenths of the property, yet in all matters affecting their lives, liberties and properties they had absolutely no voice. The Administration was charged with the grossest extravagance, bribery and corruption, and with an intense hostility to the English. The leaders of the Union were prepared to fight for their rights, and, as it appeared that the Boers were about to attack the town, the central committee of the National Union concentral committee of the National Union Con-stituted themselves a provisional government pledged to reform, and men were enlisted in large numbers, while an appeal for interven-tion was also sent to the Imperial Commis-sioner At this juncture came Dr. Jameson's raid from British Bechianialand, and his subsequent defeat, followed by the disarmament of lohanne sburg The members of the National Reform Committee were arrested, but after-wards released on the payment of heavy fines. wards icleased on the payment of heavy fines. A claim was made in respect of the Raid for material damage £677,938 is, 3d; and for moral or intellectual damage £1,000,000, which the British Government were asked to pay or to cause to be paid (Feb. 17th, '97). Estimated revenue, '96, £4,62,193; expenditure, £3,582,606; exports of wool, cattle, hides, grain, ostrich feathers, ivory, butter, gold, etc. imports, '95, £9,816,304 See Diplomatic and Swaziland.

Elistory. DB.**—Chief lustice Kotze sent a letter to the President (Feb. 5th), complaining that nothing had been done to carry out the compromise arrived at in the previous March. The Grondwet had not been amended, and the

letter to the President (Feb. 5th), complaining that nothing had been done to carry out the compromise arrived at in the previous March. Ihe Grondwet had not been amended, and the guarantee for the independence of the Judiciary had been infringed by the passing of Law No. 1, '97. He therefore regarded the compromise as at an end The result of the Presidential election was declared (9th), showing 12,858 votes for Kruger, 3753 for Schalk Burger, and 2001 for General Joubert. Chief Justice Kotze

was discharged from his onice by the account (16th), and replaced by State-Attorney Grego-protested against his was discharged from his office by the President ctoth, and replaced by State-Attorney Grego-rowski. He at once protested against his dismissal as being illegal, and a breach of the Convention. Judge Ameshoff, as a protest against the dismissal of the Chief Justice, re-signed his position (March 8th). The Government published (**May** 24th) the text of the reply which it had made to a despatch from Mr. Chamberlain in the previous October. The reply declared that the Government could not acknowledge the existence of British suzerainty since the '84 Convention, by the stipulations of which, however, it was prepared to abide. pointed out that in the process of settling the form of the Convention all references to suzerainty were deleted by Lord Derby It was urged, moreover, that any questions as to the infringement of the Convention should be left to arbitration. Hostilities broke out in October between the Transvaal forces and the Kaffir chief Mpefu, who had about 20,000 men under his control, in the mountainous country in the north-west part of the Republic The cause of the quarrel was the refusal of Mpefu to pay taxes to the Government, or even to acknowledge their claims to sovereignty over him. Aftersome preliminary encounters, the burghers made a combined attack on Magato's Mountain (Nov. 16th), and captured it after heavy fighting

Treasury. The Lord High Treasure, who, when existing, is the third great officer of State, had of old the appointment of all officers employed in collecting the revenues of the employed in collecting the revenues of the Crown, the nomination of all escheators, and the disposal of all plans and ways relating to the revenue; and power to let leases of Crown lands. This definition of his powers and duties still holds good, to a great extent, in regard to the Treasury Boait; although the management of the Crown lands has long since passed into the hands of the Commissioners of Woods and Forests. The Treasury has control over the management, collection, and expenditure the management, collection, and expenditure of the public revenue (see FINANCE), and exercises a general supervision and control over all the public departments, and no increase of salaries or additions to or material changes in the civil establishments can be made without its authority. All exceptional cases in matters of revenue are referred to it, and it settles all questions regarding the amount of compensations, allowances, and pensions to be awarded in exceptional cases. It audits the civil list, and is the accounting department to the House of Commons for a number of civil service votes, including those for rates on Government property, secret service, criminal prosecutions, revising barristers, learned societies, suppres-sion of the slave trade, subsidies to telegraph companies, and for temporary commissions. Since the days of George I. the powers and duties of the office of L. H. T. have been invariably executed by commissioners, consist-ing of the First Lord of the Treasury, the Chancellor of the Exchequer, and three Lords Commissioners, who are usually designated Junior Lords. The First Lord, if he fill that office only, has no share in the management of the department; but some minor duties, such as recommending for Civil List Pensions, appertain to his position. A number of appointments are in his gitt, and he is an ex-office trustee of the National Gallery and British Museum. For nearly eight, years prior to 1885 the office of First Lord was invariably held by

the Prime Winister (q,v.) of the day. The departmental duties of the three junior lords are almost nominal. The Patronage Secretary to the Treasury is principal Government whip (see Commons) The commissioners forming the Commons) The commissioners forming the Treasury Board seldom if ever meet; and in fact the real work of the department is performed by the Chancellor of the Exchequer, who is its effective head, aided in matters of detail by the Financial Scoretary, and the Permanent Scoretary. The Chancellor of the Exchequer sees that the estimates sent in by the spending departments are framed with due regard to economy, is made acquainted with the views of the revenue departments regarding probable receipts, and then prepares and introduces his budget, appointments in the National Debt Office are in his gift, and not only questions affecting public revenue and expenditure, but the National Debt, and the best methods of re-ducing it, and the advances made by the National Debt Commissioners for local loans are all matters within his special cognisance (see Finance). He is master of the Mint, and he presides at the nomination of sheriffs. Like the First the nomination of aberias. Like the First Lord of the Treasury, he is provided with an official residence at Downing Street. In con-nection with the Treasury there is a Parlia-mentary counsel who drafts Government Bills, and a solicitor who acts for the Government in certain legal prosecutions, and is the Crown's nominee when Her Majesty becomes entitled to the personal estate of an intestate, and administration is granted by the court; and who is also Queen's Proctor for Divorce Interventions and Director of Public Prosecutions.

Trevelyan Right Hon Sir G. O., Bart.

See PRIVY COUNCIL

Trinidad. An island of rectangular shape, with an area of about 1754 sq. m , pop. 248,404, separated from the mainland of Venezuela by the Gulf of Pania. In '85 the island of Tobsgo was separated from the Windward Islands and joined with Trinidad. The capital is Port-of-Spain, in the north-eastern corner of the island, which possesses the best harbour in the West Indies The products are sugar, cacao, asphalte, cocoanuts, and fibre. The asphalte output, which is the product of the Pitch Lake, the property of the Crown, is about 100,000 tons per annum, on which the payment to the Government is about £30,000. The Government consists of a Governor an Executive Council of 7 members, and a Legislature composed of the Governor, 9 official and 11 unofficial members, all appointed by the Crown. See BRITISH EMPIRE (table), DIPLOMATIC, and WEST INDIA SUGAR COMMISSION

Tripoli. A Turkish province in Africa on the Mediterranean coast, bounded on the west by-Tunis and Algeria, on the east by Egypt, and on the south-east and south by the Sahara. The estimated area, with Bengazi, is about 400,000 sq. miles, and the population about 1,300,000. Tripoli is the chief town, with a population of 30,000. The trade of the province practically all passes through Tripoli and

Truck Act, '96. This Act (59 & 60 Vict., ch. 44) received the royal assent Aug. 14th, '06, and came into operation Jan. 1st, '97. Sect. 1 enacts that an employer shall not make any contract with any workman for any deduction from the sum contracted to be paid by the employer to the workman, or for any payment to the employer by the workman.

or or in respect of any fine, unless the terms of the contract are contained in a notice kept constantly affixed where it can be easily seen, . read, and copied; or the contract is in writing signed by the workman; and tile contract specifies the acts or omissions in respect of which the fine may be imposed, and the amount of the fine or the particulars from which that amount may be ascertained; and the fine imposed is in respect of some act or omission which causes, or is likely to cause, damage or loss to the employer, or interruption or hindrance to his business; and the amount of the fine is fair and reasonable, having regard to all the circumstances of the case. His employer is not to make any such deduction or receive any such payment unless written particulars showing the acts or omissions and the amount of the fine are supplied to the workmen when a deduc-tion or payment is made. This section of the Act applies to the case of a shop assistant in like manner as it applies to the case of a workman. Sect. 2 enacts that an employer shall not make any contract for any deduction, or payment to him, in respect of bad or negligent work, or injury to the materials or other property of the employer, unless the terms of the contract are exhibited as in the previous section, or the contract is in writing signed by the workman; and the deduction or payment does not exceed the actual or estimated damage or loss occasioned by the act or omission of the workman, or of some persons over whom he has control, or for whom he has by the contract agreed to be responsible, and the amount of the deduction is fair and reasonable, having legard to all the circumstances of the case The deduction or payment is not to be made or received unless written particulars are supplied as in the previous section Sect. 3 makes similar provisions in respect of the use of supply of materials, tools, or machines, standing toom, light, heat, or in respect of any other thing to be done or provided in relation to the work or labour of the workman. Any workman or shop assistant may recover any sum deducted or paid to his employer contrary to the Act, provided that the proceedings are commenced within six months from the date of the deduction or payment, and that where he has consented to or acquiesced in the payment of deduction he shall only recover the excess which has been deducted or paid over the amount, if any, which the court may find to be fair and reasonable having regard to all the circumstances of the case. A register of deductions or payments made under sect. 1 of the Act is to be kept, and is to be open to inspection by one of hei Majesty's inspectors of factories or of mines Contracts under the Act are not liable to Stamp Duty. The Secretary of State, it satisfied that the provisions of the Act are unnecessary for the protection of the workmen employed in any of the Act; but every such order is to be laid before Parliament, and may, within forty days thereafter, be annulled by resolution of either House. The duties of inspectors to enforce the provisions of the former Truck Acts are by sect. 10 of this Act extended to the case of a laundry, and to places where work is given out by the occupier of a factory or workshop, or by a contractor or sub-contractor.

Tuberculosis. See Report of Royal Commission given in Medical Summary, '98,
Tunis. One of the Barbary States of Northern

Africa, lying east of Algeria, and bounded on the north and east by the Mediterranean, and on the south by the Sahara. Area, 51,000 sq. on the south by the Sahara. Area, 51,000 sq. miles; pop. 1,002,000, including 102,000 Europeans and 1,800,000 natives. Capital, Tunis, pop. 153,000. Bedouin Arabs and Kabyles form the majority of the population, the French numbering at the outside 27,000. The French roops invaded the country in '81, and established a protectorate '82. There is a French Resident, who practically carries on the administration, and the military maintained in ministration, and the military maintained in the country number 10,000 men. An agreement was concluded in Sept. 97 between Great Britain and France, whereby the British Government renounced for its consuls, its subjects, and its establishments in Tunis other rights and privileges than those secured for it in France. The most-favoured-nation treatment and the reciprocal enjoyment of the lowest customs tariff were mutually guaranteed for a period of years. however, that cotton goods, the produce of the United Kingdom and of British colonies and possessions, should not be subject to import duties higher than 5 per cent ad valor in from Dec 11st, '97, until Dec. 31st, 1912, and after that date until the expiration of six months from the day on which one of the contracting parties shall have notified to the other its intention of terminating its operation. Chief products are wheat, barley and olive oil. Revenue, 97, £902,450; expenditure, £962,42c; public de⁺t, £5,702,000; imports, 96, £1,857,620; exports, £1,520,730. See Colonies, £1C., of EUROPLAN BOWERS, and DIPLOMATIC.

Turkestan, From Central Asia, or what was formerly known as Independent fartary, Russia has formed two provinces-Turkestan and Transcaspia (q.v.). The former comprises the khanates and deserts annexed by Generals Tchernaieff and Kaufmann between '60 and '75. Area about 300,500 sq. miles, with 3,800,500 inhabitants. The principal town is Tashkent, pop. 100,000; Bokhara and Khiva are under the control of a governor-general. The old military road from Orenburg to Tashkent is now abandoned, reinforcements and stores being sent to Turkestan from the Caspian to Samarcand by railway.

-Turkestan, Afphan. Is an Afghan province
north of the Hindoo Koosh, consisting of
70,000 sq m., and a population, mostly nonAfghan (Uzbeg), of nearly 1,000,000. Principal
town, Mazari-Sherif, pop. 25,000, near the
ruins of ancient Balkh.—Turkestan, Eastern. China's westernmost province, formerly known also as Kashgaria, a state established by the rebel Mussulmans under Yakoob Beg, the Atalik Ghazi. Includes the towns of Yarkand, Kashgar, and Khoten.

TURKEY.

An empire possessing extensive territories in Europe, Asia, and Africa, governed by Sultan Abdul Hamid II. The Asian possessions are Asia Minor, Armenia and Kurdistan, Mesopotamia, Syria, and Yemen and the Hedjaz in Arabia. In Africa Tripoli and Bengazi belong to Turkey. The commands of the Sultan are absolute, unless opposed to the express direction of the Koran, a legal and theological code upon which the fundamental laws of the empire are based. The legislative and executive authority is exercised through the Grand Vizier and the Sheik-ul-Islam, who are appointed by the Sultan, the latter with the nominal concurrence of the Ulema or general body of lawyers and theologians. The Grand Vizier is assisted by the Medjliss-i-Hass or Cabinet of Ministers, and for administrative purposes the empire is divided into 31 vilayets or governments, subdivided further into provinces, districts and communities. Nominally subject to Turkey are Bulgaria, Bosnia-Herzegovina, Samos, and Egypt. It was also agreed, in '96, that Crete should be given autonomy, and by '88 the Turkish troops and Governor had been cleared out of the island. There are, it is estimated, about 16,000,000 Mahomedans and 5,000,000 Christians within the empire, besides those of other faiths. Agriculture is largely carried on, but in very primitive fashion. I obacco, cereals, cottou, coffee, wine, silk and fruits are the chief productions. There are about 2500 miles of railway open. The area of Turkey, without the states nominally subject to it, is estimated at about 1,147,578 sq. m.; and the total population at about 24,148,7659. Revenue, £16,828,475; expenditure, £16,754,019. Consolidated public debt, 98, £92,007,610. Imports, '94, £21,890,470; exports, £12,403,452. See Allania, Armenia, Crette, Diplomatic, Foreign Armies, Foreign Armies, Foreign Armies,

Form no Navies, Francis, etc.

History, '98.— The treaty of peace with Greece was signed (Dec. 4th). Arrangements having been made by Greece, with the help of Great Britain, France and Russia, for the issue ! of a loan to cover the was indemnity, a Collective Note was presented to the Porte (May 6th), notifying that the etacuation of Thessaly should begin Fhe last bodies of Turkish troops left Larissa (June 6th), and the province of Thessaly was then handed over to the Greek authorities Serious disturbances broke out in the Berane district, near the Montenegrin frontier, during June, owing apparently to blood leuds between Christian and Mahoriedan Albanians. It was said that 40 villages had been burned to ashes, and the Christians fled over the frontier and took refuge in Montenegrin territory. A rebellion was also going on at this time in Yemen. The French and Italian Governments laid claim to 1,000,000 ft of the Greek war indemnity loan as satisfaction for the losses sustained by their as subjects in the massacies at Constantinople (July 14th). They had endeavoured in vain to get satisfaction from the Porte, and so took this method of putting an embargo on the last instalment of the loan to the amount named. The British Ambassador also put in a claim for £33,000, reparesenting losses sustained by British subjects. The Porte, in reply, absolutely repudiated all responsibility, and protested against the action of France and Italy

Following on the serious events which occurred in Crete (see Crete, Bistory, '98) the four Powers—Great Britain, Russia, France, and Italy—presented a Collective Note to the Sultan demanding the withdrawal of the Turkish troops within a month (Oct. 5th). The Sultan replied (10th) that the troops should be withdrawin, except from three fortified places, which would be held with garrisons sufficient to protect the Mahomedans. The Powers refused to recognise these conditions, and ultimately the Sultan agreed unconditionally to withdraw the troops (15th). The Emperor and Empress of Germany arrived in the Dardanelles (17th) en route for the Holy Land, and were received by the Sultan in person, and for some days entertained with great state (18th). They afterwards went on to Haifa, Jaffa, and Jerusalem, where the new Evangelical Church of the Redeemer was solemnly dedicated. The announcement was also made that the Emperor when in Constantinople had acquired the property known as "Le dormitoire de la Sainte Vierge," and this he presented to the German Catholic Society of the Holy Land. Beirut and Damascus were then visited, and the Imperial squadron sailed from Beirut (Nov. 12th). The Servian representative at Constantinople made urgent representations to the Porte during the month as to the outrages on Christians committed by Albanians in the Kossovo district.

Turkey, Sultan of. See ABDUL HAMID II.

Turner, Right Hon. Sir George, K.C.M.G., Premier of Victoria, is a Melbourne solicitor. He has only been in active political life since 1889, when he was elected to represent St. Kilda in the Legislative Assembly, and still represents that constituency. He took office as Commissioner of Customs and Minister of Health in '01, and held those portfolios in the Munro Ministry and that of Mr. Shiels. In '92 he became also Solicitor-General. He was chosen as the leader of the Opposition in '94, and it was on his motion that the Patterson Ministry was overthrown. At the general election of '94 his supporters secured a majority, and he was placed in power as Premier. His forte is organisation. He was one of the guests of the Imperial Government in London on the occasion of the Jubilee festivities in '97, and was then made a Privy Councillor.

Typewriting. Most of the leading companies provide instruction in the use of their machines, with tuition in shorthand; and type-writer examinations to test efficiency are conducted by the Society of Arts, the National Union of Typists, and other bodies. The National Union of Typists (registered), 29, Old Queen Street, Westminster, S.W., has been established to promote the professional interests of typists. Secretary, Mr. F. D Pepper.

U

Uganda Protectorate, The, includes not only Uganda proper, but Unyoro, Usoga, and other countries westwards up to the boundary of the Congo Free State. Uganda itself is a large tract of country situated to the west and north-west of Lake Victoria Nyanza. Its area is about 90,000 sq. miles. An active missionary propaganda has been carried on in the country of late years, with the result that the people are divided into two parties, the Protestants and the Catholics, who each claim about 3000 baptised adherents. There are also, of course, baptised adherents. There are also, of course, the heathen and the Mahomedan sections of the population. The population is estimated at from 300,000 to 500,000. The capital of the country is Mengo. A military force under British officers holds the country, the Government having taken over the administration from the Imperial British East Africa Company in '94, and made the country a protectorate.

I his force also in some degree looks after
British interests on the west side of the Nile The civil adand in the Eastern Soudan. ministrator resides at Port Alice on the Victoria Nyanza. The development of the country has progressed wonderfully in the last year or two, and will doubtless go on still faster when the and will doubtless go on still laster when the railway from the coast is completed. This undertaking has made considerable progress, as to which see EASI APRICA PROTECTORALE. See also EGIPT (map) — History, '98.—Serious news reached Great Britain towards the end of It appeared that the Soudanese troops or. It appeared that the Solutacks thought in the Uganda Rifles, who were appointed to accompany Major Macdonald on a special mission into the Upper Nile region, had mutinied, mainly because of the hard fighting they had been compelled for a long time to unit they have the state of the provider of the state of the s dergo, and of the smallness of their pay. They left Major Macdonald at Lake Baringo, and returned to Uganda via Nandi and Kavirondo, Major Macdonald and a number of troops that remained loyal following. Lubwas, in Usoga, a fort commanding the Nile crossing, was then taken by the mutineers, who also made prisoners of Major Thruston and other Government officers, and eventually murdered them. Fighting cers, and eventuary murrered them. Fighting followed, and the aspect of affairs becoming serious, Indian troops were ordered to the front, and the 27th Bombay Infantry were sent to the terminus of the railway. Lieut. Macdonald and others were said to have been belief the programment of the control of the donald and others were said to have been killed in an engagement on Dec. 19th. The mutineers retired from Fort Lubwas (Jan. 9th) across the Victoria Nyanza, and were at conce pursued by a force under Captam Harrison They reached Uganda, however, and marched on Mkono (16th). Captam Harrison overtook them at Kabazambi, to the south of Mruli, and defeated them, after killing 60 and wounding 100 (Feb. 23rd). They were finally defeated and dispersed (Aug. 4th) The report of Mr. Berkeley, H.M. Commissioner in Uganda on the mutiny, was issued (Bept. 22nd), having the mutiny, was issued (Sept. 22nd), having been dispatched from Kampala in May. He stated that the mutineers had been overworked, and had only just finished a campaign against Mwanga when they were ordered to join Major Macdonald's expedition. This gave rise to disaffection, and, once having mutinied, the men went from bad to worse.

Unification of London. For a report of the Royal Commission appointed in '93 to inquire into the conditions on which an amalgamation of the City and the County of London could take place, and to make specific and practical proposals for the purpose, see eds. '95, '96, and '97. See also separate article on LONDON LOCAL GOVERNMENI.

Unitarians. The name commonly given to Christians who do not accept the doctrine of the Trinity, or the Deity of Christ. Congrestions number about 250 in England, besides 20 mission stations, 22 in Wales, 10 in Sociland, 40 in Ireland. The British and Foreign Unitarian Association is not representative of the churches, but consists of independent subscribers desirous of promoting "the principles of Unitarian Christianity." The writings of Dr. W. E. Channing, Theodore Parker, Dr. James Martineau, and others, have made Unitarian thought familiar to many outside the limits of the denomination. The only technically Unitarian College is that of the Unitarian Home Missionary College in Manchester, which educates for the ministry students who are not able to enter Manchester College (q v), recently removed to Oxford, where most of the leading Unitarian ministers are trained. There is a triannial Conference of non-subscribing congregations, which consists almost entirely of Unitarians. The professedly Unitarian congregations of the United States number 350; of these 232 are in New England, many of them being old Puritan foundations. (See also Sunday School Association.) The Inquirer, which is a weekly newspaper (established 42), is described as a "Journal of Liberal Religious Thought and Life." The present editor is the Rev. V. D. Davis, B A. Office, Essex Hall, Essex Street, Strand, W C.

United Presbyterian Church (Scotland). See Church of Scotland.

United Service Institution. See ROYAL U. S. INSTITUTION.

UNITED STATES.

The United States are a confederation of forty-five North American sovereign states united together by a federal bond for Imperial objects, the local administration being reserved to each state. By the constitution of 1787 and subsequent amendments the government is intrusted to three separate authorities—the executive, the legislative, and the judicial. The first is vested in a Fresident elected on the Tuesday after the first Monday in November every leap year for four years by electors appointed by each separate state. The number of such electors is equal to the number of senators and representatives to which the State is entitled in Congress, but no senator or representative can be an elector. The President is commander of the national forces, and has a veto on all laws passed by Congress, although a bill may become law in spite of his veto, on being afterwards passed by a two-thirds majority of each House of Congress. The administration is conducted inder the immediate authority of the Preside is by eight ministers chosen by him, and nolding office at his pleasure, though con-

firmed by the Senate. A Vice-President is chosen in the same manner as the President; he is ex-officio President of the Senate, and in case of the death or resignation of the President he assumes his office for the remainder of the term, and the Senate elects a temporary vicepresident. The legislative power is vested in Congress, which consists of (1) the Senate, of comembers—two chosen by each state legislature for six years—who ratify or reject all treaties made by the President, confirm or reject all appointments made by the President, and who constitute a court of impeachment. and who constitute a court of impeachment, with power only to remove or disqualify from office; (3) the Eouse of Representatives, of 357 members, chosen every two years by all sault male citizens duly qualified according to the laws of their respective states, and apportuned among the states according to the states. among the states according to population. In addition to the representatives, delegates from "territories" (districts not organised into states) are entitled to debate on matters pertinent to their interests, but must not vote. Congress may proose an amendment to the constitution if two-thirds of both houses deem it necessary; and such amendment shall be deemed to be incorporated in the constitution when ratified by the legislatures of three-fourths of the several states. All members of Congress are paid \$5000 per annum. The judicial power is confided to a Supreme Court (the members of which are nominated by the President for life) with power to interpret the constitution, to decide all disputes between the Federal Government and the individual states, and to hear all causes arising under the federal laws, etc. The constitutions and modes of administration of the various states bear a close resemblance to each other—the executive being confided to a governor and the legislative to two elective chambers. Roughly speaking, each state has voluntarily surrendered to the central Government all federal matters, including taxation for federal purposes only, while reserving the right to administer all local affairs and to impose local taxes at its pleasure. The soil impose local taxes at its pleasure. The soil of the United States not included within the or the United States not included within the boundaries of an individual state is divided into "territories," the districts of Columbia, Alaska, and three Indian territories, containing about 250,000 Indians. When duly qualified by population, etc., it is competent for the confederacy to form the territories into new "states" and admit them into the Union. The "district of Columbia" is a neutral territory underthe direct successive and competent of the confederacy. "district of Columbia" is a neutral territory under the direct government of the confederacy, in which is situated the capital, Washington. During '98 Hawan (q,v.) was annexed and declared a territory, Porto Rico (q,v.) was also ceded by Spain, and the cession of the Philippine Islands was demanded of Spain. See **History '98** below. Perfect equality is accorded to all religions. Education is free and general, although backward in some of the former slave states, the cost beauty met from state or local states, the cost being met from state or local funds, and the Federal Government contributing a portion. Uninhabited and uncultivated land is held to be national property, and titles to stated portions may be acquired under the homestead laws and the timber-culture Acts. Cereals, sugar, cotton, tobacco, live stock, timber, iron, silver, gold, coal and other minerals are the

traction lines, of which nearly 14,000 miles are worked by electricity. The total area of the Union is 3,501,409 sq. miles; the population, at the census of '90, was 62,654,302, of whom 32,007,880 were males, and 30,554,370 temales. The whites numbered 54,983,800, and the coloured 7,658,360. The proportion of the foreign-born was 14'77. In '93 the population was computed to be about 68,000,000. The wealth of the country was estimated by the Census Office at, for real property, \$39,544,544,333; and for personal property at \$25,492,546,864, giving a total of \$65,037,091,197, or £13,000,000,000. Bevenue, '978, K84,273,150; expenditure, £92,369,897; exports, '978, £356,523,305; imports, £102,675,472. Thenational debt in '97 amounted to £373,681,800. For Ministry, etc., see Diplomatic; see also For Ministry, etc., see Diplomatic; see also Behring Sea Question, Foreign Armies, and FOREIGN NAVIES.

Political Parties. - Until '92 practically the only parties in American political life were the Republicans and the Democrats. year, however a third party, first known as the Farmers Alliance and afterwards as the Populat or People's Party, was founded, and soon attracted the support of many working soon attracted the support of many working men. The programme it has advocated is a simple and sweeping one. It includes public ownership and control of the railways and tramways of the country, and the direct issue of currency to the people by the Government without the intervention of any of the mational banks. All its members are therefore silver men and bimetallists. They contend that the other parties are bound up with and support the three great monopolies of the country—the banking, speculating, and railway interests. At the '92 Presidential election the voting was as follows: Democrate 277, Republicans 145, Populists 22. The election was fought on two points mainly, the tariff and the silver question, the Democrats being for the repeal of the M'Kinley and the Sherman Acts, and the Republicans of course strongly upholding both Acts. The elections in Nov. upholding both Acts. The elections in Nov. '93, for the State governors, went very much in favour of the Republicans, and the general election in Nov. '94 resulted in a crushing defeat for the Democrats. During '95 and '96 important and startling changes took place in the relations of parties. The lines of division between Republicans and Democrats were broken down in two ways. On the one hand there were men of both parties who sympathised there were men of both parties who sympathised with the Free Silver policy, which was energetically pushed during these two years; and on the other there was, as it proved, a majority, also made up of members of both parties, in favour of the preservation of a gold standard. In the Republican party the gold standard triumbhed, and its preservation was adopted as a plank in the party platform, though they expressly pledged themselves to promote international bimetallism. The Democrats, on the contrary, were captured by Silverite and Populist influences, and adopted a platform which included the free coinage of silver, at the ratio of 16 to 1, and many points of the Populist programme. This was too much for the Democrats in favour of a gold standard, and with the explicit approval of President Cleveland, they split from the majority, and held a Convention and named a candidate of their own. There were in all no less than seven nominations for the Presidence, but three of these parions. chief products, and there are many large and flourishing manufacturing industries. There were in all no less than seven nominations are over 182,000 miles of railway in 0, 'ration, if or the Presidency, but three of these nomina-and about 16,000 miles of street railways and

the Silverites, were of the same man, Mr. Bryan. The Republicans nominated Mr. M Kinley, and the gold standard Democrate General Palmer, while two comparatively insignificant sections, the Prohibitionists and significant sections, the Prohibitionists and the Socialists, indulged in candidates of their own. The real fight lay of course between Mr. M'Kinley and Mr. Bryan, or rather between the two polices as to the currency which they represented. The tariff issue was also involved, but very little was near of it during the contest, the result of which was a victory for Mr. M'Kinley. Congress officially declared the return to he as follows (Feb. 10th 'e9). Mr. for Mr. M. Minley. Congress officially declared the voting to be as follows (Feb. 10th, 97): Mr. M'Kinley 271, Mr. Bryan 176. The popular voting showed an aggregate of 7,123,234 votes for Mr. M'Kinley, and 6,499,365 for Mr. Bryan, while a small number of votes were cast for the other candidates, amounting in all to 276,203 Early in '98, before the war with Spain began, the Bryanites seemed to be gathering strength again, but the war brought a number of entirely new issues before the nation, particuentirely new issues before the nation, particu-larly those relating to a foreign policy, and in face of these, currency questions were, to a large extent, forgotten or lost sight of. The elections for the House of Representatives were held in Nov. '98, in many states simul-taneously with the elections for State Governors taneously with the elections for State Covernors and Legislatures. Prior to the elections there were in the House 202 Republicans, 125 Democrats, and 30 Populists and Silverites Although complete returns were not to hand, it was yet ascertained (Nov. 11th) that 185 "sound money" Republicans had been elected, besides 3 Silver Republicans, 160 Democrats, and 4 Populists. Since the State Legislatures elect the Senate, it was also apparent that there would be 54 Republicans there. Thus the Silver party were placed in a hopeless minority in both Houses. The successful conduct of the war, in spite of the detects in administration com-

m space of the defects in administration com-plained of, no doubt operated in favour of the Republican party.

**History, '98.—In his annual Message to Congress the President urged the necessity of currency legislation, and, with regard to Cubs, declared that time should be given the Spanish Government to show that the new policy would bring about peace (Dec. 6th, '97). This position was adhered to for some time, despite efforts by the lingoes to force on a more vigorous policy. A resolution declaring United States bonds to be payable either in gold or silver was carried by the Senate by a majority of 15 (Jan. 28th), but rejected by the House by a majority of 50; and the Republican majority thus showed their determination to follow the President's declared policy of sound nonow the Fresident's declared policy of sound money and currency reform. In February an indiscreet letter written by the Spanish Minister at Washington somehow got into print, and as it contained various reflections on the President, the resignation of the minister, Señor Dupuy de Lôme, followed as a matter of course (10th). Señor Polo Bernabe was amounted to succeed him. Before the was appointed to succeed him. Before the

cause lay outside the ship, and was probably a submarine mine (March 25th). The Spanish authorities, however, held that the cause of the explosion was inside the ship. The President sent the American report to Congress (28th), together with a message in which he said that the report had been communicated to the Spanish Government, and he would advise Congress as to the result. Meanwhile General Woodford, the American representative at Madrid, telegraphed that the Spanish Government had revoked the Concentration decree in the western provinces of Cuba, had made a grant of money, and would accept any further assistance from the United States further assistance from the United States towards feeding and succouring the distressed country people. The preparation of terms of peace would be left to the Cuban Parliament, which would not meet till May 4th, but if the insurgents asked meanwhile for a suspension of hostilities it would be granted. This represented the Spanish leply to the American demand for a speedy settlement of affairs in the island, and it was considered very unsatisfactory, American opinfon being firm and unanimous as to the necessity of making Cuba free, even at the cost of war with Spain. The six great Powers joined in presenting an six great Powers joined in presenting an appeal to the President, which expressed the hope that an agreement might be come to, which would secure the maintenance of peace and afford all necessary guarantees for the re-establishment of order in Cuba (April 7th). The President replied that the Government appreciated the humanitarian and disinterested character of the appeal, and were confident that equal appreciation would be shown for their own earnest and unselfish endeavours to end a situation the indefinite prolongation of which had become intolerable. The President's long-delayed Message to Congress was sent (11th), asking it to authorise and empower him to take measures to secure the full and final termination of hostilities in Cuba, and the establishment there of a stable Government capable of maintaining order, and to use the military and naval forces of the United States for these purposes as might be necessary. He also recommended that the distribution of food supplies should be continued. Congress at once began to debate on this Message, and the Senate passed a resolution which included the recognition of the independence of the Cuban Republic This was in direct opposition to the President's Message, and the House of Representatives rejected it; but a conference between the two Houses led to the elimination of the clause as to independence, and the passing of concurrent resolutions demanding that Spain should at once withdraw from Cuba, and directing and empowering the President to use the land and naval forces of the United States to carry the resolutions into effect. An express disclaimer of any desire to annex Cuba was added (19th). The President then sent the resolutions as an ultimatum to Madrid, but before it could be delivered the! Spanish was appointed to succeed him. Before the excitement over this incident had subsided Government broke off diplomatic relations and the United States 2nd-class battleship Manue, lying in Havana harbour, was destroyed by The Spanish Minister also left Washington. In Exposion, 2 officers and 253 men being killed (Feb. 15th). An inquiry into the case of the explosion was commenced, and the relations between the two countries got attackly worse. The American report on the General Shafter was mobilised. Meanwhile Maine explosion was to the effect that the

heavy blow was struck at Spain by the destruction of her squadron in Manila harbour (see Phillipping Islands), for which the American commander, Admiral Dewey, received the thanks of Congress. Transports carrying troops with supplies and ammunition were sent to Manila from San Francisco (26th). by the Government was plainly shown, and a much more friendly feeling than had previously existed began to prevail towards Great Britain and Canada. One result of this was the agreement to refer the Behring Sea question and the Alaska boundary question, with other contro-Alasks boundary question, with other controversal matters, to a Commission for settlement (May 30th). Major-General Shafter left Key West with 15,000 men (June 13th), and opened the campaign in Cuba, which ended in the destruction of the Spanish fleet, and the surrender of Santiago and the whole of the eastern part of the island (for details see CUBA). After long consideration Hawaii was definitely annexed and attached to the Military dennitely annexed and attached to the Military Department of California (July 11th). An ex-pedition under General Miles left Cuba and effected a landing at Guanica in Porto Rico (25th), easily dislodging the Spanish forces there. Overtures for peace were then made there. Overtures for peace were then made by the Spanish Government through the French by the Spanish Government through the French Ambassador at Washington, and the following terms were laid down, the relinquishment and evacuation by Spain of Cuba, the cession to the United States of Porto Rico and all other Spanish possessions in the West Indies, and certain islands in the Ladrones, and the occupation by the United States of Manila till the conclusion of a treaty of peace determining the conclusion of a treaty of peace determining the "control, disposition, and government of the Philippines" (Aug. 2nd) These terms were accepted by Spain, and embodied in a protocol which was signed at Washington (12th). The President then issued a proclamation suspending hostilities, but before the news could reach Manila the city was taken by the American army and navy there cooperating (13th). Much discussion then took place in the press as to the responsibility for the terribly insanitary condition of the American forces and the inadequacy of the commissariat arrangements not only in Cuba and Porto Rico, arrangements not only in Cuba and Porto Rico, but in the health camps in the States themselves. A sharp controversy between General Miles and Mr Alger ensued, and eventually a Commission was appointed to investigate the conduct of the War Department since the commencement of the war (Sept. 9th). During the arrangements for nominating the Com-missioners to arrange the peace treaty and the evacuation of ceded Spanish territory, opinions were divided as to what should be demanded in the Distance. missioners to arrange the peace treaty and the evacuation of ceded Spanish territory, opinions were divided as to what should be demanded in the Philippines, but gradually the view of the country and of the Government settled into a resolve to annex the islands. General Miles announced (aoth) that a force of 50,000 for Porto Rico, and 4000 for Honolulu. A sensation in domestic politics was caused when Senator Quay, of Pennsylvania, the Republican "boss," was committed for trial before the Philadelphia Criminal Court on charge of conspiring to make a fraudulent use of the money in the People's Bank (Oct. 6th). The American Peace Commissioners, under the presidency of Mr. Day, met the Spanish Commissioners at Paris early in the month, and

began to discuss the terms of the final treaty of peace. Differences of opinion at once maniof peace. Dinerences of opinion at once mann-fested themselves, the Americans refusing to assume the sovereignty of Cuba, or responsi-bility in any form for the Cuban debt, and demanding the cession of the Philippine Archipelago. The Spanish Commissioners disputed both points, but eventually provisionally agreed to accept the article proposed as to Cuba. They, however, energetically protested against the claim to the Philippines, and declared that Spain had not renounced her sovereignty over those islands, nor was the question left open by the terms of the Protocol. Throughout the first two weeks in November the question was keenly discussed, and the Spanish representatives suggested that, to avoid a rupture, the matter should be referred to arbitration. The Americans refused this (21st) but offered to give Spain \$20,000,000 as an indemnity for the Philippines, and to admit Spanish imports for 5 years on equal terms with American goods.

United States, President of the. M'KINLEY, WILLIAM.

University College, London, founded 1826, was opened in '28 under the title of "The University of London." In '36 it was thought desirable to separate the College from the University, and the former was incorporated in that year as "University College, London," by royal charter, which was annulled in '69, and the College re-incorporated with additional powers. College re-incorporated with additional powers. There are, therefore, two distinct institutions—the one a teaching body and the other an examining body. The curriculum includes courses in arts, law, science, engineering, theoretical and applied, medicine, and the fine arts. There is also University College Hospital, with upwards of 200 beds. President of the College, Rt. Hon. Lord Reay, G.C. S.I.; Vioe-President, R. B. Haldane, Q.C., M.P. Deans: Professors J. A. Platt, M.A.; T. Hudson Beare; R.-J. Godlee, M.S., M.B., F.R.C.S. Secretary, J. M. Horsburgh, M.A. The students number about 2000. about 2000.

University College of North Wales (Bangor). The is one of the constituent colleges of the University of Wales. Opened 1884. It received a royal Charter in '85, and it is in receipt of a Government grant of £4000 per annum, besides an annual grant in aid of its Agricultural Department. There are a large number of entrane sholarships connected with the institution. The College possesses a valuable hipray containing over 20, 200 volumes. valuable library containing over 20,000 volumes Secretary, J. E. Lloyd.

colleges of the University of Wales. It was supported for many years by freewill offerings, but since '86 it has been in receipt of a Government grant of £4000 per annum. Besides the ordinary courses in Arts and Science, the College has a Department of Agriculture and a Normal Department. A department for the training of secondary teachers has also been organised. The total number of students during the session '97-8 was 407, of whom 174 were women, nearly all residing as a hostel under the superintendence of Miss É. A. Carpenter, President, Lord Rendel; Principal, T. F. Roberts, M.A. Oxon., Registrar, T. Mortimer Green.

University College School, Gower Street, established 1812, 1s completely unsectarian—separate classification in all subjects—a modern school with classical department. Prepaies for University College and London matriculation, as well as for Universities, Woolwich, etc Pupils, 130. Motto, Paulatim sed firmiter. Head Master, F. P. Barnard, M.A. Secretary, J. M. Horsburgh, M.A. Amongstits alumniare the Rt. Hon. Joseph Chamberlain, Lord Leighton, Sir George Lewis, Professor Michael Foster, Mr. R. H. Hutton, Lord Justice Lindleg, Mr Justice Charles, Rt. Hon. J. W. Mellor, Sir G. Faudel-Phillips, Bart, and Rt. Hon. W. C. Gully, Speaker of the House of Commons.

UNIVERSITY EXTENSION.

The object of this movement is to provide "the means of higher education for persons of all classes and of both sexes engaged in the regular occupations of life." It commenced in 22 with the University of Cambridge; about four years later Oxford took it up—abandoning it, however, until 85; and in 76 was formed the London Boolety for the Extension of University Teaching within the Metropolitan area. Durham University has been associated with Cambridge in forwarding the work in Northumberland and Durham, Victoria University is also in the field; and the Bootch Universities are making a similar plan for laying siege to the north. The University of Bydney, New South Wales, adopted the scheme in 87. An American Society for the Extension of University Teaching has been formed at Philadelphia and Chicago, and several other American universities have begun work on similar lines. Such is a general view of the present position of this movement; an insight into its working is afforded from the following details regarding the Cambridge, London, and Oxford schemes.

Cambridge.—The external work of the University—the Local Examinations and the Local Lectures (University Extension)—is controlled by a syndicate of eighteen, appointed by the University Senate. The Prehiminary, Junior, and Senior Local Examinations are intended for children of school age, and are held in December, while the Higher Local, for adults of both sexes, is held in June. Under the Local Lectures (University Extension) Scheme there are two principal tarms in the year—September to December, and January to March—and a recture of twelve-lectures is given in each term. Lectures are also given less often in the summer term—April to July. At the end of each term a spooial examination is held and certificates are awarded on the joint report of examiner and lecturer. Sessional Cartiflactes are awarded committees. The society produced the summer term appoint with the local control of the work of a term, of a session. The Local Centres are awarded by local committees, who fix and receive the students' fees. The Society produces of twelve lecturers and examiners, the chaige being the case of courses of ten, and Last for a session of twelve lectures. Last for a course of the work of a term, of a session. The Local Centres are awarded by local committees are awarded by local committees, who fix and receive the students' fees. The Society produces of twelve lectures, Last for a course of course of ten, and Last for a course of course of ten, and Last for a c

courses in Educational Sequence, and the Viochancellor's Certificate of Systematic Study is awarded to students for four sessions' work, under certain conditions. Of the whole number of centres connected with Cambridge, eight are affiliated—viz, Derby, Exeter, Hull, Newcastle-on-Tyne, Norwich, Plymouth with Stonehouse and Devonport, Scarborough, and Sunderland. (See previous eds. for the privileges given to affiliated students.) A town may come under the operation of the ordinary scheme by providing a place of meeting for the lectures and classes and an inclusive fee of foo per course to the University. All the local expenses are met by the local committee, who also fix and receive the fees. In connection with the Norfolk County Council courses on scientific subjects, bearing on agriculture, were given by lecturers of the Syndicate during the past five sessions followed in the summer by courses of practical work in the University Laboratory attended by Norfolk Teachers holding County Council scholarships. For this work the system is variously modified to suit local needs. Full particulars as to the Local Examinations and Lectures Syndicate Ruildings, Cambridge, and as to the Local Lectures from the Secretary for Lectures at the same additions.

Lectures at the same addices.

London. This organisation comprises a council of 34 members, President, the Rt. Hon. Sir John Lubbock, Bart, D.C.I., F.R.S., M.P., Chairman, the Rt. Rev the Loid Bishop of London College, College for Men and Women, Gilchrist Educational Liuist, John Grand Grecham Committee, King's College, Fand Grecham Committee, King's College, Fechnical Education Board of the London County Council, London Institution, Queen's College, Royal Institution, University College, University Extension Local Centres Association (London), and the Working Men's College, each nominate a member of the council; the remaining so are elected by members of the Society. Any one may become a member of the Society by paying an annual subscription of £115, or £50 for a life membership. These subscriptions and voluntary subscriptions constitute the Society's revenue. The council is assisted and advised on educational matters by the Universities of Oxford, Cambridge, and London; Chairman, James Stuart, M.A., L.L.D., M.P. The Joint Board nominates the lecture is and examiners and awards certificates. The solume of work is as follows—two terms in the winter, each of ten weeks, weekly lectures followed by a conversational class, weekly papers for the lecturers, and final examinations. A summer course of five weeks. Certificates are awarded for the work of a term, of a session, and of a period of four sessions. The Local Centres are managed by local committees, who fix and receive the students' fees. The Society provides lecturers and examiners, the chairs being for the locality and the discretion of the local committees. The total number of students in £128 was a 2215.

lectures at 57 centres. The Council submitted evidence to the Royal Commission on a Unievidence to the Royal Commission on a University for London (q.v.), showing that the work done by the London organisation is worthy of recognition by the New University. Secretary to the Council, C. W. Kimmins, M.A., D.Sc.; Assistant Secretary, Percy M. Wallace, M.A.; Office, Charterhouse, E.C. Consult

M.A.: Office, Charterhouse, E.C. Consult Unsuersity Extension Journal (Constable & Co., 2, Whitehall Gardens, S.W.).

Ondord.— The University first took an active part in educating non-matriculated students by means of University Extension Courses in '78. In '85 the system was reorganised on its present lines. Local committees at 100 centres extend last year (10.8) in concert at 108 centres acted last year ('97-8) in concert with the Oxford University Delegates, and arranged 145 courses, at which the total average attendance was 18,242 students. The number of lecturers was 35, and of lectures given 1092. Much of the work hitherto done by University Extension Lectures has been of an experimental nature, but there are many gratifying signs that while the early enthusiasm of the movement is not spent, its edicational efficiency is steadily increasing. At Reading the University Ex-tension College (of which Mr. Mackinder, M.A., Student of Christ Church, is Principal) has 709 regular students (besides 2000 who attend occasional lectures) and over 20 teachers. Of 727 students who entered for final examinations, 268 candidates received certificates of nations, 268 candidates received certificates of distinction, and 402 satisfied the examiner. Though in these examinations they only write one paper, the standard for distinction is identical with that required (but on several papers) in the Final University Examinations for B.A. During the last ten years the local committees have spent on Oxford courses more than £50,000. The method of University Extension work is fewerth in class work in languages. sion work is (except in class work in languages or laboratory work in Natural Sciences) invariably the lecture, followed or preceded by a class supplemented by weekly exercises corrected by the lecturer. The ninth summer meeting will be held in Oxford in August '99. The main courses of s'udy pursued at the meeting of '97 will be continued in sequence. They will will be continued in sequence. They will include:—(1) the History and Literature of the Period 1837—1871; (2) the Science, Music, and Art of the Nineteenth Century; (3) Economic History and Theory; (4) the History and Theory of Education; (5) Hellenic Studies in the Nineteenth Century; (6) Architecture. Classes in Languages will also be held. All information can be obtained from the Secretary, Mr. I. A. R. Marriott, M.A., Examination Mr. J. A. R. Marriott, M.A., Examination Schools, Oxford

University Settlements. It is the object of University settlements to bring together the large body of wage earners and the philosopher who is attacking social problems, and to make out of them an efficient instrument for national progress. Settlements were started, as Canon Barnett has explained, "without the equipment of an endowment, and without any sectarian or political object. They were to be simply clubhouses, in which men and women of the University status should live their own lives in the midst of industrial districts. . . . The first bolitical object. They were to be simply club-houses, in which men and women of the University status should live their own lives in the midst of industrial districts. . The first intention has been modified by circumstances. Some settlements have now been attached to missions, and some have become identified with sectarian objects." The first of these settlements was Toyabee Hall (Canon Barnett, M.A., assistant music masters, There is also a Lower warden), opened in Commercial Street, White-

chapel, in '84. This was an Oxford movement, in which Balliol College took a leading part. The settlement was named after Arnold Toynbee, a Balliol tutor, who in '75 had taken rooms in Whitechapel, and had helped in parish work in St. Jude's for the purpose of studying economic problems. Oxford House, Bethnal Green is a Church of England movement. There is a Mission House and Settlement at Battersea carried on by Gonville and Caius College, carried on by Gonville and Caius College, Cambridge, with headquarters at Caius House, Battersea Square (warden, Rev. W. B. I. Hopkins). Mansfield House, Barking Road, Canning Town, E. (Percy Alden, M.A., warden), commenced by students of Mansfield College, Oxford, works on religious (unsectarian) as well as on social and educational lines. A new residence, at 89, Barking Road was opened in Dec. 2011 it contains Road, was opened in Dec. '97; it contains rooms for 17 men, besides offices and a reception hall. There are also a meeting hall_and tion hall. There are also a meeting hall and men's club at 143-7, Barking Road; the "Fairbairn House" Lads' Club, at 310-12, Barking Road; and the "Wave" Lodging House, at 235, Victoria Dock Road, under the control of the Settlement The Bermondsey Settlement (Rev. 1 Scott Lidgett, M.A., warden) in Farncombe Street, Jamaica Road, the Women's Branch being at 149, Lower Road, Rotherhithe, S.E. is largely supported by Methodists (but S.E., is largely supported by Methodists (but is undenominational in general charactery, and "Browning Hall," York Road, Walworth (Rev. F. H. Stead, M.A., warden), by Congregationalists. Closely connected with Unigregationalists. Closely connected with University settlements are the settlements of women workers. Mayfield House (Miss Corbett, resident Head), started in Bethnal Green in the autumn of '89 (a settlement of old Cheltenham College girls), has now removed to Shoreditch. St. Margaret's House, Bethnal Green (Miss Harington, resident Head), a women's branch of Oxford House, at first worked temporarily in connection with Mayfield House, but separating in '02. and taking worked temporarily in connection with may-field House, but separating in '92, and taking its name from St. Margaret of Scotland, has formed two branches, one at Stratford, E., under Mrs. Crossley and Miss Yatman, which works in conjunction with Oxford Trinity Colworks in conjunction with Oxiord Frinity College Settlement, Tenby Road, Stratford (Rev. W. J. Roxburgh, B.A., warden), and another in the Isle of Dogs, E. (Miss A. M. Harington, resident Head). The women's settlement in Canning Town, F. (Miss R. H. Cheetham, resident Head), works upon a religious though unsectarian basis. Amongst its agencies is a medical mission and hospital, with a resident lady physician (Dr. Margaret Pearse). A committee elected by the women students of the Universities manage a well-arranged and thriving Settlement, known as the Women's University Settlement, at 44, 45, and 46, Nelson Square, Blackfriars Road, S.E: Warden, Miss Sewell. Courses of training are arranged here in social work amongst the poor, and resident students are received. Fees from £30 to £35 per annum; for students, £50.

Uruguay. A republic on the east coast of South America, south of Brazil. Capital, Monte Video, pop. 245,000, at the mouth of the Rio de la Plata. The Executive is vested in a president elected for four years. The legislature is composed of a Senate of 19 chosen for six years tomposed of scenario is chosen to say years by an electoral college, one-third retiring every two years, and a Chamber of 69 members elected for three years, one for each 3000 of population. In the recess a permanent committee of two senators and five deputies assume initee of two senators and five Teputies assume legislative power and control of general administration. State religion Roman Catholic, but all others tolerated. Education obligatory; cost partly borne by the State. Cattle and sheep form the chief wealth of the country, but there is a future for agriculture. There are over 1000 miles of railway open. Area, 72,110 sq. miles; pop. 900,000. Revenue, 97, £3,300,000; expenditure, £3,191,000; debt, 98, £25,670,000; imports, 96, £5,105,947; exports, £6,077,820. For Ministry, etc., see Diptomatic.—History, 98,—Ex-President Herrera and others of the Opposition were arrested on a charge of con-Opposition were arrested on a charge of con-

spiracy (Nov. 30th, '97) and condemned to exile. More disturbances followed, and President Cuestas proclaimed a dictatorship (Jan. 9th). decree dissolving the Chambers followed (Feb. 10th), and a provisional Government was formed to administer affairs until the elections formed to administer affairs until the elections in November, with Señor Cuestas as Governor. The popular approval of the action of Señor Cuestas was shown by public demonstrations in his honour; business revived, and the general outlook immensely improved. A revolt of two artillery regiments, led by officers who tavoured ex-President Herrera, was crushed (July 4th), the Blancos and the population generally supporting President Cuestas. The ringleaders were at once banished to Buenos Ayres. The Government decided (Sept. 4th) to suspend the issue of Treasury certificates, to resume the cash payment of its local monthly obligations, and to convert the outstanding certificates, amounting to about \$4,000,000, into 6-per-cent internal debt, guaranteed by a tax on the administrative salaries.

VACCINATION.

The enforcement of vaccination has for many years been a subject of much controversy The Boards of Guardians, the authorities empowered to enforce the Vaccination Acts, empowered to enforce the Vaccination Acts, were most diverse in their action, and while some i Boards rigorously enforced the law and prosecuted defaulters at every opportunity, others abstained altogether from taking proceedings against persons who did not have their children vaccinated. An anti-vaccination league aroused much opposition to the practice of vaccination, founding their objection chiefly on the risk of communication of diseases by means of vaccination. In the case of one Board of Guardians the Local Government Board endeavoured, by obtaining a mandamus, to compel them to enforce vaccination, and some of the guardians were imprisoned; but the result was not satisfactory, and this method of compulsion was not again resorted to. Meanwhile, some Boards of Guardians were doing much harm to the cause of vaccination by repeated prosecutions of the same offenders. In '89 the Royal Commission on Vaccination was appointed. The members of the Commission were —Lord Herschell (Charters of the Charters of the Commission we're —Lord Herschell (Chairman); Sir James Paget, Bart., F.R.S.; Sir Charles Dalrymple, Bart., M.P.; Sir W. Guyer Hunter, M.P.; Sir Edwin H. Galsworthy; Sir William Savory, Bart.; John Syer Bristove, M.D.; Wm. Job Collins, M.D.; John S. Dugdale, Q.C., M.P.; Professor Michael Foster, M.D.; Jonathan Hutchinson; J. Allanson Picton, M.P.; Samuel Whitbread, M.P.; F. Meadows White, Q.C.; and J. A. Bright, M.P. The Commission submitted an interim report in '92, recommending that repeated penalties for non-vaccination should not be imposed. The final report was issued in

W. J. Collins and Mr. J. Allanson Picton. The Commissioners declared their opinion that vaccination has a piotective effect, diminishing the lability to attack and mitigating the severity of the disease; that this protection is greatest during the nine or ten years following vaccination—it then rapidly diminishes, but never altogether ceases, that re-vaccination restores the temporary protection against attack, and that the beneficial effects of vaccination are greatest in those cases in which it has been most thorough, that the diseases alleged to result from vaccination are undoubtedly real and not inconsiderable in gross amount, yet insignificant in relation to the extent of vaccination work done, and are diminishing under the better precautions of the present day. The principal recommendations of the Commission principal recommensations of the commission were as follows —r. Repeated penalties for non-vaccination should be abolished. 2. Calf lymph instead of humanised lymph should be used. 3. Calf lymph should be supplied by the State, and be within the reach of every vaccinator. 4. Vaccination should be pervaccinator. 4. Vaccination should be performed at the child's home, as in Scotland, instead of at public vaccination stations. 5 Every medical man who performs vaccination successfully should be successfully succe tion successfully should be entitled to a fee in the same way as public vaccinators. 6. The period within which a child must be vaccinated should be extended to six months (instead of three months) from birth. 7. Persons having a conscientious objection to vaccination might be exempt from penalties for non-vaccination of their children if they satisfied the local authority of their objection, or made a statutory declaration before a magistrate or other authorised person. Any change of law to this effect was to be limited to five years in the imposed. The final report was issued in first instance. 8. Persons imprisoned for Sept. '96. It was signed by 11 out of 13 non-vaccination of their children should not Commissioners, the dissentients being Dr. be treated as criminals. The Commission

attached great importance to re-vaccination, but did not recommend that it should be compulsory. Dr. Collins and Mr. Picton, the dissentient Commissioners, as well as Mr. Whitbread and Mr. J. A. Bright, recommended the abolition of compulsory vaccination. The statistics of vaccination show a great falling off in the numbers vaccinated, and this is particularly the case since the period when the Royal Commission was appointed. In '95, out of 921,512 children whose births were registered, 624,650, or 678 per cent., were recorded as having been successfully vaccinated; 104,830, or 11'4 per cent., died unvaccinated; while of the rest more than 20 per cent. of the total number born appear to have eent of the total number of mappear to make the escaped vaccination. There is every reason to think that the returns for 'of and 'o7 will show a far larger proportion of unvaccinated children. In the Metropolis there has always been a greater proportion of unvaccinated children than in the rest of England. In the year ending Sept. '97, the vaccinations performed by public vaccinators at the cost of the poor rates bare the proportion of 32 per cent. to the births registered during the year.

In 'st this percentage was 61.

The Vaccination Act, '98, effected great changes in the law as to vaccination, following closely many of the recommendations of the Royal Commission. The most important changes related to the substitution of domiciliary vaccination for vaccination at public stations, the use of glycerinated calf lymph in all cases where required, and the exemption from penalties of conscientious objectors. For fuller details see Session, sects. 97 and 98. The Act does not deal with the subject of revaccination does not deal with the subject of revaccination On Oct. 18th, '98, the Local Government Board issued an order regulating the duties, remuneration, etc., of public vaccinators and vaccination officers, and repealing all previous regulations as to vaccination. Vaccination officers and public vaccinations are appointed by the Boards of Guardians; the former have the duty of enforcing the Vaccination Acts—they issue notices to parents keep records they issue notices to parents, keep records as to vaccination of all the children in their district, and institute proceedings in cases of default. A vaccination officer is empowered to take proceedings of his own accord against persons in default, without any direction from the Board of Guardians (see the decision of the Queen's Bench Division in the case of Bramble v. Lowe ['97], I Q.B., 283) By the order of the Local Government Board, the guardians are to pay the reasonable expenses incurred by a vaccination officer in proceedings taken by him. Previously, vaccination officers and public vaccinators were remunerated chiefly by tees in respect of successful vaccinations, and owing to the diminishing number of vaccinations in recent years their remuneration was in many cases greatly reduced. Henceforth both public vaccinators and vaccination officers are to be paid by fees for every birth registered in their district in addition to fees for successful vaccinations. It may be useful to note that a public vaccinator is required to vaccinate, free of charge, with glycerinated calf lymph issued by the Local Government Board, any child resident in his district or any Board, any child resident in his district or any person (not a child) who has not previously been vaccinated, and also to re-vaccinated been vaccinated, and also to re-vaccinated who has not been previously re-vaccinated took part in Sept. by in the great celebration

withm a period of ten years. If so requested, the public vaccinator is to visit the home of

Vagrancy Act. '98. See Session, sect. 99.
"Vanity Pair." This pioneer of the so-called "Vanity Fair." This pioneer of the so-called society journal was founded by Mr. T. Gibson Bowles (now M.P. for King's Lynn) in Nov. '68. It has always been noted for its literary pretensions, and for its weekly caricature, which is sui generis. The chief artist is Mr. Leslie Ward ("Spy"), who occupies the position so long held by the late Carlo Pellegrini ("Ape"). Its politics are old-fishioned Tory. It devotes Its politics are old-fashioned Tory. It devotes considerable space to Service matters. Vanity Fair changed hands for the second time in its

rair changed names for the second time in its history in March '95, but the Editor and Manager is still Mr. Oliver A. Fry. Office, 7, Essex Street, Strand, W.C.

Van Rooy, Anton, baritone vocalist, was b. at Rotterdam, 1870. He adopted the musical profession in '92, as a pupil of Stockhausen, in Fiankfort Showing a predilection for Wagnerian patts be was engaged at the Bayreuth Fiankfort Showing a predilection for Wagnerian parts, he was engaged at the Bayreuth Festival in '77, and specially distinguished himself as Wotan in 'Der Ring des Nibelungen' Sang in London at Queen's Hall at close of same year. After playing Wotan in 'Dre Walkure' at Covent Garden, in May '98, he sustained the same character there during the subsequent three cycles of the 'Ring.' Vanghan His Eminence Harphert Carding!

Vaughan, His Eminence Herbert Cardinal, Roman Catholic Archbishop of Westminster, and successor of Cardinal Manning as head of the Roman Catholic Church in England. He was b. at Gloucester, April 15th, 1832, and 1s the eldest son of the late Lieut. Colonel Vaughan, of Courtfield, Herefordshire. He was educated at Stonyhurst College and in Belgium. abandoning his first intention to enter the army, he went to Downside, and afterwards to Rome, where he entered the Accademia dei nobili Ecclesiastic, and studied for some time with the future Cardinal Manning. He was ordained priest at Lucca, Oct. 28th, '54, and alterwards, returning to England, he joined the oblates of St. Charles (a congregation of secular priests founded by the late Cardinal Manning at Bayswater), and was sent to St. Edmund's College, near Ware, of which he was Vice-President till '62. Having resolved to found a Missionary College, he went in '63 to North and South America to gather funds; and afterwards bought a house and land at abandoning his first intention to enter the and afterwards bought a house and land at Mill Hill, near London, where he began the College with only one student. The first stone College with only one student. The first stone of the present College at Mill Hill was laid in 69, and the College has now a large number of students. In spite of his entreaties to be of students. In spite of his entreaties to be allowed to remain simply a priest, he was appointed Bishop of Salford in 72. The work he didahere, the building of St. Bede's College for commercial education, his crusade against intemperance, his rescue work for children, and his pastoral letters and other writings, are well known. On the recommendation of the well known On the recommendation of the Propaganda he was elected by the Pope to the see of Westminster, April 8th, 92, took pos-session of the see May 12th, and received the pallium Aug. 16th. In Jan. 93 he was made a member of the Sacred College of Cardinals, with the title of Cardinal Priest. On June 29th,

by the Roman Catholics of England, of the 13th Centenary of the landing of St. Augustine.

Vegetarian Federal Union, The, is an association of such Societies throughout the world as may be willing to unite together for mutual counsel and the promotion of Vegetarianism-i.e. abstynence from the flesh of animals (fish, flesh, and fowl) as food, and the encouragement of the use of cereals, pulses, seeds, grains, fruits, nuts, and all the wholesome products of the vegetable kingdom. The Vegetarian Society, which celebrated its jubilee year in '96-7, is the oldest Vegetarian Society in Great Britain. The Secretary is Mr. Alfred Broadbent, and the offices are at 16, Oxford Street, Chorlton-on-Medlock, Manchester. The official organs of the Federal Union are The Vegetarian (weekly), and The Vegetarian Messenger and Review (monthly) Literature and lecturers are sent free. There is a Vegetarian Hospital, with 20 beds in connection with it, at Loughton, Essen. President, Mr. A. F. Hills, D.L.; Treasurer, Mr. T. Anderson Hanson; Secretary, Mr. Josiah Oldfield, M.A., B.C.L. Offices, Memorial Hall, 16, Farringdon Street, London, E.C.

Venezuela. A republic in South America, consisting of eight states or provinces, two settlements, and a Federal District. It is governed by a President, who holds office for two years, assisted by a Federal Council of members appointed by Congress every two years. Congress consists of a Senate of 24 members, three of whom are nominated by the legislature of each province, and a House of Representatives of 52 members, elected directly, one member to every 35,000 of popu-lation. The eight constituent states have each their own legislature and executive Roman Catholicism is the state religion, but private exercise of all others is permitted. Education is in a backward state, but is compulsory and fiee. La Guayra is the chief port of the Republic, and is connected with Caracas by a railway which is a marvel of engineering skill The chief products are coffee, cocca, timber, cattle and hides. A long-standing boundary dispute between Great Britain representing British Guiana and Venezuela, attracted unversal attention during '96, and led to some friction between Great Britain and the United States. Venezuela bases her claims on those put forward by Spain, to whose rights she succeeded on gaining her independence in far. The British, on the other hand, took over their claims from the Dutch, by whom the colony was ceded to them in 1814. In 39 the Schomburgk line was surveyed, and in 11 marked out as a reasonable basis for a settlement of the dispute. This line was not meant as indicating the extreme limit of the terri-tory over which British rights extended, but simply as a reasonable compromise. However, Venezuela refused to accept it, and subsequent negotiations, including offers from both sides, came to nothing. In '81 a modified Schomburgk line was drawn, including rather more territory than the original line. This was in response to an offer from Venezuela of a boundary line running from the coast at the mouth of the Maroco west to 60° W., and thence due south. Diplomatic relations were suspended in '87, and in '90 Great Britain declared that the modified Schomburgk line was the minimum of her demands. Aggressions by Venezuelan simply as a reasonable compromise. However,

troops in '94 and '95 on British officials at Uruan, in the Cuyuni district, led to more trouble, for the United States then took up the question, representing England's policy as one of unjustifiable aggrandisement. It was, however, agreed in Nov. of to settle the dispute on the principle that British Guiana should be treated as if it were an individual, and that fifty years' holding, whether by political control nity years holding, whether by political control or actual settlement, should give a good title, all the other points being decided by arbitration. The Arbitration treaty was signed Feb. and, '97. Diplomatic relations with Great Britain were restored, Señor Pietri being appointed Minister in London. Lord Herschell and Mr. Justice Collins were appointed arbitrators for Great Britano, and Chief Justice Fuller and Justice Brewer for the United States, with the light to choose a fifth arbitrator, failing which appointment, King Oscar of Sweden was to name the man for the position. treaty further provided that the arbitral tribunal, so constituted, should investigate and ascertain the extent of the territories that might lawfully be claimed by the United Netherlands or by the kingdom of Spain respectively, at the time of the acquisition by Great Britain of the colony of British Guiana, and should determine the boundary line between the colony of British Guiana and the United States of Venezuela The arbitrators are to be governed by the following rule, and by such principles of international law, not inconsistent therewith, as they may determine treaty further provided that the arbitral tribuinconsistent therewith, as they may determine to be applicable to the case:—"Adverse holding or prescription during a period of 50 years shall make a good title. The arbitrators may deem exclusive political control of a distinct as well as actual settlement thereof sufficient to constitute adverse holding or to make title by prescription. The printed case of each of the two parties, accompanied by the documents, the official correspondence, and other evidence on which each relies, must be delivered in duplicate to each of the arbitrators and to the agent of the other party within a period not exceeding eight months from the ratification of the tiesty. Within four months after such delivery either party may deliver a counter case and additional documents, correspondence, and evidence. The agent of each party must, within three months after the delivery of the counter-case, deliver a printed argument showing the points and referring to the evidence upon which his Government relies, and either party may also support the same before the arbitrators by oral argument of counsel. The arbitrators must meet at Paris within sixty days after the delivery of the printed arguments, and examine and decide the questions laid before them. Professor Maertens was afterwards selected as the President of the Tribunal, which will meet at Paris in the spring of 99. Area, 594,165 sq. m.: pop. 2,444,816. Capital, Oaraoas, pop. 72,449. Bevenue, 95, £1,546,700; expenditure, £1,546,700; imports, 94, about £3,000,000; exports, £4,263,502; publio debt. interior, £2,777,645; exterior, £2,709,435. Army about 7280, exclusive of militia (about 60,000 strong). For Ministry, etc.,see Dirlomatic.—History, 98. Mr. H. D. Haggard, the British Minister, was received by the President (Dec. 11th, 97), and diplomatic relations between the two countries and decide the questions laid before them. diplomatic relations between the two countries were resumed. A new Cabinet was formed by Señor Andrade, with Señor Matos as Minister

During '97 Her Majesty completed the sixtieth year of her reign, and thus passed the longest limit previously attained by any English sovereign. (For a description of the Commemoration of the Jubilee see special article, JUBILEE CELEBRATIONS, 98 ed.) The usual visit to Nice took place in March and April '98, and President Faure paid a visit to Her Majesty while she was at the Villa Liserb.

Victoria and Albert, Royal Order of, was instituted in 1862, and enlarged in '64, '65 and '80; is for Ladies, and consists of four classes. Registrar, Sir A. W. Woods.

Victoria Institute. This society, which has now been in existence for 31 years, was founded to associate together men of science and all interested and qualified persons in investigating "impartially and fully the most important questions of philosophy and science, especially those that bear upon the great truths revealed in Holy Scripture"; "to examine and discuss all supposed scientific results with reference to final causes, and the more comprehensive and fundamental principles of philosophy proper, based upon faith in the existence of one Eternal God"; and to bring together the results of such labours in the printed naionscratts of the Society. All desirous of belonging to or supporting a society having these aims are admitted as associates. The number of members and associates is 1495, one-third of whom reside abroad and in the colonies. President, Sir George Stokes, Bart, Secretary, Captain F. Petrie, Adelphi Terrace, W.C.

Victorian Order, The Royal, was created and instituted by Her Majesty, by letters putent under the Great Seal, April '96. Those admitted to the order are to be British subjects who may have rendered important or personal services to the Sovereign; or foreigners upon whom Her Majesty may think fit to confer the distinction, and who are to rank as honorally members. Members of the order are divided into five classes:—

Members of the Fourth Class Members of the Fifth Class

Members of the first and second classes receive the honour of Knighthood, and a list of those admitted Nov. '97—Nov. '98 will be found under KNIGHTS. The first three classes rank after the corresponding classes of the order of the Indian Empire. Chancery of the Order, St. James's Palace; Chancelor, The Lord Chamberlain for the time being; Secretary, The Keeper of Her Majesty's Privy Purse for the time being.

of Her Majesty's Privy Purse for the time being.

Victoria University, founded and incorporated by royal charter 1880, grew out of Owenh College, Manchester (q.w.), which was established in Besides Owens College it now comprises Sation as a cohesive and independent fighting force is still imperfect, for they have not the university College, Liverpool ('84), at which the new Victoria buildings, erected at a cost of £53,000, were opened in Dec. '92, and the Yorkshire College, Leeds ('87); and consists of a federation of colleges, not necessarily situated in the same district, as at Oxford and Cambridge. Virgin Islands. An archipelago in the West Indies, lying immediately to the east of Pusate Bioo. Of the principal islands Spain holds Oulebra and Bioque, Denmark possesses Santa Crus, St. Thomas, and St. John, and England owns Tortola, Virgin Gorda, and Anegada. The latter form a presidency of the British federal colony of the Leeward Islands. Total area of the presidency, which embraces in all about 32 islands, 58 sq. m.; total pop. 4635. See BRITISH EMPIRE (table).

VOLUNTEERS.

The Volunteer force maintains both its efficiency and popularity, and progress continues to be made. Early in the year the returns presented for '97 gave the full total of '25,200 efficients. The men now pass a much more severe musketry test than formerly. The force for the first time size '90 showed a decrease. The enrolled strength has been as follows since the establishment of the force: '60, 119,140, '61, 16,230; '62, 157,818; '63, 162,935; '64, 170,544; '65,178,484; '68, 281,556; '67, 187,864; '68, 199,194, '69, 195,287; '70, 193,893; '71,169,668, '78, 178,279, '73, 171,193,926; '74, 175,387; '75, 181,080; '76, 185,501; '77, 193,026; '78, 203,213; '79, 205,265; '84, 205,517; '81, 285,368, '88, 224,022; '86, 224,022; '86, 224,023; '87, 228,038; '88, 226,469; '89, 224,022; '80, 221,048; '91, 222,046; '82, 225,423, '83, 227,741; '94, 231,328; '95, 231,7c.; '86, 236,050, '87, 231,706. The authorised establishment, inclusive of permanent staff, was 262,558. Difficulty continues to be experienced in linding officers.

Organisation. — Volunteer corps are raised under the Volunteer Act 1863 (26 & 27 Vict., c. 65) They are subject to the provisions of that Act and any Acts amending it, and likewise to all regulations made with regard to volunteer corps by the authority of Her Majesty's principal Secretary of State for War. The Volunteer (Military Service) Act of '96 provides that "Whenever an order for the embodiment of the Militia is in force, any member of a Volunteer corps may offer himself for actual military service, and if the services of such numbers of any corps as, in the opinion of the Secretary of State, is sufficient to enable them to be separately organised are accepted, then those members may be called out either as a corps or as part of a corps." The Volunteers, like the Militia, form junior battalions attached to the line regiments in their respective districts. Their own organisation as a cohesive and independent fighting sation as a concesive and independent agring force is still imperfect, for they have not the auxiliary services, and it is not possible to ensure that all trained volunteers shall go through, even once a year, the exercises necessary to make them really efficient soldiers. To give them greater cohesion they have been formed in 33 brigades, but the organisation is as yet rudimentary, for the officers commanding volunteer infantry brigades do not in all cases inspect the battalions in their command, and the scheme of mobilisation is imperfect. But an excellent spirit is shown by both officers and men, as is proved by the general efficiency the increase in the mounted and cyclist infantry,

Wa

Staff Corps, and a movement recently set on foot to establish a Volunteer Reserve, composed of those who have been compelled to leave the ranks, but cherish their connection with the corps, and retain their devotion to its service. Constant efforts are being made to increase the efficiency of the force. It is hoped that the new grants to officers will bring a good class to the force. They are made contingent upon the attainment of proficiency.

The Latest Beturns .- Arms were distributed thus: Light Horse, 220; Artillery, 42,324; Engineers and Submarine Miners, 12,475; pay of sergeant-instructors, £98,500; capitation Rifles, 175,400; Medical Staff Corps, 1379. A grants to volunteer corps, £259,500; allowance total of 6306 officers and 13,629 sergeants are in aid of volunteer camps, £135,000; mis returned as having earned the Government cellaneous charges, £45,500.

grant of 50s.; 1605 officers have passed in tactics or artillery; 13 officers and 22 non commissioned officers have earned the gran for signalling; and 11 officers and 28 non-commissioned officers that for supply and transporduties. The number present at inspection in

The futures of the pay and allowance of volunteer corps was £614,200, as compare with £627,200 in 97-8. The expenditure on the force is as follows: pay of adjutants, £76,200.

Wakefield, Bishop of. See under PEERAGE. Wales, HR H. Albert Edward, Prince of, was b. at Buckingham Palace, Nov. 9th, 1841; created Prince of Wales and Earl of Chester, created Prince of Wales and Earl of Chester, by patent under the Great Seal, on Dec. 4th of the same year; baptised at St. George's Chapel, Windsor Castle, Jan. 25th, 42. Ed at Christ Church, Oxford (D.C.L. '68), and at Trin. Coll., Camb. (LL.D.), and Edin. Univ (LL.D.); also LL.D. Dublin ('68), and Calcutta ('74). Prince of the United Kingdom of Great Britain and Ireland, Prince of Wales, Duke of Saxony, Prince of Saxe-Coburg and Gotha, Great Steward of Scotland, Duke of Cornwall and Rothsay, Earl of Chester, Car-Cornwall and Rothsay, Earl of Chester, Carrick, and Dublin, Baron Renfrew, and Lord of the Isles, K.G., K.T., K.P., G.C.B., C.C.S.I., G.C.M.G., G.C.I.E., P.C. A somewhat serious accident befel him in '86 his knee being injured in a fall.

Wales, The University of, is a federal teach ing University. Its constituent colleges are the University College of Wales, Aberystwith the University College of North Wales, Bangor and the University College of South Wales and Monmouthshire, Cardiff, all of which will be found noticed under their separate headings and monmoutnessire, carain, all of which will of found noticed under their separate headings It has powers to confer degrees in the faculties of Arts or Letters, Science, Technical or Applied Science, Law, Music, and Theology. The charter passed under the Great Sealon Nov. 30th 83, since which time the task of getting the machinery of the University into working order has been proceeded with. On Jan. 12th '94, a large and influential deputation of persons interested in Welsh education waited upon the Chancellor of the Exchequer, with a view to secure the requisite funds. The demand for the first year was for £3000, which Sir William Harcourt was able to grant. The first meeting of the supreme governing body, the University Court, was held in the Privy Council Chamber Downing Street, on April 6th, when the chair was taken by the Earl of Rosebery, as Lore President of the Council. The Prime Minister in addressing the Court, referred to the democratic character of the new University At this and subsequent meetings. interested in Welsh education waited upon the

were adopted, a Theological Board was formed, nine Weish theological colleges were recog-nised as institutions in which candidates for rheological degrees in the University might receive instruction, and the general work of organisation was proceeded with. The University Senate, which is composed of the heads of departments in the three constituent colleges, departments in the three constituent colleges, has settled upon the courses of study for the initial degrees of the University in Arts and Science. The matriculation examinations are held each year in lune. The chief officers of the University are: Chancellor, H.R.H. The Prince of Wales, K.G.; Senior Deputy Ohancellor, Dr. Isambard Owen; Vice-Chancellor, Principal Viriamu Jones, University College of South Wales and Monmouthshire; Registrar, Mr. Ivor James, Brecon.

Walfisch Bay is a dependency of Cape Colony situated on the west coast of Africa, in the middle of the coast line of Gei man South-West Africa. Area, 430 sq. m.; pop. 768. See CAPE COLONY.

Wallace Collection, This famous collection of works of art, generously bequeathed to the nation by the late Lady Wallace, was vested in a body of trustees appointed by the Theasury, consisting of the Earl of Rosebery, Sir Edward Malet, Sir I. S. Maxwell, Sir Arthur Ellis, Mr. Freeman Mitford, Mr. A. C de Rothschild, and Mr. J. Murray Scott. Mr. Claude Phillips has been appointed keeper of the collection, and it is to be permanently housed in Hertford House, Manchester Square, in which very extensive alterations are being carried out for the purpose.

ward, Mrs. Humphry, is a daughter of Thomas Arnold, author of the well-known "Manual of English Literature," a niece of Matthew Arnold, and granddaughter of Dr. Arnold of Rugby. She married in 1872 Mr. Thomas Humphry Ward, at that time a tutor of Brasenose Coll, Oxford, now a member of the staff of the Times, and editor of a well-known edition of the English poets. Mrs. Ward displayed deep interest in the establishment ('90) of University Hall, now merged in the Passmore Edwards Settlement, Tavistock Place, of which she is Hon. Sec. In '84 she published "Miss Bretherton," in '88 "Robert Elsmere," in '92 "David Grieve"; in '94 "Marcella" appeared, a short story, "Bessie Costrell," in '95, "Sir George Tressady," a sequel to "Marcella," in '96, and "Helbeck of Bannisdale" in '98. She has also published various literary and historical essays, and a translation of H. F. Amiel's "Journal." She resides at Stocks House, Aldbury, near Tring, Herts, and in London. Herts, and in London.

War Office. Under this Department are placed the military factories for the manufacture of arms, gunpowder, etc., and the army clothing depôt at Pimlico. The parliamentary chief of the Department is the Secretary for War, who is aided by a Parliamentary Under-Secretary, a Permanent Under-Secretary, and a Financial Secretary. Important changes in the organisation of the War Office were effected in Nov. '95, when Viscount Wolseley succeeded the Duke of Cambridge as Commander-in-Chief. The main features of the new system are described in the first War Office. Under this Department are army clothing depôt at Pimlico. The parliamentary chief of the Department is the

Waterworks Engineers, British Association of. Established in April '96. The objects of the Association are to promote the interchange of information and ideas amongst its members, to receive and discuss communications from members and others as to watertions from members and others as to water-works engineering, management and finance, to originate and promote improvements in the law relating to waterworks, and to promote the interests of members. The qualifications for membership are the holding of posts as engineers of managers of waterworks underengineers of managers of waterworks undertakings. Engineers or their assistants may become associates in Class A, and persons of kindred professional knowledge or experience in Class B. There is also provision for hon, members and students. Members pay an entrance fee of £2 2s and an availal subscription of £3 1s.; and associates in Class A an entrance fee of £1 1s. and a subscription of 10s 6d., and in Class B an entrance fee of £2 2s. and subscription of 15d 1s. The third annual meeting was held at Southampton, May 24th to 27th, 198 President, Mi. W. Matthews, M. Inst C.E., F.G.S., Waterworks Engineer, Borough of Southampton. The secretary and editor of Transactions is Mr. W. H. Brothers. Offices, 54, Parliament St., Westminster, S.W. Watkinson, Rev. W. L. ex-President of the Wesleyan Methodist Conference was b. in Hull, of Methodist parents. At an early age he displayed preaching talent of such high takings. Engineers or their assistants may

age he displayed preaching talent of such high order that when, in '58, in his twentieth year, he offered himself for the ministry he was at once accepted, without preliminary college training lis first circuit was Oldbury. Suc-ceeding circuits included, amongst others, Nottingham, Bolton, and Manchester. His first London circuit was New Barnet ('80). rapidly acquired fame as a preacher, and in every circuit was invited to remain for the longest period allowable under the rule of Methodism. In '83 he became a member of the Legal Hundred, and in '84 was the Fernley Lecturer. The subject of his lecture was "The Influence of Scepticism on Character." He was appointed Connexional Editor in '03, and was chosen by Conference in '94 to represent English Methodism in the Conference of the American Methodist Episcopal Church (North). Recently he has been appointed editor of the London Quarterly Review. Amongst his published works, in addition to the Fernley Lecture, are "Noonday Addresses" (4 vols.), delivered in the Central Hall, Manchester, and the Philosophical Hall, Leeds; also a volume of sermons entitled "The Transfigured Sackcloth," in the "Preachers of the Age," series. Address 29, Exeter Road, Brondesbury, N.W.

Tennyson, which was one of the finest tributes paid to the late Laureate. He has also published a collection of "Love Lyrics," and among his earlier efforts are "Epigrams of Art, Life, and Nature," and "The Prince's Quest." Early in '93 "The Eloping Angels," a poetical caprice, and an admirable volume of essays, "Excursions in Criticism," were published. His most important volume, thus far. entitled "Odes, and Other Poems," was published in Dec. '94, "The Father of the Forest" in '95, a volume of sonnets on the Armenian question entitled "The Hope of the World, and Other Poems," in '97. A Civil List pension of £100 a year was conferred upon him in '95. Address Devonshire Club. Devonshire Club.

Watta, George Prederick, R.A., was b. 1817 In '43 his cartoon of "Caractacus led in Triumph through the Streets of Rome" ob-tained one of the three highest-class prizes of \$300 at Westminster Hall. Three years later, "Echo" and "Alfred inciting the Saxons to prevent the landing of the Danes," secured him one of the three highest-class prizes of \$500. Mr. Watts executed one of the frescoss in the Poets' Hall of the Houses of Parliament, and painted in freezo the west end of Lincoln's Inn Hall. He became a full member of the Royal Academy in '67, but retired in '96. His paintings of ideal subjects, such as "Love and Death," "Hope," "Orpheus and Eurydice," have justly given him a world-wide fame. A baronetcy was offered to, but refused by, him in '86, and the offer was renewed by Mi. Gladstone in '94, but again declined. In '95 he gave to the National Portrait Gallery fifteen oil portraits and two drawings. On his 8oth birthday (Feb. 23rd, '97) a handsomely illumi-nated address of congratulation was presented

to him by many of his friends and admirers.

Ways and Means. The Committee of Ways
and Means of the House of Commons (1) considers any proposals relative to old or new taxes and duties submitted to it by the Chancellor of the Exchequer (see FINANCE), and (2) votes sums of money from the Consolidated Fund sufficient in amount to make good the supplies granted for the maintenance of the services of the year. Resolutions relative to taxation may be acted upon by the proper officers as soon as passed. Thus, in 1885 Mr. Childers' Budgetresolutions increasing the spirit duties were agreed to in Committee of Ways and Means, and the higher duties were collected on the following day, and until the bill embodying the resolutions, and the Government which had framed them, were defeated, when the duties were defeated, when the old duties were reverted to. At the end of the session a measure which on the one hand applies out of the Consolidated Fund the whole sum granted to Her Majesty for the service of the financial year, and on the other hand appropriates the supplies in accordance with the votes already passed in Committee of Supply, is passed, and is known as the Appropriation Bill. See CHAIRMAN OF WAYS AND MEANS. when the old duties were reverted to. At the

east of Chefoo, and lies nearly opposite Port Arthur, which is situated on the northern side of the entrance to the Gulf of Pechili. Weihai-wei Harbour is sheltered, and can accom-modate a large number of vessels. The city of Wei-hai-wei is in the north-west corner of the bay, and is walled in. Forts command the entrances to the harbour. With the city and harbour there passed under British jurisdiction the island of Lju-Kung, on the north side of the bay, and all other islands and waters in the bay, together with a belt of land 10 miles wide along the entire coast-line of the bay, the Chinese population of which is about 350,000. The enrolment of a battalion of Chinese, 1000 strong, for service under British officers at Wei-hai-wei, was ordered (Nov. 18th). CHINA (map).

Weingartner, Pelix, composer, conductor, and writer on musical subjects, was b. at Zara, Dalmatia, June 2nd, 1863. At Graz studies under Dr. W. Mayer, and at Leipzig, in '8t, obtained a scholarship from the Austrian Government. At Franz Liszt's instigation his opera, "Sakuntala," was brought out at Weiman on March 23rd, '84. From '84 to '89 was conductor at Konigsberg, Danzig, and Hamburg, and in '91 was appointed Court conductor at Berlin. He has composed several symphonic burg, and in or was appointed court constant, at Berlin. He has composed several symphonic poems, a second opera ("Malawika," pi oduced in Munich in '86), and many songs. Conducted in Munich in '86), and many songs. Conducted a concert at Queen's Hall, London, May 17th, '98.

Welldon, Rev. James Edward Cowell, is the son of the Rev. Edward Welldon, master of Tonbindge School, and was born at Ton-bridge in 1854, and ed. at Eton and King's Coll. Cambridge. He was Senior Classic and Senior Chancellor's medallist' 77, and in '78 was elected a Fellow of King's. After taking his M.A. in '80, he was ordained deacon in '83 and priesa' 85, Master of Dulwich College '83-85, and elected Headmaster of Harrow School' 85. He was the select preacher at Cambridge in '84. yas the select preacher at Cambridge in '85, '38, and '93, and at Oxford in '86-87, Hulsean Lecturer at Cambridge '97. He was Honorary Chaplain to the Queen '80-92, and since then has been one of H.M's Chaplains in Ordinary. Among his publications are: "Translation of the Politics of Aristotle," '85; the "Rhetoric of Aristotle, with Analysis and "Rhetoric of Aristotle, with Analysis and Notes," '86; "The Nicomachean Ethics, with Analysis and Notes," '86; "The Nicomachean Ethics, with Analysis and Notes," '92; "Sermons' 85, '86, to Harrow Boys," '87, a second series '91; "The Spiritual Life," '83; and "Gerald Eversley's Friendship," '95. In '98 he was appointed Bishop of Calcutta and Metropolitan of India and Cevilon."

Wellington College (Wokingham, Berks). Wellington College (Wokingham, Berka). Founded in 1853, in memory of the great Duke of Wellington. The foundation consists of ninety scholarships for the sons of deceased officers, who are educated for £10 a year. There are, as a rule, ten open scholarships, and a limited number of officers' sons are educated at £95 a year. Sons of civilians are also received at a charge of £120 if boarded in the principal building, of £120 if boarded in a master's house. There is a classical school, in which boys are prepared for the Universities. which boys are prepared for the Universities, etc., and a modern side where boys are edu-Wei-hai-wei, which was leased to Great Britain by China by a Convention signed at Peking in July '99, is a city situated in a deep bay about 18 miles in circumference. Welsh Calvinistic Methodist (or Fresbyterian) Church. History. This is the largest Nonconformist Church in Wales, and the only one of native origin. It begas through a purely spiritual movement. In the middle of the eighteenth century three clergymen of the Established Church named Howell Harris, Daniel Rowlands, and Howell Davies, led the way in a great revival of religion in North Wales. They formed their converts into societies on Methodist lines, but as they rejected Wesley's Arminian doctrines, they leant more and more towards the practices of the Presbyterian Churches. In 1823 a Confession of Faith was adopted embodying the theological principles of the founders of the Church. Since that date the Presbyterian system has been more fully adopted, and Methodist and Congregational elements have been eliminated from the constitution of the Church. It is now a member of the Presbyterian Church of England. The Welsh tongue is still used in all the courts and official transactions of the Church, and in the worship of most of the congregations, but the use of English is steadily increasing.—Statistics. Synods, 2; presbyteries, 24; churches, 1330, chapels and preaching stations, 7536; ministers, 771; local preachers, 395; deacons, 5434; communicants, 145,000; income, £230,000. There are two theological colleges, one at Trevecca and one at Bala, and mission work is carried on in Brittany and India. Moderator for '98, Rev. J. M. Jones, Cardiff.

Weish Disestablishment. See DISESTAB-LISHMENT.

WESLEYAN METHODIST CHURCHES.

Wesleyan Methodists are the followers of John and Charles Wesley. The first Society of the Methodist Church was formed in 1739. The official returns show that there are in Great Britain 2135 ministers and 474,233 class-members of the Wesleyan Methodist persuasion; in Ireland 422 ministers and 27,955 members. The Foreign Missions of the Church employ 358 ministers, and number 55,907 members. The French Conference, 199 ministers and 74,483 members; and 1906 members; the South African Conference, 199 ministers and 24,483 members; and 48,270 members; and the Australasian Conference, 567 ministers and 99,585 members. The Wesleyan Conference was held in July '98 at Hull. The President is the Rev. Hugh Price Hughes, and the Secretary the Rev. Marshall Hurtley. (For foreign mission statistics see Mission is the outcome of the interest aroused by "The Bitter Cry of Outcast London," issued in '85 by the Congregational Union. Work is now going on vigorously at 5t. George's-in-the-East under the Rev. Peter Thompson; at the Leysian Hall, Errol Street, E.C., under the Rev. J. Ash Parsons, ; at 5t. John's Square, Clerkenwell, under the Rev. Hugh Price Hughes, Mark Guy Pearse, and other ministers; and in the South under the Rev. Upth Price Hughes, Mark Guy Pearse, and other ministers; and in the South under the Rev. Upth Price Hughes, Mark Guy Pearse, and other ministers; and in the South under the Rev. W. D. Walters, 58, Cromwell Avenue, Archway Road, London, N. en 11797—six years after Mr. Wesley's death—

the Methodist New Connexien was formed. Alexander Kilham had headed a movement which sought to place the geverning power in the hands of the members instead of in the hands of ministers. In the heat of controversy he made statements respecting ministers which could not be sustained, and for this he was ostensibly expelled by the Conference of 1796. He was followed by 5000 seceders, who formed themselves into the new body. In numerical strength this Connexion now ranks third amongst the denominations that have sprung out of the parent body. It has 206 ministers, 1203 lay preachers, and nearly 40,000 church members.

In 1834 a serious division took place on the proposal of Conference to open a training colege for ministerial students. Other questions, however, were at issue also. Protest was made against the power wielded by the ministers. Dr. Samuel Warren and Mr. Robert Eckett led the movement. Di. Warren was excluded in '35, and 20,000 members followed him, forming the Wesleyan Methodist Associations. Serious as was this division, another, much more serious still, commenced in '44. "Fly Sheets," unsigned, but probably written by the Rev J. Everett (the fact was not actually proved), were sent to every Wesleyan minister. The outcry was against "centralisation," and Dr. Bunting, who had for a generation been a leader in the denomination, was especially attacked. In '47 Conference required every minister who had not taken part in the dissemination of the "Fly Sheets" to sign a document to that effect. Two hundred and fifty-six ministers refused. Two years later, Everett, with two fellow-workers—the Rev. Samuel Dunn and the Rev. William Griffith—were excluded from Conference. Meetings of sympathisers followed, concessions—especially the admission of lay representatives to Conference—were asked for, and a petition signed by 50,000 Methodists was not received, and concessions were refused. In that year alone ('50-51) 56,000 communicants left the idenomination, and in five years the number of seceders had increased to 100,000. They took the name of "Reformers." This was the latest as well as the most serious of the divisions in the ranks of Methodism.

Attempts at reunion have been numerous, and not without success. The suggestions that the Old Connexion should be absorbed into the Church of England have not led to the result desired, nor has the wish—often expressed—that the denominations which have sprung from the Old Body should rejoin it, been realised. In September '81, however, an Œcumenical Methodist Conference—intended to be the first of a series—was held in Wesley's Chapel, City Road, London. The Methodist Episcopal Church of the United States had made the suggestion. There were 400 delegates, representing 28 branches of Methodism and 5,000,000 Church members. Ten years later a second Conference was held in America, and in 1901 a third is to be held in Wesley's Chapel, City Road. A remarkable instance of reunion is seen in the case of the United Methodists Pres Churches. First, the Protestant Methodists united in '36 with the Wesleyan Association. Next year a small body in the Midlands (the Arminian Methodists) was absorbed, and in the following year the Independent Methodists of North Wales. In '57 these

amaigamated bodies (with a membership of 21,000) were joined by 19,000 Reformers, and the name United Methodist Free Churches was adopted. The Reformers who refused to amalgamate became The Wesleyan Reform Union. amalgamate became The Wealsyan Reform Union, the membership of which is now only between seven and eight thousand—about a thousand less than the membership of the Independent Sethedists. With regard to the United Methodist Free Churches, a different denomination from the smaller body just named, it stands, with respect to numbers, next to the Primitive Methodists. At home and abroad there are 397 ministers and 41 supernumeraries, with 3020 local preachers and 91,423 church members. The "foreign districts" are in China, East and West Africa, Jamaica, New Zealand, Australia, and Tasmania. Attempts have been Australia, and Tasmania. Attempts have been made to carry the union of churches still further by the amalgamation of the United Methodist by the amalgamation of the United Methods body with the New Connexion. These attempts have not yet succeeded. In '92 the United Methodists held their annual assembly, on an invitation from the parent body, in Wesley's Chapel, City Road, London. At the close of the chape; City Road, London. At the close of the sittings a special resolution was passed, expres-sing satisfaction at the general feeling existing in the different Methodist bodies in favour of in the different Methodist bodies in favour of closer union, and adding that "it is much to be desired that the question of union, which has been for so many years before the churches, may, at an early period, be mutually and permanently settled by the holding of a Federal Conference at fixed periods; and in other ways making manifest a happy union of all the branches of the great Methodist family." After the Conference a member of the Unied After the Conference a member of the United Methodist Free Churches presented a stained glass window to the chapel to commemorate the gathering. At the present time the Bible Christians and the Primitive Methodists are discussing the question of amalgamation. It has been suggested that if the amalgamation ahould take place, the new body should be called "The Presbyterian Methodist Church," The Primitive Methodist Union Church." The Primitive Methodists took steps, in connection with this movement, to ascertain the views of the New Connexion, and of the United Methodist Free Church denominations, with metaodist Free Church denominations, wire reference to an amalgamation of all the minor Methodist bodies. In Australasia the United Methodist Free Churches have joined with other branches of the Methodist family to form one church. They are all at one with each other, and with the parent body, in doctrine. The differences refer almost entirely to the The differences refer almost entirely to the position of the ministers, and their relation to the laity in church government. In the old Wesleyan body the "Legal Conference" is supreme, and this "Hundred" must be composed of ministers. Its position was not altered by the admission of laymen in '77 to the Representative Conference. The Primitive Methodists, on the other hand, place power in a Conference in which there are two laymen to one minister. The New Connexion and the Bible Christians take a middle course—one layman to one minister—whilst the United Methodist Free Churches are unfettered in their choice of representatives. Another distinguishing feature in the government of the The differences refer almost entirely to the position of the ministers, and their relation to the laity in church government. In the old Wesleyan body the "Legal Conference" is supreme, and this "Hundred" must be composed of ministers. Its position was not altered by the admission of laymen in '77 to the Representative Conference. The Primitive Methodists, on the other hand, place power in a Conference in which there are two laymen to one minister. The New Connexion and the Bible Christians take a middle course—one menister. The New Connexion and the Bible Christians take a middle course—one minister. The New Connexion and the Bible Christians take a middle course—one Hayman to one minister—whilst the United Methodist Free Churches are unfettered in their choice of representatives. Another distinguishing feature in the government of the last-named Churches is their Circuit Independence. Their annual assembly has no power to revise the decisions of Circuit Courts in circuit matters. It is claimed for this denomination local preacher who threw himself into evan

that its churches enjoy the freedom of Congregationalism whilst the whole body has the cohesion of Methodism.

The greatest development of Methodism has been in the United States of America, where has beerrin the United States of America, where it is now the leading denomination, numerically and financially. The Methodist Episcopal Church of the Northern States has a membership of 2,675,023, and 16,248 ministers. The Methodist Episcopal Church South has 1,442,665 members and 9837 ministers. Other Methodist Episcopal Church, with 615,854 members and 4680 ministers; the African Methodist Episcopal Zhon Church, 492,888 members and 2561 ministers; the Methodist Protestant Church, 182,248 members and 250 ministers; the Methodist Protestant Church, 182,248 members and 250 ministers; the Methodist Protestant Church, 182,248 members and 250 ministers: 183,418 members and 2100 ministers; the Coloured Methodist Episcopal Church, 164,308 members and 1680 ministers; the Free Methodist Church, 26,038 members and 938 ministers; and some few smaller churches with about 200,000 more members. In Canada the Methodist Church has 280,537 members and 2031 ministers. figures being added to the number of Methodists in the United Kingdom and in the Colonies, give a total of 7,100,601 members, mostly heads of £miles, from which it is computed that the total number of persons attending Methodist churches throughout the world is about

30,000,000.

Primitive Methodism is sometimes referred to as a "growth" rather than a "secession," because the first "class" formed was combecause the first "class" formed was composed of persons who had not previously belonged to any church. Mr. Hugh Bourne, who had been a local preacher amongst the Wesleyans, took charge of this class, and proceeded to form other classes. This was in Staffordshire in 1810. Two years before this, Mr. Bourne had been excluded from the Mr. Source had been excluded from the Methodist body because he would not conform to the regulations of Conference respecting Camp Meetings. The Conference of 1807 had decided against Camp Meetings; but Mr. Bourne, and afterwards William Clowes, refusing to be ruled on this question, were excluded. The first Conference of this body excluded. The first Conference of this body was held in 1830. It is now the largest of all the bodies that have sprung from the Methodists. It has missions in Southern Western, and Central Africa; in South Australia, New Zealand, and Queensland. It has a training college for ministers at Manchester and colleges for youths at York and Birming ham, also an orphanage at Airesford. It has too, a training school for native evangelists in South Africa. Latest statistics: Members 2018-2-Increase for the year-stats: ministers.

gelistic work in such thoroughgoing fashion that he was declared to be "irregular." Upon that he was declared to be "irregular." Upon this the new denomination was formed. The preachers at first did not take the title of "Reverend." They, however, (like he Primitive Methodists) license women to preach as well as men. In England the denomination is strongest in Cornwall and in the Western counties. Numerically it is almost a large at the counties. counties. Numerically it is almost as large as the New Connexion, having nearly 35,000 mem-bers, and ranking, in this particular, fourth amongst the minor bodies of Methodists. The Protestant Methodists were organised in 1829, when more than 1000 members separated from the Leeds societies, because the trustees of Brunswick Chapel (with the consent of Con-ference) placed an organ in that building in opposition to the wishes of the class leaders. Western Africa, British Possessions. See under the respective alphabetical headings, as

WESTERN AUSTRALIA.

LAGOS, NIGERIA, SIERRA LEONE, etc.

WESTERN AUSTRALIA.

Western Australia is a colony comprising all the western half of Australia beyond the rapth meridian of E. long. It is 1480 miles N. to S., and 1000 E. to W., and has a coastline of 3000 miles. Area, 975,920 sq. m.; pop., '98, 179,921. Divided into 31 magnisterial districts. Capital, Perth, pop. 43,000; chief port Fremantile, pop. 15,000. Representative government was first given to the colony in 70 in a limited form; but in '90 the Imperial Parliament gave a new constitution, vesting the administration in a Governor and Parliament. The Legislative Council, or Upper the administration in a Governor and Farlia ment. The Legislative Council, or Upper House, contains 24 members elected for six years; the Legislative Assembly, or Lower House, contains 44 members elected for four years. Electors to the Council must by the Constitution Act of Oct. '93 have resided in the colony for 12 months, and possess £10 freehold or £25 per annum lessehold, or be freehold or £25 per annum leasehold, or be householders to the value of £25, or occupy, or mine Crown lands rented at £10 per annum. The qualifications of electors to the Assembly are 6 months' residence in the dis-Assembly are o months residence in the district; or the possession of £50 freehold or £50 freehold or £70 fro, or leasing Crown lands at £5 per annum. Education is compulsory, though not free Grants in aid are given to denominational archaels. schools. The climate varies considerably, for schools. The climate varies considerably, for the colony stretches over twenty degrees of latitude, but the inhabitants laud it as the healthnest in the world. The products of the colony are gold, wool, pearl shells, pearls, timber, sandal wood, and guano. The gold is found at Kimberley, in the N.W., Yilgarn, in the S.W., and at several points between these two districts. The chief fields are the Murchison, the Ashburton, and the Pilbarra, but the research extend for about 1200 miles. The but the refs extend for about 1200 miles. The Coolgardie field, in the S.W., became famous during '95. The export in '90 was only £86,000, but in '93 it amounted to £421,385, and in '97 to £256,976. There are 1361 miles of railway open and 276 under construction; 5948 open, 262 under construction of telegraph. Great efforts are hairs made to promote the construction of unuer construction of telegraph. Great efforts are being made to promote the construction of railways on a grand scale on the "land-grant system," and so to open up back country. Revenue, '07, £3,754,747; expenditure, £3,325,912; imperts, '97, £6,418,55; experts, £3,040,098; dest, '08, 69,833,100. See Augraalia, British Empire (table), and Diplomatic.

WEST INDIES.

The name given by Columbus to the islands surrounding the Caribbean Sea. They are divisible into the Bahamas, the Greater Antilles, and the Lesser Antilles. The last are also divided into Windward and Leeward are also divided into windward and Leeward groups; and to them may be added the islands off the Venezuelan coast. The total area is estimated at upwards of 90,000 sq. m., and the total pop. at 5,000,000, of whom two-thirds are negroes. Those of the islands which are important enough will be found which are important enough will be found treated separately under their respective alphabetical headings. A terrible hurricane occurred (Sept. 10th, '98), which did enormous damage, especially in St. Vincent, St. Lucis, Barbados, the Grenadines, St. Kitt's-Nevis, Montserrat, Anguilla, and Barbuda. It was estimated that several hundred people perished and many thousands were rendered homeless and destitute of food. The coasts were strewn with ursels and whole to the coasts were strewn with wrecks, and whole towns were destroyed. In Barbados, for instance, 11,250 labourers' houses were swept away, and 4918 damaged. It was computed that there alone \$40,000 was required immediately to re-house destitute persons. The Lord Mayor of London at once opened a relief fund, and aid was promptly rendered by the Imperial authorities. The Lord Mayor's Fund on Nov. 18th amounted to £42,800.

During '07 a Royal Commission, consisting of Sir Henry Norman, Sir David Barbour and Sir Edward Grey, was occupied in investigating the condition of the sugar industry in the West Indian colonies, and specially the causes of the present depression. The report of the Commission was saiblished as a bluebook, Oct. 2nd, 97, and the conclusions of the Commissioners on, and the conclusions of the Commissioners may be summarised as follows:—The sugar industry in the West Indices is in danger of great reduction, which in some colonies may be equivalent, or almost equivalent, to extinction. The depression of the industry is due to the competition of other sugar-producing to the competition of other sugar-producing countries, and in a special degree to the competition of beet sugar produced under a system of bounties. It is also affected by high protective tariffs. The causes of the depression are permanent, inasmuch as they are largely due to the policy of foreign countries, and there is no indication that that policy is likely to be abandoned in the immediate future. It is not due in any considerable degree to extravagance in management, to imperfection in the process of manufacture, or to inadequate supervision consequent on absentee ownership, and the removal of these causes, wherever they exist, would not enable it, generally, to be profitably carried on under present conditions of competition. The depression is increasingly causing estates to be abandoned, and such abandonment is causing, and will cause, distress among the labouring population, including a a large number of East Indian immigrants, and will seriously affect for a considerable time the general prosperity of the sugar-producing colonies, and will render it impossible for some, colonies, and will render it impossible for some, and perhaps the greater number of them, to provide, without external aid, for their own government and administration. There is no industry or industries that could completely replace, in such islands as Barbados, Antigua, and St. Kitts, the sugarindustry. In Jamaica, in Trinidad, in British Guiana, in St. Lucia, in

St. Vincent, and to some extent in Montserrat and Nevus, the sugar industry may in time be replaced by other industries, but only after the lapse of a considerable period and at the cost of much displacement of labour and consequent suffering In Dominica the sugar industry is not at the present day of great importance.

not at the present day of great importance.
Coming to the question of remedies, the Commissioners had to dismiss the best remedy, the abandonment of the bounty system by Continental nations, as quite improbable. They were divided in opinion as to the imposition of countervailing duties on bounty-fed sugar imported into the United Kingdom, the chair-man, Sir Henry Norman, supporting, and his two colleagues opposing, such a course. Various special remedies or measures of relief were, however, recommended as follows: (1)
The settlement of the labouring population on
small plots of land as peasant proprietors;
(2) the establishment of minor agricultural
industries and the improvement of the system of cultivation, especially in the case of small proprietors, (2) the improvement of the means of communication between the different islands; (a) the encouragement of a trade in fruit with New York, and possibly, at a future time, with London; (5) the grant of a loan of £120,000 from the Imperial Exchequer for the establishment of central factories in Barbados. expenditure which these measures would involve was estimated as follows (1) A grant of \$\frac{4}{27,000}\$ a year for ten years, to carry out the special remedies i ecommended in (a), (3), and (b); (2) a grant of \$\frac{4}{20,000}\$ a year for five years for the smaller islands; (3) immediate grants of £60,000 and £30,000, or £90,000 in all, to clear off the floating debt in some of the smaller islands, and to make ioads and settle minister islanus, and to make l'oads and settle the labouring population on the land in Dominica and St. Vincent, (4) a loan of £120,000 to Barbados for the establishment of central factories. As to the expenditure which might be necessary for relieving distress (especially in British Guiana and Barbados), in promoting emigration, and in supporting and repatriating East Indian immigrants, the Commissioners were unable to form any estimate, but it might be very great, if there occurred a sudden and general failure of the sugar indus-try in Barbados and British Guiana. In such a contingency neither British Guiana nor Barbados would be able to meet the necessary cost of administration for probably a considerable number of years. The action taken by the Imperial Parliament in the direction of grants imperial Farliament in the direction of grants in aid will be found described under SESSION, sect. 31. A Bugar Bounties Conference was held, on the invitation of the Belgian Government, at Brussels, in June '98, Austria, Belgium, France, Germany, Great Britain, Holland, Russia, Spain and Sweden being represented. It soon appeared that France would not consent to the complete suppression of all apports. to the complete suppression of all export bounties on sugar, whether direct or indirect, and that Russia declined to discuss the question of her internal legislation, contending that her aystem did not amount to a bounty on the exportation of sugar. Austria and Hungary, however, with Germany, Belgium and Holland, were ready to abolish their bounties, and Spain and Sweden would offer no opposition to such a course. But no action could be expected from these countries in face of the attitude of France

delegates reported that, failing any arrangement for modifying the French and Russian systems acceptably to other countries, the only course would be for those other sugar-producing countries to conclude a convention, suppressing bounties within their dominions, and engaging to impose countervaling duties on, or prohibit the entry of, bounty-fed sugar coming from states not included in the convention. The West Indian, planters then reiterated their demand for countervaling duties, and a conference of their representatives was held in Barbados in September '98. A resolution was adopted, in which appreciation of the Imperial grants was expressed, but also the opinion that the Imperial Government should, as a matter of right and as the only possible remedy, exclude bounty-fed sugar from the English market or impose countervalling duties. This latter curse was taken by the United States

westminster Abbey. A Commission was appointed, April '90, to inquire into the facilities offered by the Abbey for providing for the interment, and of otherwise preserving the memory of Her Majesty's subjects, in the mainer which has been customary for many centuries; and to hear evidence, and to consider plans for providing at the Abbey, or elsewhere, an additional place for memorials, should such a provision appear necessary. The Commissioners reported in '91 that of the various schemes which had been brought before them, there were two which they commended as specially suited to the purpose. The one proposed to clear an area then occupied by certain houses in Old Palace Yard, and to erect upon a portion of the ground so cleared a monumental chapel connected with the Abbey at Poet's Corner. They ventured to recommend, whether the latter part of this proposal were adopted or not, that no time should be lost in removing the houses in Old Palace Yard referred to, which not only concealed, to a great extent, the architecture of the Chapel of Henry VII. and the *ancient Chapter-house, but were also a constant source of danger to the Abbey from fire. This has since been done, and the result is that a most striking view of the Abbey and of Henry VII.'s Chapel is opened up. The other plan contemplated the erection of a monumental chapel on a vacant piece of ground, the site of the old Refectory, in possession of Westminster School, lying immediately south of the Great Cloister and parallel to the nave of the Abbey, After a careful review of the arguments, they recommended that of the two schemes the latter should be adopted. A dissentient report of the Abbey, advised that preference should be given to the site at the south-east of the Abbey.

France, Germany, Great Britam, Holland, Russia, Spain and Sweden being represented it soon appeared that France would not consent to the complete suppression of all export bounties on sugar, whether direct or indirect, and that Russia declined to discuss the question of her internal legislation, contending that her system did not amount to a bounty on the exportation of sugar. Austria and Hungary, however, with Germany, Belgium and Holland, were ready to abolish their bounties, and Spain and Sweden would offer no opposition to such a course. But no action could be expected from these countries in face of the attitude of France and Russia, and so the conterence separated without any practical results. The British

Weyman, Stanley John, was b. at Ludlow, hropshire, Aug. 7th, 1854, and ed. at Shrewsury School and Christ Church, Oxford, taking is B.A. degree in '77. He decided to follow is legal profession, and was called to the bar the Inner Temple in Jan. '81, joining the Exford Circuit. On this circuit he practised il '80, when his first work, "The House of the Wolf," a romance of French history, was published. His health then giving him considerible trouble, he was compelled to spend some me abroad, and this led him to abandon his ractice. In '90 "The New Rector" appeared, book of a totally different style from his irst book. It is a modern novel of the school of Anthony Trollope. "The Story of Francis Iludde" followed; and then came, in '93, the book which has made him such a favourite with all lovers of romance, "A Gentleman of France." This novel has been translated into French, German, and Swedish, and has proved one of the most successful of recent novels. In '94 he published "Under the Red Robe," and "My Lady Rotha." The former is a tale of the time of Richelieu, and the latter a stirring story of Germany during the Thirty Years' War. In '96 appeared "The Red Cockade," which was followed in '8by "Shrewsbury." Mr. Weyman is married, and lives at Llanrhydd, near Ruthin, Denbrghshire.

Wheat. The crop for the year '97 was an unusually poor one, especially in view of the growing requirements of the world. Coupled with this was the fact that what is known as the visible supply—that is, practically, the public stocks—were considerably below the average for the time of year, being less than half as large on Aug. 1st, '97, as on the same date in '95. All these facts pointed to shoutness of supply, the only uncertain factor being the amounts of the visible supplies or stocks held in private hands. From the following table it will be seen that during the last three months of '97 and the first four months of '98 prices were firm, with a slightly upward tendency. The statistical position led to the formation of a corner in the United States, by which a certain Mr. Letter endeavoured to secure all the stocks in his own hands, and was for a time largely successful in doing so. This rushed prices up in May to an abnormal extent in comparison with those ruling in late years. By June, however, there were signs that the maintenance of the corner had become a matter of extreme difficulty, and by the end of the month it had practically broken down with disastrous results to its author. It had mean-while become increasingly evident that the crop for '98 would be an unusually large one, and all these circumstances combined to bring prices in the autimn months down to rates below those ruling at the same time in '97.

The following table will give a rough view of the course of the market.

'97-8.	English Wheat.						Flour. Price per		
	,	-	p		280 lb.				
_	5	d.	•	d.	s.	d.			
Oct.	32	3	38	73	20	0			
Nov.	33	9	39	o	20	1			
Dec.	34	í	39	6	20	0			
Jan.	34	10	38	o	. 29	0			
Feb	35	1		I	30	•			
March		6	. 39	6	30	0			
Aprıl	36	3	41	6	31	3			
May	46	0	51	2	39	7			
June	42	7	44	8	35	0			
July	37	3	3-2	6	20	6			
Aug	. 28	6	30	0	27	6			
Sept	. 29	0	,1	О	27	6			

At the same time the important fact has to be borne in mind that visible stocks have been undoubtedly depleted to an inusual extent, and that they are still at a very lowlevel. The position is shown in the following table. There seems, therefore, a fair prospect that for some time to come prices will remain moderately steady in the absence of any new factors.

	Visible	Supply.	Aug. 1st
Year			Ors.
'91			11,450,000
'92			13,608,000
'93			19,670,000

'98		301,000,000
'97		280,000,000
'98		330,000,000

The danger of a famine 110m lack of supplies of wheat was dealt with at the meeting of the British Association in the presidential address, in which it was pointed out that the population was increasing much more rapidly than production, and that within 30 years something like a wheat famine would become chronic if in the meantime no remedy could be devised. The President regarded the question as mainly a chemical one, and principally resting in the utilisation of the free nitrogen which is known to exist in the atmosphere. Into the chemical aspect of the question we do not here enter, but it may be pointed out that Sir William Crookes underestimated the amount of the actual produce, and hardly took sufficient account that there are still large areas of the world where wheat could advantageously be cultivated which are not utilised. Asia Minor,

the Danubian provinces, and Queensland (in which latter country alone it is computed that there are 50,003,000 acres of virgin soil suitable for wheat) may be cited as examples. Further, the methods of cultivation in many parts of the world, notably in America and India, are capable of immense improvement.

White, Sir George Stuart, G.C.B., G.C.S.I., G.C.I.E., V.C., was b. in 1835, and entered the army in '53. He has had a brilliant career, and won his V.C. at Charasiab in '79, and at and won his v.c. at character 1/9, and a Kundahar Sept. 80, by his conspicuous personal bravery. He served in the mutiny, in the Afghan campaign 79-80, in the Nile expedition 85-7 as commander of the forces there, when he gained his promotion to the rank of Major-General. In '89 he was appointed to the command of a first-class district in India, and in '93 he succeeded Lord Roberts as Commander-in-Chief in India. He was appointed Quartermaster-General of the Army in '98, following Sir Evelyn Wood in that office. He is a D.L. and J.P. for the county of Address: Whitehall, Broughshane, co. Antrim.

co. Antrim.

Whyte, Rev. Alexander, M.A., D.D., was b. at Kirriemuir, Forfarshire, 1837; ed. at Aberdeen University (M.A. '62) and Free Church College, and ordained at Glasgow in '66. Four years later he became minister of Free St. George's, Edinburgh, the premier Presbyterian church in Scotland, and this position he still holds. He is a D.D. of Edinburgh University. In '98 he was elected Moderator of the Free Church General Assembly. Wilberforce, Canon Albert Basil Orme, 18 Wilcertorce, Canon Albert Basil Orme, is the youngest son of the late Bishop Wilberforce of Oxford and afterwards of Winchester, and was ed. at Exeter College, Oxford, where he graduated B.A. in '65, M.A. in '66, D.D in '94. He was curate of Cuddesdon '66-7, chaplain to the Bisho of Oxford '66-70, curate of St. Jude, Southsea, 61-71, and rector of St Mary's, Southampton, 71-94. In 94 he was given the living of St. John's, Westminster, and made a Canon of Westminster. The Speaker appointed him as his chaplain in Jan. '96. He is famous for his eloquence in the pulpit and

pointed him as his chaptain in Jan. '96. He is famous for his eloquence in the pulpit and as a temperance advocate. Address. 20, Dean's Yard, Westminster Abbey.

Withelmina I., Queen of the Netherlands, was b. 1880. She is the daughter of Wilham III., of the Netherlands, by his second wrife, the Princess Emma Adelaide Wilhelmina Theress. Her mother is sister of H.R.H. the Duchess of Albany, being daughter of Prince George Victor of Waldeck-Pyrmont. Queen Wilhelmina succeeded to the throne on the decease of her father, in Nov. '90, but her mother acted as Queen-Regent till the young Queen came of age (Aug. 31st, '86), and, amidst the enthusiasm of her people, was installed as Sovereign.

William II., King of Prussus and German Emperer, is the eldest son of the late Emperor Frederick III., by Victoria, Princess Royal of England, and was b. Jan. 27th, 1859. He succeeded his father June 15th, '83. Ed. at the gymnasium of Cassel, and submitted to the ordinary discipline of that establishment until '77, when he entered the University of Bonn.

77, when he entered the University of Bonn. He married on his twenty-second birthday, in 8s, the Princess Augusta Victoria, of Schleswig-Holstein - Augustenburg, a niece of Prince

Christian. An International Labour Conferchristian. An international passour conference was inaugurated by the Emperor in 30. A state visit to Heligoland and to Amsterdam in 31 preceded his Majesty's arrival in England, accompanied by the Empress, in July. They were entertained at a series of splendid festivities, and the Emperer was presented with the freedom of the City of London. His Majesty sent a congratulatory telegram to President Krugʻr when Dr. Jameson's force was defeated in Dec. '95, an act which caused considerable surprise in Great Britain, though it was afterwards explained that His Majesty had no unfriendly intent towards this country. He was equally prompt in sending his congratulations to the Sirdar on his victory at Omdurman in '98. In October and November Omdurman in '98. In October and November of that year he paid a visit, with the Empress, to Constantinople, where their Majesties stayed some time as the Sultan's guests, afterwards going on to Palestine and Jerusalem. See Turkfy. See also Gremany and Yachting.

Wills. It should be borne in mind that the object of making a will is to make provision for the personal estate and effects of the person to whom they belong going to people.

person to whom they belong going to people other than those amongst whom they would be distributed by law in the event of no will being made. A will may be quite simple— couched in ordinary language; and though the couched in ordinary language; and though the intention of the testator is always sought for in construing the meaning of the will, yet if he make use of technical or legal terms, those terms will be taken in their legal sense, which may be quite contrary to the testator's intention. A will must be in writing, and must be signed, or, if already signed, must be acknowledged, by the testator in the presence of two witnesses, who must each sign the will of two witnesses, who must each sign the will in the presence of the testator and in the presence of the testator and in the presence of each other. If a witness be a legatee he will lose the gift left to him, and his legacy will fall into the residuary estate fut the fact of a witness being a legatee will not invalidate the will. Property acquired after the date of the will passes under it, as the will is said to speak from the date of the testator's death and not from the date of the will. The last will in point of date is the one which will be admitted to probate. A will may be revoked in the following ways: (1) By the marriage of the testator; (2) By destruction of the will; (3) By a subsequent will, or portions of a former will by a codicil. The testator must appoint an executor or executors to carry out the provisions of the will, or it will be necessary for the Probate Court to appoint an administrator cum lestamento annexo (with the will annexed) in order to do so. Immediately upon the testator's death the executor becomes entitled to all the testator's executor becomes entitled to all the testator's personal property. He is bound first of all to bury the deceased and prove his will, then to pay out of it any debts due by the testator; and then to distribute the property, so far as it will go, in accordance with the will. Wills may be proved either at the Principal Registry, Somerset House, or at the District Registry of the district in which the testator had his permanent shode at the time of his death. Execumanent abode at the time of his death. Executors may prove the will personally without the aid of a solicitor. (For the Legacy and Succession duties payable, see DEATH DUTIES.) Should there be more than one executor, each can exercise All the powers of the office, each can exercise All the powers of the office, except that all must join in bringing any

action respecting the estate. The office continues to the survivors or survivor. Should the executor renounce, or die, before taking out probate, or not appear when cited to take probate, his rights of executorship cease entirely. But when the last surviving executor entirely. But when the isst surviving executor dies, then his executors are also executors of the original testator. If the executor is an infant, the Probate, Divorce, and Admiralty Division of the High Court will grant administration to his guardian or some other person who becomes administrator durante minor actate ("during the minority"). An executor merely in virtue of his spropriment is released merely in virtue of his appointment is released from any debts due from him to the testator, and may retain out of the assets any debt due from the testator to him in priority to all other debts of the same degree; but this provi-sion is so guarded in equity as to be practi-cally of no effect. Any person who takes upon himself to be executor without cally of no effect. Any person who takes upon himself to be executor without having been appointed, is said to be an executor de son tort ("of his own wrong"), and is not allowed to derive any benefit from the office. Should no executor be available, the Court will grant letters of administration cum testamento annexo ("with the will experted") as desiring from the ordinery letters. annexed"), as distinct from the ordinary letters of administration granted when a person dies without making a will.—Letters of Administrawithout making a will.—Letters of administration. In the event of a person having personal property dying without a will, application is made, generally by the deceased's relatives, or sometimes by a creditor, to the District Registrar of the Probate Court, who thereupon grants letters of administration to the person proposed for the office, who will have to make proposed for the office, who will have to make affidavits of the assets and debts, and sign the prescribed oath. He will then pay the debts owing by the testator, and distribute the remainder of the estate in accordance with the various Acts dealing with the property of intestates. Copies of all wills that have been proved can be seen at Somerset House by any one on payment of the fee of is. See Law, '98." Winchester, Bishop of. See under Peer-

Minchester College, the oldest of our public schools, founded (1387) by William of Wykeham. as a nursery for the "New College" he had recently founded at Oxford. It is certain, however, that some years before that date Wykeham was maintaining and educating poor scholars, and the actual date of the opening of the College was March 26th, 1393. About a dozen vacancies yearly occur for foundationers, who are elected by the governors after open competition. Her Majesty gives two gold and two silver medals to be competed for. Tenable at the Universities are four exhibitions of £50 for four years, and at New College, Oxford, six scholarships. The quingentenary of the College, its 500th anniversary, was observed on "Domun Day," July 25th, '93. Head Master, Rev. W.A. Fearon, D.D. Motto,

WOMEN, HIGHER EDUCATION OF.

The Higher Education of Women has made great advances since the Report of the Royal Commission on Secondary Schools was issued in 1868. The National Union for Improving the Education of Women, formed under the presidency of the Princess Louise, in consequence of that report, founded in '22 the Girls' Public Day School Company, which, with the Church Day School Company, which with the Church Day School Company, the state of the School School Company for the Higher—that is, University and College—Education of Women. These two Companies have now 64 schools and 10,000 pupils, entirely taught and officered by women, many of whom have had a college training. The National Union founded, in '77, the Teachers' Training and Registriano Society, out of which has grown the Earis Groy Training Ollege, Salusbury Road, Brondeabury (Principal, Miss Alice Woods), and, indirectly, the Oambridge Training Ollege, for Women, incorporated Jan. '93 (Principal, Miss Hughes), and the St. George's Training Ollege, S. Mel-ville Street, Edinburgh (Principal, Miss M. R. Walker), opende '86. St. Leonard's School, St. Andrews; Roedean School, Brighton; and Wylombe Abbey, Bucks, are large residential establishments founded to give to girls similar advantages '12 those open to boys in our great public schools.

Dublic schools. Oxford and Cambridge now offer many facilities to women desiring advanced education. At Cambridge the triposes, or honour examinations for the B.A. degree in mathematics, classics, natural science, moral science, history, mediaeval and modern languages law, Semitic languages, Indian languages

of £ 5000 is devoted to scholarships. Students can attend University lectures in Cambridge, in addition to those provided by the college. The college fees (inclusive of both university and college charges) are £ 705 per annum. The South Hall, Newhâm College, Cambridge (Principal, Mrs. Sidgwick), was opened in '75, and incorporated in '80. The North Hall (Vice-Principal, Miss B. A. Clough) followed in '80, Clough Hall in '83, and the Pfeiffer building in '93; 158 students and 12 resident tutors form the collegiate body. A small isolation hospital is built to receive any cases of infectious illness that may arise. An entrance examination is neld annually in March at Cambridge in mathematics and languages. Scholarships and exhibitions are awarded yearly to students for the various tripos examinations. No student, unless reading for a tripos examination, with a reasonable prospect of obtaining honours, is allowed to reside at the college for more than two years without special permission. Fees, inclusive of board, lodging, and teaching, are from £25 to £32 per term. Women are admitted by the Council af out-students of the college if they either (a) reside with their parents or guardians in Cambridge, or (b) are not generally resident in Cambridge, but are bond fides students, pursuing definite study, over thirty years of age, unable to afford the cost of residence in one of the halls, or in other exceptional circumstances, and accustomed to support themselves. Out-students fees are about £9 per term. Application for admission as out-students should be made to Miss M. G. Kennedy, Shenstone, Cambridge, before Sept. 1st in each year. A scheme of corraspondence teaching was inaugurated in '70 by Mrs. Peile, and numbers students in all parts of the world. Information respecting it can be obtained from Miss M. Bateson, 74, Huntingdon Road, Cambridge.

Road, Cambridge.

In Oxford the principal final honour examinations of the University (in classics, natural science, history, mathematics, jurisprudence, theology, Oriental studies, the degree of B.C.L., and the examinations for the degrees of Bachelor and Doctor of Music), are open to women. In modern languages, where no final honour examination for the B.A. degree is as yet provided by the University, a special women's honour examination is held, with a standard equivalent to that of the University is open to women, as well as Pass Moderations. Before a candidate can enter for either pass or honours, Responsions must be taken, unless some equivalent (as the first examination for women at Oxford, the Cambridge "Previous," the higher examination of the Oxford and Cambridge board, the London matriculation, the higher examination of the Cambridge board, the London matriculation, the Cambridge higher local in two languages, and mathematics) has been passed. Graduates of Colleges which are admitted to membership in the Association of Collegiate Alumnæ (U.S.A.) are excused this examination if they become candidates for honours at the second examination, and in the case of honours the names are entered in the Himpersity Grastler; but hames are entered in the Himpersity Grastler; but hames are entered in the Himpersity Grastler; but hames are entered in the Himpersity Grastler; but

the B.A. degree is not conferred upon women. Communications should be addressed to the Secretary, H. J. Gerrans, Esq., Clarendon Buildings, Broad Street, Oxford. The University, in '99, established in Oxford a professional examination for teachers, and arranged a course of Training in Theory and Practice of Teaching. To both of these women are of Teaching. To both of these women are admitted on precisely the same terms as men (apply to Miss A. J. Cooper). Semarville College, Oxford. (Principal, Miss Maitland), founded in '79, incorporated '81, the name changed from "Hall" to "College" '94, has yo students and 4 resident tutors. There is no entrance examination, but all students are expected to pass "Responsars" before enter. expected to pass "Responsions" before entering the college, unless they have passed one of the examinations accepted as equivalent. Fees, inclusive of board, lodging and teaching, vary from £86 to £92, according to the rooms selected. The college is undenominational in principle. The Council confers certificates selected. Ine conege is unuenommational principle. The Council confers certificates showing all the examinations passed by the student, recording the term of residence, and stating that the student has qualified for the Degree. Students who have resided three years and taken honours become members of the Degree. Students who have resided three years and taken honours become members of the College (on payment of a small fee, and by keeping their names on the books) with right of voting at general meetings and elections of Council. Lady Margaret Hall, Oxford (Principal, Miss Wordsworth), was also founded in '79. It is conducted on the principles of the Church of England, with provision for the liberty of members of other religious bodies, and numbers about 47 students and 3 resident tutors. Candidates for entrance, who have not yet passed the Oxford first examination, or an equivalent, are expected to pass an entrance examination in two foreign languages and elementary mathematics. Scholarships are offered each lune. 8t. Hugh's Hall, Oxford (Principal, Miss Moberley), founded in '86, is intended for students unable to bear the expenses of Lady Margaret Hall, and has about 25 students and 1 tutor. The fees for board and lodging, exclusive of tuition, are from £45 to £65 a year. The conditions of entrance are the same as for Lady Margaret Hall. Lecture arrangements for women in Oxford are under the management of a joint association for educational under the management of a joint association for educational purposes, consisting of representatives of the women's college or halls of residence, and of the home students, with the tutors in the principal subjects, and others interested in education. A member of the Hebdomadal Board sits as a member of this asso-ciation (Secretary, Miss A. M. A. H. Rogers). Unattached students are allowed, under certain Unattached students are allowed, under certain conditions, to reside in Oxford under the censorship of Mrs. A. H. Johnson, 8, Merton Street. A system of teaching by correspondence (apply to Mrs. A. H. Johnson) was set on foot in 83, and a scheme of teachers' training is under the management of Mrs. Scott, Merton College. "St. Hilda's" (Lady Resident, Mrs. Burrows), is a Hall of Residence for old Cheltonians and others who may desire a final year or more others who may desire a final year or more of study before entering on professional work. Twenty-one students are now in residence. The charges are similar to those at Somerville College and Lady Margaret Hall.

The University of Leaden confers its degrees equally upon men and women. Women stu-

tion. Certificates are awarded as the result of The University of Leadon confers its degrees the examinations, and in the case of honours the equally upon men and women. Women stunames are entered in the University Gasette; but dents are received at the Royal Relievay.

College, Egham, opened in '87 (Principal, Miss Emily Penrose). The object of the college is to provide the instruction necessary for the London degrees in science and arts, the pre-liminary M.B., the examinations of the Uni-versity of Oxford, and for the Royal University versity of Oxford, and for the Royal University of Ireland. Instruction in music, drawing, and painting is provided. The entrance examination, held in September, includes English, foreign languages, and arithmetic. Scholarahips are competed for in Jaly. All scholars must read for honours. Other students are under no such restriction. There are 113 students, 8 resident women lecturers, and 10 non-resident professors and teachers. Terms, inclusive of heard before a directive research. inclusive of board, lodging, and instruction, are soo per annum. No student may enter for less than one year, or reside for more than four years, without special leave. Bedford College, London, incorporated '40 (Principal, Miss Ethel Hurlbatt), offers scholarships, prepares resident and non-resident students for the London degrees in arts and science, with special classes in chemistry for the first M.B. examination, and has college courses for students wishing to pursue continuous study without seeking a degree. Students are also admitted to separate classes. It receives an annual sum of £1200 from Britain. £4000 has also fallen to its share from the Pfeiffer Bequest to be expended in scholarships, and an annual grant of £500 from the Technical Education Board is used for the equipment of the laboratories. Fees for board and residence from £58 to £68 per annum. Tuition fees for the London examinations from £27 to £44 a session. Students are not admitted underseventeen except in special circumstances, and, if necessary, have their acquirements tested by preliminary examination. An art school (Visitor, Hubert Herkomer, R.A. Professor, E. Borough Johnson), with teaching based on the method of Professor Herkomer. based on the method of Professor Herkomer, is attached to the College as well as a Teachers' Training Department (Head, Miss H. Robertson, B.A.). With the session of '956 there was instituted a complete and scientific course of instruction in Hygiene, under Dr. T. M. Legge, M.D., to enable women to qualify for the various professional posts in Hygiene now open. Queen's College, Harley Street, and the ladies' department of King's College, Kensington Square (Lady Superintendent, Miss L. M Fauthfull), provide lectures and classes as preparation for the London and Oxford examinations. A residence for students is under preparation for the London and Oxford examinations. A residence for students is under the charge of Miss E. Faithfull. Westfield College, Hampstead, founded in '82 (Mistress, Miss Maynard), receives about 40 students; but they are not compelled to take the entire course, or to enter for any University examination. Candidates are required to pass an entrance examination in Scripture, English, arithmetic, and geography, with two extra subjects (languages and mathematics, unless they have passed some equivalent. Fees, fros per annum. Students of University College, London, or of the London School of Medicine for Women, can reside, under collegiate rules, at College Hall, Byng Place, Gordon Square (Principal, Miss Grove).

Victoria University follows the example of London in conferring its degrees upon women. Houses of residence for them are recommended at Manchester, Liverpool, and Leeds in connections with the service college.

the Women's Department, Miss Edith Wilson, 223, Brunswick Street, Manchester.) A hall of residence for women in Liverpool is now (Oct. 38) open to students. Fees for residence, 440 to £55 per annum. College tuition fees, £50 to £25 per annum. Particulars from Miss Roberts, 163, Edge Lane, Liverpool. The provincial colleges of Birmingham, Bristol, and Nottingham also provide for women. The University of Durham, since '95, by special Supplementary Charter, grants degrees to women except only in Divinity. A women's hall of residence is the Women's Department, Miss Edith Wilson, Charter, grants degrees to women except only in Divinity. A women's hall of residence is in contemplation for Durham. Scholarships for women students are offered in October of each year. Apply to the Censor of Women Students, Mrs. Ellershaw, 46, North Bailey, Durham. The Durham College of Science at Newcastle-on-1 yne (Secretary, H. F. Stockdale), represents the faculties of science, medicine, and engineering in the University of Durham, and is open to students of either sex. A University Hostel for women is open at Durham, and is open to students or either sex.

A University Hostel for women is open at
Eslington Tower, Jesmond, Newcastle-on-Tyne
(Mistress, Miss Perry). Fees for board and
residence from \(\frac{1}{2}\) for \(\frac{1}{2}\) for \(\frac{1}{2}\) for session. In Ireland the Royal University of Ireland (Dublin) offers degrees to women, and also exhibitions and scholarships. In Scotland the University and scholarships. In Soutland the University of St. Andrews grants the degree of LL.A. to women on the result of examination in the subjects taught in the University, together with history, music, fine arts, sesthetics, modern languages, and the natural sciences. University Hall (Warden, Miss L. I. Lumsden), opened Sept. '96, accommodates 24 students. Fees for board and residence about £60 per subparables value from 1.00 to 1.50. annum, Scholarships, value from £40 to £15, are competed for in October. At Edinburgh are competed for in October. At Edinburgh University 64.0.) women are admitted to the Arts classes with the men, and on the same terms as regards academic privilege. The Burns House, University Hall, 457, Lawnmarket, Edinburgh, inaugurated June 94, is intended for the accommodation of women students of the University, artists, teachers, and others. All particulars of Mrs. Salmon, 8, Ramsay Garden, Edinburgh. Queen Marser College, Glassow (Hon. Secretary, Miss aret College, Glasgow (Hon. Secretary, Miss T. A. Galloway), by recent incorporation is now the women's department of the Univernow the women's department of the University of Glasgow as a non-resident college for women governed by the University Court and Senate. Women are there prepared for all degrees in arts and medicine of Glasgow. Matriculated students are entitled to vote for the Lord Rector of the University, and women graduates become members of the General Council of the University. For a small fee students can have the use of the University indicates and the University museum and Wiss Maynard), receives about 40 students; but they are not compelled to take the entire course, or to enter for any University; but they are not compelled to take the entire course, or to enter for any University with access to the University museum and central course, or to enter for any University chapter and the pass an entrance examination in Scripture, English, arithmetic, and geography, with two extra subjects (languages and mathematics), unless they have passed some equivalent. Fees, £105 per annum. Students of University College, London, or of the London School of Medicine for Women, can reside, under collegiate rules, at College Hall, Byng Place, Gordon Square (Principal, Miss Grove).

Victoria Vaiversity follows the example of London in conferring its degrees upon women. Houses of residence for them are recommended at Manchester, Liverpool, and Leeds in connection with the men's colleges. (Secretary of Lady Geddes). Average fees for M.A. or B.Sc., 49 98. per annum. Residence fee, Li 15. to

Ag 98. per annum. Residence fee, £1 10. to £1 69. per week. The Hall is near to the King's College, the seat of the arts classes.

In South Wales the classes of University College, Cardiff, in arts, science, and medicine are open to students, men and women alike, with scholarships. Women students are received at Aberdare Hall (Principal, Miss Kate Hurlbatt). Terms for board and residence from £10 to £40 per annum. "Normal" students in school management, etc., may reside in Aberdare Hall, and spend the necessary time in teaching in the Board Schools of the town. A school of cookery and a Teachers' Training Department is attached to the College. Scholarships are competed for in September. The University College of North Wales (Bangor) gives the same advantages to women as to men in preparation for the London and Welsh degrees and for the medical preliminaries of Edinburgh and for the medical preliminaries of Edinburgh and for the medical preliminaries of Edinburgh and Glasgow. A new University Hall for Women Students (Lady Superintendent, Miss M. Maude) was penjed Oct. '97. Open entrance Scholarships (from £30 to £10 in value) are offered to men and women alike. University Oollege, Aberystwith, prepares for the requirements of the London and Welsh examinations for B.A., M.A., B.Sc., for degrees in medicine, and the entrance examinations of the older universities. Furrance scholarships, ones to universities. Entrance scholarships, open to women, are competed for annually. Alexandra Hall of Residence (Principal, Miss E. A

Hall of Residence (Principal, Miss E. A Carpenter) has rooms for 147 students. For the special study of medicine, women are eligible for the medical degrees of the University of London (Burlington Cardens, W.), the Royal University of Ireland (Earlsfort Terrace, Dublin), the conjoint exaftination of the Royal College of Physicians and the Royal College of Surgeons in Ireland (Dawson the Royal College of Physicians and the Royal College of Surgeons in Ireland (Dawson Street, Dublin), the Colleges of Physicians and Surgeons, Ediaburgh, the Faculty of Physicians and Surgeons, Glasgow (conjoint), the Society of Apothecaries, London, and the University of Durham. It is easier, and takes a shorter time, to pass the colleges than the Universities, but by the new regulations (92) five years instead of four a the required five years instead of four as the required five years instead of four is the required period for which a student must be registered as such. Students are not admitted under the age of eighteen, and, unless matriculation has been taken, a preliminary examination in English, Latin, and one other easimation in English, Latin, and one other language, elementary mathematics, and arithmetic, has to be passed before registration. The necessary hospital work in the case of London can be done at the New Hospital for Women, 144, Euston Road, or at the Royal Free Hospital. In Scotland and Ireland women attudents are admitted to the case of the case of

students (women) at 3, Endsleigh Gardens, W.C. (Mrs. Greene), at 5, Endsleigh Street, W.C. (Mrs. Clarke Kerr), and at 23, Mecklenburgh Square, W.C. (Mrs. Lamborn Cock). As has been mentioned above, instruction in medicine is given to women by the faculties of the University Colleges at Cardiff, Bangor, Aberystwith, and Newcastle-upon-Tyne.

Women, Organisations for Young. See Young Women, Organisations for. Women's Clubs. See Clubs. Women's Industrial Council, The, is a

Central Council established to organise special and systematic inquiry into the conditions of working women, to provide accurate informa-tion concerning these conditions, and to promote such action as may seem conducive to their improvement. The Council is conducted on lines strictly non-sectarian and independent of party, and endeavours to avoid encroaching upon the special province of work of any societies which may affiliate themselves to it. A General Purposes Committee, and Finance, Investigation, Educational, Statistical, Organistation, and Parliamentary and Legal Committees carry out the details of the work, mittees carry out the details of the work, which has included exhaustive inquiries into Home-work industries, wage-earning of children of school age, the typing profession, and other women's industries; the establishment of a Central Circulating Library for London Girls' Clubs; and the promotion of better bathing accommodation for working women. Attached to the Council is a large staff of voluntary lecturers upon industrial questions, and free legal advice is given to women and girls on matters connected with industrial law. The Council meets quarterly, the committees generally monthly. Membership is by election of the Council on nomination of two members. The funds are provided by a small income from a trust fund, and by sub-criptions income from a trust fund, and by subscriptions and donations. The Women's Industrial and donations. The Women's Industrial News (quarterly) is the official organ of the Council President, Mr R. B. Haldane, Q.C., M.P.; Vice-Presidents, Miss Clementina Black, Mrs. Creighton, Mrs. Hicks, Mrs. Hogg, Mrs. R. Phillmore, Mrs. Percy Thompson, Lady Henry Somerset, Mr. Stephen N. Fox, and Mr. Herbert Burrows; Tressurer, Mr. Sydney Buxton, M.P.; Financial Secretary, Mr. Robert S. Garnett, British Museum, W.C.; General Secretary, Miss Catherine Webb. Office, 12, Buckingham Street, Strand, W.C. Women's Institute, The, 15, Grosvenor Crescent, Hyde Park, was founded in the spring of '07. It is non-political, and is specially intended as a place of re-union for workers. Under its roof various important departments of work are carried on, the prin-

Free Hospital. In Scotland and Ireland women students are admitted to the local hospitals. At the Royal Infirmary of Edinburgh arrangements are made for the clinical education of women, giving accommodation according to the demands of the Triple Qualification Board, £300 having been raised and presented to the Infirmary in recognition of the "fact that women students have been admitted to qualifying instruction in its wards." All particulars and details of study are obtainable from the Secretary, Miss Heaton, Lendon School of Medicials of the Women, 30, Handel Street, Brunswick Squars, W.C. Valuable scholarships are annually competed for at the London School in instruction is given in typewriting, short-spetember. In addition to College Hall (see above) there are boarding houses for medicial constitutional history, local government, departments of work are carried on the principal of which are the Reference Library, where reliable works on such subjects as housekeeping, domestic economy, hygiene, school boards, education, boards of guardians, action was becomitted, and the formation hygiene, etc., are also sent out from the Institute, societies of various philanthropic natures meet within its walls, and an artists circle and debating society have been organised. Men as well as women are eligible for membership, provided they are engaged in literature, art, science, or philanthropy.

Women's Suffrage. The Women's Liberal Federation is the body which in this country work substitutions where the sentence of the sentence of

most authoritatively supports amongst organisations having a party character, the claim of women to the suffrage. In May '22, at the annual meeting of the Federation, a resolution was carried instructing the executive committee to promote the parliamentary enfranchisement of women among the other Liberal reforms then women among the other Liberal reforms then before the country. A divergence of opinion occurred over this question, and Mrs. Gladstone, the President, decided not to stand for election again, Lady Aberdeen being chosen in her place. Ultimately the Women's National Liberal Association was formed for the promotion of the official Liberal programme simply, Women's Suffrage not being put prominently in the front of the programme. The Women's Liberal Federation, however, proceeded to emphasise their position at the innual meeting in May '93 by making Object II, of their Constitution read thus —"To promote just legislation for women, including the local and parstitution read thus —"To promote just legisla-tion for women, including the local and par-liamentary franchise for all women, married, single, or widowed, who possess any of the legal qualifications which entitle men to vote, and the removal of all their disabilities as citizens." There are about 501 associations and the removal of all their disabilities as citizens." There are about 501 associations connected with the Federation, with an aggregate membership of 80,000. In the autumn of 97 a reorganisation of the Women's Suffrage Societies took place. They now all form one Mational Union of Women's Suffrage Societies, with a representative executive meeting at one or other of the Central Offices in London viz or other of the Central Offices in London, viz or other of the Central Offices in London, viz The Central and East of England Society, 20, Great College Street, Westminster, of which Miss Edith Palliser is Secretary, and the Central and Western Society, 3, Queen Victoria Street, of which Mrs. Charles Baxter is Secretary. The Union, which is strictly on a non-party basis, aims at placing Women's Suffrage in such a position that no Government of whatever party shall be able to touch questions to selling to representation without at the tions relating to representation without at the same time removing the electoral disabilities of women. The recent parliamentary history of women. The recent parliamentary history of the movement is as follows:—Sir A. K. Rollit brought in a Bill during the '92 session (see ed. '93, SESSION, sect. 80), which was severely criticised in a pamphlet written by Mr. Gladstons. There can be no doubt that his pamphlet wrecked the Bill, which was ultimately thrown out by 175 votes against 152. In '93 Viscount Wolmer undertook the charge of the movement in the House of Commons; on his elevation to the peerage Mr. George on his elevation to the peerage Mr. George Wyndham consented to watch its interests. A wynnam consented to watch its interests. Bill was down for second reading in the name of Mr. Faithfull Begg, M.P., on May 20th, '96, but was frustrated by the pressure of Government measures. The operative clause of the proposed Bill read as follows: "On and after the passing of this Act every woman who is the inhabitant occupier as owner or tenant of any dwelling-house, tenement, or building ing in village stations around Leicester, in within the borough or county where such occupation town his father was a Congregational matter and received ministerial training as a voter in the list of voters for such at New College, London, '68-74. He took his

borough or county in which she is so qualified as aforesaid, and, when registered, to vote for a member or members to serve in Parliament. Provided always that such woman is not subject to any legal incapacity which would disqualify a male voter." The Bill was again brought in by Mr. Faithfull, Begg, M.P., on Feb. 3rd, '07, and passed its second reading in the House of Commons, 230 members of the House voting in its favour. June 23rd was fixed for the full discussion of the measure as the first order of the day; but the 22sd being the date of the Queen's Jubilee rejoicings, the consideration of the Bill was postponed till July 7th. On the 6th a petition signed by 86 men and women. of the Bill was postponed till July 7th. On the 6th a petition signed by 86 men and women, among whom were some of the oldest workers on the Suffrage platform, was presented to the House of Commons by Mr. Courtney. In it the petitioners begged that the procedure of Parliament might be so amended that further delays in the foir consideration of the inter-time. in the fair consideration of the just claims of women to citizenship might be impossible. However, in consequence of the amendments left over for consideration from the day preceding of another bill, the Suffrage Bill was held over and finally thrown out. The advocates of Women's Suffrage were consequently once more disappointed. Mr. J. T. Firbank, M.P., had charge of a similar Bill in '98. In the Colonies the movement has made considerable progress, and in New Zealand and South Australia the goal has been reached. In the former the parliamentary franchise was conferred on women Sept 9th, '93, the municipal franchise being already theirs. In South Australia the Parliamentary vote was extended to women Dec 18th, '94'

Dec 18th, '94'

Wood, General Sir Evelyn, V.C., G.C.B., G.C.M.G., was b. at Cressing in 1838, and entered the Navy in '52. Served in the Crimea, and was severely wounded at the assault on the Redan In '55 be joined the Army as cornet of the 13th Light Dragoons. Served in India in 17th Lancers, and, while commanding the 1st Regt. of Beatson's Irregular Horse, won the Victoria Oross, '59 Served throughout the Ashantes war. Previous to the Zulu war he joined the Middle Temple, and was called to the bar '74. After defeating the Zulus at Kambula, he became brigadier-general, and was present at Ulundi. In '79 he met with a triumphant reception in England, and became E.C.B. Served through the Transvaal limits ('81). Created G.C.M.G. Commanded the 2nd Brigade, 2nd division, in the Bgyptian expedition, receiving the thanks of Parliment in (81). Created G.C.M.G. Commanded the 2nd Brigade, 2nd division, in the Egyptian expedition, receiving the thanks of Parliament in 82. Raised the Egyptian Army in 83, and served in Nile expedition. From 83 to 93 he commanded the Aldershot district, from 93 till 97 he was Quartermaster-General, and was in Oct. 97 appointed Adjutant-General. He has published a book on his reminiscences of the Crimea, "Cavalry Anchievements." Cluba, Army and "Cavalry Achievements." Cluba, Army and Navy, United Service. Address, 23, Devonshire Place, W.

Woods, Rev. William James, B.A. (Lond.), the Secretary of the Congregational Union of England and Wales, commenced preach-

B.A. in '72, and on the completion of his college course became pastor of the influential Congregational Church at Spencer Street, Leamington, removing in '81 to Cavendish Chapel, Manchester, one of the largest Congregational Churches in the North of England, and from '58 to '69 the sphere of Dr. Joseph Parker's ministry. While there a temporary breakdown in his health necessitated a voyage to Australia. On his return he published "A Visit to Victoria." In '87 he became pastor of Clapton Park Congregational Church, London, which position he held until, in '92, he succeeded the late Rev. Alexander Hánnay, D.D., in his present office. Address: Memorial Hall, in his present office. Address: Memorial Hall,

WORKMEN'S COMPENSATION ACT. '97.

I. THE LEGAL ASPECT.

The Workmen's Compensation Act, '97, is a bold attempt to deal in a large and liberal spirit with the vexted question of Employer's Liability to an injured workman. It has not only wrought extensive changes in the law as it existed prior to the passing of the Act, but it has also introduced principles which are novel in the law of England. There are three periods in the history of the law regulating the liability of an employer to his injured workmen; and the law as it stands to-day is best understood by seeing what the law was in each one of those periods, and by tracing the steps which were taken to alter it. The first period was the period prior to '80, when the liability of an employer to his injured workmen was regulated by the common law of the land alone, and by no statute. The second period was the period between '80 and July 1st, '98, when the liability of an employer to his injured workmen was regulated by the Employers' Liability Act '80, in addition to the common law. And the third period is the present, in which, in addition to the common law and the Employers' Liability Act '80, there has come into force the Workmen's Combension Act 'es. only wrought extensive changes in the law as there has come into force the Workmen's Compensation Act '97.

Period of the Common Law.

Under the common law, as under every law, the employer is liable to an injured workman if the injury is caused by the employer's own personal negligence—which negligence may be either in the active conduct of the work or in the choice of servants to perform the work. In modern conditions of industry it raiely happens that an accident is caused by the personal negligence of an employer while engaged actively in the work; and when it does so happen, the employer is usually so amail a man financially that a judgment against him is of no practical value to the injured workman. Equally rarely does it happen that an employer is negligent in the choice of his servants, or in the choice of those to whom he delegates his authority and to whom he leaves the duty of superintendence. Self interest prevents it. It has, in consequence, almost invariably happened that the negligence upon which the injured workman must base his claim is the negligence not of the employer

the defence which is known as the Defence of Common Employment. This defence is based in principle upon the old Roman doctrine, Volenti non fit injuria. It is a well-established rule of law that an employer, or any other individual, is liable for damage arising from the negligence of his servants if the servants when guilty of of his servants it the servants when guilty or negligence are about their master's business; because a master is bound to guarantee the public against all damages arising from the negligent acts of his servants, on the ground that it is the master's duty to choose servants who will not be negligent, and to ensure that his business is carried on in a careful manner. It is an equally well-established rule of law that when any individual knows the risks of injury which he is incurring, and nevertheless with that knowledge chooses to incur those risks, he must be presumed to have taken those risks upon himself, and he cannot, if he is injuied, lecover compensation for his injury. This is the foundation of the doctrine that a man is not liable to his workman for injury caused to that workman through the negligence of a fellow-workman It is easy to see how much hardship to injured workmen to see now much nardship to injured workmen this docTrine entailed, and consequently there sprang up in the country a strong and wide-spread desire to find some remedy. It was definitely held that this doctrine was the rule of law in '58 by the House of Lords, in the case of Bartonshill Cool Co v. Reid; and almost immediately efforts were made to amend the law, and flom '72 onwards the various attempts to abolish the defence of common employment were almost annual. In '79 a Bill was introduced by Lord (then Mr.) Brassey, which was not proceeded with, but which was the foundation of the Bill which, in the following year, became the

Employers' Liability Act. '80.

The principal change wrought by this Act wes, that in certain cases an injured workman was put upon the same footing as an injured stranger, and to that extent at least the doctrine of common employment was abolished. The Act enacts that an injured workman shall have the same rights against the employer as an injured stranger would have if his injury has been caused—(1) by any defect in the ways, works, machinery or plant which has not been discovered or remedied owing to the neglidiscovered or remedied owing to the negli-gence of the employer, or of some person in the service of the employer who is entrusted by the employer with the duty of seeing that the ways, works, machinery and plant were in proper condition, (2) by the negligence of any person in the service of the employer who has any superintendence entrusted to him whilst in the exercise of that superintendence; (3) by the negligence of any person in the service of the negligence of any person in the service of the employer to whose orders or directions the workman was bound to conform, and did conform, and where the injury resulted from his having so conformed; (4) by reason of the act or omission of any person in the service of the employer done or made in obedience to any improper or defective rules, bye-laws, or instructions of the employer; (5) by the negligence of any person in the service of the emwhich the injured workman must base his ployer who has the charge or control of any claim is the negligence not of the employer signal, points, locomotive engine or train upon himself, but of one of the servants of the employer. It followed as a result of this that the scope. It followed as a result of this that the scope. It does not apply to servants who are legal advisers of the employer began to set up not employed in manual labour—e.g. clerks;

nor does it apply to domestic or menial servants or to seamen. The amount of compensation recoverable is limited in amount; and there is no provision in the Act prohibiting employers and workmen from contracting themselves out of the Act. As may well be imagined, the Act was greeted on the one hand by a storm of opposition from the employers, and on the other hand by support, coupled with strongly expressed discontent at its limited scope, from the leaders of labour. Like all measures of progress, it bore in the eyes of some individuals the appearance of a measure of plunder; but it has been tried for eighteen years, and experience has shown that it has not brought ruin upon employers nor disaster upon the trade of the country. It has proved all the more beneficial in that it was partial and tentative in its scope, and was treated as an experiment which, if proved successful, would lead to still greater reforms. It was not long before the repre-sentatives of the workmen began to agitate for an extension of the principle of the Act. Then principal demands were that the defence of common employment should be wholly instead of partially abolished; that the amount of compensation which might be awarded to an injured workman should be unlimited; that the Act should be extended to domestic and menial servants and to seamen, that the liability of the employer to compensate the workmen should extend to injuries to health as well as should extend to injuries to health as well as to bodily injuries; and that contracting out of the provisions of the Act should be entirely prohibited. The result of the agitation was that in '86 a Special Committee was appointed to inquire into the working of the Act. After a searching inquiry the Committee reported, embodying in their report suggestions for future legislation. The Conservative Government, which was then in power, introduced a Bill to give effect to the resolutions of the Committee, but it was abandoned. The first Committee, but it was abandoned. The first serious attempt to extend the scope of the act of '80 was the Bill introduced by Mr. Asquith

In '03.

If. Asquith's Bill of '93 proposed to make nine very material alterations in the law as it then stood. He proposed—(i) that the defence of common employment should be entirely abolished; (2) that the liability of the employer should extend to workmen employed by a subcontractor of the employer, (3) that the liability of the employer should extend to injury to health as well as to bodily injuries; (4) that the provisions of the Act should be extended so as to include clerks, domestic servants, and seamen; (5) that the injured workmen's knowledge of the existence of the defect in the ways, works, machinery or plant by which his injury was caused should not be available to the employer as a defence; (6) that there should be no limit to the amount of compensation which might be awarded to an injured workman; (7) that no notice of the accident should be required; (8) that the limit of time within which an action might be brought should be extended from six months, or twelve months in case of death, to six years in all cases; (9) that contracting out of the provisions of the Act should be absolutely prohibited. The Bill met with great opposition; in the House of Commons from Mr. Chamberlain, who advocated the lines which were afterwards followed in his own Act of \$\frac{1}{20}\$, and in the House of Lords from Lord Dudley and others on

account of the total prohibition of "contracting out." In consequence of the opposition of the Lords, who in that respect adopted the resolution of the Committee of '86, approving of "contracting out." with proper safeguards, the Bill had to be withdrawn. In the meantime the General Election 8f '95 intervened, and with the return of a Unionist Government to power the agitation for the extension of the Act of '80 revived. The question was taken in hand by Mi. Chamberlain, than whom no one could have been better fitted to undertake the task, and the result was the

Workmen's Compensation Act, '97.

The most important changes in the existing law effected by the Act are the total instead of the partial abolition of the defence of common employment, and the elimination of "negli-gence" from the elements necessary to create the hability of the employer. The Act, being an experiment of very considerable magnitude and importance, has very properly been limited in its application to certain specified trades and industries; but in those trades and industries it applies to every one in the service of the employer, manager, clerk, or manual labourer. The Act makes the employer liable for injury caused to those in his employment by any accident arising out of and in the course of the employment, only excepting those which are due to the serious and wilful misconduct of the injured workman himself. misconduct of the injured workman nimself.
Not only is no negligence necessary to
constitute the liability, but even where the
greatest possible care has been taken by those
concerned the employer is still liable for the
results of an unavoidable accident, if it arises
out of and in the course of the employment,
Moreover, although "contracting out" is
allowed under certain conditions, the effect of
those conditions is such as to practically prothose conditions is such as to practically pro-hibit "contracting out" altogether. No scheme for "contracting out" is legal unless passed by the Registrar of Friendly Societies as being as beneficial to the workmen as are the provisions of the Act, the scheme is liable to revision at the termination of limited periods; revision at the termination of limited periods; the scheme and its administration by the em-ployer may be at any time attacked by dis-contented or ill-disposed workmen, who will thereby cause the employer an infinity of trouble; and no scheme is legal which makes it a condition of the employment that the scheme should be adopted. Moreover the employer is liable for the injuries caused to workmen employed by a snb-contractor, and for injuries caused to this workmen by the act of a stranger; while the employer has a remedy over against the sub-contractor or the remedy over against the sub-contractor of the stranger, for what that remedy may be worth. The amount of compensation for which the employer is liable is as follows: (a) where death results from the injury a sum varying from \$\int_{15}\$ to \$\int_{20}\$ where dependants are left who were wholly dependent upon the dead workman, and any sum up to £300 where dependents are left who were partially dependent upon the dead workman; and if there pendent upon the dead workman; and it there are no dependants left, a sum not exceeding £10 for medical and funeral expenses; (b) where total or partial incapacity for work results from the injury, a weekly payment not exceeding £1 per week. The great principle underlying the provisions of the Act, as Mr. Chamberlain pointed out, was that the trades and industries of the county should be chargeable with the maintenance of those workmen who were injured in the carrying on of those trades and industries, and with the maintenance of those who were dependent upon the earnings of the injured workmen. To a certain extent, no doubt, the Act has achieved its object. But if the principle underlying the Act is to be carried to its logical conclusion, the provisions of the Act must be extended to all accidents, whether caused by misconduct or not, and to all trades and industries. So far as the Act is concerned the trades and industries of the country are only vinade chargeable through the instrumentality of the individual employer, because it is the individual employers who is personally responsible to the injured workman. But it remains for the individual employers to devise some means by which the burden of liability may be shifted from their individual shoulders to that of the whole trade or industry.

II. THE INSURANCE ASPECT.

Throughout thet debates in the House of Commons it was generally assumed that this liability would be met by some system of insurance, and the insurance offices, taking the same view, anticipated that it would lead to a large amount of business. Companies that had formerly insured against employers' liability in many cases increased their capital in view of the anticipated extension, and several old and wealthy hie offices started departments for accident business in general and employers' liability insurance in particular. The managers of many of the principal offices met together and arranged for a careful analysis of all available statistics bearing upon the question, and as a result of their deliberations a tariff of rates was prepared by which many of the principal offices agreed to abide. A comparison of the premiums charged for insurance against inability under the Act of 80 and under common law to the extent of three years' wages, with the rates for these liabilities and for those under the Workmen's Compensation Act in addition, is given below for some of the principal trades

These rates were very greatly in excess of the premiums that had been anticipated; and Mr. Chamberlain, in an important speech at Birmingham, went so far as to say that he regarded them as absolutely preposterous, and as exceeding his own calculations threefold, fivefold, and even tenfold. He urged employers to insure themselves rather than pay these rates, adding that in a very short time competition would bring matters to a satis-factory level. With the latter sentiment everybody will agree, and experience of the working of the Act will doubtless prove in the course of a year or two the extent of the liabilities involved and the appropriate rates to be charged. Up to the present many employers have acted upon Mr. Chamberlain's advice, and are retaining their own risks, while some of the insurance companies also consider it feasible to issue policies at premiums very much below the tariff rates published by the combination among some of the offices. It must, however, be acknowledged that the weightiest expert opinion—the opinion of men with the most extensive insurance experience and those most familiar with the calculations of premiums of kindred rates—is strongly to the effect that the new liabilities will prove financially very great, and that the tariff rates are below rather than above what experience will ultimately show to be required.

all the face of such differences of opinion, and such uncertainty as to the liability involved, a very natural suggestion was that return to the employers of any excess that they had paid over and above the claims surance companies for working expenses and deduct 15 per cent. of the premiums for working expenses, no per cent. for profit to the companies, and hand over the balance to the employers. When these figures are companied with the expenses and profits on fire insurance and other classes of accident insurance, it is found that they are rather less favourable to the insurance companies than other classes of insurance husiness the average expenses for the past ten years have been 32 per cent. of the premiums, and the average claims 60 per cent., leaving 8 per cent. This means that the fire offices have had 40 per cent. of the premiums for expenses and profits, while in connection with accident insurance the profit shave been slightly greater. This means that the fire offices have had 40 per cent. of the premiums for expenses and profits, while the profit-sharing scheme for employers liability insurance only gives them 13 per cent. for expenses and 10 per cent. for profits, making 23 per cent, in all. The expenses to be covered by this 15 per cent. do not, however, include the cost of settling claims or of medical examinations in connection with accidents. It thus appears that, whether the opinions of the most

important insurance companies as to the extent i of the liabilities involved are right or wrong, they are not aiming at excessive profits.

Mutual Combinations of Employers.

Certain employers who, rightly or wrongly, formed the opinion that the premiums asked by the insurance companies were excessive, but who felt that the liabilities were too great solution of the difficulty in combination among themselves. Such mutual combinations have often been tried in connection with fire in surance among particular trades, or in certain limited areas, and experience of these com-binations goes to show that they have seldom been attended with much success. There are certain aspects of employers' liability under the new Act which suggest that this class of risk is even less satisfactorily provided against by mutual combination than are the risks of fire. One most important feature of the Act of '97 is the permanent character of the compensation payable to injured workmen, and one of the essential weaknesses in mutual combina-tions is the absence of any guarantee of permanent stability. It is scarcely possible to insure the permanent adherence of any firm to a mutual combination, while unless insurance operations are conducted on an extensive scale so as to secure average results, a run of ill luck involving many cases of permanent disablement or death might easily occur, and cause either the failure of the combination or such excessive rates in order to meet the liabilities as to lead to dissatis-faction with, and dissolution of, the combination. In such an event it is is only too probable that individual employers would be left to meet out of their own resources the annual payments to permanently injured workmen arising from accidents during the exist-ence of the combination. The permanent character of workmen's compensation under the new Act makes it especially importantifor employers to be thoroughly satisfied that the company or the combination by which they are indemnified is not only financially sound now, but that it shows adequate assurance of permanent stability. For these and other reasons it is improbable that mutual combinations will meet with any considerable measure of success.

Rate-cutting Offices.

Similar considerations as to the necessity of permanent stability apply to insurance companies that are willing to undertake the companies that are wining to undertake the risks at much lower premiums than those usually quoted. In the event of the high premiums being justified, the low premiums will involve considerable loss, and may endanger the solvency of the companies quoting danger the solvency of the companies quoting them, or may cause the insurance companies and employed and a merican visit, and a provincial tour, he made quoting inadequate premiums to cavil over the settlement of claims, so producing friction between employers and employed and dissatisfaction all round. If, on the other hand, low premiums are justified, an empleyer who paid a high premium to a first-class company for the first year or so would have his premium reduced as soon as experience showed this to be practicable. The claims of workmen would be met in a liberal spirit, in which nearly every actor and actress of note workmen would be met in a liberal spirit, thereby conducing to good relations between employer and employed, and directly or indirectly the excess in the premiums paid

would be recouped to him if, as there is every reason to believe would be the case, the maurance companies felt it to be to their interest to deal with their policy-holders with the same liberality that characterises their dealings in connection with fire insurance when they are satisfied that they themselves are being honestly dealt with.

The retention of the risk by the employers

themselves is a course that will scarcely commend itself to the majority of business men. The compensation provided for by the Act may amount to as much as £1 per week through the whole after lifetime of the injured through the whole after lifetime of the injured workman, or in the event of death, to a sum not exceeding £300. The possibility of being suddenly called upon to compensate several workmen on this scale is one that no employer would care to permanently incur. The payment of death claims might prove financially inconvenient, and it is by no means unlikely that in the event of an accident happening in the works of an employer known to be uninsured, his credit might be seliously impaired just at a time when he negeded it most, for his creditors would be well aware that the claims of workmen constitute a first charge upon the of workmen constitute a first charge upon the assets of an employer. So again in the case of permanent disablement, the profits of a business for many years to come would be appreciably decreased by the payment of several annuities of £52 each. Thus, even if an employer feels that the rates charged by the majority of the best offices are excessive, it would still be his best course to pay those would still be his best course to pay those rates, knowing that thereby he procures insurance hat really insures, that accidents in the past will involve him in no liabilities in the future, that competition will bring rates to their right level whether by increasing or decreasing them, and that though for a time the payment of insurance premiums may seem to involve a heavy tax on the employer, yet the but den will in the natural course of things be transferred to the purchasers of the things be transferred to the purchasers of the things he sells. In this way the Act will accomplish the beneficial object of protecting the workmen against injury at the expense of the whole body of consumers, to whom the cost of doing so will be quite inappreciable.

Wyndham, Charles, was b. in 1837, and ed. for the medical profession. His debut as an actor was at the Royalty Theatie in '62, with Miss Ellen Terry and David James. He then went to America and played at Washington, in conjunction with John Wilkes Booth. He afterwards fought in the Civil War, but returned England and met with great success. His first London appearance was in '66, and after another

Y

YACHTING, '98.

In the Mediterranean Races Gloria won the in the Mequeranean Races Cloria won the principal contest at Marseilles, and the Coupe de France at Cannes, but she had the misfortune to lose her mast on March 22nd, which prevented her sailing again, and she was sent home to England. Bona heat Satantia for the chief prize at Mentone. There was more stir among the clubs on the river and round the mouth of the Thames than has been noticed for some years, and the London Sailing Club and the Burnham Y C. opened the season in April The Castle Y.C. opened at the end of May. The racing on the Thames, under the auspices of the New Thames Y.C , took place in squally weather, on June 1st, when Cares beat
Bona and Ailsa—Pentlent winning the 52-rater
prize. In the H-London Y.C. races Senta, a new
boat, beat Isolde and Gloria, the second prize
being taken by Pentlent. The R. Thames Y.C. were to have had a great race on June 2nd, but unfortunately Ailsa, which is now rigged as a yaw, came to grief, and, not being ready in time, Bona sailed over. Senta won a drifting in time, Bona salied over. Senia won a critting match from Isolde, and Geisha won the smaller class prize. The Harwich match, from Southend to Harwich, under the auspices this year of the R. Harwich Y.C., on June 4th, was won by Bona, Astrild making her first appearance in this contest. On June 6th and 7th the Harwich Club held their regatta, Bona winning the Onesi's Cun Judle being second. Bona the Queen's Cup, Isolde being second Bona also won the puncipal race on the second day, Astrild winning the smaller craft prize. The Ohannel Match, on June 11th, from the Nore to Dover, was won by Bona in the first match, Isolde in the second. In the Cinque Ports regatta the principal match was won by Ailsa over Bona. Penuent beating Gloria. At the R. Southein Y.C. Regatta, Isolde won from Gloria on the first day, Caress on the second day. On June 20th started the great race for the Emperor's Cup, from Dover to Heligoland, over a course of 316 miles, which was won by Merry Thought first, Latorna second, Castanet third. At the R. Cork Y.C. Regatta, on June agand, Bona won a match against Ailsa, the latter having had an accident; the same bad luck attended Astrild, who was beaten by Isolde. attended Astrila, who was beaten by Isolde. On the 23rd Bona sailed over the course, Ailsa being still under repair. Isolde beat Astrila, who had to retire from the race. The Kiel Regatta began on June 24th. the Emperor's race for the North Sea Cup was won by May Morn, Nan being second. Rainbow won the match on the second day, 71 yachts competing, the Emperor's amongst them. The Olyde fortnight opened on June 29th with the R. Largs Club when Ailsa won the buy wacht prize night opened on June 29th with the R. Largs Club, when Ailsa won the big yacht prize, Isolde the smaller, and Viera the smallest boat prize. On the second day, under the R. Western Y.C. of Scotland, Hester won the race for yachts exceeding 60 feet linear rating. Penitent won the race for those above 42. At Greenock, under the direction of the West of Scotland Y. C., Astriid easily heat Isolde, and Forsa, in the race for the smaller craft, beat Viera, Senga, and Penitent. On July and the principal contest was for the Queen's Cup.

which was won by Bona, Isolde being in front of Ailsa. On the following day Bona again beat Ailsa for the £100 race, and Astrild beat Isolde Nanara beat Hester and Mad Marion, and Sc. ga won from the smaller boats. The Clyde Corintian Club took over the direction on July 5th. There was no match for the first-class yachts, nor for the 52-footers, but in the 65-feet rating match Isolde beat Airyld with ease. On July 6th Hester and Penitent were the winners. The Mudhook Regesta was favoured with fine racing weather Regatta was favoured with fine racing weather on the first day, when Ailsa beat Bona, Isolde beat Astrild, and Eddred beat Senga and Viera; but on the second day, with unreliable winds, the races were won by Isolde and Viera. July of was the worst day of the fortnight, the weather being almost a calm. Ailsa won the 70-rating race. Isolde that for those above 22 and rating race, Isolde that for those above 52, and Senga for the smaller rating. On the 1th, the second day of the R. Nothern Y C.'s racing, Bona, Isolde, and Forsa were the winners The Campeltown Regatta brought the Clyde weather, Ailsa, Isolde, and Viera winning their respective races, after which the larger yachts crossed over to Ireland for the regatts, their. At the R Cinque Ports Regatts, held on July 15th and 16th, Maid Marion and Dorem were the Principle Impacts and in the research. were the principal awinners, and in the race to Boulogne and back Maid Marion won. The R Ulster Y.C Regatta began on July 15th, in scorching weather, with no wind; the County Down Cup was won by Bona, Astrild winning the 52-raters race. The second day was favoured unterstanded weather when Alice heart. with splendid weather, when Ailsa beat Bona, and Isolde beat Astrila. In the race from Dover and Isolde beat Astrild. In the race from Dover to Ostend, on luly 18th, Lorna was first, Maud Munon second. On July 20th the racing at the Kungston Regatta, under the R. St. George's Y.C., took place in beautiful weather. Bona won her third Queen's Cup this season; Penient won the Jameson Cup; Ailsa won on the second day; and, on the last day, Senga won the Champion Cup. At Ostend the principal race was won by Namara. The Cowes week commenced on Aug. 1st, on which day, in not very good racing weather. Bona. Senia, and very good racing weather, Bona, Senia, and Penusest won the races for their different ratings. The Queen's Cup in the R.Y.S. renient won the races for their different ratings. The Queen's Cup in the R.Y.S. Regatta was sailed for in moderate weather, and resulted in the victory of Betty. The Cowes Town Cup was carried off by Bona. The Australian Cup was won by Senta, the German Emperor's Cup by Latona, Rossneath and vertrude being second and third; for those not above 32 rating, Penilent won. The Prince of Wales' Cup was won by Tangerine. At the Portsmouth Corinthian Y.C. Regatta, on Aug. 6th, Latone won the race for yachts of 25 tons and upwards, Eldred the prize for 52 raters, and Ailsa won a Cup presented by Mr. Rose; and at the R. Southampton Y.C. Regatta, on Aug. 8th, Ailsa, Kommodore, and Latona won. The Ryde week began with the R. Victoria Y.C., on Aug. 9th, when Bona won the big race, Astrild the 52-footer, and Caress the sy-ton race. On the second day Ailsa won, Souss winning the 52-footer race. The Ryde Town Cup was won by Maid Marion, Creols being Cup was won by Maid Marion, Creols being

second. The Commodore's Trophy was won by Bona on the 12th. Astrild won the race for the forties. Maid Marion won the race round the Isle of Wight at the R. Portsmouth Y.C. Regatta on a day of tropical heat, with hardly any wind. Bona, too, won the Albert Cup of the R. Albert Y.C. at Southeea, on a day when the weather was scorchingly hot, with no wind. The same weather newalled on the wind; the same weather prevailed on the second day, when Bona was again successful for the large class, Astrid Punning amongst the 65-raters. On the 17th Eldred won a race for the 56-feet raters, on a day as hot and airless as the previous ones. The R Dorset Regatta took place at Weymouth on Aug. 20th, when drifting races were won by Ailsa, Senia, and Eldred under their respective ratings On Aug. 2nd, at the Torbay Regatta, Ailsa won the prize for yachts exceeding 65 rating, Senta that for those exceeding 52, and Caress and Pensient the smaller races. On the second day Bona won among the large yachts, Astrild amongst those exceeding 52 rating At Daitmouth, on the 26th, Bona again won, Eldred winning the prize for small boats In the Start Bay Y C Regatta, owing to a man on board the Alsa falling overboard and being drowned, all the yachts gave up the race The smaller races were won by Isolde and Eldred On Aug. 30th, at Plymouth, under the auspices of the R. Western Y.C., neither Bona nor Ailsa appeared, Astrild won the 52-rater prize, and Eldred the smaller yacht race. On the following day the Port of Plymouth R Regatta was held, when Senta beat Astilla At the R. Plymouth Corinthian YC Regatta, on R. Plymouth Cornthian YC Regata, on Sept 1st, Eldred won the race for yachts above 42 rating, and also on Sept. 2nd, at the R South-Western YC. regatta, on the final day, at Plymouth, which last regatta brought the yachting season to a close 4 a series. yachting season to a close A series of laces took place in August on Lake St Louis, for the Scawanhaka Cup, between the Dominion and the American yacht Challenger. Canada having won three races in succession, i etains the Cup on Sept. 17th began a series of three races between the Australian yacht Irex, owned by Mr Mark Foy, and the English boat the Mad of Kent. The course of the first tace was about 12 knots on the Medway, and it resulted in a victory for the Mad of Kent The second in a victory for the Maid of Kent The second race, over a circular course, was also won by the Maid of Kent, as well as the third, over a straight course Mrs Wyllie, the wife of Mr. W. L. Wyllie, steered the English boat in each match in the most admirable manner Bona has won 39 prizes this season—a very satisfactory record, and one that should please the Duke d'Abruzzi. In the autumn Sir Thomas Lipton sent a challenge to the New York Y.C. for the American Cup for '99, which was accepted. was accepted.

Yemen. A province of Arabia, which, with the province of Hedjaz, is under Turkish rule It is bounded on the N. by the Hedjaz, on the N.E. by the Arabian desert, on the S. by the Gulf of Aden, and on the W. by the Red Sea. Area about 77,000 sq. m.; pop. about 3,000,000. The capital of the province is Sana, and other important towns are Mocha and Hosleidah, the coffee of the district finding its outlet at the former town. The chiaf products are coffee, lentils, wheat, grapes, and fruit, and the country is very fertile. See Arabia.

YEOMANRY.

The Yeomanry cavalry are raised and serve under the Act of 1804, and are governed by special regulations. Until a few years back the force was composed almost entirely of farmers, the commissions being held by the nobility and landed gentry. The farmer element is unfortunately by no means so prominent as it used to be, and in populous districts nent as it used to be, and in populous districts is being replaced by men who adopt soldiering because they like it, though the town-bred Yeomanry have not the character or value of their predecessors. The maintenance of the force depends largely upon the patronage of the gentry, and is thus locally subject to viciositudes. The expenditure upon the force in 98-9 is 277,000, divided thus regimental pay, the control of the c \$\frac{47,000}{647,000}\$, extra pay and allowances, \$\int_{26,000}\$; miscellaneous, \$\int_{110}\$. The expenditure upon the force in '97-8, was \$\int_{76,000}\$, the decrease being due to the smaller amount required for clothing and contingent allowances The force is organised in regiments, thirty-eight in number, and these again in brigades. The regiments are assembled annually for training for eight days. (See ed of for pay.) The force is liable to be called out for service in any part of Great Britain called out for service in any part of Great Britain case of threatened invasion or to suppress civil riots. A return issued in '98 giving particulars of the force, shows that on Jan 1st, '98, the enrolled strength was 10,467, as compared with 10,342 on Jan 1st, '97. At the inspection of '97 there were present 563 officers, g81 noncommissioned officers, including permanent staff, 188 trumpeters, and 7097 rank and file, making a total of 8829. The enrolled strength is 1424 below the establishment. Musketry Training The year '03 was the first in which an obligatory course was prescribed. On Jan. 1st, '07, the School of Instruction for Yeomanry and Volunteer Cavalry was abolished, and the work of instructing officers and non-commisand Volunteer Cavalry was abolished, and the work of instructing officers and non-commissioned officers of these forces was charged upon the regiments of regular cavalry, to which officers are to be attached during the period of squadron training **Teomany Oavalry Brigades**. The isolated situation of the Yeomanry regiments, which gave them no cohesion or plan of mobilisation as a fighting force, was long felt to be unsatisfactory; but force, was long felt to be unsatisfactory; but although something has been done to supply the want, the progress made has been so far inconsiderable. In '93 all the existing regiments made up into squadions of 100 members, or not less than 70 efficients, were formed into 18 brigades, with the exception of the Pembrokeshire Regiment, which, on mobilisation for home defence, was assigned to the Milford Haven defences Fifteen of the brigades were allotted in this scheme as divisional cavalry for the Home Defence Army, and the remaining three to the garrisons of Portsmouth, the Western District, and Dover and the South Coast defences.

and the South Coast defences.

Yonge, (Miss) Charlotte Mary, was b. at Otterbourne, Hants, in 23, and is a daughter of the late Mr. W. C. Yonge, of Otterbourne. Known chiefly by her novels and other books. She has also edited the Monthly Packet for thirty years. Her principal novels are: "The Heir of Redclyffe," "Heartsease," and "Dove in the Eagle's Nest", and she has also published "Cameos of History of England," "Landmarks of History: Ancient, Middle Ages, and Modern," a "History of Christian

Names and their Derivation," a "Life of Bishop Patteson," and various other historical and miscellaneous works. Address: Elderfield, Otterbourne.

York, Archbishop of. See under PERRAGE. York, H.R.H. George Frederick, Duke of, and son of T.R.H. the Prince and Princess of Wales, was b. at Marlborough House on June 3rd, 1865, just seventeen months after his elder brother, the late Duke of Clarence. The two brother, the late Duke of Clarence. The two brothers were greatly attached to one another all through boyhood, and entered the navy together as cadets June 5th, 77. Two years were spent on the training ship Britannia, and then Prince George, accompanied by his brother, started for a three years' voyage round the world on board the Bacchante. In May '83 H.R.H. was made midshipman to the Canada, which was stationed on the North American which was stationed on the North-American coast. In '85 he was promoted to be lieutenant, after passing his examinations with distinction, and in '90 was given the separate command of the gunboat Thrush on the West Indian station. the gunboat the same on the West Indian station. He opened the Jamaica Industrial Exhibition during the same year, and in or was made commander. He visited Ireland in October, staying with the late Duke of Clarence in Dublin, but unfortunately contracted a dangerous fever while there. In '02, through the lamentable death of his elder brother, he became the heir to the throne, and took his seat in the House of Lords as Duke of York. In May '04 his engagement to Princess Victoria Mary of Teck was announced. The marriage was celebrated in the Chapel Royal at 5t. James's Palace (July in the Chapel Royal at St. James's Palace (July 6th), and was a most brilliant ceremony, attended by all the members of the royal family, by the King and Queen of Denmark, the Czarewitch. and other illustrious foreign guests. The University of Cambridge conferred their Hon. LL.D. degree on the Duke in June '94 A son, Prince Edward Albert Christian George Andrew Prince Edward Albert Christian George Andrew Patrick David, was born to the royal pair (June 23rd, '94), a second son, Prince Albert Frederick Arthur George, on Dec. 14th, '95, and a daughter on April 25th, '97 During '98 H.R.H. for some time hoisted his pennant on the Crescent, attached to the Channel Squadron.

Young Men's Christian Association, The. which has for its object the spiritual, mental, social and physical well-being of young men, was founded in the year 1844, for the purpose of benefiting the young men in the various dry goods houses in the City of London, the President, Sir George Williams, being the chief instigator in its formation. The work rapidly took root, and increased in every direction, until there are at the present time 6415 centres scattered throughout the world, with a total membership of 511,200. In the United Kingdom there are 1240 centres, with 105,170 members; whilst in London there are 72 in the year '80, at a cost of £61,000. Sir George Williams is President. Secretaries, John H. Putterill, Clarence Hooper. Secretary of the National Council, Mr. W. H. Mills.

Young Men's Society, Church of England. See Church of England Young Men's

Young People's Society of Christian Endeavour. In 1881 the first society was established by the Rev. F. E. Clark, D.D., in the Congregational Church of which he was pastor, in Portland, Maine, U.S.A. The object of the Society is stated to be to promote an earnest Christian life among its members, to increase their mutual acquaintance, and to make them more useful in the service of God. The growth of the Society has been phenomenal. The growth of the Society has been phenomenal. In four years there were 11,000 members, five years later 660,000. In '96, seventeen years after its origin, there were 54,101 societies (5575 in the United Kingdom), with a membership of 3,252,000. The Society is inter-denominational, and has been adopted by every section of Protestants. The Readquarters in Great Britain are at the Sunday School Union. Offices, Ludgate Hill. London, E.C. gate Hill, London, E.C.

Young Women, Organisations for the Benefit of. The two principal organisations which exist in England for the benefit of young women are the Girls Friendly Society and the Young Women's Christian Association, although there are other societies which aid the work in their respective methods. The Young Women's Christian Association numbers about 500,000 young women among its members in all parts of the world. Members include those who belong to the Prayer Union, Associates, Working Members, and Hon. Associates. The subscription, exclusive of fees for Institute membership, is 15. per annum; but working members subscribe 2s. 6d., and hon. members 55 and upwards. There are numerous Institutes and Komes in London and provincial towns, also at many of the seaside resorts throughout the British Empire, besides many branches which hold meetings in villages, the charge for lodging in the London Homes being from 2s 6d. to 30s. per week, There is a Teachers' Department, a Nurses' Union, a Home for Barmaids, and some 20 other departments for meeting the special needs of young women. Freehold premises have been acquired at George Street, Hanover Square, as headquarters of the Association, and a hall to seat 500 has been erected. The Association has subscription, exclusive of fees for Institute soo has been erected. The Association has two excellent gymnasia at 26, George Street, and 14, Finsbury Square, E.C. the Preparation Home for workers. A World's Y.W.C.A. has recently been organised, for the union, development, and extension of Y.W.C.A.'s in all lands. Its office is at 26, George Street, Hanover Square, W., and the head offices for the "British National," "London," and "South of England and Wales" work are in the same building.—The Girls Friendly Seciety (Patron, the Queen; Vice-Patron, the Princess of Wales; Presidents, the Archbishop of Canterbury and the Archbishop of York). It has for its object the banding together in one society of ladies (as associates), now 35,000 in number, girls and young women for mutual 500 has been erected. The Association has members; whilst in London there are 72 associations, with a roll of 13,860 members The chief associations in the Metropolis are Inche die 15,860 members of England and Wales "work are in the same building.—The Giris Friendly Seciety (Patron, located at Exeter Hall, Strand; 186, Aldersgate Street, E.C.; spand 60, Cornhill, E.C.; Stafford Roads, N.W.; 198, Upper Street, Islington, N.; 20, Hill Road, Wimbledon; 275, Mare Street, Hackney, N.E.; 4, Kingsland Road, Shoreditch, N.E.; and Conference Hall, Stratford, E. The headquarters of the Y.M.C.A. are in purity, dutifulness, thrift and fidelity, at Exeter Hall, Strand, which was purchased and adapted to the requirements of the work in 1287 places, and members (who number

150,055 from the age of 1s and upwards) are introduced from one branch to another wherever they may go. "Associates" must belong to the Church of England, but no such restriction applies to "members." Associates contribute annually not less than 2s. 6d., members not less than 6d. The organisation extends to various towns of Northern and

Central Europe, Australia, New Zealand, India, Africa, and Canada, and in the diocese or Gibraltar. Clubs, classes, homes of rest, registry offices and protected emigration form part of the scheme. See also University Settlements.

Yukon. See North-West Territories.

Zanzibar Protectorate, The, consists of the island of Zanzibar, area 625 sq. m., pop 150,000, and the island of Pemba, area, 360 sq. m., pop. 50,000. Capital, Zanzibar. The Sultan is Said Hamud bin Mahomed (q.v.), and a regular Government is constituted under and a regular Government is constituted under British control, exercised through the Consul-General. Slavery was abolished in April '97, but the British and Foreign Anti-Slavery Society has since declared that the decree of abolition is a dead letter. Imports in '94, £1,197,681; exports, £1,096,240. The preducts are mainly cloves, which form four-fifths of the entire clove crop of the world, chillies, cocoanuts, betel-nuts, grain, and wheat. Ivory, rubber, bides, and sum are also exported from rubber, hides, and gum are also exported from Zanzibar. See BRITISH EMPIRE (table), EAST AFRICA PROTECTORATE, and DIPLOMATIC.

AFRICA PROTECTORATE, and DIPLOMATIC.

Zola, Emills, was b. 1840, in Paris. Ed. at the Lycée St. Louis, and began life at Messrs. Hachette's, the distinguished French publishing firm. He first appeared as a novelist in "Les Mystères de Marseilles." "Thérèse Raquin" further exhibited his remarkable power of critical analysis of human nature. "L'Assommoir," perhaps his most popular work, has gone through fifty editions. Author of "Nana," "Pot Bouille," "La Terre," "La Bète Humaine, "and other works. M. Zola was appointed a Knight of the Legion of Roseur in "88, and elected (April '91) President of the Society of Men of Letters. In '92 he published "La D'ebàcle," and "Docteur Pascal" in June 1893, and elected (April '91) President of the famous Rougon Macquart series of twenty volumes, and was dedicated to the memory of M. Zola's mother and to his wife. During '94 he published "Lourdes," a love-story, set in the scenery of the famous resort of French pilgrims. "Rome" followed in '96, and "Paris" in '97. During '97 and '98 he took up with

splendid courage the cause of Captain Dreyfus, whom he declared to have been illegally condemned, and was in consequence of his action prosecuted by order of the French Government, and condemned to imprisonment. For details see France, History, '98.

Zoological Society of London. The annual report of this Society, which was instituted in 1826 for the advancement of coology and animal physiology, stated that the number of Fellows physiology, stated that the number of Fellows on Jan. 1st, '98, was 3158. The number of visitors to the Gaidens in '97 was 717,755, as compared with 65,004 in '96. The number of animals in the Society's collection on Dec. 31st, '97, was 2585, of which '92 were mammals, 1362 birds, and 421 reptiles. The additions during '97 numbered 1508, of which 688 were presented, 278 purchased, 104 bred in the Gardens, 319 crecived on deposit, and 108 obtained in exchange. The Gardens in Regent's Park are open from ofa.m till sunset and the Offices open from 9\(\frac{1}{2}\) m till sunset, and the Offices and Library from 10 a.m till 5 p.m., Saturdays roa.m till 2 p.m. President, Sir W H. Flower, K.C.B., LL.D. D.C.L., Sc.D.; Booretary, Mr. P. L. Sclater, M A., F.R.S. Offices, 3, Hanover Square, W

Zululand lies to the north-east of Natal, of which it was till '98 a dependency, but of which it now forms an integral part. Area, which it now forms an integral part. Area, about 12,500 sq m.; pep. 181,000, including 1100 whites, it is well watered and capable of cultivation, with 140 miles of seaboard. St. Lucia Bay, the best harbour, was proclaimed British (1885). Gold and other minerals have been found in no inconsiderable quantities, but they have not been worked as yet. Royal

Society

FOR THE

Prevention of Cruelty to Animals.

105, JERMYN STREET, LONDON, S.W.

Patrons.

HER MOST GRACIOUS MAJESTY THE QUEEN, THEIR ROYAL HIGHNESSES THE PRINCE AND PRINCESS OF WALES.

President.
HIS ROYAL HIGHNESS THE DUKE OF YORK, K.G.

THE Education Committee of the Society earnestly appeal to clergymen and ministers of every religious denomination, to bring before their schools and congregations the claims of animals. To cultivate kindness of heart towards inferior creatures is to

prepare for the more easy introduction of Christianity.

The Committee are advised that the Fourth Sunday after Trinity is a suitable day for pleading the cause of the lower animal creation in the Church of England; because, (1) of the appropriateness of the Collect on that day, (2) in the Epistle to the Romans viii. 18, we shall read that "the whole creation groaneth and travaileth in pain together until now; and (3) in the Gospel of Luke vi. 36, we shall read that we are commanded to be "merciful, as our Father also is merciful." Any time is suitable, however, and this remark applies particularly to Nonconformist Churches of all denominations, where it is desirable to plead the cause of the Society, which is neither sectarian nor political.

Upon this Institution, founded in 1824 (the only one having for its object the protection of dumb and defenceless animals), rests a heavy responsibility. It is earnestly and respectfully submitted, that it has in consequence a strong claim upon the benevolence of the humane and charitable.

The Committee respectfully appeal to the Public to extend a hearty assistance,—

I. By supplying early information to the Secretary of all acts of cruelty that have been witnessed.

II. By increasing the revenue of the Society by annual subscriptions, by donations, by testamentary gifts, and particularly by inducing their friends to become members.

Trained Officers are despatched to all parts of the Kingdom. Upwards of 7,500 convictions obtained annually.

The increased operations of the Society have drawn from the funds an amount vastly exceeding the yearly subscriptions. The Committee need much greater assistance, and unless such additional support be extended to them, this most righteous cause of humanity must suffer from insufficiency of means to carry out those inany urgent measures which every well-wisher of this Society has so deeply at heart. Remittances may be forwarded to

JOHN COLAM, Sacretary.

SUPPORTED ONLY BY VOLUNTARY CONTRIBUTIONS.

The labour of other Charities is divided among many Associations; but this Charity stands alone—the Defender of the defenceless—without any assistant.

SUGGESTIONS TO PERSONS MAKING THEIR WILLS.

"I give and bequeath free of Legacy Duty,

unto the Treasurer for
the time being of a Society called or known by the name of The ROYAL SOCIETY FOR THE PREVENTION
OF CRUELTY TO ANIMALS, established 1824; to be at the disposal of the Committee for the time being
of the said Society."

FIRE DEPARTMENT.

Fire Insurances granted at current rates.

LIFE DEPARTMENT.

The Rates of Premium have recently been revised, and are very moderate in respect of all classes of Assurances.

Large Bonuses, including Interim Bonuses.

The Expenditure (including Commission) to be charged to the Life Department has been limited to 10 per cent. of the Life Premium Income.

Claims Paid Immediately after Proof of Death, Age, and Title.

The Alliance Policies are especially valuable, for they are whole-world and indisputable, and they carry important Guaranteed Privileges.

DEATH DUTIES.

DEATH DUTIES.—In order to enable the Owners of Property to make provision for payment of the ESTATE DUTY, Special Forms of Policies have been prepared, under which the Policy-moneys (or such portion thereof as may be required for the purpose) will be paid direct to the Inland Revenue Commissioners, without waiting for production of Probate. Full particulars will be forwarded on application.

LEASEHOLD AND INVESTMENT INSURANCES.

Policies securing the return of Capital Sums on the expiration of Fixed Terms of years are granted.

Prospectuses containing full particulars may be obtained on application to any of the Company's Offices or Agents. ROBERT LEWIS, Chief Secretary.

THE CAPITAL, amounting to FIVI MILLIONS, was fully subscribed before the Society commenced business in 1845, and the shares are now held by a body of Sharcholders, comprising some of the highest and most influential members of the Legal profession. The success which has attended the operations of the Society founded on its strong financial position, the eligible character of the risks constituting the bulk of its business, and the promptitude and liberality with which its engagements are met

LAW LIFE ASSURANCE SOCIETY.

INSTITUTED 1828.

Office:--187, FLEET STREET, LONDON, E.C.

ASSETS ON THE 31st DEC. 1897 INCOME FOR THE YEAR 1897

Participating Policies hereafter effected share in 90 per cent. of the total divisible surplus, instead of in 80 per cent. only as has hitherto been the case.

EXEMPTION FROM PAYMENT OF PREMIUMS DURING INCAPACITY ARISING FROM ACCIDENT OR BODILY OR MENTAL DISORDER.

In order to meet the requirements of professional men and others whose incomes depend upon their ability to pursue their occupations, the Society has introduced a Scheme of Life Assurance carrying the above privilege in addition to those incorporated in the Society's ordinary policy form. The scheme has recently been extended up to age 65 to Whole-Life Policies at uniform premiums.

For Prospectus and any further information apply to the MANAGER, Law Life Assurance Society, 187, Fleet Street, London, E.C.

Nearly Five Thousand

Orphan or Waif Children are always being

MAINTAINED, EDUCATED and TAUGHT TRADES in

"DR. BARNARDO'S HOMES."

"Christian, Protestant and Evangelical, but not Sectarian," is the religious motto of the Institutions. The work is supported by all sections of Christendom. In their operations all Evangelical Christians may, and do, join hands.

Applications for urgent cases are received at any hour of the day or night.

Destitute Children of any age or creed, of either sex and of any nationality, are eligible. Deaf or Dumb, Blind or Crippled Children, or those Diseased and already Given Over to Death, are, if destitute, always eligible.

The most searching inquiry is made into every application, but NO REALLY DESTITUTE BOY OR GIRL IS EVER REJECTED. Each case is determined solely upon its merits, without election and without the intervention of wealthy patrons.

Over **35,000** children have been received since 1866. From **50** to **60** Fresh Cases are admitted weekly during the winter months.

About 1500 Young Children are now Boarded Out in rural districts, under careful supervision.

Technical training in some one of the **fourteen** handicrafts carried on in the Homes is given to every **Lad** capable of receiving it.

All the Gipls are brought up in Cottages on the family system, and carefully instructed in the various branches of Domestic Service.

10,013 Trained and Tested Children have already been placed out in the Colonies. Of these 98 per cent, have been successful.

Four Lodging Houses and a Night Refuge open in the Metropolis, and Nine "Ever Open Doors" in Provincial Towns, are accessible throughout all hours of the day and night to homeless "Waifs and Strays" seeking temporary shelter.

These Homes actively co-operate with the **N.S.P.C.C.**, and receive **freely** and **at once** all destitute cases recommended by that Society or any of its Branches all over the Kingdom.

In all, these Institutions now comprise 86 distinct Homes, dealing with every age and class of destitute and needy childhood, and 24 Mission Branches.

FUNDS ARE URGENTLY NEEDED FOR GOOD AND MAINTENANCE.

Donations and Subscriptions gratefully received by the Treasurer, WILLIAM FOWLER, Esq.; by the Chairman of Committee, Howard Williams, Esq.; by the Founder and Director, Dr. Thos. J. Barnardo; or by the Bankers, London and South-Western Bank, and Messrs. Prescott, Dimsdale & Co.

JOHN ODLING, Secretary.

Rev. R. F. Horton, M.A., D.D.
J. Passmore Edwards, Esq.
George Hanbury, Esq.
Abel Smith, Esq., M.P.
Robert T. Turnbull, Esq.

These Homes were the first to abandon the discredited Barrack System, to secure Family Life for the Boys.

THE COTTAGE HOMES AT FARNINGHAM are for 330 Boys, who are Homeless and Destitute. They are placed in families of 30 each, with a Father and Mother to take care of them. They are fed, clothed, and educated, and receive careful, moral, and religious training.

They are taught to be industrious, by being employed in Tailoring, Shoemaking, Carpentering, Printing, Breadmaking, Painting, Gardening, and Farming. Situations found for them, where they are looked after as "Old Boys."

Boys are either admitted on payment by benevolent persons of 7s. a week, or can be

elected free or on part payment.

THE HOMES FOR ORPHANS at Swanley are designed for 200 Boys, whose mothers need to go out to earn their living. They do what they can towards the support of their own boys, and friends who have known them in better days help them. Every boy admitted to the Orphanage is paid for at the rate of £21 per annum, for which they are fed, clothed, educated, taught to work, and entirely maintained throughout the year, and many benevolent people are glad in this way to support an Orphan Boy.

These Homes being entirely supported by Voluntary Gifts, the Committee most earnestly appeal for help.

Treasurer.—W. H. WILLANS, Esq., J.P., 3, Copthall Buildings, E.C. Secretary.—Mr. WILLIAM ROBSON, 25, Holborn Viaduct, E.C. Bankers.—Measrs. Smith. Payne. & Smiths. 1. Lombard Stfeet, E.C.

HOME MISSIONS OF THE CHURCH OF ENGLAND.

CHURCH PASTORAL-AID SOCIETY.

INSTITUTED 1836.

FIVE MILLIONS AND A HALF of people in our parishes are indebted to this Society for the presence of additional Clergy, Lay Agents, and Women Workers. The number of Grants has gone up to 896.

THERE ARE STILL MANY urgent applications which cannot be granted for lack of funds.

Secretaries.—Rev. JOHN BARTON, M.A.; Col. H. S. CLARKE, (late) R.A.; Rev. R. G. FOWELL, M.A. •

Offices of the Society.—Falcon Court, 32, Fleet Street, London, E.C.

Bankers.—Measrs. WILLIAMS, DEACON, AND MANCHESTER AND SALFORD BANK,

BENEVOLENT FOUNDED BY THE LATE PETER HERVÉ.

Batablished 1819. Incorporated by Royal Charter.

Under the immediate Protection and Patronage of Her Most Excellent Majesty the Queen, and His Royal Highness the Prince of Wales.

Treasurer-The Reverend Prebendary WHITTINGTON, M.A.

This Institution was founded for the purpose of granting Annuities to distressed members of the Upper and Middle Classes of Society, who have attained the age of 60 years and upwards.

The Pensioners are elected half-yearly, in May and November, by the votes of the Life Governors and

Subscribers.

The sum disbursed in Pensions now amounts to upwards of £13,000 per Annum.

The total number of Aged Persons who have been supported by the Institution is 2,580, the gross sum distributed to them up to the present exceeding £506,100.

Subscriptions, from 5. and upwards, will be thankfully received at the Office, and any further information given between the hours of 10 and 4 daily. (Saturdays 10 to 2.)

Office -65, Southampton Row, Bloomsbury, W.C. HENRY C. LATREILLE, Secretary.

ROYAL ALFRED

AGED MERCHANT SEAMEN'S INSTITUTION.

ESTABLISHED IN 1867.

To give a HOME or a PENSION to the MERCHANI SAILOR When Old, Destitute, and Helpless.

This truly NATIONAL Institution deserves, and earnestly APPEALS for, the help of ONE and ALL.

'POOR JACK.'

The Merchant Seaman brings us the food we eat, the clothes we wear, and many of the luxuries we enjoy When we consider his cheerless existence away from home and friends, out in the solitudes of sea and sky, risking his life for his daily bread, yet all the while an unobtrusive factor in welding together our mighty empire, surely it becomes us to lend him a hand when his own hands are too feeble to steer his ship or reef her sail, and when nothing but the workhouse stands between him and the grave.

The ROYAL ALFRED INSTITUTION provides a Home or a Pension, and since its foundation it has thus helped 1,424 poor old Seamen, who else must have ended life in the dreaded Workhouse.

280 are now anxiously competing for every vacancy.

INCREASED ANNUAL HELP URGENTLY NEEDED.

The Mission of The Children's Home is to rescue children who, through the death, or vice,

The Mission of The Children's Home is to rescue children who, through the death, or vice, or extreme poverty of their parents, are in danger of falling into criminal ways. It is therefore at once an Orphanage and a Refuge.

The Home receives children of any age, or any sect, without election It is conducted on the Family system; is a Religious and Industrial Institution; is a Training School for Christian Workers; and is dependent on Voluntary Contributions.

Within the last twenty-nine years 4.256 children have received the benefits of this Institution. 1020 are now in residence. About £16 will maintain a child in the Home for a year. There is the greatest cause for thankfulness to God for the present well-being and for the prospects in life of a large majority of the great number who have passed through the Home.

In connection with this work the Gordon Hall Mission is carried on in the East End of London; an agency for the Protection of Girls is at work, a refuge being available night and day; a Servants Free Registry is open, and Lodgings are provided for respectable young women during the interval between situations; also a Mission to the Poorest Children of East London is very successfully carried on. A Number of Epileptic Children have already been received. The entire work is greatly in need of more liberal support. The smallest contributions will be thankfully received.

will be thankfully received.

The need of such a work is painfully obvious. Our cities and towns are crowded with children exposed to every evil influence, shut out from all good, and living a life worse than that of savages, and as they grow up they naturally take their places in the ranks of the pauper and the criminal. Yet they may be saved. Hundreds of cases prove that these little ones--some of them riminal. Yet they may be saved. Finding so takes proven at these inches some conservation mere infants—are susceptible of every elevating influence, and need only the care of a Christian home to develop all that is good in their characters, and fit them for reputable and useful lives.

Collecting Books, Boxes, or Cards will gladly be forwarded to those who are willing to collect in aid of the funds of the Institution.

Cheques and Money Orders should be crossed City Bank, and Orders made payable at General Post Office.

Remittances to be made payable and sent to T. B. STEPHENSON, Bonner Road, London, N.E.

J. PENDLEBURY, Secretary.

ST. JOHN'S HOSPITAL FOR DISEASES OF THE SKIN.

HOSPITALS FOR WOMEN IN INDIA.

The Zenana Bible and Medical Mission,

Which works in co-operation with Protestant Missionary Societies in India, and which was founded in 1852, has Hospitals and Dispensaries in India, presided over by fully-qualified Lady Doctors, at various centres, as follows:—

BENARES: Victoria Hospital and Dispensaries.

PATNA: The Duchess of Teck Hospital and Dispensaries.

LUCKNOW: Lady Kinnaird Memorial Hospital and Dispensaries.
Total Attendances In 1896, 58,000.

CONTRIBUTIONS ARE MOST URGENTLY NEEDED, and will be thankfully received by the Treasurers, Lord KINNAIRD and Sir W MUIR, K.C.S I, or by the Hon. Finance Secretary, W. T. PATON, E-q., at the Offices, 2, Adelphi Terrace, London, W.C. General Secretary—Rev. A. R. CAVALIER Bankers—BARCLAY and CO, Ltd., 2, Pa I Mall East.

Royal London Ophthalmic Hospital.

Founded in 1804.] MOORFIELDS, E.C. [Founded in 1804.]

The magnitude of the work of this Charity is shown by the fact that in 1897 the Out-patients numbered 25,051, and that the total number of attendances was 129,050,

An Average of over 416 for each Working Day,

whilst the In-patients numbered 1,968, the 96 beds being almost constantly occupied.

Unless more support is forthcoming the committee will be compelled to limit the scope of the work; they therefore earnestly appeal for Subscriptions, Donations, and Legacies.

Cheques and Postal Orders should be made payable to the Secretary, and crossed "Williams, Deacon, and Manchester and Salford Bank"

ROBERT, J. BLAND, Secretary.

Her Majesty the Queen has been the Patron of this Institution for 50 years.

ROYAL' HOSPITAL

FOR

DISEASES OF THE CHEST,

CITY ROAD, LONDON, E.C.

President-THE LORD ROTHSCHILD.

Treasurer-S. HOPE MORLEY, Esq.

Chairman of the Council—SIR T. ANDROS DE LA RUE, Bart.

Vice-Chairman—The Hon. LIONEL ASHLEY.

THIS Hospital was the first of its kind established in Europe, and has uninter uptedly since 1814 carried on its great work in the midst of the suffering poor of the Metropolis.

It treats annually about 750 In-Patients, who come from all parts of the country, and the attendances of Out-Patients each year number about 25,000.

The Charity's income from all sources does not exceed £3,000, whereas its annual expenditure averages £8,000, leaving an annual deficit of £5,000.

DONATIONS and SUBSCRIPTIONS are earnestly solicited, and may be sent direct to the Tre-surer, or to the Secretary,

CHARING CROSS HOSPITAL

STRAND, W.C.

Bresident :

HIS ROYAL HIGHNESS THE DUKE OF EDINBURGH, K.G.

Areasurer :

GEORGE J. DRUMMOND, Esq.

Bankers :

MESSRS. DRUMMOND, 49, Charing Cross; Messrs. COUTTS, 59, Strand; Messrs. HOARE, 37, Fleet Street; MARTIN'S BANK, LD., 68, Lombard Street. Secretary-ARTHUR E. READE, Eso.

The Governors earnestly solicit assistance for this Hospital, which is mainly dependent on voluntary contributions, and treats annually an average of over 23,000 SICK AND INJURED PATIENTS.

The Assured Income is about ~ £1,000. The Expenditure averages -£16,000.

ANNUAL SUBSCRIPTIONS and DONATIONS will be most thankfully received by either of the above-named bankers; or by the Secretary, at the Hospital.

FORM OF BEQUEST.

"I give and bequeath to the Treasurer or Treasurers, for the time being, of CHARING CROSS HOSPITAL, London, for the use of that Charity, the sum of free of Legacy Duty, to be paid out of my pure personal estate as soon after my decease as may be possible."

GREAT NORTHERN CENTRAL HOSPITAL

LONDON. N.

ENTIRELY FREE THE SICK POOR. TO

AND

Dependent on Voluntary Support.

JUST PUBLISHED.

AN ENTIRELY NEW EDITION OF

HAYDN'S DICTIONARY OF DATES

And UNIVERSAL INFORMATION.

A COMPLETE RECORD OF ALL NATIONS AND TIMES.

With Especial Reference to the History and Achievements of the British Empire.

CONTAINING THE HISTORY OF THE WORLD TO THE AUTUMN OF 1898.

BY BENJAMIN VINCENT,

Hon. Librarian of the Royal Institution of Great Britain.

Medium 8vo, cloth, 21s , half calf, 25s.; full or tree calf, 31s. 6d.

TWENTY-SECOND EDITION.

Revised, Corrected, and Enlarged, with New and Important Matter, and thoroughly brought down to the Autumn of 1898, containing considerably over

1,300 Pages, 12,500 Articles, 145,000 Dates and Facts.

"The mention of dates brings us back to 'Haydn' the wonderful. 'Haydn' is far more than a mere catalogue of dates. It is a compendious history of every country and of almost everything under the sun—and on many subjects it is a veritable statistical encyclopædia. Are you interested in diamonds, or coals, or or any mortal thing you like to name? You will find out all about them in 'Haydn,' condensed and chronological, accurate and recent. In short, 'Haydn' shuns no test in its proper line, and will disappoint no reasonable expectation."—DAILY CHRONICLE.

ROYAL NATIONAL MISSION •TO DEEP SEA FISHERW

Patron-HER MAJESTY THE QUEEN.

This Society has ministered for seventeen years to the spiritual and physical needs of the North Sea trawlers, as well as to the Fishermen on the West Coast, off the South of Ireland, East Coast of Scotland, and elsewhere. During recent years the Society has established two permanent hospital stations on the Labrador coast, which are also centres of spiritual effort. The steamers, Julia Sheridan and Princess May, carry on itinerary Medical Mission work along the whole 800 miles of coast frequented by the English-speaking fisher-folk. The Society has also shore agents at Gorleston (Great Yarmouth), Grimsby, Ymuden (Holland), Aberdeen, Milford Haven, etc. It thus wholly employs thirteen vessels (three of them being fully equipped hospital ships with surgeons on board), and the number of persons medically treated as in and out patients during 1807 was no less than 12,540. The Council carnestly appeal for Funds. Large or small donations will be thankfully acknowledged. Cheques or Postal Orders to be made payable to The Secretary (FRANOIS H. WOOD), and crossed "Lloyds Bank, Ltd."

Gold Coast Colony A British Crown colony on the coast of West Africa The colony has a coast-line of about 350 miles, and though the interior boundaries are not strictly defined, the area may be put at about 45,000 square miles, and the population at 1,500,000, including 37,500 professed Christians. The native state of Ashanti lies inland, at the back of the central portion of the colony Trouble arose between portion of the colony Trouble arose between the King of Kumassi, who had declared himself King of Ashanti in '94, and the British authorities and in '95 an expedition was sent against him, under the command of Sir Francis Scott, which resulted in the submission of the King, who was afterwards taken to the coast. The kings of Bekwai and Abodom also made their submission, and the country was placed under Butish protection, and a Resident appointed at Kumassi Accra is the administrative centre of the colony, and has a population of 16,267. The Government includes a Governor, an Executive Council, and a Legislative Council of nine, none of whom are elected. The products are chiefly palm-oil, gold, palm kernels, rubber, timber, etc. See British Empire (table), "Glasgow Herald." A morning newspaper, Independent in politics. Founded in 1782. It circulates all over Scotland, and has the highest Anglo-French Commission sitting at Paris,

and signed June 15th, settled the boundaries of the hinterland to the west and the north. From the intersection of the river Volta with the 9th parallel of north latitude, the boundary runs up the course of the river northwards to 115 intersection with the 11th parallel, and then turns east along the 11th parallel, deflecting northwards so as to include Bawku, till it reaches German territory in the hinterland of Togoland. Bona and Dokta were thus given up to France, and the French had to concede Wa and other points to the east of the Volta which had been occupied by them (See also NIGERIA.) A number of railway officials left Liverpool (Aug 4th) in connection with the laying of a Government iailway from Sekogdi to Tarquah in the goldmining district of the colony Railway material had already been sent out, and it was estimated that the construction of the line, which will be about 40 miles long, will occupy three years The old Ashanti capital of Kumassi is 170 miles from Tarquah, but into the date given the country between the two points had not been surveyed for railway purposes. The new line will have a gauge of 4 it. 6 in , and the starting point will be Treoiday Bay, where wharves and piers will be erected.

Gold Fields and Production. Gold is found in every quarter of the globe in reefs or veins among quartz, from which it is separated by among quartz, from which it is separated by quarrying, crushing, washing, and treatment with mercury; in alluvial deposits, from which it is extracted by washing, in dust, grains, laminae, or nuggets. Alluvial deposits are of several kinds—namel), (1) beds of running rivers, involving the employment of dredging apparatus; (2) superficial or not deep deposits, capable of being worked by diggers single-handed, (3) deep alluvial beds, often underlying hard rock processitating therough manny. (4) handed, (3) deep alluvial beds, often underlying hard rock, necessitating thorough mining, (4) deposits of gravel, schist, and disintegrated rock, often on hillsides, now generally washed gradually down by means of hydraulic engines. Mining in quartz entails the employment of large capital and expensave machinery, including heavy stamps, cyandeworks, et. The ore is in the first instance crushed by stamps, the separated gold being collected. This process being lowers, ineffectual in separating the separated gold being conference. Ame pro-cess being, however, ineffectual in separating the whole of the gold, the residue is again treated by cyanide, and a considerable further quantity is obtained. Until recently the ore then left, technically known as "slimes," was quantity is obtained Until recently the then left, technically known as "slimes," regarded as worthless, but now that in its turn is made to yield a further quantity of gold One of the most interesting developments of recent years has been what is known as deep-level mining in the Transvaal—that is, sinking shafts to a great depth in order to work an existing reef known to dip at a considerable angle. In the Witwatersrand field many deeplevel mines are now yielding very satisfactory results. The initial expenditure in connection with quartz mining is so great, that it is mainly conducted through the agency of limited com-panies, the buying and selling of the shares of which are an important part of the business of the Stock Exchange (q v). Thanks to the of the Stock Exchange (q v.) Thanks to the rapid development of gold mining in the Iransvaal, Western Australia, and India of recent years, there has been a rapid increase in the production of the metal after unimportant fluctuations for a considerable period. This is clearly shown in the following table, the main figures of which are quoted from the Statist :-

	Production in-					
Year.	Australasia	America.	Whole World.			
	£	£	£			
1851	1,319,000	11,000,000	17,200,000			
1855	11,277,000	11,000,000	27,015,000			
1860	10,554,000	9,200,000	23,850,000			
1865	10,253,000	10,600,000	24,040,000			
1870	8,939,000	10,000,000	21,370,000			
1875	7,326,000	6,700,000	22,700,000			
1880	6,174,000	7,203,000	22,130,000			
1885	5,597,000	6,400,000	21,250,000			
1888	5,530,000	6,600,000	21,985,000			
1890	6,004,000	6,600,000	24,260,000			
1891	5,305,000	6,600,000	26,700,000			
1892	6,835,000	6,600,000	20,900,000			
1893	7,127,000	7,200,000	32,600,000			
1894	7,282,000	7,900,000	36,765,000			
1895	8,870,000	9,300,000	41,000,000			
1896	8,983,000	10,800,000	45,000,000			
1897	11,075,000	11,400,000	51,706,000			

As regards the new fields of importance, that of the Witwatersiand takes the first place Deposits were only discovered there so recently as 86, but owing to the reefs being good and regular, and to the fact that the best scientific methods of mining have been employed, the output has increased by leaps and bounds, It is now practically certain that many years— probably from eighty to a hundred—must clapse before the field is worked out. Gold is known to exist in other parts of the Fransvaal, such as the Lydenburg, Kleiksdorp, and De Knap districts, but these are being only partially worked at present. The exist one of payable gold in Rhodesia has been a much disputed point for many years past. In the autumn of '98 a few mines began to crush, and the question is therefore likely to be determined one way or the other before long. The output one way or the other before long. The output in Western Australia is also steadily increasing, but the gold there is scattered over a wide area, and the reefs in many parts are irregular and patchy. In the neighbourhood of Kalgoorlie, however, very large and rich teets are being systematically worked. In none of the other Westein Australian districts have important developments taken place during the year In India there has been steady progress without any occurrences worthy of note Gold mining in New Zealand continues in a somewhat unprogressive condition, but in British North America, especially in the Klondike region, rapid progress is being made

GOLF, '98.

Golf retains and even increases its hold on popular favour, and each year more links are added to the large number that now exist. The following are the most important matches that have taken place during the year. On Feb. 17th J. H. Taylor and J. Braud plaved a grand game in a 36-hole match at Wimbledon, for a prize presented by Sir George Newnes, Bart, in which Taylor won, his score being 150 against Braid's 15t. On April 2nd, at the opening of the new Wimbledon Park Golf Club, a march was played between Rowland Jones, the professional of the new club, and P. Paxton, when the former won by 2 holes up and 1 to play. An 18-hole match between J Braid and Jack White at Seaford, on April 13th, resulted in Braids victory by 4 holes up and 3 to play. A return match was played on the following day at

Newhaven, when Braid again won by 7 holes up and 6 to play. A 72-holes professional Foursome for £ 100 was played between A. Kirkaldy and A. Herd on one side and B. Savers and and A. Herd on one side and B. Sayers and A. Simpson on the other, on Apil 14th and 21st. At the end of the first day the former were leading by 3 holes, which advantage they increased to 12 up and 11 to play, by which they won. On Apil 14th J. Braid beat Jack White. On April 19th, at Aberfeldy, A.Kirkaldy beat A. Herd in an exciting match by 1 up. On April 23rd W. Fernie beat J. Kinnell in a Scholes match. 36-holes match, the scores being 151 to 154 A. Herd beat Tom Varden in a 36-holes match on April 30th by 148 strokes to 155 At Hastings, on May 4th, a match between many noted pro-lessionals resulted in favour of A. Herd, whose score was 148. On May 11th, at Burnham, Somerset, J. H. Taylor beat J. Braid, the scores being 163 and 166; and on the 18th, at Fast Finchley, a match between the same professionals ended in a tie, the scores being 154. Miss Lena Thomson won the Ladies Golf Championship at Great Yarmouth on May 20th The Amateur Championship was won by Lt F The ambieur our impossing was won by a factor of Tait (black Watch) for the second time, at Hoylake, on May 27th Mr S Muir Fergusson was beaten in the final by 7 up sud 5 to play, Mi. Tait also won the St. George's Challenge Cup at Sandwich on June 1st, with a score of 163 W. Park, in a match for £200 against W Fernie, W. Fark, 111 a mater 101 £200 against w rernie, beat him by 13 up and 22 to play. In Copen Championship was played over the Prestwick Links, when Harry Vardon for the second time won, with a score of 3,7, Willie Park being second with a score of 308 Miss K Moeller won the Ladies Championship of Yorkshire, Mr. Frank Woodhead being the Amateu Champion of the same county, beating his bro-Champion of the same county, beating his brother Arthur in the final by 3 up and 4 to play On July 5th, in two matches at Romford, J. Braid defeated the champion, H Vardon, but on the 23rd H. Vardon won a match at the North Surrey Ground against other professionals The Calcutta Cup was won by Mr. E. Blackwell at St. Andrews on Aug 5th. At the Canoustic Journament or Professionals, on Aug 13th, Harry Vaidon won the 36 holes match, and he also won at the Elie Professional Fournament also won at the Elie Professional Fournament The Borough of Deal Amateur Challenge Cup was won by Mr. Schacht. Mr Macfie won the Queen Victoria Jubilee Vasc at St. Andrew's. The Irish Golf Championship was won by Mr. W. B. Taylor, of the Edinburgh Carlton Club, in a most exciting match, an exita hole being played to decide the game. Mr. Dallmeyer, of the London Scottish, was his opponent. On of the London Scottish, was his opponent of the London Scottish, was his opponent On Aug. 26th Kirkaldy beat Scott by 4 up and 3 to play, and a few days afterwards A Herd defeated H. Vardon by 3 holes up and 2 to play. Mr. Lawson won the Midlothian Cup with a score of 77 Mr. H W de Zoete won the King Wilham IV. Medal, at St Andrew's, with a score of 80, and Mr. F G I art the Club Gold Medal with a score of 78 Hairry Vardon won the Newosatle (Co. Down) Professional

Goluchowski, Count Agenor, Austro-Hungarian Minister for Foreign Affairs, was

He is a large landed proprietor in Galicia, and has sat as a Conservative in the Austrian Chamber of Peers. He was appointed Minister of Foreign Affairs on Count Kalnoky's resignation in May '95.

Good Templars, The Independent Order

of, a total abstinence fraternity originated in New York in 1851. In '68 it was extended to England by Joseph Malins, who, by '70, had instituted the Grand Lodge of England, from which the Order has spread round the world. It administers a pledge of lifelong abstinence from intoxicating beverages, and advocates the legal suppression of their common sale. It seeks to protect the abstinent and reclaim the inebriate. It admits both sexes to equal privileges and office. Only a small fee of 6d or 1s. per quarter is exacted, as it is non-beneficiary per quarter is exacted, as it is non-beneficiary in basis. The Order consists of (1) local "Subordinate" lodges, meeting weekly; (2) county "District" lodges, meeting quarterly; (3) national "Grand" lodges, meeting annually, and an "International Supieme Lodge." The latter has met in the United States, Canada, England, Ireland, Scotland, Wales, and Sweden, and next meets at Toronto, Canada on the Gurth Tuesday in line '998. Canada, Engiand, Frending Scotland, vision, and Sweden, and next meets at Toronto, Canada, on the fourth Tuesday in June '99. The Order publishes about forty newspapers and magazines in various languages. It has a membership of over 550,000, in about 12,000 branches, governed by 100 different Giand Lodges. There are in the United Kingdom nearly 200,000 adult and junior members, of whom 55,000 adults and 45,000 juniors are under the Grand Lodge of England, whose permanent offices are in Edmund Street, Birmingham. This Grand Lodge has over 1300 lodges, of which 100 are in the army and navy. The Giand Lodge annual session at Plymouth, Easter '98, was attended by 600 representatives and The Juvenile Section of the Order enjoins abstinence from strong drink, tobacco, gainbling and bad words, and has 70,000 British members, in 1000 branches. Ihe members have founded a Temperance Orphanage at Sunbury, at a cost of about £10,000. They have Mission Vans, with travelling missionaries to hold open-air meetings and circulate temperance literature in rural parts, and in many countries have latterly formed Good Templar Cyoling Brigades. The Grand Lodge of Scotland has 100 feet and 100 feet of Scotland has 100 fe members, in 1000 branches. The members land has 1061 adult and 380 jumor branches, with a total of 79,000 members; its office is 72, Great Clyde Street, Glasgow, and its monthly organ is The Good Templar, Ireland and Wales have about 500 adult and junior branches, and have an increasing membership The organ in England is The Good Templar's Watchword, weekly; and several local monthlies are issued besides much literary matter, from the Grand Lodge printing presses, at 168, Edmund Street. Birmingham

Gore, Rev. Charles, M.A., D D (Edin.), was b. 1853, and is the son of the late Hon. Charles Alexander Gore, the brother of the 4th Earl of Arran He was ed at Harrow and Balliol College, and was a Fellow of Trinity College, Oxford.
Mr. Gore has taken a prominent position in
Oxford as the exponent of High Church tenets.
The publication of "Lux Mund," for which he Hungarian Minister for Foreign Affairs, was born in 1849. He entered upon his diplomatic career in the Ministry for Foreign Affairs, and in '72 was appointed Attache and afterwards Secretary of Embassy at Berlin. He then went to Paris as Counsellor of Embassy, and there married a daughter of Prince Joachim Murat. He was Minister at Bucharest, '87-93. Canon of Westminster. In '95 and '96 he took a prominent part in the Armenian agitation, and in '97 attended, with the Bishop of Rochester, the Convention of the Brotherhood of St Andrew, at Buffalo, U.S.A. In '98 he edited 'Essays in Aid of the Reform of the Church.' Address 'Little Cloisters, Westminster.

Gorst, Sir John, M.P. See under COMMONS Goschen, Rt. Hon. George J., M.P. See under COMMONS.

Gosse, Edmund, was b. in London 1849. Ed. privately. His book "Seventeenth Century Studies" was published in '80 (3rd edition '97). "The Masque of Painters," which was performed with great success by members of the Royal Institute of Painters in Water-Colouis in May '86, was written by Mr. Gosse. In '89 he published "The History of 18th-Century Literature, 1600—1780" His later works include a volume of most interesting essays entitled "Gossip in a Library" ('91); a novel, "The Secret of Narcisse" ('92); a collection of essays, "Questions at Issue" ('93); a critical volume on "The Jacobean Poets", a collection of lyrical poems, "In Russet and Silver" ('94); "Critical Kit-Kats" ('96), a series of modern monographs, and "A Short History of English Literature" ('97). An edition of Mr. Gosse's works, in 7 vols, was issued in '96. Mr Gosse is now engaged on the "Life and Letters" of the great Elizabethan poet and divine, Dr John Donne. Address. 29, Delamere Ierrace, W.

Gothenburg System, The. See special articles in '95 and '96 editions, "The Gothenburg System of Public-house Licensing," published by the Church of England Temperance Society, 9, Bridge Street, Westminster, a book on the Gothenburg system, by Mr Edwin Goadby, "Sober by Act of Parliament," published by Swan Sonnenschein & Co, and "The Gothenburg and Bergen Schemes," by D Lewis, J P, published by Elliott, Edinburgh. See also Local Option.

Gould, F. Carruthers, one of the greatest cartoonists of the day, was at Bainstaple in 1845, and was ed in that town He entered a local bank at the age of 16, and at 20 came up to London and entered a stockbroker's office, eventually himself becoming a member of the Stock Exchange As a boy his genius for carricature was noticeable, and on the Stock Exchange he found plenty of material ready to his hand. In '79 he began to illustrate the Christmas number of Truth, but his first journalistic work was done on the Pall Mall Gazette and Budget when Mr. Stead was editor He very soon became a regular member of the staff, and with his colleagues transferred his services to the Westminster Gazette when the former paper passed into Mr Astor's hands, For years his pictorial commentary on the proceedings at Westminster has been brilliant in the extreme, and latterly he has done the literary commentary also with equal success His "Cartoons for the Crisis" diring the general election of '95, afterwards republished separately, put his name into all men's mouths, and firmly established his reputation as a political caricaturist. He is now assistant editor of the Westminster Gazette.

Government. See Ministry, Treasury, and other articles.

Grace, Dr. W. G., the renowned cricketer, was b. at Downend, Bristol, 1848, and made his

first appearance in important matches in West Gloucestershire v. Bedminster, at Mangotsfield. Between '64 and '79 he made 20,842 runs in a total of 475 innings. His exploits as a batsman, fielder, and bowler, became so celebrated, that the title of "champion" was spontaneously conferred upon him. On July 22nd, '79, at Lord's, the enthusiasm of his admirers took the form of a presentation of the value of £1400 Although pui suing the medical profession, Dr Grace has still kept his place in first-class cricket. An interesting book upon Cricket was published by him in '91, and another is in preparation. He celebrated his Jubilee in '98, and it was announced in the autumn that he had accepted the position of secretary of the London County Cricket Club, whose ground will be at the Ciystal Palace.

"Graphic, The," founded 1869, by Mr. W. L. Thomas, its present manager, is an illustrated weekly of high-class character, and treats of current events Its Curistmas and Summer numbers are especially excellent, and have a very wide circulation Editor, Mr. T. Heath Joyce. See also Daily Graphic Office, 190, Strand.

GREAT BRITAIN AND HER COLONIAL TRADE.

The British dominions are expanding rapidly both in wealth and in population. According to the best estimates, there were 320,000,000 persons subject to the Empire in 87, over 351,00,000 in '91, and about 400,000,000 in '97, exclusive of the inhabitants of Protectorates and spheres of the Empire. In fact, more than a quarter of the population of the civilised world reside under the British flag. The importance of the trade of such multitudes needs no demonstration, and it is therefore not surprising that attention has been closely directed to the best means for making it of mutual benefit, and to the dangers of foreign competition. The Canadian preferential tariff, adopted in '97, and put into full operation in '98 (see Canada), is of great interest in this connection. Whether other colonies are likely connection Whether other colonies are likely to follow Canada's lead seems very doubtful. It would be extremely difficult, if not impossible, for many of the colonies at present to dispense with a tariff on imports. It is probable that for the present such changes as do take place will be rather in the relation of adjacent colonies to each other than in that of those colonies to the mother country. It is calculated that 70 per cent of British exports go to foreign countries, while 77 per cent. of British imports are derived from outside the British Empire. The following tables, compiled from the Colonial Office list, show the state of things in the Colonies. The percentage of some of the minor colonies has been omitted to save space, but the general average at the bottom includes all British possessions.—

Indian and Colonial Exports.
Percentage to

	United Kingdom		British		Coreign ountries
Cape Colony .	95		1		4
New Zealand	78		15		7
Ceylon .	. 70	• •	18	•	12
Natal	. 64	• •	12	• •	24
Victoria .	57	• •	29	•	14
British Guiana	. 52		0		42

Percentage to

_	United Kingdom		British sessions	C	Foreign ountrie
Canada	52		4		44
South Australia	41		54		5
Queensland	39		60		ī
West Australia	38		6 1		1
New South Wales	36		45		19
Newfoundland	36		41		23
India and Burmah	31		20		49
West Indies	20		8		63
Tasmania	. 21		79		
Straits Settlements			14		60
Av'ge for all Coloni			27		65 26

There are great variations in this table, and the colonies are purposely so arranged as to show how much more some colonies send here than others. Of course the fact that some of the exports sent here are for distribution only must not be lost sight of, but broadly it may be said that as regards foreign trade our colonies fall into three distinct categories. There are those which he contiguous to foreign countries and naturally do a large amount of business with them. Of these Canada, the West Indies and the Straits Settlements are conspicuous examples. There are others which are greatly isolated from the world at large, and therefore depend mainly on Gleat Britain as a market—for instance, New Zealand, Cape Colony and Natal. The third category comprises those colonies, mainly Australian, which he near to each other and trade largely with each other. It is classification is important, as we are too apt to speak generally of the colonies as if their conditions were imilar, while the differences between them are great and have a vital bearing on inter-Imperial trade relations.

With some variations, the classification of imports on the same lines is very like that of exports, as will be seen from the following table.—

Indian and Colonial Imports
Percentage from

	United	British		Foreign ountric		
Cape Colony .	80	7	••	13		
Natal .	76	ġ		15		
India	71	11		18		
New Zealand	65	27		8		
British Guiana	55	16		29		
West Australia	49	49		2		
West Indies .	46	12		42		
Victoria	42	49		ġ		
New South Wales	. 40	52		8		
Queensland	. 36	60		4		
Canada	35	2		62		
Tasmania	. 33	66		1		
Ceylon .	26	68		6		
South Australia	. 25	67		8		
Newfoundland	20	. 19		61		
Straits Settlements	B 14	. 20		60		
Av'ge for all Colon	165 47	27		26		

Leaving out of account those colonies all eady alluded to, which, owing to their geographical position, necessarily trade largely with neighbours, it will be seen that foreign competition is much less than many suppose. Allowance has of course to be made for the fact that all the goods exported from this country are not necessarily made here, but even then it is obvious that we command the bulk and the pick of colonial trade in manufactured goods. See Colonial Conference '97.

GREAT BRITAIN AND HER FOREIGN TRADE.

In the Annual of the last three years much attention has been paid to the rapidly changing conditions of our foreign trade, owing to the eager rush for the development of new markets and the increasing and organised competition of enterprising rivals. The special conditions affecting particular markets throughout the world were surveyed, partly with the view of inducing traders to remedy some of the defects in our commercial system, the existence of which was demonstrated. Generally speaking, it may be said that the conditions explained have changed but little, though in some directions the competition has become accentuated. It is not proposed here to repeat the particular survey of foreign markets (see eds. of '96, '97, '88), but meiely to collect certain particulars concerning the mercantile energy of our rivals and the unsatisfactory methods which many British traders employ. Some credit may family be taken for the part played by the Annual in calling the attention of the public to these matters.

Early in '97 a Memorandum was laid upon the table of the House of Commons embodying Comparative Statistics of Population, Industry, and Commerce in the United Kingdom and some Leading Foreign Countries. The general conclusion was that the conditions of the manufacturing and industrial predominance of the Kingdom were different from what they were when the non-agricultural population of every country in the world was smaller than in our own—in other words, that industries and manufactures abroad are becoming much bigger things than they were Later on, a paper embodying Correspondence respecting Diplomatic and Consular Assistance to British Trade Abroad was presented to both Houses of Parliament, and a gicat deal of information was derived from the Chambers of Commerce throughout the country as to the manner in which this assistance might be ancreased.

A very important step was taken by the Board of Trade in July '07, in the appointment of a Departmental Committee to undertake an Inquiry into the Development of British Trade. The special instructions to the Committee were that they should consider and advise as to the best means of bringing to the knowledge of the home trades the information furnished by Consuls and Commercial Attaches, and by Agents-General and other representatives of Colonial Governments and of India, as to the supply and demand and other conditions of the markets in their respective districts, and as to the opportunities which they afford for the introduction and development of British trade. They were also to report as to whether in their opinion it was desirable that Consuls and Agents should be instructed to remit home from time to time samples of goods most in demand—this being a recommendation which had been made by many Chambers of Commerce—and if they should be of that opinion they were to advise in regard to arrangements for

the exhibition or circulation of such samples.

The Committee presented their Report in July, '98, making a number of general suggestions in relation to the dissemination of commercial intelligence. In regard to a suggested Commercial Intelligence Office, the Committee with practical unanimity recommended the

establishment of an office whose function it should be to meet the constantly increasing demand for prompt and accurate information on commercial matters, so far as it can be met by Government action There was no desire to suggest anything which would, even if it could, impair the value of the information already obtainable by individual enterprise. It was more than ever essential in these days that our manufacturers and traders should rely mainly on their own efforts to extend the area of their transactions and the amount of their business. Sir James Mackay, a member of the Committee, laid great stress upon this matter, and was of opinion that the establishment of such an office as was proposed would tend to rob the trader, whe has embarked in operations in distant regions, of the just fruit of his enterprise, while at the same time it would lay open to foreigners and competitors information that would be very valuable to them. "The State may, however," said the report, "usefully afford assistance in the interests of the trading community as a whole, and may supply information from a broader point of view than that of the individual trader." The Committee further came to the conclusion that it is desirable to obtain more completely than at present particulars and samples of foreign-made goods mostly in demand in foreign, Indian and Colonial markets, and to make arrangements for the exhibition of those samples in our centres of industries and commerce.

In such helps to commerce foreigners are particularly energetic. There are typical museums of the class in Brussels and Vienna, and Commercial Information Bureaus exist in several of the capitals of Europe. In July 38 the French Minister of Commerce announced the institution of a Commercial Intelligence Bureau in Paris, which was to collect and disseminate information concerning raw materials or products which France can import for manufacturing purposes, for consumption, or transit, on customs, tariffs, port dues and taxes affecting trade or navigation; on products capable of finding an outlet in foleign markets, etc., with particulars of conditions of transit, payment, package, the position of markets, firms, etc., and on undertakings to be opened in foreign countries. Later, in Oct. '98, it was announced that the loss of the Spanish colonies had caused the Spanish Government to form a special sub department of the Ministry of Foreign Affairs for the purpose of supply-ing commercial information and statistics to traders These are but illustrations of the new commercial activity being displayed abroad in Austria-Hungary a plan has been formed which is striking, though not new, of despatch-ing a Floating Exhibition to make known the products of the dual monarchy in various countries. The exhibition is intended to be installed in a ship of the Austrian Lloyd's installed in a ship of the Austrian Lloyd's Steamship Company, to leave in Dect of carrying a large assortment of samples, with experts and catalogues in four languages, for the Piræus, Salonika, Constantinople, Smyrna, Alexandria, Massowah, Aden, Bombay, Colombo, Calcutta, Akyab, Rangoon, Singapore, Bangkok, Saigon, Batavia, Macassar, Sandakan, Cebu, Manilla, Pakhoi, Kiungchow, Canton, Hongkong, Swatow, Amoy, Kelung, Foohcow, Shanghai, Chin-Kiang, Wei-hai-wei, Chefoo, Port Arthur, Yuensan, Nagasaki, Kobe, and Yokohama.

But certainly the most important commercial rival we have is Germany, which is everywhere displaying extraordinary energy and enterprise. The Berlin correspondent of the Times, writing 111 October '98, gave an exceedingly interesting account of the development of German influence in Turkey since 1888, largely through the operations of the Deutsche Bank group of financiers, both directly and indirectly. The transaction of business was facilitated, and German enterprise was not slow to take advantage of the new opportunities Everywhere the beginnings of new business connections are visible, and in many cases it is the promise of future development rather than what has been achieved which merits the intelligent attention of Englishmen. This expansion will doubtless receive a new impetus from the visit to Constantinople of the German Emperor, who said to the German community on his arrival, "I have it from the ruler of this land himself that you have established for yourselves a high position in this capital" The correspondent made some remarks which are confirmed by all experience -" The German export trade, I am assured on all hands, owes its successes to the stolid, steady perseverance of German industrialists, who imitate the methods of the German general staff, and, it may be added, those of our own admirable Sirdar, in neglecting no detail, however trivial, in their plan of campaign l'utting their pi de in their pockets, they accommodate then system to the task in hand Like great generals and strategists, they are perfectly content to labour for long years in obscunity, and to 'cast thein bread upon the waters, conscious that 'after many days' it will return to them Above all, they study the business ways of their customers, and do not thoughtlessly apply Western stan-dards to Fastern transactions Fertility of Fertility of resource and a prompt willingness to abandon their own experiments, when these prove unsuitable for the purpose in view, are also characteristic of German commercial methods. In the Balkan States, for example, they tried the establishment of warehouses for the exhibition of German products. This was found not to answer, and the idea of commercial museums was simply dropped. In its place the system of sending out large numbers of energetic, well-educated, and experienced commercial travellers was adopted, and it has hither to yielded the best results."

This commercial activity of the Germans is even more marked in the Far East, where Kiao-chau is expected ultimately to overshadow the prosperity of Chefoo, and to lead to a wonderful increase of German trade. Our system of trade is obviously cf a stiff and unbending character. Mr. Byron Brenan, Consul at Canton, in a report to the Foreign Office has made a useful comparison of German and English methods. The young German puts up with trouble and disagreeable experiences much more readily than the young Englishman. English makers, he says, show less eagerness to secure orders than Continental and American rivals. If the critical eye sees vagueness in the applications of a would-be Japanese purchaser, the vendor thinks there can be no real business, whereas the possibility is that the Japanese does not know precisely what he requires. "But the loss of business caused by this unbending adherence to established standards is not limited to the makers who refuse to be accommodating. If

sometimes reacts upon others. One British firm in Japan lost a good order for rails, and consequently some English maker also, because with the rails it was necessary to supply a certain kind of crossing and switches which are not now made in England. The English firm had hitherto got over the difficulty by supplying the rails from England and obtaining from the Continent what the British iron-masters refused to make; but their Continental rivals here saw their opportunity. The order had to be executed as a whole, and if the British firm could be prevented from obtaining the switches, the order would have to be transferred to such parties as could supply all that was desired, so a paternal Government applied a little pressure to the Continental maker of the right kind of switches, and he refused to sell any more to the British firm, who thus were unable to fuffil their orders, and in the end both switches and rails were procured from the Continent."

A remarkable illustration of German commercial zeal is the Commercial Mission which was sent out to the Far East The mission visited Canton, Swatow, Amoy, etc., and penetrated 1100 miles up the Yang-tse, staying at the towns on the banks, and especially the newly opened treaty port of Shashi. Samshii and Wuchow were visited, and an accurate know ledge was gained of the province of Chekiang and the southern portion of Kiangsu, as well as of the silk districts of Canton. Some members of the party made an overland journey from Tientsin to Newchwang and the neighbouring districts. The mission also thoroughly in vestigated the trade conditions of Japan, and had a glance at Korea. The result is that a vast amount of special commercial intelligence vast amount of special commercial intelligence has been made available to German traders, with careful provision that it shall not be divulged to others. In April '98 an exhibition of 5,000 samples brought back was opened in two large rooms in the Reichstag buildings, which showed that the collection was the result of class attidued to the collection was the result of close study of technical men thoroughly versed in their work. The exhibition, which was transferred to Diesden before the cuid of April, had the twofold object of showing what Europ an and American goods are exported to East Asia, and what goods can be purchased out there, The commercial attache to the British embassy in Berlin has described the interesting conditions on which the collection was on view. These should be carefully noted by British traders as an excellent example of the German commercial system. "The exhibition is only open to those persons actually interes ed in the trades concerned, and to members of the Chambers of Commerce and some officials, no other persons are admitted, and entrance is only permitted on the presentation of a permit from the Society of Industrialists. The general report, and the valuable special reports on the different branches of particular trades to the East will not be published, except for private circulation amongst those persons interested in each particular branch. Copies of these reports are not to be obtained anywhere for the general information of the public."
There is reason to hope that our manufacturers and merchants are now alive to the serious nature of the attack which is being made upon our commerce. With a fair field and no favour the British trader can probably in most things hold his own against the world; but he must

abandon the antiquated and unbending methods of business which forbid him to study the wants of his customers, and cause him to attach great faith to his catalogues in the English language, with English prices, weights and measures, deposited at British consulates, and to a system of payment which is often not suited to his correspondents, as well as to methods of packing goods which are generally far inferior to those of his commercial rivals.

ing goods which are generally far inferior to those of his commercial rivals. A memorandum lately (Oct '98) published by the Board of Irade on the ways and methods of British trade is a complete exposition of the defective system referred to Not less than 116 consular and diplomatic officers throughout the world report with much thoroughness upon the prevailing currents of trade, and, with few exceptions, all deplore the supineness and short-sighted policy of the British trader He finds eager rivals in markets where once he was supreme, and these gain the advantage because they rush forward, while he is apt to be stationary. He has not seen, as this memore nas not seen, as this memorandum makes plain, that the conditions of trade are rapidly changing. He makes things that are good, solid, generally honest, and often expensive; and if the customer asks for cheaper objects he will not supply them. Much as he may regret that quantity is valued more than quality all the world over in these days, he must sail with the stream, or his tortunes will be 'hipwrecked. This is, in effect, what the consuls say. We have almost lost the trade with Poland in agricultural lost the trade with Poland in agricultural implements because we would not suit our productions to the purses of our customers Many of the consuls report that our merchants will not sell unless they get large orders, whereas the German will book and execute small orders. One consul quoted in the memorandum says that the chief cause of success in forceign competition is the greater attention. randum says that the chief cause of success in foreign competition is the greater attention paid abroad to the art of exactly suiting the foreign customer's "pocket, taste, and convenience." In regard to the first matter, the Germans seem particularly obliging, though, of course, with an ulterior object in view. While English houses will give only two or three months' credit, or even demand cash on delivery, the German will give six months' credit, so that the consignment may perhaps credit, so that the consignment may perhaps be sold before payment is made. To give credit without making many bad debts requires an intimate knowledge of the stability of individuals, which can only be obtained by diligent and careful travellers, and these not all English houses take the trouble to send out. Many of the consuls whose opinions are collected in this important memorandum declare that too much reliance is placed in flooding the consulates with elaborately and nooning the constitutes with classificating and artistically got-up catalogues, price lists, etc., containing a request that they should be distributed or placed at the disposal of dealers—a system pronounced "absolutely valueless."

"In many cases the first thing the recipients of these catalogues and price lists do, on seeing the drawing or design which has taken their fancy, is to apply to the representative of the foreign firms with whom they have been in the habit of dealing in order to ascertain all particulars concerning the articles described in the English language" "One commercial in the English language" in the English language "One commercial traveller," says the consul at Cherbourg, "who knows the language and the ways of the people, will do more than ten thousand circulars"; while his colleague at Naples remarks that "it is pitiable to see the British commercial traveller stumbling along with an interpreter, while his German competitor is conversing fluently; and one is still more sorry for him when his patterns and samples are marked with British weights and measures" The notes here collected have the purpose of enforcing and recording much that has lately been said, for the condition of our foreign trade has been one of the keenest interests of the year '98.

Great Central Railway. See RAILWAYS.

GREECE.

A kingdom under George I. (q v.), of Glücksburg. The country gained its independence in the famous struggle of 1821-9, after centuries of subjection to Turkey. The present monarch, who is the second son of the King of Denmark, was elected in '63, after the expulsion of King Otto. Executive vested in King and responsible ministers. The legislative authority is in the hands of the Boule, a chamber of 207 representatives elected by manhood suffrage for four years. The deputies are each paid about £72 per session. There are large numbers of Greeks outside the limits of the Kingdom. In Asia Minor there are probably about 2,000,000, in European Turkey about 3,500,000, and large numbers dwell in Crete, Cypi us, etc. The Greek orthodox Church is the State religion, but complete liberty of worship prevaile. Education is compulsory, but the law is not enforced. The State has a monopoly in salt, petroleum, matches, and playing-rards. The chief exports are currants, ores, wines, fruit, and olive oil. There are 591 miles of railway open. By the war with Turkey, which arose in '97 out of Greek sympathy with Crete, Greece underwent humiliation and defeat, and had to agree to pay an indemnity of £74,000,000, and to submit to a strategic reconstruction of the frontier in Turkey's favour. She also had to accept international control in financial matters Area about 25,014 sq m; pop. ('96) 2,4433,860. Revenue, '88, £2,502,188, expenditure, £2,402,096, old public debt, £22,068,660, guaranteed debt, £6,800,000; imports, '97, 4,590,461; exports, £3,229,363. See Difflomatic, Foreign Armies, and Foreign Navies.

and Foreign Navies

Political Parities. Until '90 the two chief party leaders were M. Trioupi and M. Delyanni. But in '90 a section of the Opposition under M. Delyanni broke away from him to follow M. Ralli, who posed as the chief of the Neo-Hellenic party. M Delyanni ruled the country from '90 till March '92, and M. Tricoupi from June '92 (with the exception of a few months during '93) till Jan. '95. In April '95 M. Delyanni was returned to power with 140 supporters, 16 supporters of M. Tricoupi, 18 of M. Ralli, 24 Independents, 8 Progressists, and others being elected. M. Tricoupi thereupon withdrew from political life, and died during '06. M. Delyanni remained in office till April '97, when the popular feeling against him aroused by the Greek reverses during the war with Turkey led the King to dismiss him M Ralli succeeded as Premier, and held office till Sept. 30th, '97, when he was succeeded by M. Zalmis. With the formation of the Zalmis Cabinet (Oct. 2nd, '97) a split occurred amongst the Delyannists. M. Zalmis himself had for-

merly been a follower of M. Delyanni; but on his accession to office there was a rupture between them, and very many members of the party supported M. Zaimis. Nevertheless M. Zaimis deemed the opposition too strong for him, and resigned (Nov. 7th, '98) History, '98. The treaty of peace with Turkey was at last signed at Constantinople

(Dec. 4th), and the details of the law for the institution of an International Commission of Control over the revenues assigned for the service of the foreign debt and the indemnity loan were settled by the Foreign Minister and toan were settled by the Toleran manner the European delegates (Jan. 12th). The Commission consists of six members, one from each of the Great Powers, each in turn acting as president for six months. The Commission nominates its own agents and employés, collecting the money through a Greek company under its absolute control, and furnishing an account of its operations to the Greek Government every six months In case the assigned revenues should not suffice to pay the foreign loans the Greek Government is responsible for the definency The arrangements with the bondholders were made an integral part of the law, the foreign loans being divided into three categories. The first category comprises the two privileged loans, the Monopoly and Funding, the second includes the Five-per-cent loans of '81, 84, and '90, and the third the Fourper cent Rentes. The revenues assigned as security were monopolies (including emery security were monopones (including emery from Naxos) valued at 12,300,000 drachmas per annum, the tobacco tax valued at 6,600,000, stamps at 10,000,000, and the Piræus Customs at 10,700 000—total 39,600,000 drachmas. In case of a deficiency, the Customs of Patras, case of a deficiency, the Customs of Patras, Volo, Corfu, and Laurium, valued at 7,200,000 druchmas, were assigned as supplementary revenues. The indemnity loan was successfully airanged (Feb. 24th) with the help of Great Britain, France, and Russia £74,000,000 were furnished by a Syndicate under the guarantee of the three Powers, and £71,000,000 without guarantee. The Greek Bank found the remainder of the loan £76,600,000. A cowardly attempt to assassinate the King by shoo ing him while out driving with the Princess Marie fulled (27th). The King displayed great courage, and his escape awoke played great courage, and his escape awoke an outburst of enthusiastic loyalty. The two would-be assassins were caught and con-demned to death. The Chamber reassembled and the Finance Minister introduced the Bill for the international control of the revenues set apart for the service of the foleign debt (March 3rd) It passed quickly, and practically unopposed, through its various stages, and was carried (7th). The Bill authorising the issue of the loan guaranteed by the three Powers was also carried (April 3rd), and the Session was then closed. The Porte was notified by the Powers (May 6th) that the evacuation of I hessaly must begin, and it was announced (June 6th) that all the Turkish troops had left and the thermore had left and the the thermore had left and the thermore had left and the thermore troops had left, and that the province had been reoccupied by the Greeks M. Zaimis and his Cabinet resigned (Nov 7th), declining to meet a Chamber which he knew beforehand contained a majority of members hostile to him; but was commissioned by the King to form, and formed, a new Cabinet. The date for the opening of the Chamber was postponed from Nov. 12th to Nov. 27th. Greene, W. Conyngham, C.B., appointed British Agent in the Iransvaal, Aug. 27th, '96, is a nephew of Lord Plunket, Archbishop of Dublin, and was b. in 1854. He was ed. at Harrow and Oxford, and then entered the Foreign Office, '77. He has acted as Chargé d'Affaines at Athens, Stuttgart, and Teheran, being Secretary of Legation at the latter place His rank at Pretoria is that of Charge d'Affaires.

Greenland. An extensive region or island north-east of America, extending into the Polar regions. The interior is all ice, but parts of the south and west coast are habitable, with verdant pasturage, some shrubbery, and mossy valleys. Principal exports: oil of seals and whales, fox, scal, and reindeer skins, eiderdown, teathers, and civolite. The chief trade is with Denmark, to which country the colony belongs Area, 46,740 sq m, pop. 10,516, of whom 309 are Europeans and the rest natives. See Colonies, 11c, of European Powers

Grenada An island in the West Indies froming part of the British colony of the Wind ward Islands. It is the largest of the group, and is the residence of the Governor of the Windward Islands Its area is about 133 square miles, and the population 05,367. Capital, St George, with a population of 4919 Products are sugar, cacao, cotton, coffee, and spices The Government includes the Governor-in-chief of the Windward Islands, an Executive Council of six, and a Legislative Council of thriteensix official, and seven nominated by the Crown For financial statistics see British Empire (table).

Grenadines. A cluster of islets lying between Grenada and St. Vincent, some of which are subordinate to Grenada and some to St Vincent. The largest is Carriacou, with an area of 10 sq. in and pop. 6031 Exports: fish, oil, wood, sugar, corn, and cotton. Area, 86 sq. m.; pop. 400.

Gresham College. The Gresham Lectures, as well as the College in which they are delivered, owe their institution to the munificence of Sir Thomas Cresham, the "Royal Merchant" of Queen Elizabeth. By his will, dated July sth, 1575, Sir Thomas bequeathed certain rents growing out of the Royal Exchange, which he built, to the Corporation of the City of London, and to the Mercers' Company, for the "erecting and maintaining of divers lectures in sundry artonomy, music, and rhetoric. The lectures were organised and commenced in June 1597 The buildings of Gresham House, which had thus become Gresham College, were pulled down in 1768, and the General Excise Office erected on the site, the property having been acquired by the Crown for an annuity of £500 In '76, whilst the Earl of Schoolne was Master of the Mercers Company, the Gresham Lecturers submitted two schemes for the improvement of the Lectures, and the recommendations under this head were adopted, the principal being that all the Lectures should be delivered in English instead of Latin and English, twelve lectures to be given in each year by each Prolectures to be given in each year by each Professor. The names of the piesent Gresham Lecturers are as follows: Physio, E. Symes Thompson, M.D.; Rhetorio, J. E. Nixon, M.A.; Astronomy, Rev. E. Ledger, M.A., F.R.A.S.; Law, G. H. Blakesley; Geometry, W. H. Wagstaff, M.A.; Busio, J. F. Bridge, Mus. Doc. (a.v.); Divinity, Rev. Henry E. J. Bevan, M.A.; Clerk to the Gresham Committee, John Watney, Mercers' Hall, London, E.C.

Grav. Earl. See PEERS.

Guadeloupe. This colony is one of the principal French possessions in the West Indies, and con-ists of two islands, Basse-terre and Grande-terre, separated by a narrow salt-water river, with five smaller dependent islands. It is situated in the Leeward group of the Lesser Antilles. Capital, Pointe-à-Pitre. Products: sugar, rum, coffee, cotton, cacao, bananas, etc. The colony is represented at Paris by a Schator and two Deputies, and has an area of about 680 sq. m., and a total population of 167,000. It is administered by a Governor with an elected Council. See Cquonies, etc., of Europelan Powers.

Guatemala. The most northern republic of Central America, bounded on the east and north by Mexico, west by Belize, the republics of Honduras and Salvador, and south by the Pacific Governed by a President, elected for six years, and a National Assembly, elected by universal suffrage for a term of four years. Roman Catholicism is the chief religion, but liberty prevails. Education free and compulsory. Chief products: coffee, Indes, bananas, and sugar Army numbers about 7000 officers and men, with militia about 50,000. Area, 63,400 sq m., pop 1,750,000. Capital, Guatemala la Nueva, pop. 85,000 Revenue, 97, \$22,073,588; expenditure, \$21,433,194, internal debt, \$3,000,000, external, £1,432,800, imports, 97, \$21,452,053 (silver); exports, \$19,775,800 (silver). See CFNIRAL AMERICA, for Ministry, etc., see Diptomatic—History, 98 Senor Barrios, the President, was assassinated (Feb. 9th), and Senor Cabrera, the first Vice-President, at once a-sumed office. The National Assembly afterwards formally proclaimed him President for the period '99—1905 (Sept. 25th).

Guernsey. One of the Channel Islands (q.v.).

Guildhall School of Music, Victoria Embankment, E.C., was established by the Corporation of London in '80, for the purpose of providing high-class instruction in the art and science of music at a moderate cost. Students are nominated by an alderman or a member of the Court of Common Council. The school commenced with 62 pupils, but now there are more than 3600 pupils. Its origin is traceable to the Guildhall Orchestral and Choral Society, founded in '78. The Common Council having had a report of this school laid before it, granted £350, and lent some buildings in Aldermanbury with which to establish the present school. Its speedy success led the Corporation of London to vote £20,000 for the fine buildings in which the school has carried on its work since '87. The total sum which the Corporation have expended on the school is £50,000, in addition to an annual contribution of £2300. There are several exhibition scholarships in connection with the school. Principal, Mr. W. H. Cummings; Becretary, Mr. Hilton Carter; Lady Superintendent, Mrs. Charles P. Smith.

Guy's Hospital and Medical School, London Bridge, S.E. This institution, now one of the great general hospitals of the Metropolis, was built and endowed in the year 1725 by Thomas Guy, a City bookseller. The wards contain accommodation for 650 patients. Agricultural depression has of late years decreased

of the Physiological Laboratories, opened in '97 Residential College furnishes accommodation by H.R.H. The Prince of Wales. Guy's also for fifty students and the resident medical possesses a Dental School for complete instruc- | staff.

by £20,000 per annum the income derived from the endowments, and public aid has had to be invoked. The Medical School has recently whole of the dental curriculum for the College received an important addition in the erection of Surgeons examination can be taken. The

H

Haggard, Henry Rider, was b. at Braden ham Hall, Norfolk, 1856. He was private secretary to Sir Henry Bulwer at Natal, and was subsequently on the staff of Sir Theophilus Shepstone, H.M. Commissioner to the Transvaal, during the temporary annexation of that territory in '77. He was afterwards appointed Easter of the High Court of the Transvaal. At the commencement of the Zulu war he was adjutant. lieutenant of the Pretoria Horse. He began his career as an author with the publication of "Cetewayo and his White Neighbours" in 82, and subsequently wrote "Dawn," "The Witch's Head," and "King Solomon's Mines" This Head," and "King Solomon's Mines" This won for him immense popularity, which was further increased by his romantic allegory "She." "Allan Quatermain," "Jess," "Mn Meeson's Will," "Mauwa's Revenge," "Colonel Quaritch, V.C.," "Allan's Wife," and "Cleopatra" followed. Then came "The World's Desire," in collaboration with Mr Andicw Lang, "Beatrice," "Eine Bright-eves," "Nada the Lily," "Montezuma's Daughter," "The People of the Mist" (50), "Joan Haste "(55), "Heat of the World' (50), and "Swallow" (78) He is a barrister of Lincoln's linn and a magistrate for Notolk and Suffolk, and was magistrate for Norfolk and Suffolk, and was Chairman of the Committee of the Society of Authors, '96-8. Address Ditchingham House, Nortolk.

Halleybury College, Horts. Founded 1862, received Royal Charter '64. Exhibitions to Oxford and Cambridge five annually (£60, £50, £50, £40, and £20) for three years. Pupils 500 Head Master, Hon. and Rev. Edward Lyttelton, M.A., Hon. Canon of St. Albans.

Hallé, Lady, the famous violinist, known before she married the late 511 Charles Halle in 88 as Madame Norman-Neruda She comes of a famous musical family, and was b, at Brunn, in '20. After studying under Jansa, she made her début at Vienna in '46, and at once excited enthusiasm by her wonderful execution. Her first appearance in London was at a Philharmonic concert in '49. Thence-forward her career has been one long success, both here and on the Continent. Her first husband was a Swedish musician, Ludwig Norman. Sir Charles Haile died Oct. 25th, '95.

British Architects. His first noteworthy literary effort was a novel published in '71, entitled "Desperate Remedies." In '74 the entitled "Desperate Remedies." In 74 the work by which he is best known appeared in the pages of Cornhill Magasins—"Far from the Madding Crowd." Other novels from his pen have been "Under the Greenwood Tree" (72), "A Pair of Blue Eyes" (73), "The Trumpet Major" (80), "A Laodicean" (81), "Twe on a Iower" (82), "The Hand of Ethelberta," "The Return of the Native," "Ihe Mayor of Casterbridge," "Wessex Tales," "A Group of Noble Dames," "Tess of the D'Urbervilles" (91), which was held by some of the citties to be the finest of all his works, "Life's Little Ironies" (94), "Jude the Obscure" (95), and "The Well-Beloved" (92 and '97) In June '93 Mr Hardy followed an early dramatic version of "Far from the Madding Crowd" with a dramatic piece called "The eariy dramatic version of "Far from the Mad-ding Crowd" with a dramatic piece called "The Three Wayfarers," which achieved a striking success "Fess' also has been recently dra-matised and played in America. He was made a J.P. for Dorchester in '84, and for Dorsetshire

in '94.

Harris, Lord. See under l'Li RAGL. Harriso, Frederic, MA, was b in London 1811; educated at King's Coll, Lond, and Wadham Coll, Oxford; scholar, '48; first class in classics, 53; fellow and tutor, '54. Sir Charles Haile died Oct. 25th, '95. Address: Greenhayes Lane, Manchester. Halsbury, Lord. See under Peerage. Hamilton, Lord George, M.P. See under Commons. Hardy, Thomas, novelist, was b. 1840, in Dorsetshire, and commenced his career as an architect. For an essay dealing with "Coloured Brick and Terra-cotta Architecture," he received the medal and prize of the Institute of 192. Address: 38, Westbourne Terrace, W.

Harrow School Founded 1571, by John Lyon, a yeoman, b. at Preston, near Harrow. Harrow School Founded 1571, by John Lyon, a yeoman, b. at Preston, near Harrow. Age of admission from 12 to 14. Among the scholarships to either University are Isabella Gregory's of £100 a year for four years, Earl Spencer's, £30a year for three years, Botfield's, £60 a year for three years, Botfield's, £60 a year for three years, Anderson's, £50 a year for three years, there of £100 a year for five years; to Leaus College, Cambridge, Sayer's two of £52 10s. for four years; and to any College, Oxford, Neeld's two of £30 for three years. Pupils, about 600. Head Master, Rev Joseph Wood, D.D Motto, Stet fortuna domus. Some distinguished alumni: Butler, afterwards head master, Sir R. Peel, Cardinal Manning, Sheridan, Earl of Aberdeen, Sir William Jones, Byron, Archbishop Trench, Trollope the novelist, Sir George Trevelyan, Lord Shaftesbury, Dr. Parr, Lord Palmerston, Rodney, Theodore Hook, Rt Hon. E. Stanhope, MP, Rt Hon. Lord George Hamilton, M.P., Rt. Hon. Lord George Hamilton, M.P., Rt. Hon. Sir W Hart Dyke, Bart., MP, Earl Spencer, K.G., and the present Master of Trinity Coll, Cambridge. Six or seven entrance scholarships, one of not less than £80 a year, two of not les one of not less than £80 a year, two of not less than £60 a year, and the rest of not less than £30 a year, are offered every Easter to boys (not members of the school) who were under fourteen years of age on the previous 1st of January These scholarships are held during the scholar's stay in the school, provided that both his conduct and diligence continue satisfactory at least of the scholarships will be, and others at icasi of the scholarships will be, and others may be, given for proficiency in mathematics, or in modern subjects. No boy can be elected under twelve years of age. The governors can, at their discretion, add £20 a year to any scholarship, if the circumstances of the scholar appear to make it desirable. There are also two scholarships, each of £20 a year for two years, open to boys in the fifth i im, which are awarded for proficiency in such subjects as are common to both sides (classical and modern) of the school

Harte, bret, was born at Albany, New York, 1839 At the age of fifteen he settled in California, and went through a variety of experiences. He worked for a time in the mines, and subsequently served a short apprenticeship to a printer, and also acted as teacher in a school, expless messenger to a newspaper editor, and secretary to the Mint at San Francisco; United States Cousul at Crefeld, and at Glasgow in '80. He became the first editor of the Atlantic Monthly, in '68 His reputation as a humorist was established by his well-known poem "The Heathen Ohimee," which appeared in that journal in '69. "The Luck of Roaring Oamp" greatly increased his popularity. In '82 he published a collected edition of his works. His latest works are "Cressy," "The Heritage of Dedlow Marsh," "A Waif of the Plains," "A Ward of the Golden Gate," "A Sappho of Green Springs," "Sally Dows" ('92), "Susy" ('93), "A Protegee of Jack Hamilin's "('94), "Clarence" ('95). "Three Partners' ('97), "Some Later Verses," and "Tales of Trail and Town" ('98). Address '74, Lancaster Gate, W

(188). Address 74, Lancaster Gate, W
Hausa Association, The This association
was formed in 92, for the purpose of securing
scientific study of the Hausa language, so
that the Scriptures might be translated into
the Hausa tongue, and the higher interests of

the people be furthered in other ways. Hausa is the Inigua Iranea of the Central Soudan, extending from the Sahara to the pagan tribes near the Gulf of Guinea, and from the Egyptian Soudan to the French colony of Senegal. The greater portion of this region is in the sphere of British influence. It is estimated that no fewer than fifteen millions of persons speak the Hausa tongue, and many of these can read and write it in a modified form of Arabic character. The first student, the Rev. C. Robinson, was sent out in April '93. Since then he has visited Lokoja and Kano, the commercial centre of Hausaland, and collected the materials for a grammar of the Hausa language, besides having translated two of the gospels into Hausa, and revised and corrected Dr. Schon's dictionary. The Cambridge University has accepted the offer of the Association to endow a Lecture-ship in Hausa for three years; and the University Press in '96 published under Mr. Robinson's editorship a volume containing facsimiles of the fragments of Hausa literature brought home by him from Kano. Hon Secretary, Rev. J. O. F. Murray, Dean of Emmanuel College, Cambridge; Hon. Treasurer, Mr. J. H. Iritton, 54, Lombard Street, E.C.

Hawaiian Islands A group of eight inhabited and four uninhabited islands in the North Pacific. Area 6697 set in the North Pacific. Area 6697 set in the North Pacific. Area 6697 set in the North Pacific.

North Pacific. Area, 6577 sq m; pop 190,020. Capital, Honolulu, on the south-west coast of the island of Oahu, pop. 29,020. Until 33 the Government of the islands was that of a limited monarchy, under Queen Liliuokalani, but then a revolution broke out, and a President and provisional executive were appointed. The Hawaiian Republic was proclaimed and a new Constitution was pro mulgated on July 4th, '94 Mr Dole was elected President for a term of six years. The islands were annexed to the United States in '98 (see History, below). The legislature now consists of a Senate of 15 members, and a Chamber of Representatives of 15 members. There is a State Council of 15 members, 5 appointed by the President, 5 by the Senate, and 5 by the Chamber The natives almost all profess the Christian faith, and education is general ports Sugar, rice, coffee, hides, wool, whale oil, and bone. The bulk of the trade is with the United States Steamers connect the islands with America, Australasia, and China Revenue, 97, £3,127,370, expenditure, £445,220, imports, 97, £5,127,370, exports, £3,304,401; debt, 97, £88,160 For Ministry, etc., see Diplomatic—Hastory, 98 The islands were definitely annexed by the United States and attached to the military department of California (July 11th), a garrison being sent out to Honolulu. The formal transfer took place (Aug 12th), and the American flag was 121sed. Mr. Dale took the oath of allegiance as President, and the islands were made "a new territory of the United States"

Hay, Folonel John, b. at Salem, Indiana, in 1838, and ed at Brown University. He was a barrister practising in the Supreme Court of Illinois till '61. when he gave up his profession in order to become private secretary to President Lincoln. He also served as his aide-decamp, and took an active part in the field as Adjutant and Lieut.-Colonel. After President Lincoln's death he continued his political and diplomatic career, and was appointed Secretary of Legation and Chargé d'Affaires at Paris ('65), Vienna, and Madrid. He then became President and Charge of Legation and Madrid.

dent Haves' First Assistant Secretary of State 70-81. But Colonel Hay is best known in this country by his literary efforts, the "Pike County Ballads" having won him high favour with the reading public. In conjunction with Colonel Nicolay he wrote the Life of President Lincoln, a task for which he was specially fitted. In Feb. '97, on President M'Kinley's accession, he was appointed Ambassador to Great Britain, a post which he filled with distinction till he became Secretary of State ın '98.

Hayti, called Hispaniola by Columbus, and afterwards San Domingo. The second largest island of the Antilles, lying between Cuba and Puerto Rico. Area, 28,249 sq. m.; pop. 2,000,000. There age two states in the island. The largest is the Republic of San Domingo (q.v.). The Republic of Hayti occupies the western portion of the Island. sq. m.; pop. 1,500,000. Capital, Port-au-Prince, pop. 50,000. It was originally a French colony, but was proclaimed independent in 1804, and is governed under a constitution drawn up in '67 The executive power is in the hands of a President, elected by the people in theory, but in practice by the Senate and House of Representatives, in whom rests the legislative power The House is elected directly for three years by all male citizens, and the Senate indirectly for six years. The religion is Roman Catholic, and elementary education is free, though in-efficient in many districts. There is an aimy of about 7000 men, and a navy of six small vessels. Revenue, '97, £1,500,000, expenditure, £1,580,000, debt, '97, £4,700,000; exports (coffee, mahogany, logwood, cotton, cocoa, turtle shells, and hides), '97, £2,614,500; imports, £1,140,000. Henley, W. E., poet, critic, and dramatist,
LL.D. St. Andrews '93, was b in 1849 at
Gloucester, at which city he was also educated. In his youth he suffered greatly from
ill health, and his "In Hospital. Rhymes
and Rhythms" ("A Book of Verses," fourth
edition '93) was largely a tellection of certain
experiences in the Old Infirmary, Edinburgh,
between '73 and '75. In the latter year he
began to contribute to various London journals, and was one of the founders of London
(7370), which he edited for some time, and in ('77-9), which he edited for some time, and in which many of his verses first appeared. His editorial career subsequently led him to the chair of the Magazine of Ait; in 89 to that of the Scots Observer, atterwards the National Observer, which he left in 94; and in 95 to that of the New Review. In these journals and in others—the Alhenaum and the Saturday Review among them—Mr. Henley's critical work has been done, but a reprint of some selected passages appeared in 90 as "Views and Reviews" (second edition '92). His dramatic work in collaboration with the late R. L. Stevenson

to which he contributed an essay on the poet's "Life, Genius, and Achievement," and "English Lyrics: Chaucer to Poe," appeared in '97. In '88 he was granted a pension (£225) on the Civil List for his services to literature. He is at present—after a long spell of ill-health—engaged on a new edition of Byron's prose and verse (12 vols.), with a fuller commentary than has ever been essayed before. Address:

Stanley Lodge, Muswell Hill, N.

Hereford, Bishop of. See under Peerage. Hereford, Bishop of. See under PEERAGE.

Herkomer, Hubert, R.A., was b. 1849 at
Waal, in Bavaria. At an early age he settled
with his parents first in America and subsequently in England. Joined the Institute of
Painters in Water Colours '71, but resigned '91,
and to the gallery of this Society and to the
Grosvenor and Academy exhibitions he contributed many drawings, chiefly of Bavarian
subjects. His oil picture, "After the Toil of
Day," in the Academy exhibition of '73, was
followed by his "Last Muster," the memorable
picture of the Chelsea pensioners ('75), which
gained him the "Grande Medaille d'Honneur"
at the Pairs Exhibition, '78. He was ('70) at the Paus Exhibition, 78. He was (79) elected an A R.A. Since 80 he has devoted much time to portraiture, and his portrait of Miss Grant is one of his many successes in that branch of art. He personally directs the well-known Art School at Bushey, of which he is the founder, and in connection with which a new theatre was opened in '88 with the per-formance of a romantic fragment entitled "The Sorceress," followed in '89 by a more important opeia, "An Idyll," both composed by the Pro-fessor himself. Elected a Royal Academician in '90. He is also Deputy President of the Royal Society of Painters in Water-Colours, and was elected on Associate of the Franch and was elected an Associate of the French Academy of Fine Art in '05.

Historical Manuscripts Commission. A Royal Commission was appointed in 1869 to examine and report upon the collections of manuscripts in the possession of private families and municipal authorities, who have rendered the commissioners every assistance in the investigation and classification of manuscripts illustrative of history, constitutional law and general literature. Fourteen reports and many appendixes thereto have been issued by the Commission describing some hundreds of private collections of manuscripts in Great Britain and Ireland. The Commission at in collaboration with the late R. L. Stevenson included four plays republished in [66]. His second book of verse, "The Song of the Sword," went into a second edition as "London Voluntaries" in [93]. A corrected reprint of Voluntaries" in [93]. A corrected reprint of Voluntaries in [93]. A corrected reprint of Salisbury, K. G.; the Marquess of Lothian, K. T.; the Marquess of Salisbury, K. G.; the Marquess of Crawford; the Earl of Crawford; the Earl of Rosebery, W. G.; Viscount Esher; Lord Edmond Fitzmatics, "The editor and compiler of "Lyra Heroica" ([93]); and, in collaboration with Mr. Charles Whibley, the editor and compiler of an anthology of English prose. The fourth and last volume of "The Centenary Burns," as Secretary. The reports are prepared by various inspectors acting under the authority of the Commission, many of the historical papers examined being deposited by their owners in the Public Record Office for the purpose. Office, Public Record Office, Charcery Lane, W.C.

Hockey continues to be most successful, and HOCKEY continues to be most successful, and gains ground every year. The number of clubs grows annually, and most towns have a club now. Ladies play a great dcal, especially in the country, though in the suburbs of London there are not many laddes' clubs at present. The hon, sec. of the Hockey Association is Mr. Stanley Christopherson, of the Wimbledon Hockey Club, who is also one of the best players Hockey Club, who is also one of the best players Hockey Club, who is also one of the best players of the game. Of the teams round London, Teddington is perhaps the best, having won 22 out of the 28 matches the Club played—only losing 2 and drawing 4—a record hard to beat Some of the principal matches resulted as follows—England beat Wales, Ireland beat Wales, England v. Ireland diawn. Cambridge beat Oxford, Cambridge Ladies beat Oxford Ladies, North of England beat Midland Coun-ties, South of England beat Midland Counties, Kent beat Surrey, Cheshire beat Lancashire, Cheshire beat Middlesex, Lancashire beat Middlesex, Kent beat Middlesex, South beat North, Warwickshire beat Shropshire, Glou-cestershire beat Somersetshire, Durham v York drawn Denbighshire beat Merioneth, Middlesex beat Surrey.

Hohenione, Prince, appointed Chancellor of the German Empire and Prime Minister of Prussia in Oct. 94, was b in 1819 He is a native of Bayaria, and a Roman Catholic, and hadre of Bavaria, and a Roman Catholic, and his long public career has given him exceptional experience and influence. So long ago as '66 he was Prime Minister of Bavaria, and in the war of '70 he took a most important part. In '74 he was chosen to succeed Count Arnim as the German Ambassador to France, and held the post till '85, when he became Governor General of Alsace-Loriance. When the crisis which resulted in the resulted with the resulted in the resul which resulted in the resignation of Count Caprivi and Count Eulenberg arose, in '94, he was appointed Chancellor and entrusted by the Emperor with the continuance of Count Caprivi's poncy. He is married to Princess

Sayn-Wittgenstein, a daughter of an aide de camp of the Czai Nicholas I

Street, Kensington, Branch.

Home Office. This is a many-sided department, and makes great demands upon the time and judgment of its parliamentary chief. He grants certificates for the naturalisation of aliens. Addresses to the Sovereign and the gracious replies thereto pass through his office, reports of Royal Commissions are forwarded to him to be laid before the Sovereign, by whose command they are subsequently presented to Parliament; he nominates the principal officers

of the Isle of Man and the Channel Islands; and most civil knighthoods are conferred upon his most of in impanaeous are conserved upon in recommendation. Heavy fees are paid to the Department by those upon whom poerages and other dignities are bestowed. The Home Secre-tary may grant Provisional Orders for the im-provement of unhealthy areas in the Metropolis, and the functions of licensing and inspection in regard to the practice of vivisection, schools of anatomy, and retreats for habitual drunkards are vested in him. One staff of inspectors from the Department is charged with the supervision of coal and metalliferous mines; another sees that the Acts relative to the manufacture and storing of explosives are properly carried out; and a third visits factories, printing works, bleaching works, brickyards, white lead works, and workshops. The Home Secretary is also and worksnops. The Home Secretary is also charged with powers of inspection under the Burnal Acts, and may permit in certain special cases interments in closed burnal grounds, or the exhumation of bodies where there is supprising of four plant. there is suspicion of foul play. Under the Prevention of Cruelty to Children Act he is given authority to direct a factory in spector to see that the conditions and respector to see that the conditions and restrictions of any licence granted in respect of the employment of children of between the ages of seven and ten years in theatres are duly complied with. His consent is required before certain steps can be taken under the Building Societies Act, '04, and he may, on the application of a County Council, make orders for the protection of wild birds, or prohibiting the taking or destroying of wild birds' eggs. His duties in connection with the police include the appointment of with the police include the appointment of the Chief Commissioner of the Metropolitan Force, and the approval of rules made for the service by that officer (see Police of THE UNITED KINGDOM); he must be satisfied, before granting his certificate under the County and Borough Police Act, that the police of a county or borough has been maintained in a state of efficiency in point of numbers and discipline; and should his certificate of efficiency by withheld, the sum annually payable by the County Council in substitution for local grants towards the cost of pay and clothing of the police is forfeited. The prevention and suppression of local disorder lies with the local authorities, but he may authorise the employment of the armed forces of the Crown in order to aid the local forces in the suppression of riot and disorder. He appoints and frequently puts in motion the Director of Public Prosecutions. The control of the prisons and convict establishments, and the inspection of reformatory and industrial schools are exercised by his Department, and he has the charge of criminal lunatics and invane prisoners. He may recommend to the Crown the remission of punishment passed upon offenders, either by justices of the peace or by the judges, his most anxious and responsible function in this councetion being in regard to petitions for commutation of the death sentence; but before deciding in such grave matters he usually takes such judicial, legal, and, in cases where insanity is suggested, medical opinion as he may think necessary, to enable him to arrive at a just conclusion. The present Home Secretary is the Rt. Hon. Sir M W. Ridley, Bart See Ministray and Secretary of State. Home Rule. In the '94 edition, under the heading Session, Part I., sect. 3, and Part M., of punishment passed upon offenders, either by

sects. 79-101, full particulars are given as to the provisions and progress of the Home Rule Bill, which was introduced by Mr. Gladatone in the Session of '93. For the Local Government (Ireland) Act '98, see Sission, sect. 63. Honduras, a republic in Central America

Area, 43,000 sq. m.; pop. 450,000. Capital, Tegucigalpa, pop. 12,000. Governed by a President and Congress, elected for four years During '98 Honduras, Nicaragua and San Salvador combined to form the United States Capital, of Central America. Costa Rica and Guatemala may eventually join the combination. country possesses great agricultural resources and much mineral wealth, but these he neglected because of internal disagreements and the consequent paralysis of enterprise Agriculture, however, is now showing signs of development. Chief products: tobacco, sugar, of development. Ghief products: tobacco, sugar, conee, indigo, wheat, mahogany, lindes, and cattle. Revenue, '66, £40,000; expenditure, £471,750; imports, '96, £275,000; exports, £051,000, debt, £5,400,000. The loans were raised for the purpose of constructing an inter-oceanic railway, but a small proportion only was expended for this purpose. The arrears of interest amount to over £11,000,000 Army small, but there is a militia of about 20,000. See Central America and Diplo-MATIC.

Hong Kong. An island and British Crown colony, situated close to the mouth of the Canton river, and divided from the southern-coast of China by a narrow strait—the Ly-ee-moon pass. It was ceded to Great Britain in 1841, at the close of the opium war. The pennsylle of Kawling opposite the island and peninsula of Kowlung, opposite the island, and the small adjacent Stonecutter's Island, now strongly fortified, appertant to the colony Capital, Victoria (commonly called Hong Kong). Capital, Viotoria (commonly called Hong Kong). Area, 32 sq. m, pop. 261,258. Government is in the hands of a Governor, with Executive and Legislative Councils. Religion and education are abundantly provided for. The island is our "Eastern Gibraltar," and is both a military and naval station, forming the headquarters of the China Squadion. It is also the great emporium for the European trade with China, and for the local constraints and is free port. Imparts chiefly coast trade, and is a free port. Imports, chiefly goods for China, cottons, and other manufatured articles; exports, tea, silk, and other Chinese produce. For latest financial statistics Chinese produce. For latest financial statistics see British Empire (table); and for Executive Council see Diplomatic History, '98 — For the better protection of the colony, the territories on the mainland opposite, behind Kow-lung up to a line joining Mirs Bay and Deep Bay, as well as the island of Lau-tao, were leased for 99 years to Great Britain by a convention (June 9th). The area leased amounted to 200 so, miles. (June oth). sq. miles.

Hope, Anthony, is the pen-rame of one of the most brilliant of the younger novelists of the day. His real name is Mr. A. H. Hawkins, and he is a younger son of the Rev E. C.

Mark," was published in 'oo, and there have since followed, "Father Stafford," "Mr. Witt's Widow," "Sport Royal," "Half a Hero," "The Prisoner of Zenda," "The God in the Car," "The Dolly Dialogues," a collection of exquisitely finished dialogues, "Count Antonio" ('95) "Comedies of Courtship," and "The Heart of Princess Osra" ('96), "Phroso" ('97), "Simon Dale "and "Rupert of Hentzau," a sequel to the "Prisoner of Zenda" ('98). A dramatic version of "The Prisoner of Zenda" proved very successful in '96, and a comedy. proved very successful in '96, and a comedy, "The Adventures of Lady Ursula," was successfully produced in the United States, and in London (98) Address. 16, Buckingham Street, Strand, W C

Horological Institute, The British, has for its main object the encouragement of the English watch trade. Technical classes and examinations are held by the Institute at its headquarters, Northampton Square, E.C., and certificates of competency are granted. It publishes monthly the "Horological Journal," which circulates among watchmakers, jewellers, and silversmiths. There are 315 members and 15 associates. Secretary, F J Britten.

Horton, Robert F., M.A., D.D., Congrega-tional minister, was b 1855, ed. at Shrewsbury, whence he went to New Coll., Oxford (74), where he commenced a bi illiant college career by obtaining First Class in Moderations, and was President of the Union, and in '78 a First in Classical Greats Elected Fellow of his college '79, but excluded from an examine ship in the Rudiments of Faith and Religion by reason of his Nonconformist views He began his ministry at Hampstead (80), and his success there soon necessitated the building of a cess there soon necessitated the building of a larger church, in the Lyndhirst Road, which was opened in '84 Hc has published "Inspiration and the Bible," '87, "Revelation and the tion and the Bible," '87, "Revelation and the Bible,' '93, a course of lectures on "Preaching," delivered at Yale, and subsequently issued in book form as "Verbum Di," '93, "The Cartons of St. Mark" '94, "The Teaching of Jesus" '95, "The Life of John Howe," "The Book of Proverbs," in the Expositor's Bible, "The Art of Living Together" '95, "The Four Pillars of the Home," "Oliver Cromwell, a Study in Personal Religion," "Success and Failure," "The Women of the Old Testament," all in '97; "Brief Sermons to Busy Men," "England's Danger," and "The Commandments of Jesus," '98 Address Chesils, Christ Church Road, Hampstead, N.W.

HOSPITALS AND DISPENSARIES.

The first annual meeting of the Council of the Prince of Wales's Hospital Fund was held at Marlborough House on Feb. 4th, '98. The total paid to the Fund for the eleven months total paid to the Fund for the eleven months ending Dec. 1181, '97, was £227,552. Of this amount £56,286 5. was given to the various London Hospitals, and £167,022 198. 8d. was invested, the expenses were £3704, 75. 9d The sale of stamps produced £34,776; the Daily Telegraph fund reached £36,750, and that of Lloyd's News £2618. a total of £74,174, the wreater portion of which represents efforts not Hawkins, vicar of St. Bride's, Fieet Street, and was b. in London, Feb. 0th, 1863. He was ed. at Marlborough Coll. and Balliol Coll, Oxford, of which college he was a scholar. He gained a first class in Classical Schools in '85, and took his M.A. degree in '89. He took the step which is apparently necessary to success in literature by devoting himself at first to the law, and was called to the Bar at the Middle Temple in '87. His significantly named first book, "A Man of the significant sign likely to be repeated. The annual subscription list is about £22,000. It will thus be seen that the object of the Prince of Wales—viz., "to raise a sum of £100,000 to £150,000 a year from persons not subscribers to Hospitals at all "—

The following list comprises most of the important hospitals and dispensaries in London, with their last notified annual income and secretary's address:

Bischoffsheim; Hon Secretary, Mr Thomas Ryan, Secretary of St. Marys Hospital, W., to which address all urgent communications should be sent.

House of Commons. See Commons, House

Howard Association (founded 1866) was instituted, under the patronage of Lord Brougham, to promote the best methods of treatment and prevention of crime and pauperism. The principles of the great philanthropist, John Howard, have been generally embodied in the work of the Association It collects information both at home and abroad bearing on the present systems of punishment and prevention of crime.

Many books and pamphlets dealing with pauperism, boarding-out neglected children, vagrancy, and kindred subjects, have been disseminated by the Howard Association. A remarkable work, entitled "Penological and Preventive Principles," which has received high official recognition, and reached a second and enlarged

serving his time with his father as a printer, he adopted journalism as his profesion, and in '66 was appointed editor of the Atlantic Monthly, from which he retired in '81. His poems, sketches, and stories are characterised by a lightness of artistic touch which marks the individuality of their author, and have had a wide circulation on both sides of the Atlantic. Mr. Howells was American Consul at Venice 61-5. Amongst the most popular of his numerous writings are "A Foregone Conclusion" and "The Rise of Silas Lapham" In '92 he became the editor of the Cosmopolitan Magasine, but after a short tenure resigned the post. sime, but after a short tenure resigned the post. Published "The World of Chance" ('93), "A Fravellet from Altruria" ('94), "Impressions and Experiences" ('96), "The Landlord of Lion's Head," "An Open-eyed Conspiracy" ('97), and "The Story of a Play" ('98). Address Authors' Club, New York, U.S.A. Hughes, Rev Hugh Price, M.A., the leader of the "Forward Movement" of Wesleyan Mathodism is a native of Wesleyan

Methodism, is a native of Wales, and was b. 1847. Ed at Richmond Theological Coll., and gradu-ated M.A at London Univ Has held appoint-ments at Dover, Brighton, Tottenham, Dulwich, Oxford, Brixton, and West London Is a member of the Legal Conference Has edited, with conspicuous success, the Methodist Times since 85, and is the Superintendent of the Wesleyan '85, and is the Superintendent of the Wesleyan Mission to the West End He is the author of "Social Christianity," "The Philanthropy of God," "Ethical Christianity," and "Essential Christianity." In '92 he took a prominent part in the "Review of the Churches" Conference at Grindelwald He is one of the founders of the Evangelical Free Church Movement, and was President of its National Council in '96. was President of its National Council in 'o6. He is a Vice-President of the United Kingdom Alliance, and an a tive member of the Anti-Gambling League In '98 he was elected President of the Wesleyan Conference.

Humanitarian League, The, was founded in 1894, its main object being to apply and emphasise, wherever possible, the principle that it is iniquitous to inflict unnecessary suffering on any sentient being. The League proposes a thorough revision and more equitable administration of the criminal law and prison system, deprecates the various provocations to aggressive warfare, and urges the need of amending present social conditions.
With regard to the treatment of animals, it denounces the practice of vivisection as incompatible with the fundamental principles both of humanity and sound science, condemns cruel sports, and aims at the mitigation of the sufferings to which animals are subjected in the cattle traffic and the shambles. The **Hon.** state in the samples The Hon. Secretary is Mr. Henry S Salt, and the offices are at 52, Chancery Lane, London, W C.

Humbert I, King of Italy, was b. 1844; succeeded his father Victor Emmanuel '78. While Orown Prince he distinguished himself by the active part he took in the movement for promoting Italian Unity. He shared with Garibaldi the triumph of the reorganisation of the king-dom of the two Sicilies. Prince Humbert served with distinction in the war of '66, and displayed much personal bravery in the moment of disaster at the battle of Custozza, in which the Italians edition in '95, is the work of Mr. William Tallack, who is the Scoretary of the Association. Office, S. Bishopsgate Street Without, E.C.

Rowells, William Dean, the eminent Emmanuel, Prince of Naples, was born Nov. American novelist, was b. in Ohio, 1837. After 11th, '69. His marriage to Princess Helen of

Montenegro took place in October 'o6. During his Majesty's visit to Naples, Nov. 17th, '78, a would-be assassin named Giovanni Passananti made an attempt upon his life with a poniard, made an attempt upon his the with a politary, and another attempt in '97 also happily failed. His Majesty is very popular among his subjects. The Queen is well known as an accomplished artist. The royal silver wedding was celebrated at Rome with splendid pomp in April '93.

Hungary. See Austria-Hungary.

of foxhounds, 152 of harriers, and 50 of beagles | gestion" (in '97. The packs were thus distributed: In (Pentland)

England and Wales there were 19 packs of staghounds, 160 of foxhounds, 108 of harriers, and 43 of beagles. In Ireland there were 5 packs of staghounds, 23 of foxhounds, 26 of harriers, and 4 of beagles. In Scotland there were 10 packs of foxhounds and 3 of harriers.

Husband and Wife. See Law, '98.

Hypnotism. See '95 and previous editions artist. The royal silver wedding was celebrated at Rome with splendid pomp in April '93.

Hungary. See Austria-Hungary.

Hunting. According to figures given by the Field their has been of late years a steady pincrease in the number of packs kept in all parts of the kingdom. There were in the United Kingdom in '98 24 packs of si aghounds, 193 of foxhounds, 193 of harriers, and 47 of beggles, as against 26 packs of staghounds, 193 of foxhounds, 193 of harriers, and 50 of beagles, as against 26 packs of staghounds in '07. The packs were thus distributed In '08.

Ibsen. Henrik, the Norwegian dramatist and poet, was been Maich acth, 1828, at Skien. After serving his apprenticeship to an apotherary, he went to Christiania Universal to study medicine. In 50 he produced his flist play, "Cattilina", and in 51 was appointed to study medicine. In 150 he produced his flist play, "Cattilina", and in 51 was appointed to the Norske Theatre at Bergen by Ole Bull. In 152 he travelled for a time in Denmark and Germany, and in 157 he received the post of director of the Norske Theatre at Christiania, which he managed till 62. During this period several of his plays were written and produced. Most of his works are translated into German, and many into English His "100ll's House" was produced at the (Olympic, in London, July '89, and his drama "Rosmersholm" at the Vaudeville Theatre in "Rosmersholm" at the Vaudeville Theatre in since maintained, and the English Illustrated Magazine. and produced. Most of his works are translated into German, and many into English His "Doll's House" was produced at the Olympic, in London, July 89, and his drama "Rosmersholm" at the Vaudeville Theatre in Feb. '91, followed by "Ghosts," and "Hedda Gabler." Ibsen'scharacters are most powerfully drawn, and impress even the reader of his plays as being living men and women. The "Pillars of Society" perhaps represents his social philosophy as closely as any of his plays, while "Brand" is held to be his masterpiece "Ghosts" is a striking, almost ghastly, study of heredity. "The Master-Builder" was transof heredity. "The Master-Builder" was translated, published, and periformed in English early in '93. It produced violent dissensions amongst the critics, and even alienated some who had before been pronounced libsenites. Two English translations of "Brand" were published in '94, "Little Eyolf" in November of that year, and "John Gabriel Borkman" in '96 A distinguished group of English admirers presented him with a set of silver on his 70th birthday, '88.

IMPERIAL FEDERATION.

The Imperial Federation League was formed at a Conference held in '84 under the chairman-ship of the late Right Hon. W. E. Forstei. A special committee of the League appointed in '91 prepared a practical scheme of Federation, and presented its report on Nov. 12th, '92. The substance of the report was as follows—It being admitted that in order to combine the resources of the Empire for the purpose of defending and maintaining its purpose of defending and maintaining its common interests, some central body, in which all its parts are represented, is essential, the question of the nature and functions of such a body at once arises. It remains then to consider—(i) How shall a Council of the Empire be constituted? The Council should consist of members appointed by the United Kingdom and the self-governing Colonies. The three great groups of self-governing Colonies. three great groups of self-governing Colonies, North American, Australasian, and South Aftican, should be directly represented in that Council. India and the Crown Colonies would clected by household suffrage and the Upper Council. India and the Crown Colonies would twelve members, six elected, and six nominated by the King of Denmark. Exports: taries of State at present charged with the sulphur, Iceland moss, wool, dried fish, seal-sakins and oil, whale-oil and baleen, eiderdown, other manner as might become desirable. The bird-skins and ponies. Manufactures domestic. Council might include on the part of the United

Kingdom, the Indian Empire, and the Crown Colonies, the Prime Minister, the Secretaries of State for Foreign Affairs, War, Colonies, and India; the First Lord of the Admiralty and the Chancellor of the Exchequer; and on and the Chancellor of the Exchequer; and on the part of the self-governing Colonies, of repre-sentatives of the three groups. (2) By what means can the resources of the Empire be most effectively combined? Such a Council, being furnished with adequate information relating to matters of foreign policy, should deal with Imperial Defence; and in matters of defence Imperial Defence; and in matters of defence should supervise the appropriation of any moneys provided for the defence of the Empire by the common contribution of the United Kingdom and the Colonies. It is in the maintenance of the sea communications of the Empire that the community of interests is most absolute. The primary requirements of combined defence therefore are a sea-going fleet and naval bases. It may be laid down as a leading principle that as all parts of the Empire enjoy the benefits of Imperial Defence they should contribute to its cost. In the case of India and the Crown Colonies the United Kingdom would continue to be responsible for all matters relating to their respective contri-butions. The method of raising contributions would be left at the outset to the choice of the individual self-governing states, but future developments may disclose a means of raising the necessary contributions upon some uni-form principle throughout the Empire, by the allocation to this purpose of special sources of revenue or otherwise. The amounts to be contributed by each country should be fixed in the first instance for a term of years by a conference, and be subject to periodual revisions. There is no reason to doubt that if the necessities of the case were made clear, the Colonies would be prepared to take their share in the cost of the general defence of the Empire, provided that they were given a proper share in the control and expenditure of the common fund. It is pointed out that by so doing those countries would be undertaking an incomparably smaller financial expenditure than would be required for their own defences if these did not form part of the general scheme of defence adopted for the empire.

After the adoption of this report by the Council it was recognised by the leaders of the movement that its first stage, that of general discussion without any plan, had been passed, and that it would be necessary in future to advocate practical steps for bringing the matter to an issue. As the League had been avowedly founded without any defined policy as to the way in which Federation should be carried out, and as it was evident that opinions within the League would be likely to differ upon this point, it was decided to dissolve the League at the end of '93, in order that complete freedom of opinion should be afforded in advocating practical steps. The League was accordingly dissolved on Dec. 31st, '93, by resolution of the Council adopted some months previously. This step has had the effect of giving increased activity to the movement in some directions, and it is now being prosecuted by several bodies in the United Kingdom, as well as by branches founded by the League in Canada and Australia. Among the former may be mentioned The United Empire Trade League, Sir Howard Vincent, M.P., Hon, Sec., which advocates a commercial union of the Empire by means of Protection;

The British Empire League, Sec., C. F. Murray, 112, Cannon Street, London, F.C. (see separate account under the heading British Empire LEAGUE); The Imperial Federation (Defence) Committee, Hon. Sec., A. H. Loring, 25, Old Queen Street, Westminster, which advocates combination for the purposes of Defence on the lines of the report quoted above, in the first instance by maintaining a common Navy; the Unity of the Empire Association, Edinburgh.

The celebration of the sixtieth year of Her Angesty's reign during 97 was the occasion of a gathering in London of the Prime Ministers of all the self governing Colonies, who were entertained by H.M. Government as the guests of the country. This was the second occasion of the country This was the second occasion of a meeting of representatives of the Colonies in London, the first having been the conference of 87. After taking part in the Queen's procession and the attendant festivities, the Premiers met the Secretary of State for the Colonies (Mr Chamberlain) in conference (see COLONIAL CONFERENCE, 97). The subject of Imperial Federation was discussed at one of these meetings, and though more than one of the Premiers directly advocated the representation of the colonies in a Council sitting in London, the opinion of the greater number was expressed in the observation that the Colonies were very well as they were at present. The importance to the Colonies of maritime defence was recognised by Cape Colony in the offer to Her Majesty's Government of an monclad as a contribution to Her Majesty's Navy It has since been proposed to conveit this offer into an annual contribu-tion of money The Canadian Tariff Act came into force on Aug. 1st, '98, setting up a preferential tairif in favour of the United Kingdom and various Colonies (see Canada). Penny postage between Great Britain and Canada and Cape Colony was also set up in '98. A movement was set on foot in Canada with the object of securing the enrolment of Canadians in the Royal Naval Reserve, the proposal being that they should be trained at the expense of the Canadian Government but paid by the British taxpayer. See GREAT BRITAIN AND HER COLONIAL PRADE Consult "Round the Empire" (Cassell), and "Imperial Federation" (Macmillan), by Mr. G. R. Parkin; "Britannic Confederation" (Philip); Publications of Imperial Federation (Defence) Committee (P. S. King & Co.); Britannia, monthly (Simpkin, Marshall & Co., Ld.).

IMPERIAL INSTITUTE.

The Imperial Institute of the United Kingdom, the Colonies, and India, was founded in 1887 as a record of Her Majesty's Jubilee. (See eds. '87 and '88.) In the main, the aims of the Institute may be said to be the formation of complete collections of the natural products of the British Empire, the establishment of a system of commercial intelligence to work with and supplement the display of the specimens, and the practical adaptation of both to the purposes and advancement of trade. The government of the Institute is carried on by a chartered body, whose form of constitution was approved by a royal warrant dated April 21st, '91. The governors are 125 in number, 12 being nominated by the Sovereign, 6 by the President, 36 by Colonial Governments, 15 by the Government of India, by 21 county and municipal authorities of the United

Kingdom, and 27 by the various learned and technical societies and institutions of the Empire. The full complement is made up with certain ex-office governors, who are principally high officials of the State. The foundation-stone was laid by Her Majesty on July 4th, '87, and the buildings were partially opened in June '92. The Fellows of the Institute number over 8000, but nearly 1500 of them are Chartered Life Fellows, principally by reason of being original subscribers, and therefore exempt from payment of subscription. The annual subscription for the United Kingdom is £2; for Indian and Colonial Fellows £1 the wives of Fellows are entitled to Fellowship on election at half rates. The Institute practically offers all the advantages of a club-house. Vast quantities of specimen products from all parts of the Empire are in the galleries. Collections of products have been prepared and transmitted by the Governments of India, Ceylon, Straits Settlements, Mauritius, and Seychelles; the Canadian provinces of Quebec, Ontario, New Brunswick, Nova Scotia, British Columbia, and Manitoba; New South Wales, Victoria, South Australia, Queensland, Western Australia, Tasmania; West Coast of Africa, Zanzibar, Cape Colony, Natal, Bechuanaland and Mashonaland, Jamaica, Bahamas, Bermuda, Hong-Kong, British Noith Borneo, and Malta. Ourators and officers in charge of collections have been appointed by the Governments of India, Ceylon, the Canadian provinces, Cape Colony, Jamaica, and Bahamas.

The formal inauguration by the Queen took place on May 11th, '93. During the summer of '98 an Exhibition of Acetylene Gas apparatus was held, and the celebrated Concert Orchestra from La Scala, Milan, under the directorship of Leandro Campanari, gave a series of concerts twice daily. Admission to the Institute during the summer season is free from 10 a m to 1 p.m. on every week-day except Wednesday; after 1 p.m. on payment of 12 On Wednesdays he Institute 12 exclusively reserved for the inspection of Fellows and friends introduced by them with tickets. During the autumn and winter seasons the Commercial Collections and the Commercial and Industrial News Room are open free to the public from 11 a.m. till 5 p.m. Lectures and concerts are also given during the winter season. In connection with the School of Modern Oriental Studies, the Ouseley Scholarships of '99, each of £50 per annum for two years, will be awarded, should sufficient merit be shown, the first for proficiency in Arabio, the second for proficiency in Sanskirt, and the third for proficiency in Persian. In lan. '95 was published the first number of the Imperial Institute Journal, which is issued every month as a record of the trade and commerce, finance, and agriculture of the British Empire. The Imperial Institute Year-book is a unique and most valuable compilation dealing with the history, physical geography, natural resources, industries, and commerce of the Colonies and India, and collating facts and figures with regard to those mainly taken from official sources which had never before been comprehensively brought together. A most valuable feature of the book is the inclusion in 10 of diagrammatic charts, showing the fluctuations in money and discount, in the exchange value of silver, etc. The Scientific and

Technical Department of the Institute, opened in '94 for the practical investigation of economic products furnished by the Empire, is partly supported by special contributions from the Royal Commissioners of the Exhibition of 1851 and the Goldsmiths' and Salters' Companies. In '96 the Laboratories and staff were much extended, and the department was placed under the direction of Professor W. R. Dunstan, M.A., F.R.S. The Department has attached to it a special staff of Scientific and Technical Referees. Hon. Scoretary and Director, Sir Frederick Abel, Bart., K.C.B., D.C.L., F.R.S.; Director of the Scientific and Technical Department, Professor Wyndham R. Dunstan, M.A., F.R.S; Assistant Secretary, Imperial Institute, Imperial Institute Road, S.W.

Incorporated Law Society, The. From papers discovered a few years ago at the Incorporated Law Society, and recently published, it appears that in the year 1730 a society called the "Society of Gentlemen Practisers in the several Courts of Law and Equity" was established, for the promotion of fair and honourable practice and the detection and discountenance of all unfair practice. This Society continued in active existence from that time till 1822, from which period all trace of it is lost. In the year 1825, however, certain leading solicitors issued a prospectus advocating the establishment of a "Law Institution." The deed of settlement of the Institution. The deed of settlement of the Institution was completed in Feb. '27, and a royal charter was obtained in Dec. '31. In '45 the Society, which had been originally constituted as a joint-stock company, was remodelled upon the principle of other learned and professional bodies, and received a newcharter. This charter was amended by a supplemental one in '72. Any solicitor practising in Scotland, as well as any solicitor or writer who has ceased to practise, is eligible for election as a member of the Society. The administration of business is in the hands of an elective council of forty ordinary members, of whom ten vacate their seats every year, and ten extraordinary members of the Society who are

presidents of provincial law societies. The President and Vice-President are annually elected by the members of the Society from the members of the council. The members of the Society at present number 7882. Its building the Society at present number 7002. Its sumings are stuated in Chancery Lane, and comprise a handsome hall and a library of upwards of 36,000 volumes. The general function of the Society resembles that which the Inns of Court are supposed to discharge. It takes care of the professional training, character, and interests of solicitors. When it was founded no test was required from any person wishing to be-come a solicitor beyond evidence of character and of having served under articles for the prescribed time. The Society instituted lectures on law in '33, and in '36 obtained from the judges authority to examine students on the completion of their articles. Since then Preliminary and Intermediate Examinations have been added, and the entire control of all the examinations has been transferred to the Society. Under recent legislation, all cases of alleged malpractice by solicitors are heard before a specially appointed committee, which, when necessary, makes a report to the light Court. The Society exerts itself to promote what it considers the legitimate interest of the public and of the profession. It has also assisted in promoting reforms beneficial to the whole community, such as the concentration in one building of the various Courts, the Conveyancing Acts, the Trustee Act, and the Companies Act of '98. The improved standing of solicitors is in great pair due to the exertions of the Society. Secretary, E. W. William-

tions of the Society. Secretary, E. W. Williamson. Office. Chancery Lane Consult the Handbook of the Society.

Incorporated Society of Authors. The, established in 1884 by the late Sir F. Pollock, and other eminent literary men, under the presidency of the late Lord Tennyson Its object is to defend the interests of literary, dramatic, and musical property, to maintain the rights of authors of all the above works, to advise them as to questions of copyright, and in other ways to render them assistance in their agreements and the publication of their works; to assist them to recover accounts and moneys to assist them to recover accounts and moneys due under their agreements, or for work sent to magazines, etc. Also to procure in England the passing of an Act which shall amend and consolidate the law of Domestic Copyright. During '96 the Society diafted a small Copyright Bill to amend some of the worst features at present existing. This Bill passed the Lords in '97. It is hoped that either this Bill will become law or that in the near future the will become law, or that in the near future the Government will bring forward a full consoli-Government will bring forward a full consolidating Bill. It is the only association of the kind in England, but its model, "Lå Société des Gens de Lettres," has been flourishing for over fifty years in France. The works published by this Society are "Grievances of Authors," "Literature and the Pension List," "History of the Société des Gens de Lettres," "The Cost of Production," "The Methods of Publication," "Copyright Law Reform," and a short record of the Society work from its foundation down to '92. The organ of the Society is The Author (monthly). organ of the Society is The Author (monthly).

INDIA.

India is a dependency of Great Britain, consisting partly of territory under the direct administration of British officials, and partly of native states, all subordinate, in varying degrees of relationship, to the suzerain power. The British territory was acquired by the East India Company, by conquest or treaty, in the course of one hundred years, dating from the battle of Plassey (1757). As a result of the mutiny of the Sepoy army (1857-8), the East India Company ceased to exist; and the direct sovereignty was vested by Act of Parliament in the Crown. In accordance with an Act of Parliament passed in '76, Queen Victoria assumed the title of "Empress of India," Kaisar-i-Hind. The Parhament of the United Kingdom The Parliament of the United Kingdom is, of course, supreme over India; but this supremacy is enforced rather by means of ministerial responsibility than by direct legislation. Practically, all the statutes relating to India are in the nature of either constitutional enactments or financial provisions. The Act of Parliament that abolished the Company also created a Secretary of State for India, together with a Council (selected for a period of ten years from among Indian officials for the most part), in which is vested the authority of the Crown. In England every measure concerning India runs in the name of the Secretary of State; and he alone is responsible to Parliament. In practice he is always a Cabinet minister of the first rank. In always a Cannet minister of the first rank. In India the supreme authority, both executive and legislative, is vested in the Governor-General in Council. The Governor-General, or Viceroy, has power to overrule his Council in cases of emergency. For ordinary purposes the Council is composed of six members, all appointed, like the Governor General himself, by the Crown These six members preside over the departments of Finance and Commerce, Home Affairs, Revenue and Agricul-ture, Military Administration, Legislation, and Public Works The Commander-in chief is appointed as an extraordinary member. For purposes of legislation this Council is augmented by about twelve additional members, nominated by the Governor-General, of whom one-half must be non-official persons, and of whom some are always natives. The four whom some are always natives. The four provincial legislative councils and the Calcutta Chamber of Commerce have each the right to recommend one member. The seat the Supreme Government is Calcutta, with an annual migration to the hill station of Simla for the hot season. As regards the work of administration, India is divided into several divisions. Two of these, Madras and Bombay, which boast a historic existence for two centuries, are styled l'residencies, and enjoy a certain precedence. They are each ruled by a Governor, appointed by the Crown, with legislative and executive councils modelled on those of the Governor-General. They each possess an army and a civil service of their own. Bengal and the North-West Provinces are under Lieut. Governors and have each ere under Lieut. Governors and have each which boast a historic existence for two cen-Society is an agency, the Authors' Syndicate, are under Lieut. Governors and have each a which undertakes business arrangements for legislative council only. The other provinces

have no councils or legislative powers. The more, of less importance (the Central Provinces. Burma, and Assam), are under Chief Commissioners. In addition, there are some smaller tracts under the direct administration of the Governor-General. Within the provinces the actual unit of administration is the District, which forms the charge of an officer, usually styled Collector or Deputy-Commissioner. His princi-pal duties are executive, magisterial, and fiscal; but he also exercises supervision over police, jails, schools, public works, forests, etc. Districts are combined into Divisions under Commissioners. As to justice, the Collector in each District is usually judge both of first instance and appeal. Madras, Bombay, Bengal and the North-west Provinces have each a High Court, from which there is an ultimate appeal to the Privy Council in England. The Punjab has a Chief Court, and Burmah, the Central Provinces, Oudh and Sind, have each a Judicial Commissioner. For local government purposes there are the municipal bodies, numbering about 750, in all towns of sufficient size, appointed on the elective principle, and in the rural districts there are over a thousand district and local boards. The staff of administration consists of. (1) the covenanted civil service, appointed after competitive examination in England; (2) the statutory civil service, selected from among natives, (8) inilitary officers of the staff corps in civil employ; (4) a miscellaneous class of uncovenanted civil servants of different grades, who may be either Europeans or natives. There still remain a number of native or feudatory states, over which the British Government has indeed control, but not control of the direct character which it exercises trol of the direct character which is cover the wholly British territory. Some, but not all, of these states pay tribute to the supry me Government. The nature of British control over these states varies, and is exerted chiefly through a political resident, who assists the native princes. I hese princes can manage their internal affairs, but have no power to make war or peace. Their external relations make war or peace. Their external relations are in the hands of the Supreme Government, and they can only maintain a limited military force. The latest census of India ('91) states that the total area of these states was 595,167 sq. m., and pop. 66,050,479. Religion. The Hindu religion is that of three-fourths of the whole population. The Mohammedans or the whole population. The Monammeuans number about 57,000,000 adherents, the Buddhists about 7,000,000 (chiefly in Burmah), and Christians about 2,500,000. The total number of schools and colleges, '97, was 152,841, attended by 4,303,100 pupils, of whom only 397,103 were girls. The large majority of the population are engaged in agricultural pursuits, nearly 200,000,000 either being engaged in tilling the soil or dependent upon those so engaged. Metal and textile workers, glass and pottery workers, with their dependants, number close on 20,000,000, and there are large numbers employed in service. In every province a special department is established for the purpose of improving agricultural methods and dissemi-

also exists in the Central Provinces, Madras, and Assam. Under this system the land is held in large estates by zamındarı and by village communities, and the state revenue is assessed and paid on each estate as a whole for stated periods. The rayatwar system prevails in Bombay, Madras, Sind, Burma, Assam, and to some extent in the Central Provinces. Under this system the land is held by petty proprietors direct from the Government, and the revenue is assessed with each holding, and is paid directly to the State. The country is rich in coal, though little mining has as yet been done. The production in '97 was nearly 4,000,000 tons. The railways of India have been constructed either by private companies to which the State guarantees interest, or directly by the State. The total number of miles open for traffic in March '97 was 20,390, while over British territory alone (excluding native states) 18 964,993 sq. m., and the population, 221,172,952. The total area of India, including Burma and the native states, amounts to 1,560,160 sq m, and the total population, according to the corrected census of '91, numbers 287,223,431. The revenue for '96-7 was, reckoning the rupce at 1s. 44°, £62,753,160, and the expenditure £63,889,840, the estimates for '97-8 showed a revenue of £64,374,000, and expenditure of £67,963,000; the estimates of '98-9 a revenue of £66,057,000, and an expenditure of £65,463,000. The public debt is Rx. 114,862,083 in India, and £107,404,143 in England. The imports, including merchandise and treasure, for the year ending March 31st, '97, were 559,453,000, and the exports 7.72,607,000 For all details as to the army see ARMY, BRITISH; see also BRITISH EMPIRE (table), BURMA, DIPLOMATIC, INDIAN CURRENCY COMMISSION,

but not all, of these states pay tibute to the supreme Government. Metal and text

notes to an amount equal to the value of gold deposited with the Secretary of State in London. He said that the Bill was necessary to relieve the stringency in the money market, and that it would certainly have this effect. The Bill was shortly afterwards carried, and its operation extended for two years. Most of the Afridi tribes had been brought into a submissive frame of mind by the middle of this month, except the Zakka-Khels of the Khaibar, who seized every opportunity of harassing the British force. Serious plague niots, accompanied by some loss of lite, occurred at Bombay (March oth). The Criminal Procedure Bill was finally passed by the Legislative Council (12th), 22 amendments having been accepted and 17 rejected Sir William Lockhart had an interview with a number of chiefs representing all the frontier tribes, and gave them their final choice of peace or war (13th). The Zakka-Khels gave in (April 1st), paying the full fine and giving up all the titles demanded. This virtually concluded the submission of the titles, and the Firah force was reduced to three brigades, while Sir W Lockhart left Peshawar (4th). By September the caravan traffic through the Khaibar was in full swing again, a brigade under Colonel Egerton holding Landi Kotal, and the Khaibar Rifles serving between that point and Jamrud. A few titles were still in the hands of the Khasron section of the Zakka Kliels, but the outlook all over the frontier districts was eminently satisfactory. The conditions drawn up by the Government for the control of the Khaibar Pass were announced to the Afridi jirgalis at Peshawar (Oct. 24th). Forts will be built at Landi Kotal, and at other places between there and Jamrud, to keep the pass open. A railway will be built, if necessary. The Airidis will manage their own affairs; but in the Khaibar they will be responsible to the Government, which will continue the allowances and will maintain a militia recruited from the Afridis and other clans, commanded by British officers. The jirgahs, which were of an absolutely representative character, and numbered nearly 2000 men, accepted the terms (Nov. 4th) A full account of the recrudescence of the plague during the year, and of the steps taken to combat it, will be found under the MEDICAL SUMMARY, '98 The question of cuirency, so inuch debated during the year, is also treated in a separate article, Indian Currency Com-Mission. Lord Elgin's term of office expired during the year, and Mr. G. N. Curzon, M.P., then Under-Secretary for Foreign Affairs, was appointed to succeed him, and raised to the Peerage as Lord Curzon of Keelleston.

India Frontier Operations. See Session.

pose of promoting social progress and education in India, and extending friendly intercourse between the English people and the people of India. The Association carries out these objects by the diffusion of information; by grants in en-couragement of education, especially of female couragement of education, especially of female education, in India; organising lectures on Indian subjects, social meetings, etc.; selecting English teachers for Indian families and schools; helping and advising Indian students who visit England. The Princess of Wales is Patroness of the Association, and Lord Hobhouse, K.C.S.I., the President. The Vice-Presidents include a large number of influential natives of India, Anglo-Indians, and other ladges and gentlemen interested in the other ladies and gentlemen interested in the welfare of the Empire. Organ of the Association, The Indian Magazine and Review (monthly), published by Archibald Constable & Co, 2, Whitehall Cardens, S.W. There are several branches of the Association with the Co. branches of the Association in India. Hos.
Secretary in England, Miss E. A. Manning, 5, Pembridge Crescent, Bayswater, London, W. Indian Civil Service embraces a much wider field of employment than does the Home

Civil Service Besides the ordinary departments of civil administration, it includes judicial posts, the medical service, the forest department, and officers of the staff corps in civil employ. Situations in the Covenanted Civil Service are gained by passing a competitive examination in England—which examinations are as a rule held annually during August in London. The candidates who have successfully competed are required to undergo two years' probation, and to pass periodical examinations in special subjects of study before proceeding to India Candidates must be above 21 and under 23 on the 1st of April preceding the date of the examination. Application for admission to the examination must be made before May 31st in each year. Candidates are encouraged, though it is not imperative, to obtain a university training; and to this end the Government makes an allowance of Lioo per annum to all who pass their one year's probation in residence at a university. Having arrived in India, the candidate must within a specified period elect to serve either in the executive or the judicial branch of the service. In the former branch the lieutenantgovernorship of a province is the highest post governorship of a province is the nighest post to which a civil servant can attain, and in the latter branch a judgeship of the High Court. The members of the Statutory Civil Service of India are selected purely from among the natives. Many appointments are in the gift of the local governments. The Public Works Department is recruited from the Royal Indian Francius (allege (u v) at Cooper's Hill from Engineering College (g v) at Cooper's Hill, from the corps of Royal Engineers, and, as regards natives, from the Civil Engineering Colleges India Frontier Operations. See Session, sect. 13.

India, Imperial Order of the Crown of, was instituted Jan 1st, 1878, and consists of the Sovereign and such as the sists of the Sovereign and such as the Princesses of Her Majesty's Royal and Imperial House; the wives and female relatives of Indian Princes; and the wives and other lands are also held in this country, and successful House; the wives and female relatives of Indian Princes; and the wives and other length of the Princesses of Her Majesty's Royal and Imperial are also held in this country, and successful candidates are required to attend a four months' course at the Army Medical School at Netley, female relatives of any of the persons who have held, now hold, or will hereafter hold the office of Viceroy and Governor-General or India, Governors of Madras and Bombay, or Principal Secretary of State for India Rejain association, National. Established in 1870 (by Miss Mary Carpenter) for the purchase of Royal Engineering College (g v) at Cooper's Hill, from the copys of Royal Engineering College (g v) at Cooper's Hill, from the copys of Royal Engineering College (g v) at Cooper's Hill, from the copys of Royal Engineering College (g v) at Cooper's Hill, from the copys of Royal Engineering College (g v) at Cooper's Hill, from the copys of Royal Engineering College (g v) at Cooper's Hill, from the copys of Royal Engineering College (g v) at Cooper's Hill, from the copys in the copys in the text of Royal Engineering College (g v) at Cooper's Hill, from the copys in all who competed should be finally classified in one list according to merit. The Government immediately requested the Indian Government to give prompt and careful consideration to the subject. This was done, and the result was that that Government pronounced emphatically against the proposal. Her Majesty's Government, therefore, came to the conclusion that by far the best method of meeting the legitimate claims and aspirations of the natives of India was to bestow such of the higher posts as could be made available for them on those who distinguished themselves by their capacity and trustworthness in the performance of subordinate duties, and that the existing system, subject to such alterations in detail as experience might prove to be necessary, should be maintained.

INDIAN CURRENCY COMMISSION.

As early as 1878 the Indian Government, in consequence of the fall in silver then beginning to be seriously selt all over the world, conceived the idea of closing the Indian mints against the free coinage of silver until the rupee should rise in value to 28, or one-tenth of an English sovereign. This they hoped would counteract the cheapness of silver, by raising the value of the rupee. I his proposal was referred to a committee, appointed, like the present Committee, by the Secretary for India. But the difficulties of interfering with the currency were felt to be so grave, that the proposal was finally rejected at that time The financial troubles of the Indian Government however, increased That Government undernowever, increased I hat Government under-takes large responsibilities in the way of rail-roads and public works of all kinds, it has heavy official expenses, it imports largely from Europe, and has borrowed from other countries The debt thus incurred is entirely a gold one, and must be paid back in gold. But it receives, and must be paid back in gold. But it receives its revenue in rupees, and since these rupees are pincipally raised by land taxes, it follows that when silver became low in value the Government required more jupees to pay its obligations with than it had at its commandthe amount of these land taxes in rupees liaving been already determined and settled with the natives, either for ever or for very extended periods of years. The suggestion that the extra revenue thus called for might be met by increasing those taxes was deemed implactica ble, as likely to cause riots and other political dangers; and eventually the closing of the Indian mints to silver in '93 was sanctioned by the Imperial Government on the strength of recommendations to that effect received from India and from a second committee, commonly called Lord Herschell's Committee, which had been appointed to consider the question. The mints were accordingly closed, and it was provided that when the scarcity of silver coin should bring the value of the jupec upto is 4d. the mint would be opened to the connage of rupees at that price; but, as a matter of fact, that has never been realised. The consequences of this step have been variously estimated by its upholders and opponents. The believers in a gold standard consider it as the first move in a change that will finally end in gold being made full legal tender in India as in England. The advantages gained by the Indian Government are obvious, the rupee has gone up in price, as was hoped, and exchange is altogether

in favour of remitting home. As far as the official side of the question is concerned the position of the Government financially has

improved.

But there is another side, which is of equal importance. While the Government has gained, the producer, whether native grower or European planter, finds he has to lose whenever he has to place his tea, cotton, or whatever it may be, on a market where he is paid for his goods in gold. When he has turned the gold into rupees he now has proportionately fewer for each sovereign than he had when the value of the rupee was less, and as he has to pay his labourers as many rupees as he did before the mints were closed, it follows that his own profits are smaller. In other words, while all expenses of production remain the same, he is left with fewer rupees as his own share of his industry. In addition, the capital which a few years ago flowed easily from Great Britain to India to be invested in the planting industries, etc , has now almost entirely ceased, investors declining to lend their money where they cannot be sure of a profi able return. Hence the opponents of the Government's financial policy contend that the improved balance sheet of the Indian Government shown since '03 is no real criterion of the state of trade in that country or in Ceylon, which, although a Crown Colony, must be included with India in any consideration of the question, as it uses the same comage as its greater neighbour. The natives have lost heavily by the closing of the mints Many of them are compelled by poverty or some other cause to turn their hoards of silver ornaments into money, and it has been estimated that not less than £00,000,000 has been lost by the poorest classes in weigh and exchange from this cause alone. There have not been wanting, indeed, politicians who have argued that the recent Indian famine wa caused less from scarcity of food than of the means with which to buy it All these facts combined have resulted in a strong feeling of discontent with the action of the Government, and it may be said without fear of contradiction that commercial opinion is practically agreed that the reopening of the mints is the only possible cure for the present state of affairs. Strong memorials representing that view have been received by the India Office from the merchants in India, London, and other centres of trade. On the other hand, a proposal was brought before Parliament in the spring of '98 to mend matters by sending out from this country a gold reserve of \(\frac{1}{2}\cdot \cdot \cdot \cdot \cdot \cdot \cdot \) and finally a Departmental Committee to consider the whole question was appointed by Lord George Hamilton This Committee, which is now sitting, consists of the following which is now sitting, consists of the following members.—Sir Henry Fowler, G.C.S. 1. (Chairman), Loid Balfour of Burleigh, Sir David Barbour, K.C.S. I., Sir John Muir, Bart., Sir Francis Mowatt, K.C.B., Sir Charles Crosthwaite, K.C.B., F. C. Le Marchant, Esq., Everard Hambro, Esq., W. H. Holland, Esq., Robert Campbell, Esq., Sir Alfred Dent, K.C.M.G., Robert Chalmers, Esq. It has already heard a large number of witnesses and experts, but its report is not to be and experts, but its report is not to be looked for till the spring of '99 at the earliest. A considerable number of the witnesses endeavoured to demonstrate that there was really no other course possible to the Indian Government but to close the minte, whereas

the unofficial evidence has been all the other among the educated classes of India of all races way. The final recommendations of the Comreligions, and provinces—to meet together and mittee are awaited in much anxiety by all having official or commercial interests in India.

Indian Empire, The Most Eminent Order of. Instituted in 1878 to commemorate the proclamation of Her Majesty as Empress of India, and enlarged in '86, and in the Jubilee year, as a means of rewarding those whose services to the Indian Empire have merited the Imperial favour. This orders consists of the Sovereign, a Grand Master, who is the Viceroy of India for the time being, and of three classes of members—viz., Knights Grand Commanders (KCLF) (G.C.I.E.), Knights Commanders (K.C.I.E.), and Companions (C.I.E.). Only the two first of these, being knights, are entitled to the prefix "Sir." The motto of the order is Im-

peratricis Auspiciis.

Indian Expenditure, Royal Commission
on. A Royal Commission was appointed in May '95 to inquire into the administration and management of the military and civil expenditure of India, and into the apportionment of the charge between the Governments of the United Kingdom and of India. The Commission was constituted as follows —Lord Welby (Chairman), Rt. Hon. L. Courtney, M.P., Rt. Hon. W. L. Jackson, M.P., held-Marshal Sir Donald Stewart, Sir W. Wedderburn, M.P., Sir E. W. Hamilton, Sir James Peile, Sir Andrew Scoble, M.P., Mr. T. R. Buchanan, M.P., Mr. W. S. Caine, M.P., Mr. Dadabhai Naoroji, M.P., Mr. R. G. C. Mowbray, Sir Ralph Knox, Mr. G. L. Ryder, and Mr. Collin G. Campbell (Secretary). The main problems to be solved are how far the Indian Freasury ought to be charged for a number of services for which no charge is made to other dependencharge between the Governments of the United for which no charge is made to other dependencies of Great Britain, and especially for military charges designed primarily in the interests of Great Britain and without reference to India A Select Committee in '74 acknowledged the right of India to equitable treatment, but also declared her liability for the cost of improve-ments in the general military administration If the principle be maintained, it is questionable whether the present capitation charge for the British troops employed in India will be materially reduced by any fresh scruting. If the principle be modified with a view to the financial effect of the reforms as regards the troops on Indian service, and of the un-suitability of certain of the charges to Indian military requirements, then a field for the readjustment of home charges opens up. And so as to the civil establishments in England which are charged to the Indian Exchequer India now has to pay the total cost not only of the services which the India Office renders to her, but also of the functions it discharges as a branch of the Home or Imperial administration The fundamental question is—How far are Parliament and the nation willing to reconsider settlement which has been gradually formed upon it? The Commission began its work at the end of Nov. '95, and a mass of material was at once placed before it by the Indian Committee in the House of Commons, consisting of those members who devote themselves specially to Indian questions. No report had been issued by Nov. '98, though it was under-

religions, and provinces—to meet together and discuss their political wants. Hitherto the people of India had been widely separated from one another by differences of language, creed, and caste; and these differences had been intensified by distance. It was the English Government that for the first time made it possible for them to unite in a common object.

The original stimulus came from the education in English, which is given in all the colleges and higher schools, and in many of the common schools; but the scheme could never have been realised if it had not been for the development of the railway system. The first Indian National Congress was held at Bombay in Dec. 85; the president was Mr. W. C. Bonnerjee, a Bengali Brahmin Calcutta was the scene of the twelfth Congress, in December '96, Amracti of the thrteenth Congress, Dec. 28th, '97, and Madras of the Fourteenth Congress, December '98. The political meetings of the Congress being ended, a Sonal Conference for the discussion of social reference to the discussion of social conference for the discussion of social conference for the discussion of social conference for the discussion of social sections. reforms in the Hindu community is regularly held. From one-halt to two-thirds of the delegates to the Congress attend this Conference. The resolutions adopted at all the congresses have been of a similar character. Questions of social reform—such as child marriage—have special religions and castes. Loyalty to the British Crown has been unhesitatingly avowed, both in the resolutions and in the speeches and certain political changes in the admini-strative system have been as unhesitatingly demanded, special stress being laid upon the excessive growth of Indian military expendi-ture, the evils of the "forward" frontier policy, the want of an adequate system of education, and the urgent necessity of giving effect to the resolution of the House of Commons in favour of holding examinations to the Indian Civil Service simultaneously in India and England. The Right Hon. Sir Richard Garth, Q.C., late Chief Justice of Bengal, has described the In-dian National Congress as "a large, influential and important assembly of earnest and patriotic gentlemen," and says that it "affords an open, honest and loyal means of making the views and wishes of the most intelligent section of the Indian people known to the Government. The Indian Parliamentary Committee, which consists of 120 members of the House of Commons, and acts in concert with the British Committee of the Indian National Congress, watches Indian interests in Parliament, and was chefly instrumental in securing the appointment of the Royal Commission on Indian expenditure The chairman of both Committees is Sir W. Wedderburn, M.P. The Committees is Sir W. Wedderburn, M.P. The official report of the various sessions of the Congress may be obtained from the British Committee, 84 and 85, Palace Chambers, Westminster, S.W. A weekly journal, named India, "a record and review of Indian affairs," is published at the same address. It is edited by Mr. Gordon Hewart, M.A. (Oxon), who is also Secretary of the British Committee. India publishes a full report of all proceedings in Parliament relating to Indian affairs.

India, The Most Exalted Order of the Star of Established by letters patent in 1861, and enlarged in '66 and '78. Its badge stood that it was then in preparation.

Indian National Congress. Some fourteen wards, and with motte, "Heaven's Light our years ago a movement took definite shape, Guide." It consists of the Sowereign, a Grand Master, who is the Viceroy of India for the time | tion, unless they have previously passed some

Master, who is the Viceroy of India for the time being, and three classes of members:—
G.C. S.I. Knight Grand Commander.
K.C.S.I. Companion.
Members of the first two classes, being Knights, are entitled to the prefix "Sir." Of the first class there may by the statutes of the Order be 30, of the second class 72, and of the third (or Companions) 144; but extra and honorary members may, and have been, from time to time appointed. The Registrar of the Order is Sir Albert W. Woods; and the Secretary is the Foreign Secretary to the Government of India. Foreign Secretary to the Government of India.

Indo-China is the name given to the French possessions in the Annamese peninsula. They include Cochin China, Annam, Cambodia, and Tonquin, of which separate accounts will be found under their respective headings. A convention with China (signed June 25th, 95), completed the delimitation of the boundaries between French Indo-China and Chinese territory, and settled all commercial arrangements in connection therewith. Among these one of the most important points was the right given to France to extend the Annamite railway into Chinese territory. This congiven to France to extend the Annamite railway into Chinese territory. This convention made French and Chinese territory contiguous from the Mekong to Laokai, on the Ionquin-China frontier French access to China through Ionquin and Yunnan was to definitely assured; but British lights seemed to be infringed, for Great British lights seemed to be infringed, for Great Britain had definite rights over the Shan States of Kiang-Hung and Kiang-Khang, to which krance laid Hung and Kiang-Kheng, to which France laid claim under the convention. However, by an agreement made in '96 between England and France the matter was settled. The Khiang-Kheng territory was handed over to France by Great Britain, the Mekong river being made the dividing line between the possessions of the two nations from the north of Siam to the boundaries of China. The idea of a buffer state was thus given up. The boundary between the French and Siamese possessions was made the river Mekong southwards to the rapids just below Stung Treng, from which point the frontier diverged in a south-westerly direction to the coast. For the effect of the agreement upon Siam see SIAM. See CHINA (map) as to French railway projects M. Doumer is the Fiench railway projects M. Doumer is the Governor-General of Indo-China, and the seat of government is at Hanoi.

Institution of Civil Engineers, The.

Founded Jan. 2nd, 1818, incorporated by royal charter June 3rd, 28, and received supplemental charters, with extended powers, Aug. 3rd, '87, and Maich 20th, '90. The object of the Institution is to further the advancement of mechanical science, and more particularly to promote the acquisition of that species of knowledge, which is becaused in the professional of the profession. knowledge which is essential in the profession of a civil engineer. According to its constitution, it consists of members, corporate associates (called associate members), and honorary members. There are also attached to it non-corporate associates and students, it has recently adopted a scheme by which andidates for associate membership and students. dentships will in future be subject to examination, the subjects being general education and scientific knowledge befitting the profession of a civil engineer. These examinations will be open to non-members. The numbers of the several classes are members 1959, associate members 3945, honorary members 20, associates 322, and students 902 total 7148. The session extends from the first Tuesday in November to the last Tuesday in April, the ordinary meetings being held on the Tuesday in each week. The record of the papers read and the discussions thereon at these meetings is embodied in the Minutes of Proceedings, which likewise contain other original communications presented to the Institution, as well as abstracts of papers

trust funds £466 7s. 4d. The funded property of the Institution amounts to £52,000, besides which it has under its charge trust funds of the nominal value of £17,092 os. 9d. It has a library of upwards of 30,000 volumes, including 790 of rare tracts, the number of which cannot be much less than 10,500. Secretary, Dr. J. H. T. Tudsbery. Offices, Great George Street, Westminster, S.W.

INSURANCE.

The following article on Insurance in all its branches, and in every department of those branches, will be found to be thoroughly up to date, and as exhaustive as its limits allow. The article deals with five branches, viz. :-

I. Fire.
II. LIFE.
III. MARINE.

IV. ACCIDENT AND FIDELITY GUARANTEE, etc.

V. Minor Branches, and Extraordinary Forms of Insurance.

Since the previous edition of this Annual was published, fire insurance companies have had a very bad time for business, as the fires have been more than in average corresponding years, and, if rumour is correct, several insurance companies, and among them some in the first rank, will show an adverse balance on the year's transactions. In the United Kingdom the most extensive conflagration was that which occurred at Glasgow on April 25th, '98, and which, after starting in a block of buildings in East Howard Street, rapidly spread from block to block and from street to street, until a large amount of property was involved and finally destroyed. The manner in which the flames leapt across the surrounding thoroughfares recalls the calamitous fire at St. Mary Axe, London, in '9a. There has been a marked decrease in Liverpool cotton fires. The only one of importance was that which broke out in Atlas Street, on April 22nd, when about 2 oo bales were destroyed or damaged. Owing to the more general adoption of automatic sprinklers in cotton mills, these factories have not materially contributed to the yearly fire waste. A serious loss took place in a warehouse connected with Messrs. Barlow & Jones' mill at Bolton, and the destruction of Messrs. Booth & Sons' mill at Turton, near Bolton, which was an automatic-spiinklered risk. Several fires have occurred at print works. The most destructive happened at the Gateside print works, at Barrhead, near Glasgow, at the Dunmurry print works at Belfast, and on Messrs. Lee & Co.'s premises at Castleton, Lancashire. Several woollen and worsted Lancashire, Several woollen and worster mill fires have been recorded during the year, the most serious being at Wrigley & Parker's factory at Batley, Lobley & Co.'s, Carlinghow, in the same neighbourhood, Watergate mill, Dewsbury, and Bective mill, near Wakefield. A fire also involving a very heavy loss occurred at the Welsh flannel mill, Holywell. The insurance companies have not during The insurance companies have not, during the year, suffered much from flour-mill risks. The only fires of importance which happened were those in a mill at Bedminster, Somerset, and one at Woolton, Lancashire. On Aug. 1st and scientific workmanship for this purpose is a fire broke out in Norwich on premises more necessary than ever, and itshould always occupied as rope works, and before it could be done under the supervision of a practical

be extinguished a large quantity of adjoining property, including an extensive drapery establishment, was destroved. In the same month the menageries of Mr. Cross, at Liverpool, were demolished, and several lions and other animais were burnt to death. No theatre fires of any consequence have occurred during the veer. but a music hall at Detweduring the year; but a music hall at Dewsbury, known as Harts Amphitheatre, was burnt out in June. The timber trade has contributed its full quota of losses: many destructive fires occurred in saw mills, timber yards, and stores in various parts of the country. Printers have fairly maintained their reputation as hazardous risks, and it is therefore improbable that the insurance offices will, for the present at least, see their way to make any reduction in the heavy rates printers are required to pay. The only important wharf fire that happened was that at Hay's wharf, in Tooley Street, London, which occurred in June, and caused heavy losses to occurred in June, and caused heavy losses to several insurance companies. Among other big fires may be mentioned a tannery at Yatton, Young's brewery at Elgin, Free, Rodwell & Co's mait mills at Mistley, Essex, Saltpans hotel, Saltpans, and Aspinall's paint works, New Cross, and a large fire in Tabernacle Street, London, destroying several buildings The number of farm and stack fires has been unusually large, especially in the South and West of England. They have been mainly attributable to the defective been mainly attributable to the defective manner in which the hay was got and ricked this season, but the ubiquitous tramp has There have also been responsible for many. been several mansion fires during the year. the most noteworthy being at Rendlesham Hall, Suffolk, the seat of Lord Rendlesham; Eynsham Hall, Oxon: Abngton House, Lanark, the property of Sir E. A. Colebrook; "Argory," near Armagh, the seat of Capt.
Bond-Shelton, and Tempsford Hall, Tempsford,
Beds, the seat of W Dugald Stuart, Esq. Owing to the constitution of rural and urban district and parish councils, a large number of fire brigades have recently been established. Many of them have done good work; but there are a considerable number (and this nematk also applies to some of the olderestablished brigades) which have made themselves conspicuous by their efforts to take advantage of the mistortunes of others, and to extort heavy and unreasonable charges from the insurance companies through their insured.

The insurance companies allow about 50 per cent. discount for sprinklers with other fireextinguishing appliances in cotion mills, 30 per cent. for lace factories and flour mills, and often 25 per cent. for wood-working establishments. Only about 15 per cent. 18 generally allowed as discount for sprinklers in printing works, which is far less than that allowed to more hazardous trades, and this small percentage is justly regarded by printers as a consider-able grievance. As there are several latent dangers from the electric light in buildings, it is very necessary that there should be defective installation of such. Several 1 Several Fire Offices have rules for avoiding these dangers, but they are often disregarded owing to the employment of inexperienced men for installa-tions to save expense The necessity of expert

electrical engineer. In several large towns many buildings intended for dwe'ling-houses, and which have long been used as residences, are afterwards made to bear far beyond their strength the weight of heavy stocks or heavy vibrating machinery. In consequence of this use made of the buildings, fires therein fre-quently become very serious, and the losses are heavy. In a recent paper read at a meeting of the Insurance Institute of Yorkshire by Mr J. H. Mills, Resident Secretary at Hudders-field of the Palatine Insurance Company, he stated that in fire insurance business within the United Kingdom there is no scheme to be more desired than the general periodical inspection of all manufacturing and other large inspection of all manufacturing and other large fire risks. Such inspection is made by the London Salvage Corps, the Liverpool Salvage Corps, and the Glasgow Salvage Corps, in warehouse risks coming under the London Mercantile Tariff, the Liverpool Mercantile Tariff, the Liverpool Mercantile Tariff, and the Glasgow Warehouse Tariff. He adds that "the losses under these tariffs have adds that "the losses under these tariffs have shown much improvement in recent years Outside these three areas the companies for the most part rely upon the fifful, far between, and comparatively cursory visits of surveyors for knowledge of their risks . . . Periodical general inspection by every office is impracticgeneral inspection by every office is impractic-able. Concerted inspection by all the offices is sure to come. Many of the more serious losses from building fires have resulted from the insufficiency and unreliableness of public water supplies. The people of a district with excellent water supply and adequate public appliances for extinguishing fires have propor-tionately to pay as much for fire insurance as those who have not these advantages

The aggregate premium income of fire offices in 97 amounts to about £18,870,920, as reported in White's Insurance Register, '98, and the losses to about £10,596,179. The number of companies in the United Kingdom whose business is entirely or mainly that of fire insurance s s2; 37 compose the London Salvage Corps; and 61 companies contribute towards the expenses of the Metropolitan Fire Brigade at the rate of £15 per million on the amount of property insured. The premiums and losses of the leading British fire insurance companies as given below are mentioned in the Annual Insurance Digest, '98, published at the Post Magazine Office in November.

II. LIFE.

As the financial year with the great majority of life offices closes at the end of December, published reports of their position do not appear for some months subsequently. According to the returns relating to life assurance companies in '07 to the Board of Trade, and published in '98, the important particulars in

the table opposite are notified — Of the British and Colonial companies transacting ordinary life assurance in the United acting ordinary life assuiance in the United Kingdom, the following, arranged alphabetically, receive an annual premium income of £100,000 and upwards—viz., Alliance, Atlas; British Empire, British Equitable; Caledonian, City of Glasgow; Clergy Mutual; Clerical, Medical and General; Colonial Mutual, Commercial Union; Eagle, Economic, Edinburgh, English and Scottish Law; Equitable; Equity and Law, Friends' Provident; General; Gesekham Guardian Handian-Hand Imperial Gresham, Guardian, Hand-in-Hand, Imperial, Law Life, Law Union and Crown; Legal and General; Life Association of Scotland; Liver-pool and London and Globe; London and Lancashire; London Assurance; London Life; Metropolitan, National Mutual; National Provi-dent; North British and Mercantile; Northern; Norwich Union, Pelican, Provident Clerks: Provident Life, Prudential (Ordinary); Refuge (Ordinary); Rock, Royal; Royal Exchange; Scottish Amicable; Scottish Equitable, Scot-Scottish Amicable; Scottish Equitable, Scottish Provident; Scottish Union and National, Scottish Widows' Fund, Standard; Star; Sun; Sun Life of Canada; Union; and United Kingdom Temperance. The yearly premium amones of three of the United States of America companies are very much in excess of those of British life assurance companies. These American Companies are the Fauitable. These American companies are the Equitable of the United States, the New York, and the Mutual Life of New York. The premiums of British and American companies, while they indicate the magnitude of the business done by them, are not always an approximate evidence. of their merits.

assurances for '97 was 849 for £48,017, as compared with 256 for £20,600 in '83. The number of immediate annuities granted in '97 was 2051 for £56,237, as compared with 770 for £14,141 in '83. The number of deferred annuities in '97 was 207 for £4000, as against 104 for £2120 in '83.

On the other hand, an enormous number of life noblogue are granted to the masses by industifue of the masses by industing the statement of the masses by industriance.

life policies are granted to the masses by indus-trial life assurance companies and collecting friendly societies; and this kind of insurance has prodigiously increased during the last twelve years—so much so that apout half the popula-

tion of this country is insured in them. The following figures, according to the latest returns, show receipts of over £100,000 premium incomes of industrial companies and collecting friendly societies: viz., British Workman's and General, societies: viz., British Workman's and General, £555,168 (including ordinary); Liverpool Victoria Legal, £573,749; London, Edinburgh and Glasgow, £262,661, Pearl, £540,920 (including ordinary); Prudential, £4,793,591; Refuge, £882,370; Royal Liver, £465,137; Royal London, £362,493, Socitish Legal, £147.850; Wesleyan and General, £329,525 (including ordinary). About half the number of British life offices

grant immediate annuities; and lend on personal security with life assurance; and about 27 transact fire insurance. The Caledonian Insurance Company have introduced a new form of assurance, whereby in approved cases it will grant immediate life assurance without medical examination. The directors require the applicant under this method to lodge a proposal containing the usual information respecting containing the usual information respecting his own health, history, and the causes of the death of his relatives; and although the directors reserve their right to communicate with the ordinary medical attendant of the proposer, they do not contemplate exercising this power in ordinary cases. The main safeguard on which the Company rely is the requirement that the transaction shall take the form of an endowment session and that is, an with the ordinary medical attendant of the proposer, they do not contemplate exercising this power in ordinary cases. The main safeguard on which the Company rely is the woother companies also assure without requirement that the transaction shall take the form of an endowment assurance—that is, an

assurance payable on the attainment of a selected age, or at death if this should occur previously; but with this variation from the ordinary endowment assurance-viz., that the amount payable on survivance shall be double the amount payable at death. To meet the case of those who do not desire a cash benefit on reaching the selected age, there is provided instead of the endowment the option of a large paid-up policy or the exchange of an annuity for the endowment. Liberal cash values will be allowed for the surrender of these assurances

policies at extraordinarily low premiums for sums payable at death if this event occur before the attainment of ages 45, 50, 55, or 60. These are practically temporary assur-ances of very long duration. Nothing will be paid under them if policy-holders die atter the expiration of the term for which they are

granted.
Endowment Policies payable at a given age or earlier in the event of death, answer a very important public requirement, and are granted by most of the life offices. They have greatly increased during the last eleven years. Better ariangements have been recently made for paying surrender values and reviving lapsed polices Several important restrictions have also been removed in favour of policy-holders asso near reword in avoir of policy-floured as regards travelling and residing abroad. Invalids can also have their lives insured on favourable terms.—The Equitable Life Assurance Society, or the Old Equitable, as it is generally called, started upon a new career on June 16th, '93, when a memorandum and articles of association were substituted for the deed of settlement, which had done good service for 130 years, but which had become antiquated and almost unworkable. The directors availed themselves of the new powers by issuing an Endowment Assurance prospectus containing the rates of premium on which they were prepared to issue this class of policy with full participation in the exceptionally large profits. Hitherto they had not been able to grant such policies. The plan has been still grant such policies The plan has been still further extended by a scheme for guaranteeing interest at the rate of 5 per cent on the sum assured, and bonuses from the date of matu-rity until death. This has been followed by an attractive prospectus containing a somewhat novel feature—namely, deferred assurance for children without medical examination. The assurance under this scheme does not come into force or enter for profits until the child attains twenty-one | Fen pounds a year paid in respect of a child less than twelve months old will secure for he child at the age of twenty-one a with-profit policy for £1000 payable at death, free from all restrictions as to residence or occupation, and for which he will only have to bay Lio a year In the event of the child dying before twenty-one all the premiums paid will be returned without interest. In consequence of many adverse criticisms having been made on the use of the Noithampton Table by the Old Equitable in its latest investigation, the directors have published a valuation by the Institute of Actuaries, H^m and H^m() Tables and 3 per cent interest, which is considered the highest standard for a company to adopt, and the result shows that the surplus was £1,782,497, being £584,727 more than the amount divided as profit. This Society offers, as it has ever done, the most ample security for the discharge of its liabiliample security for the discnarge of its manu-tics, and a substantial guarantee for future profits. The new prospectus is a comprehen-sive guide, and should be studied by all who are thinking of assuring their life. The Society now grants immediate annuities. It previously only granted deferred annuities. The Royal only granted deferred annuities. The Royal Exchange Assurance, under the heading of Settlement Endowment Policies, has recently introduced a new scheme, which consists of an assurance upon the life of the survivor of introduced a new scheme, which consists of an assurance upon the life of the survivor of husband and wife, combined with a deferred husband and wife, combined with a deferred annuity payable to the husband on his attain-

ing an agreed age, and to the wife on her husband's death. The policy may be either a whole-term or an endowment assurance, and, if required, may share in profits. In the case of a whole-life policy the defeired annuity is payable to the wife only after the death of the husband. The amount of the annuity is fixed when the policy is granted, and may range from 3½ to 5 per cent on the sum assured, according to the wishes of the proposer. The premiums payable are regulated according to the percentage agreed upon On the failure of both lives, the sum assured is paid to the husband's representatives to be distributed among the children or other beneficiaries as appointed by him, or, if no such appointment is made, "as provided in the policy itself."

This scheme is adapted to, and obviates the necessity of, the ordinary form of settlement that secures a life interest to the wife, with remainder to the children, as appointed by the settler. It may also be stated that, contrary to the practice on the grant of an ordinary last-survivor policy, no evidence of the wife s

health is necessary

The Sun Life Office has introduced Improved Tables of Endowment Assurance. Under one table the assurance matures in the fifty-fifth. and in the other in the sixtieth year of age. The assurance money is also payable at death if this occurs before the maturing period. It has also introduced what it terms The Perfect Protection Policy, which means (a) that the policy cannot lapse as long as it has any surrender value, (b) if the assured has a breakdown in health he has no premiums to pay during the period of his incapacity, (c) if he becomes totally incapacitated the Society will not trouble him for any more premiums, (d) if he meets with a very serious accident the Society will pay him half the sum assured, keep the policy in nim hall the sum assured, keep the policy in force fice of cost, and pay the balance of the policy at his death, (e) he can travel anywhere without paying an extra premium, (f) he can surrender his policy, and either receive a paid-up policy or withdraw its value in eash; (g) he can borrow money on his policy. It is stated that no other assurance office issues this policy. The Immediate Bonus Plan has been introduced by the Scottiel, to untable has been introduced by the Scottish Equitable Life Assurance Society. Under this scheme a table has been prepared under which members may pay very low premiums, while retaining the right to share in the profits The payments les those using the table have been fairly adjusted, so as to put them on a footing of equality with members paying the highei ordinary premiums. The system of assurance called Guaranteed Tentine Endowment has been introduced, whereby double the amount assured is paid if the policy-holder survive the stipulated time for which his policy is granted. Other systems of Iontine Endowment also prevail.—
Pensions are also granted by several life offices to secure an annual income payable during the later years of life. If the assured should die before that date the whole of his premiums and interest will be returned to his representatives.

The National Mutual Life Assurance Society has introduced a scheme of Guaranteed 5 per cent. sum assured is payable to the legal representatives of the deceased, and who can surrender both the sum assured and the annuity either on the failure of the life assured, or at any time within the specified period after such failure, the surrender value being greater than the sum assured. The benefits of the scheme can also be extended to endowment assurances on payment of a slightly increased premium. The British Empire Mutual Life Assurance Ompany have also introduced 2 new feature, under the title of Children's Assurances. In this method there are two scales of premiums. In one all that are paid are returnable if a child dies before twenty-one. In the other scale, which is lower in the amount of premiums payable, these are non-returnable. On the child attaining twenty-one the policy comes into full force as a policy of insurance. The Norwich Union Life Assurance Society also transact this business as regards adults as well as children. The British Empire Mutual likewise issue Six-per-Cent Investment Policies, whereby an assured income is secured without fluctuation or loss of capital value This scheme is specially suited for marriage and (amily settlements. Under the Reverable Premium Plan, which is a new one introduced by the Colonial Mutual Life Assurance Society in connection with old age pensions, the sum assured becomes payable at death, and the premiums cease at the age of sixty or sixty-five, as selected at the outset, and afterwards the society will return one premium each year as long as the policy-holder lives For providing a fund for payment of Death Duties under the Finance Act of 94 several life offices insert a clause in their policies that if requested by the legal personal representatives of the assured, entitled to receive the policy noneys on grant of probate or letters of administration, they will either pay so much of the sum assured as will be enough to satisfy these duties to such representatives, or at their option pay the whole or so much of the policy moneys as shall be required for these duties to the Inland Revenue Commissioners or any other persons lawfully entitled to receive the same under the before-mentioned or any other statute. In consequence of these ai rangements, executors and administrators are re-lieved from the necessity of realising the estate to provide the money for the payment of these heavy duties. An important and distinctive feature of the Scottish Provident Institution is what may be called the Low Premium and Deferred Bonus system. The premiums for policies granted by this society are considerably lower than the average rates of other offices, and thus a much larger sum can be assured than can be assured by the same premium in other offices. The particular feature of the scheme is that bonuses are reserved for division exclusively among those who survive the period at which their premiums with compound interest at 4 per cent. amount to the sum assured More than half the policyholders divide the bonuses between them, which are very large.

As there appears to be a demand for an assurance policy at a low rate of premium under which the holder shall not be excluded from bonus additions, the Pelican Life Office

without-profit policies. The reversionary bonus to be alloited to the policies is always to be r per cent, per annum less than that allotted to the ordinary full-premium policies. If the bonus should fall below r per cent, these policies will get nothing, but will rank for their share beyond that proportion when the distribution is more than that rate. The gleat advantage of this arrangement is that it involves no liability on the policy-holder. He is assured for a definite fixed sum, which cannot be reduced even if there is no bonus; nor can the premium be increased.

The 8-per-cent Consols with Bonuses of the Norwich Union Life Insurance Society appears to offer an eligible and safe investment 4 per cent Guaranteed Increasing Policy, recently introduced by this Company, appears to be much appreciated. Under this scheme the assured or his legal representative is entitled to a bonus of 4 per cent annually during the continuance of the policy up to 25 years. If he should survive this period he will then be entitled to the following options if he insures for £1000 viz, (a) A cash payment of £1000, and a paid-up policy for the same amount; (b) A cash payment of £1500, (c) A paid-up policy for £2002, subject to health; (d) On a continuation of the premiums a policy (a) On a continuation of the premiums a point of f_{4750} , subject to health, (e) An annuity of f_{108} is gd, payable half-yearly, (f) A padup policy for f_{1000} , and an annuity for life of f_{72} 75 od, (g) A cash loan value at the end of 5 years of f_{940} , at the end of 10 years f_{2200} , at the end of 10 years f_{2200} , at the end of 12 years f_{2400} , and at the end of 20 years f_{2500} . This example applies to a 20 years £950. This example applies to a policy taken out by the assured at 25 years of age, but premiums and options of the like kind as far as is practically and equitably applicable and will be quoted on application to the Society.

Very liberal Immediate Annuities are granted by many life offices, but in consequence of the small rate of interest paid for first-class investments the consideration money or rates paid for these annuities has increased very considerably, and is likely to further increase in the near future.

In order to meet the difficulty which trus-tees have now in finding safe investments yielding a fair rate of interest, the Rock Life Assurance Company and the Westminster and General Life Assurance Association have adopted Assurances to Secure an Income for Widows and Children at low premiums.

The system of profit peculiar to the Rock Lite is that larger bonuses are reserved for those policy holders who survive and cause a profit, a smaller share being reserved to those by whose earlier death there is a loss to the common fund.

The Family Settlement Policies of the North British and Mercantile Insurance Co., which come under this class of assurance, also answer a growing requirement. They avoid the necessity of appointing trustees for the widow, and secure to her during her life a fixed safe and remunerative investment of the funds provided by the assurance on the life of her husband. It is stipulated in the policy that on the death of the husband, the wife surviving, the Company will pay to her during her life interest on the sum assured at the rate of has made an arrangement which is described as Bonus Policies at Minimum Premiums. The survivor of husband and wife, the sum assured rates are very little in excess of those for will be at once paid over to the executors of

the husband. If the husband and wife both die, leaving a child or children, and while any child is under age, the fund may, on the death of the survivor of the parents, either be at once paid over to the husband's executors, and the matter closed—or it may, if the husband have so directed at the outset, be left in the hands of the Company, until the youngest child attains twenty-one, the Company allowing interest at 3½ per cent. Power is reserved to the husband to revoke the foregoing provisions—in which case the sum insured would at his death be at once paid to his representatives or assigns. If it should be desired while husband and wife are both living to discontinue payment of premium, the Company will give to him either a cash surrender value, or a fully paid up policy, securing a reduced amount of assurance and annuity. The husband alone is medically and annuity. The husband alone is medically examined. The same Company also issues Threefold Option Policies. By this scheme the policy secures a capital sum payable at death or on the attainment of an age (say 55, 60, or 65) specified at the time the policy is effected, but the assured may, on attaining that age, choose to receive either—(1) Immediate payment of the capital sum, or (2) An annuity (equal in amount to interest on the capital sum at the rate of 4 per cent) payable during the re-mainder of his life—payment of the capital sum being deferred until his death, or (3) An annuity of larger amount (in lieu of capital and interest) avable during the remainder of his life. Investment Policies granted by the Rock Life Assurance Company are likely to be much appreciated. By these policies small or large sums may be accumulated without any risk of losing the money, and the certainty of receiving back a sure and profitable return as regards sums down, annuities, marriage settlements, family endowments, educational annuities, and leasehold redemption funds; and the whole with or without life assurance. The Yorkshire Fire and Life Insurance Company have brought out a new table, giving Endowment Insurance at Minimum Cost, but with profits deferred until the attainment of the endowment age. liberal options which are obtainable on the attainment of the endowment age are 1. Payment of the full sum assured in cash, with bonuses. 2. The assurance to be continued for the original amount of the policy payable at death, the bonuses and the balance of the sums assured to be paid in cash. 3. A paid-up policy for an increased amount payable at death, 4. A paid-up policy, payable at death, for the original sum assured, and in addition a pension to be drawn for the remainder of life. 5. A pension for the remainder of life, 6. A pension to wife or child 7. A deferred pension to commence at the death of the life assured, and commence at the death of the life assured, and be payable during the life of the widow or of a child. In addition to this table the Company have also brought out a new scheme of Discounted Bonus. This consists of the adoption of a new table of reduced premiums obtained of a new table of reduced premiums covarious by discounting bonus at the rate of Liper cent. per annum (compound), whereby the actual premiums are reduced to a minimum almost equivalent to non-profit rates, but with the special advantage that should the assured attain as specified fixed age—say 30 years after the date of the policy—it will then participate in the profits for the whole period at the rate of the bonus declared over the £1 per cent. assumed; that should provide for the discontinuance of or, in other words, the difference between the premiums under their policies, in the

(1 per cent. and, say, 30s. per cent. (which is below the average rate hitherto declared by the Yorkshire) would be credited in a lump sum to the policy. Assurances on Invalid Lines, called "Invalid Assurances," are effected by the Clerical, Medical and General Life Assurance Society. For conducting this class of business with fairness to the public, the regulations of the Society provide that of the seventeen directhe Society provide that of the seventeen directors eight at least are to be members of the medical profession. The system adopted for assuring invalid lives, while safe to the Society, is as favourable to the assured as the various risks will permit. Other companies also take these and other under-average life risks. Non-forfeitable Endowment Assurances with Guaranteed Bonuses are granted by the risks Non-toricitable Endowment Assurances with Guaranteed Bonuses fre granted by the London, Edinburgh and Glasgow Assurance Company. The Sun Life Assurance Company of Canada issue among other policies Coupon Bonds which are very attractive. The rates for these are so low that a person can, it is stated, carry 40 per cent. more assurance than in the ordinary plans for the same money. The coupon bonds differ from other systems of assurance, because the amount assured, instead of being paid in one sum at the death of the assured, or at the maturity of the policy, is payable by the company in twenty equal annual instalments. A coupon to represent each of these is attached to the bond. The first coupon becomes due immediately at death, or at the end of the endowment term, and the other coupons are payable one each year thereafter to the assured, or if dead, to the benefici-aries named by him, until the whole twenty have been redeemed. One great advantage of this form of policy is that it avoids the trouble and risk of finding suitable investments for the assurance money which a wife may receive at the death of her husband. The receive at the death of her husband. The bonds participate in the profits, and if money is urgently required during the twenty years, the coupons not then due will at any time be discounted by the Company. Semi-Endowment Polices are also granted by this Company They differ from the ordinary endowment ones in the following manner. While an ordinary endowment courset pro-While an ordinary endowment contract provides for the payment of a fixed sum at the end of the term specified, or in the event of previous death, a semi-endowment policy proprevious death, a semi-endowment policy provides for the payment of double the amount on the death of the assured before the expiration of the endowment period. One of such policies taken out by a person aged 30 next birthday for £1000, payable at the end of 20 years, would cost under the with-profit plan £33, 95. The amount payable on death during this interval would be £1000, but if the assured survived the endowment term the appropriate ray while to him would be £1000. amount payable to him would be £500, exclusive of bonuses; which, if allowed to accumulate of bonuses. late on the Reserve Dividend plan, would probably amount to £536. So that at the end of the term he would receive altogether about

Assurances with Exempton from Payment of Premiums under circumstances involving temporary or permanent Incapanty. There are many professional men, and others, whose incomes solely depend upon their ability to follow their occupations, to whom it would be a great advantage to effect assurances under conditions

event of their becoming incapacitated, either event of their becoming incapacitated, either by accident, or bodily or mental disorder, from continuing to earn their own livelihood. With the view to secure this advantage to the assured a German life office, many years ago, issued policies for this purpose, and so much was their scheme appreciated that the Law Life Assurance Society introduced it into the United Kingdom shortly afterwards. It now issues policies of this kind upon the lives of males above the age of 24, whose occupations males move the age of 24, whose occupantions do not involve undue exposure to risk, and who are found to be assurable at ordinary rates. Under this scheme female lives are not accepted. This description of assurance is also transacted by the Scottish Accident Life and Fidelity Insurance Company, for the Exemption from Payment of Premiums on the life assured attaining the age of seventy, or whilst the assured may be temporarily or permanently incapable by accidental bodily injury or illness,

incapable by accidental bodily injury or liness, or by mental disorder, from attending to his usual profession, business, or occupation.

The Edinburgh Life Assurance Company have brought forward a scheme—the New "Edinburgh" Policy with Guaranteed Options
This is stated to be an extension of the principle of endowment assurance. The annual contributions at most ages between 20 and 40 is £40 per £1000, if payable for 25 years, and £50 per £1000 if payable for 20 years. An intending policy-holder is offered three options. The first, if selected, must be declared at the outset, but a choice between the second and the third may remain open until the end of the selected term. Option 1 includes £1000 at death if within the selected term, £45 annually for life after the selected term, and £1000 when that yearly payment ceases, whether by death or surrender, it being the option of the policy-holder to drop the same at any time after the end of the selected term and take the £1000 in cash Option 2 comprises the £1000 at death if within the selected term, L1000 in cash at the end of such, and accumulated profits to those who survive the term Under Option 3 £1000 is payable at death if within the selected term, £1500 to £2200 fully-paid-up assurance at the end of the term according to the age then attained, and accumulated profits to those who survive the term. The profits may either be taken in cash or applied to secure additional paid-up assurance. The same company has introduced an Early Provident Scheme, whereby parents who wish to secure to their children a future provision may effect policies under this arrangement at about half the usual rates These assurances may be of the ordinary kind, with premiums payable for the whole life or ending at a fixed age, or they may be endowment assurances payable at a given age or a death if that sooner occurs. The assurance death if that sooner occurs. The assurance commences after 15 years, but if death happens when the age is attained at which the assurance is to begin; the policy takes rank for bonuses at the same rates as those declared on policies effected at that age. A surrender value is guaranteed after the first three years, or a paid-up policy may be had instead. This Company has introduced new schemes for

A person aged 20 may, by paying £31 10s. per annum until he is 60, or until his death if earlier, secure £1000. If he should previously die, 5 per cent. per annum on 5,000 would be paid to his representatives for 20 years, and the full sum of 5,1000 at such time as he would have attained 60. If he should ne would nave attained to. If he should survive this period he is entitled to receive in cash a tontine bonus representing his share of profits of the entire class, which are divided among survivors. Respecting the £1000 assured, he may either receive it immediately on reaching 60, take 5 per cent. per annum on it for the remainder of his life and leave it to his representatives or accept in leave. leave it to his representatives, or accept in lieu of it an annuity of Loo for lile. Again, instead of an immediate annuity, he may have one not commencing until he is 65 of £165 for the remainder of his life. Moreover, he may on satisfactory medical examination exchange the floor immediately payable for a fully paid policy of £1670 payable at death; or for one of £1290 payable at the end of five years or at death if carlier. The policy carries the further advantage, beyond those mentioned, that in the great of the extend hours. that in the event of the assured being incapacitated for business by bodily or mental disorder for any continuous period exceeding six months while premiums are payable, a remission of premium is made for a period corresponding to the duration of the incapacity For example, if an assured were disabled for a consecutive period of nine months previous to a year's premium falling due, only a quarter of such year's premium would be charged. Until recently his offices were not favour-ably disposed to assure Women, and would only grant them policies at premiums very much in excess of those charged to males. The New York Life Insurance Company, which transacts much assurance business in the United Kingdom, concedes the same benefits in respect of non-forfeiture, freedom from restrictions, etc., in female policies at the same premium rates as are charged to males. This is a very important experiment, which, as is alleged, is justified by the rapidly changing conditions of the female sex as regards their increasing professional and business occupations and other causes. Assurance companies are paying more attention to the rating of female lives, and are canvassing for policies by women. A large number of this sex in the United States is specially employed to solicit life assurance among female workers, and secure large numbers of them as policy-holders. In Great Britain it appears that the number of lady agents engaged to canvass women to assure their lives is on the increase, and it is stated that a great development in this pursuit may certainly be looked for in the near future. It appears from a recent article in the Bankers' Magazine, by Mr. A. G. Mackenzie, F.I.A., that the invested assets of Life Offices have now reached the enormous sum of £334,000,000 sterling, having doubled in the last 20 years. At this rate of progress they will amount to At this rate of progress they will amount to \$500,000,000 by 1921, and in another quarter of a century to a thousand millions, and the rate of interest, which is declining, to \$63 95. per cent. by 1921. He adds that "in the not remote future" it is probable that 3 per cent will be the lighest rate of interest that a well-The assurance under more favourable terms of states as a probable that 3 per cent will be the highest rate of interest that a well-crown insurance Company have recently issued managed office will feel justified in assuming a new Secured Option Policy. The following that it will earn in the future, "and it may be example will show the working of such scheme. result in a fair profit from interest being made for a good many years to come.'

III. MARINE.

This has, in '98, been in a worse condition than for several years, owing to many losses from foundering, stranding, and wiecks of ships. During recent years very low rates have been charged for insurance, which have been greatly inadequate to the risks involved. Such reduced rates have been occasioned by the influx of a great number of small marine insurance companies, who to get business have reck-lessly issued policies at such remarkably small premiums that they were not remuneraance brokers condemn this practice as one that will become rumous to marine insurance companies, since it has materially increased
over-insurance of ships In consequence
of the prevalence of very low premiums for
marine insurance during the last twelve years the large and old-established underwriting companies have refused to reduce their rates to anything like a level with those of the new companies, and hence the former have done much less business during this period than they previously did. For the last nine years, however, marine insurance brokers have become more careful in considering the security of the companies they insure with than formerly, and therefore have increased their policies with leading companies of old standing, so that the latter have considerably regained much of the business they lost owing to smaller and newly established companies of indifferent financial status insuring at lower The result has been that, while the latter companies have effected less insurances, the leading companies have issued more policies of eighteen leading maine insurance com-panies in Great Britain, the oldest are the Royal Exchange and the London Assurance Royal Exchange and the Louison 1332 and Corporation, both established in 1720; and the Alliance and Indemnity Companies, both founded in 1824 Very heavy claims have recently been paid for losses on all kinds of ships, and the rates for insurance of them have materially increased during the last six years.

The dividends paid upon some marine insur-ance companies shares are mainly, and as to others are almost entirely, derived from the investment of capital and reserves Several of such companies are more financial than insurance concerns. A large amount of marine insurance business is also done by private underwriters connected with Lloyd's. Marine insurances are generally effected through marine insurance brokers, who are an important class in London, Liverpool, and Glasgow. Claims are determined by average adjusters in difficult cases One of the grievous evils in underwriting transactions is the use of so-called "honour policies," generally issued as insurances on prospective freight. The number of members engaged as underwriters at Lloyd's is about 560, who, with few exceptions, have lodged with the Committee security, either by deposit or approved guarantee, against the marine lia-bilities which they severally incur at Lloyd's Several wealthy foreign marine insurance com-

whose operations are governed by the principle of mutuality and co-operation.

About 50 per cent, of the total outgoings of underwriters on hulls is for average claims, and the remainder for total loss claims. According to the law of marine insurance relating to "con-structive total loss," which shipowners agree is fair, the estimated market value of a ship, after repair, should be taken as a test of such loss, so that if the estimated cost of repairing a vessel is more than her market value after repair, she is constructively lost. Under-writers, however, demand that a valuation which is admitted to be far beyond the market value when the ship is sound, shall be fixed as the value below which, when the state of her damage may have entirely prejudiced her character in the market, she cannot be made a constructive total loss. Thus if a ship is offered for insurance at what her owners consider her market value, £15,000, the under-writers, for reasons connected with averages. ask for the ship to be valued at £20,000, and policies are taken out for her insurance accordingly. If the vessel strands in a bad position, and sustains serious damage whereby her repairs are estimated by the surveyors to cost £12,000, and it is also estimated that after she is repaired buyers, thinking that she might have latent structural injury, would not give more than £10,000 for her, underwriters wish to make not this sum, but £22,000—their own fancy valuation—the test of constructive total The losses which Marine Insurance Companies have recently suffered from strandings have been materially increased by the new method in the construction of hulls.

ACCIDENT, AND FIDELITY GUARANTEE.

By far the most important change which has taken place in recent years by legislation between employers and employed has been caused by the Workmen's Compensation Act. The pro-visions of this Act, and the action taken by employers and the insurance companies in

regard to it, are fully dealt with in the separate article on WORKMEN'S COMPENSATION (9.0).

1. Acoident, Personal.—The business of this branch is done by nearly 40 companies, who for certain premiums insure the payment of periodical sums for total and partial temporary disablement, and other fixed amounts on death or on total or partial permanent disablement. The Railway Passengers Assurance Company was the first established, which was in 1849; but as regards premium income, the Ocean Accident and Guarantee Corporation takes the Accident and charantee Corporation takes the lead of all the Accident Companies At the lend of Dec. '97 this income was £334,102, as against £245,285 in '96, and £186,707 in '97. The premium income of the Employers' Liability Assurance Corporation for the year ending March 1978, '98, was £320,386, as against £314,173 of the year pieceding, and the premium income of the Railway Passengers Assurance Company for the year fields of the company for the year pieceding, and the premium income of the Railway Passengers Assurance Company for the year fields of the company for the year fields of the premium income of the Railway Passengers Assurance Company for the year fields of the premium income of the Railway Passengers Assurance Company for the year fields of the premium income of the Railway Passengers Assurance Company for the year fields of the premium income of the Railway Passengers Assurance Company for the year fields of the premium income of the Railway Passengers Assurance Company for the year fields of the premium income of the Passengers Assurance Company for the year premium income of the Railway Passengers Assurance Company for the year premium income of the Passengers Assurance Company for the year premium income of the Railway Passengers Assurance Company for the year premium income of the Passengers Assurance Company for the year premium income of the Passengers Assurance Company for the year premium income of the premium income of the year pre of the Kailway Passengers Assurance company for '97 was £244,948 as against £240,129 for '95 Mcst accident insurance companies transact Employers' Liability Insurance, as well the assurance companies. Under the present law employers are indemnified against panies having branches in Great Britain do a their hability to pay compensation for injuries large portion of business here. To satisfy the to their workmen under the Employers' requirements of the coasting trade, a few Liability Act of '80, and at common law up mailine insurance clubs have been established, to the limit of three years' wages. The pre-

miums are calculated on an estimate of the annual wages paid by the employer. Very many accidents which occur during employmany accidents which occur during employement are such that no compensation can be recovered against the employer. Joint policies are therefore granted to give the full indemnity under the Employers' Liability Act and at common law, as before mentioned, and also grant compensation in all cases of accident during occupation Many employers extend their insurance by joining with their workpeople under this system, so as to provide for every accident during occupation. The usual benefits under wages in the event of death, and weekly allowances varying from one-third to one-half of the weekly wages, for not exceeding twenty-six weeks, during total disablement. The premiums for these policies are paid in full by the employer, who, by arrangement with the work-people, deducts from their weekly wages their contributions, which vary from \(\frac{1}{2}d \). to \(\frac{3}{2}d \). per week, according to occupation. Since the latter part of \(\frac{1}{2}q \) several important additional hands. benefits have been offered to the public by the Personal Accident Insurance Companies At the end of '95, it of the companies out of 31 issued what is termed a "Combined Policy." offering a variety of benefits beyond the death and permanent and temporary disablement allowances of the older Accident policies With these increased benefits, however, additional and necessary restrictions and safeguards have been adopted.

The Tontine Bonus for Non-Claimants is a system devised by the London, Edinbuigh & Glasgow Assurance Company Under this scheme the premiums payable by a policy holder who continues his assurance with the Company, and who makes no claim for compensation, will be considerably reduced after five years over and above the abatement allowed to all policy-holders, and it is possible that they will be eventually extinguished altogether, and the assured will at the same time retain the full benefit of his assurance in

the event of subsequent injury

9. Fidelity Guarantee — I'ns class of insurance dates back to '40, and was commenced to supersede the system of private suicelyship, against which there are many objections, one of the principal being the necessity for continual inquiry into the financial position of the bondsmen. Companies' guarantees have gained much popularity among employers owing to the liberal manner in which claims are dealt with; and all the Government departments at home and abroad, the law courts, municipal corporations, local boards, etc., accept them in preference to private bonds. Guarantees are issued on behalf of all persons of good character, and very many finms require a guarantee society's security with every new member of their staff, because if it is obtained it is a proof that the employe has satisfactorily passed through the searching inquirits made into his antecedents. Among the principal causes leading to defalcations by employes are drink, women, and betting. So much is this the case, that a man with a clear record as to honestly and character will find it difficult to obtain a guarantee if there is a suspicion of weakness in the matter of sobriety. On the employers' side the leading cause of the defalcations referred to is either the want of a good system of accounts, or, if a good system of accounts, or, if a good system.

negligence in its application. That opportunity makes the thief is the daily experience of guarantee societies, and any deficiency in the before-mentioned method of accounts is most seriously against the interests alike of em-ployers and employed. These companies are not intended to render good accountants unnecessary, but to meet those losses which it is, and apparently always will be, unable to prevent. The rates of premium vary from to 408, per cent., and are classified under the different employments. Length of service, position and means are all matters taken into consideration when fixing the premium to be paid. Any number of officials of an employer may be guaranteed under one policy. Addimay be guin anteed under one poincy. Additions and alterations are made by endorsement from time to time. This is a great convenience when there is a large staff. Within the last few years, premiums have been reduced 50 per cent, and the present tariff is drawn up on such moderate lines that the inducement for large firms to form their own guarantee fund is removed The Guarantee Society, the Provident Clerks' and General Guarantee Associaton, and the London Gualantee and Accident Company, Ld, have each paid hundreds of thousands of pounds in claims. The Ocean Accident and Guarantee Corporation, the Law Guarantee and Trust Society, the General Accident Assurance Corporation, the Palatine and other companies, have also paid large claims. One of the leading grievances of Fidelity Guarantee Insurance Companies is that they are not allowed more than a mere trifling percentage of the costs they incur for the prosecution of offenders In addition to these companies, who insure employers generally against loss by their servants dishonesty, there against loss of their servains distincted, the sa society called the "Bankers' Guarantee Frust Fund," to indemnify against loss by bank employes The Society is divided into two branches, the British and the Foreign Guarantees. tee Trust The Bank of England and several of the leading railway companies have a fund contributed by the employes to secure their employers against loss by the dishonesty of the former. There is also a Local Government and a Post Office Fidelity Guarantee Society, to insure the honesty of the Local Government and Post Office employes At present the only Insurance Company of importance whose premium income and expenses are not known to the public and the insurance world, is the Guarantee Society, and it is a cause of general astonishment that they are not published.

V. MINOR BRANCHES, AND EXTRAORDI-NARY FORMS OF INSURANCE.

1. Sickness.—The Sickness, Accident, and Life Association answers a great requirement of the middle classes, and is particularly valuable to professional and business men. It pays weekly sums to those who are wholly or partially disabled from following their vocations on account of illness not resulting from accidents. This company also combines accident with health assurance. The Ocean Accident and Guarantee Corporation, the Northern Accident Insurance Company, the General Accident Assurance Corporation, the Platine Insurance Company, the Acme Insurance Company, and the National Cycle and Motor-Car Insurance Company transact this business

3. Diseases. - More than twenty companies

transact insurance against certain diseases, and make weekly allowances for temporary total disablement by scarlet, typhus or typhoid fevers, or smallpox. These allowances are extended to measles by eleven, and to diphtheria by ten companies.

3. The coupon system of insurance entitles persons who possess copies of specified newspapers, railway guides, etc., containing accident coupons, to the payment of certain sums for injuries mentioned therein; while some of these on other coupons promise to pay the next-of-kin or legal representatives of the holders who suffer death from certain accidents which are generally those that happen in railway trains—within specified times, fixed sums, which vary very much according to chances of death from such occurrences. By far the greater part of this insurance is trans-acted by the Ocean Accident and Guarantee Corporation It is also transacted by the General Accident Assurance Corporation, the Law Accident Insurance Society, the Sickness and Accident Assurance Company, the Northern Accident Insurance Company, and the Fine

Acts Insurance Company, and the Fine Arts Insurance Company,
4. Medical Attendance during Sickness is insured by the Globe Accident Insurance Com pany and the National Medical Aid Company and several industrial assurance companies

and several industrial assurance companies

8. Burglary and Housebreaking—The companies which take risks against these felonies
are the National Burglary Insurance Corporation, the Gold miths and General Burglary
Insurance Association, the National Cycle and
Motor-Car Insurance Company, the Norwich
and London Accident Insurance Company, the
Security Company the Ocean Accident and Security Company, the Ocean Accident Guarantee Corporation, the Law Accident Insurance Society, the General Accident Assurance Corporation, the Fine Art and General Insurance Company, the Empress Assurance
Association, and the Credit Assurance and
Guarantee Corporation Some of these companies also misure against larceny or theft in houses. The risk of muider by burglars or housebreakers is now covered by the Goldsmiths and General Burglary Insurance Asso-ciation by payment of a small additional premium to that of the burglary and housebreaking risk

6. Transit Risks - The Northern Accident Insurance Company, the Fine Art and General Insurance Company, and the Law Accident Insurance Society, insure against loss of pro-

perty in transit
7. Horses and Cattle and Insurance against
Death by Accident and Disease is undertaken by the Horse, Carriage, and General Insurance Company, the Imperial Live Stock Insurance Corporation, the Vehicular Insurance Company, and the Lancashire and Yorkshire Accident

and the Lancashire and Yorkshire Accident Insurance Company, as Third Party Risks are taken by the Vehicular Insurance Company, the Noithern Accident Insurance Company, the Ocean Accident and Gairantee Corporation, the Horse and Cairiage and General Insurance Company, the Law Accident Insurance Society, the Sickness and Accident Assurance Association (outside London), the Lancashire and Yorkshire Accident Insurance Company the General Accident Insurance Company, the General Accident Assurance Corporation, the Globe Accident Insurance Company, the Norwich and London Accident Insurance Association,

and the National Boiler and General Insurance

Company.

9. Vehicular Risks are taken by nearly all the last-named companies, as well as the General Accident Insurance Corporation, and the Scottish Employers' Liability and General Insurance Company.

10. Hailstorm Insurance is transacted by the Norwich and London Accident Insurance Association, and the Nurserymen's, Market Gardeners', and General Hailstorm Insurance

11. Machinery Insurance was originated some years ago During '95 the Machinery Insurance Company was formed, to insure against all risks and accidents to machinery, except those risks and accidents to machinery, except those resulting from fire or boiler explosion. The regular inspection and general maintenance of the machinery insured forms part of the Company's business The Company also issues policies which cover loss of profits by fire on goods and merchandise of all kinds. The contract of fire insurance is one of indemnity only; when, therefore, the fire insurance company has repaired the damage done by fire or reinstated the buildings destroyed, the responsibility of that Company ceases. In the meantime, however, very serious losses are incurred by the insured on account of the partial or total suspension of the profits which but for the fire damage would have been earned. It is to safeguard the insured against such losses that the new profit policy has been introduced

12. Steam Boiler insurance began by the es-Association in '54, and is transacted by nine companies The Boiler Insurance and Steam Power Company, Ld, now called the National Boiler and General Insurance Company, Ld, was the first to combine insurance with inspection, a system which has now been very generally adopted. This business includes the insurance of boilers against explosion and against damage thereby to the surrounding property, and of the employers' liability lisk under the recent statute for all accidents to the boilers covered by the conditions in the policies The premiums vary from £1 per boiler for £100, to £5 or £6 for £1000. The Company also insure

engines, both steam and gas

13. Plate-glass insurance was first commenced in '52 by the Plate-glass Insurance Company. Many companies transact this business. In method generally followed in plate-glass insurance is to undertake to make good all breakages, the companies being entitled, by the broken glass. The way of salvage, to the broken glass. The insurance is often undertaken by contract in private dwellings

14. Mortgages, Debentures, and other Securi-ies The insurance of the holders of these valuables against loss of principal and interest, valuables against loss of principal and interest, and other business of a kindred character, is effected, by the Law Guarantee and Trust Society, the Liverpool Mortgage Insurance Company, the Ocean Accident and Guarantee Corporation the Trustees, Executors, and Securities, Insurance Corporation, the Law Accident Insurance Society, and the Credit Assurance and Guarantee Corporation,

Accident Insurance Society, and the Credit Assurance and Guarantee Corporation.

15. Trusteeship and Executorship In consideration of certain premiums, the Law Guarantee and Trust Society, the Ocean Accident and Guarantee Corporation, the Trustees, Executors, and Securities Insurance Corpora-

tion, and the Liverpool Mortgage Insurance Company, arrange to act as trustees or executors. Trusteeship by insurance companies has recently made considerable progress, not only under wills and marriage settlements, but for debenture holders.

16. Plotures and other Valuable Objects of Art. The owners of these are indemunifed against loss from damage or destruction of such, by the Fine Art and General Insurance Company.

17 Licence Insurance. The Licences Insur-

17 Licence Insurance. The Licences Insurance Corporation and the Law Guarantee and Trust Society insure licence holders and other interested persons against loss or deprivation in the value of property incurred by the forfeiture or non-renewal of licences

18. Loss or Damage of Fassengers' and Mariners' 18. Loss or Damage of Fassengers' and Mariners' Luggage at 8ea lhe Marine and General Mutual Life Assurance Society, the General Accident Assurance Corpporation, and the Lancashire and Yorkshire Accident Insurance Company undertake these risks

19. Sinking Funds or Capital Redemption in connection with Learehold Property Several life offices and the Ocean Accident and Guarantee Cosporation issue policies for this purpose

20. Special Indemnities or Contingency Policies are issued in almost any cases, when they are required, by several life offices, as well as by the Ocean Accident and Guarantee Corporation, the Law Guarantee and Trust Society, the Law Accident Insurance Society, and the Fine Arts and General Insurance Company Most ordinary life assurance companies insure against issue of marriages, and on the other hand against a person dying without issue, when those events are improbable. Insurances are sometimes effected with ordinary life offices against such contingencies as a change of name, armorial bearings or religion, loss or recovery of reason, etc. The Law Guarantee and Trust Society, beyond granting policies for these objects, have done so with regard to defects in title to landed or other property lost documents, missing benchicianes, avoidance of voluntary settlement, and payment of annuities Some of these risks are also insured by the Ocean Accident and Guarantee Corporation

21 Performance of Contracts. The London Guarantee and Accident Company, the Fine Art and General Insurance Company, and the Credit Assurance and Guarantee Corporation insure the performance of contracts.

nsure the performance of contracts.

22 Oyole Insurance of different kinds is undertaken by several companies, etc.

23. Oredit Insurance. The Credit Assurance

23. Gredit Insurance. The Credit Assurance and Guarantee Corporation issue p slicics (a) to secure the fullest credit for solvent and responsible traders of good character, and likely to be successful in their business, (b) to enable business men to obtain addition. Capital through their bankers or otherwise; (c) to guarantee trade bills and other ordinary commercial transactions between traders and others.

24. Excess Bad Debt Insurance. Policies are issued by the Ocean Accident and Guarantee Corporation for covering merchants and others against bad debts of shoit duration.

25. Motor-Car Indemnity and Horseless Carriage Insurance is carried on by the National Cycle and Motor-Car Insurance Company, the General Accident Assurance Corporation, and other companies.

26. Chemists and Druggists' Indemnity Insurance is undertaken by the Northern Accident

Insurance Company, the Scottish Employers' Liability and General Insurance Company, and the General Accident Assurance Corporation, for risks connected with the dispensing and sale of drugs by chemists and druggists in their business

27. Lifts, Hoists, and Cranes. Several of the leading accident companies assure the owners or tenants of passenger and other lifts against liability for damages for personal injuries to individuals from accidents by or in connection with such lifts.

28. Landlords' and Factors' Indemnity Insurance. Policies are issued for these risks by the Northern Accident Insurance Company to indemnify such persons for compensation which they may be compelled to pay in respect of those personal accidents the policy covers.

29. Steam Pipes Accidents from these pipes are insured by the National Boilei and General Insurance Company

Insurance Law. See Law, '98

International Arbitration League, formerly known as the Workmen's Peace Association, was originally established during the Franco-German war of 1870 to promote a policy of peace and international arbitration. For many years the League has carried on an active peace propaganda, both in Great Britain, on the Continent, and in America. It initiated the memorial from 214 members of the British House of Commons to the President and Congress of the United States in favour of a permanent treaty of arbitration between the two nations, organised the deputation of M.P.s to Washington, also initiated and organised the inter-parlamentary conferences of Members of Parlaments in favour of international arbitration which have been held during the last six years at Paris, London, Rome, Berne, The Hague, Brussels, and Budapest. It has no members of various Parlaments as Vice-Presidents. President, Thomas Burt, M.P.; Chairman of Council, Howard Evans; Seoretary, W. Randal Cremer, ex-M.P. Offices, 11, Lincoln's Inn Fields, London Ocrasional Organ, The Arbitrator, 1d See also Peace Society

INTERNATIONAL COPYRIGHT.

Artists and authors have long desired to obtain an international law of copyright, by which works of literature and art might be protected, not only in the countries where they were first published, but in all civilised countries. A conference upon international copyright was held at Berne in Sept. 1885, and attended by representatives of the following states. Germany, Spain, France, Great Britain, Hayti, Honduras, Italy, the Netherlands, Sweden and Norway, Switzerland, and Tunis At this conference there was settled the draft of a convention for securing to the authors of literary or artistic works published in any one of the countries represented copyright in all the others. This convention was signed on Sept. 9th, '86. Such copyright is not to be more than the author enjoys in his own state, nor more than the state granting it secures to its own subjects. The provisions of the convention extend to dramatic and dramatico-musical works. They extend to all works which at the date of the convention have not become public property. They forbid the publication of a translation not sanctioned by the author of the original work. But if within a certain

time there appears no authorised translation, an unauthorised one may be published. Articles which have appeared in newspapers or periodicals may be reproduced, unless such reproductions have been expressly forbidden by the original authors or publishers, and no pro-hibition by them can have effect in the case of articles discussing politics, current topics or news of the day. A work is not to be indirectly appropriated by a reproduction which, in spite of superficial changes, is essentially the same as its original. The convention establishes an Office of the International Union for the Protection of Literary and Artistic Works, which is to be under the surveillance of the Swiss Government, and is to be supported by contributions from all the contracting parties. Any State, not a party, which is willing to adopt the provisions of the convention, may give in its adherence, whilst any State which is a party to the convention, and wishes to withdraw, must give a year's notice of its intention. The convention is to take effect within three months from the adoption of the diaft. Conferences for its revision are to be held successively in each of the countries by which it has been adopted. It does not annul or preclude any conventious already existing or hercafter to be made between any two or more of the con-tracting parties, provided that such special conventions secure at least as ample a protection to authors as it does, and do not otherwise conflict with its provisions. In this country Acts of Parliament have been passed in '44, '52, '75 and '86, with the object of securing copyright to authors and artists who are subjects of foreign states which secure copyright to British artists and authors. These Acts em-British artists and authors. These Acts empower Her Majesty by Order in Council to grant copyright to the artists and authors of such countries, and Her Majesty has a large discretion in fixing the conditions with which they must comply. The existence of the copyright of the foreign author in his own country with the most of the control of the control of the company of the control of the contr may be proved by a certificate under the official seal of a Minister of State in that country or of a British diplomatic or consular officer acting there. Copies of works made in any foreign country other than that in which the protected work was first published and made without the consent of the proprietor of the copyright may not be imported into this country. An Order in Council issued under these Acts applies to works produced before the date of the Order, but not so as to prejudice any person who has lawfully produced any work in the United Kingdom. It shall be taken to apply to every British possession, saving only those which are expressly excepted. The Act of '86 contains several modifications of previous statutes in-tended to harmonise with the provisions of the convention of Berne above noticed. Conventions for the mutual protection of copyright have been made between the United Kingdom

and several foreign States.

In the United States of America, after much amendment, a bill was passed in March 91, to take effect from July, giving to foreign authors a copyright in their works under certain conditions. Most of these are simple, consisting of the payment of small fees in certain places, but one is the famous "chromo-amendment," which in free-traders' ideas detracted largely from the merits of the Act. Under this clause from the merits of the Act. Under this clause | public opinion of the civilised world, and since the foreign copyright-owner can have his | this public opinion in turn is mainly derived rights in the United States, if he deposit with | from the leading international jurists of Europe,

the Librarian of Congress, firstly, a printed copy of the title of his book or musical composition, or a printed description of his painting statue, lithograph, etc.; and secondly, two copies of such book, or a reproduction of such work of art from type set or from negatives or drawings on stone made within the United States. Musical compositions are exempted from the second condition. The well-known British author largely benefits by the Act in spite of the amendment, but the fact that every number of a magazine is to be considered a separate book, and copyrighted accordingly, is an kward for those authors who produce their work serially The Act is of chief benefit to American authors themselves, for it has freed them from ecompetition with pirated reprints of popular English novelists, and its passage reflects the highest credit upon Mr. R. Underwood Johnson and the American Copyright League.

In Canada the copyright question has caused trouble for over fifty years. Canada, with the other British colonies, came under the provisions of the Beine Convention and the International Copyright Act of '86, and was thus prevented from reproducing copyright works of Great Britain and other countries in the Union without the authority of the author. The United States, on the contrary, was able to flood the market, not only in America but also in Canada, with cheap reprints of English publications. Thereupon Canada passed a publications. Thereupon Canada passed a Copyright Act in 80, one provision of which was that, if an author had not obtained copyright in Canada, his book might be published under a licence or licenses, he receiving a roper cent royalty as the price of each licence. This would have compelled Canada to withdraw from the Copyright Union, which she was quite willing to do, but the Act never received the sanction of the Imperial Government. Mr. Hall Came visited Canada in the autumn of '95, and it was reported that he had obtained important concessions from the Government as the result of his representations on behalf of the Society of Authors. He spoke strongly in favour of a system of licensed publishing under authors control, and drew up an amended Act, to which he obtained the signatures of the Act, to which he obtained the signatures of multiplier and pinning and other interested classes in Canada, and the Canadian Copyright Association This Act, known in official circles as the "H. C. Compromise," was made the basis of certain recommendations offered by the Colonial Office to the Canadian Government as a possible means of settling the dispute between Canada and the mother country, and it is understood that a new Act will be introduced into the Canadian Parliament embodying as many as may be of the new clauses agreed

upon in the Compromise
International Law, Institute of. This
Institution was founded in '73, Di. Lieber, a
distinguished American, M. Moynier of Geneva, and M. Rolin-Jacquemyns, the well-known Belgian advocate, being its chief promoters. The first meeting was at Geneva in '74, and since then the Institute has assembled annually at various places on the Continent and in England. The idea of the founders was that since the rules which govern the intercourse of states are established out of respect for the the incorporation of those jurists into a society whose resolutions should form a corpus juris gentium, could not but facilitate the development of the reign of law and justice among nations. The maximum number of its members is 60, and of its associates 60, and no nation can possess more than a fifth of the whole number. The English members are Professors Westlake, Holland, Leech, and Dicey, Sir Robert Hart, Lord Reay, Mr. T. Barclay, and Sir D. Mackenzie Wallace; and the English associates are Mr. E. J. Lawrence, Sir Sherston Baker, Sir John Scott, Mr. J. A. Foote, and Professor Goudy. Secretary, M. Lehr.

TRELAND.

The head of the executive in Ireland is the Vicercy or Lord-Lieutenant, who is assisted by a Chief Secretary, the Lord Chancellor of Ireland, the Attorney-General for Ireland, the permanent officials, and a Privy Council (which is a separate and distinct body from the Privy Council of Great Britain); but the government of the country is in all essential points carried on under the direction of or in concert with the Ministry of the day in London. The Lord-Ministry of the day in London. The Lord-Lieutenant is charged with the maintenance of peace and order; the Irish Constabulary are under his control, and he may, if he think it to be necessary, direct the Commander of the Forces to send troops to their aid He has power to commute sentences and pardon criminals. There are, however, more agreeable and less anxious functions attaching to the office for as representing Her Marsety to the office, for, as representing Her Majesty, the Viceroy, assisted by his wife, holds courts, drawing-rooms, levées, and maintains in Dublin an establishment of a semi-regal character. On occasions he confers the honour of civil knighthood. During his absence the duties of chief governorship are performed by three or more Lords Justices, those who act in this capacity being usually the Lord Chancellor of Ireland, the Commander of the Forces, and some of the judges The Chief Scoretary to the Lord-Lieutenant, or Chief Secretary for Ireland as he is usually called, has been described as prime minister to the Viceroy; and although he is in theory subordinate to the Home Office, he has his own establishment at the Irish Office in London, as well as in Dublin, and is directly responsible to the House of Commons for the acts of the Irish administration. He is assisted by a Permanent Under-Secretary, is assisted by a remainent one-rootery, salary £2000, and other officials. There is a separate Local Government Board for Ireland; a Board of Works, which is the great financial agent of the Government in Ireland; a Board of National Education, by which the grant and a board of National Education, by which the grant of the grant made by Parliament for public education is administered: the inspection of Irish fisheries is kept separate from the supervision of those of England or Scotland; and there is a veterinary department in Dublin for dealing with cattle diseases, etc.

cattle diseases, etc.

A Commission was appointed in May '94 to report upon the Financial Relations between Grest Britain and Ireland. The members were the Right Hon. Hugh C. E. Childers, Lord Farrer, Lord Welby, the Right Hon. O'Conor Don, Sir Robert G. C. Hamilton, Sir Thomas Sutherland, K.C.M.G., M.P., Sir David Barbour, K.C.S.I., the Hon. Edward Blake, M.P., Messrs, Bertram W. Currie, W. A. Hunter, M.P., C. E.

Martin, I. E. Redmond, M.P., and Thomas Sexton, M.P., with Mr. Holland as secretary. The following Commissioners were appointed by further Royal warrant, June 22nd, 94: Messrs Henry F. Slattery and G. W. Wolff, M.P. The report of the Commission was issued in Sept. 96. The terms of reference vere vecapitulated as follows: "To inquire into the financial relations between Great Britain and Ireland and their relative taxable expects and Ireland, and their relative taxable capacity, and to report—(1) Upon what principles of com-parison, and by the application of what specific standards, the relative capacity of Great Britain and Ireland to bear taxation may be most equitably determined. (2) What, so far as can be ascertained, is the true proportion, under the principles and specific standards so determined, between the taxable capacity of Great Britain and Ireland (3) I'le history of the financial relations between Great Britain and Ireland at and after the Legislative Union, the charge for Irish purposes on the Imperial Exchequer during that period, and the amount of Irish taxation remaining available for contribution to Imperial expenditure; also the Imperial expenditure to which it is considered equitable that It cland should contribute." report then proceeded "In carrying out the inquiry we have ascertained that there are certain questions upon which we are practically unanimous, and we think it expedient to set them out in this joint report. Our conclusions on these questions are as follows: (1) That on these questions are as follows. (1) That Great Britain and Ireland must, for the purpose of this inquiry, be considered as separate entities. (2) That the Act of Union imposed upon Ireland a burden which, as events showed, she was unable to bear (3) That the increase of taxation laid upon Ireland between '53 and '60 was not justified by the then existing circumstances. (4) That identity of lates of taxation does not necessarily involve equality of burden does not necessarily involve equality of burden. (5) That, whilst the actual tax revenue of Ireland is about 1-11th of that of Great Biltain, the relative taxable capacity of Ireland is very much smaller, and is not estimated by any of us as exceeding 1-20th " All the members but two concurred in this report. These two members, Sii Thomas Sutherland and Sir These two David Barbour, each presented a separate report, and three other supplementary reports were signed by various groups of the members. The O Conor Don and Messrs. J. E. Redmond, M.P., C. L. Maltin, W. A. Hunter, M.P., and G. W. Wolff, M.P., were of opinion that the best principle to adopt for comparing the taxbest principle to adopt for comparing the taxable capacities of the two countries was to ascertain their relative annual wealth. The ascertain they put at 1 to 20 at the outside. Lord Farrer, Lord Welby, and Mr. B. W. Currie condemned the existing system as piessing hardly and inequitably upon Ireland. They said that one sure method of redressing the inequality would be to put upon the Irish people the duty of levying their own taxes and providing for their own expenditure, leaving to the wisdom of Parliament to decide the question of contribution out of Irish taxes to the Imperial Exchequer. This report brought Imperial Exchequer. This report brought about a remarkable movement towards unity amongst almost all sections of Irish representatives, and urgent demands were made that the Government should introduce legislation to carry its conclusions into effect. The Government, however, appointed another Commission "to inquire into and report (1) how much of the total expenditure for which the State provides may properly be considered to be expenditure common to England, Scotland, and Ireland, and what share of such common expenditure each country is contributing, after the amount expended on local services has been deducted from its true revenue. (2) How the expenditure on Irish local services, for which the State wholly or in part provides, compares with the corresponding expenditure in England and in Scotland, and whether such Irish expenditure may with advantage be readjusted or reduced (3) Whether, when regard is had to the nature of the taxes now in force, to existing exemptions, and to the amount of expenditure by the State on local services, the provision in the Act of Union between Great Britain and Ireland, with regard to 'particular exemptions or abatements,' calls for any modification in the financial system of the United Kingdom' See Sassion sect. 18.

SESSION, Sect. 18. An Irish Land Commission was appointed July rath, '97, "to inquire into and report upon the procedure and practice, and the methods and valuation followed by the Land Commission and the Civil Bill Courts in Ireland, under the Land Law Acts (a) in fixing fair rents, (b) in ascertaining the true value to be paid for a tenant's interest in a holding by a landlord tenant's interest in a nouning by a manuford exercising the right's of presumption, also to inquire into and report upon the piocedure and practice, and the me hods and valuation followed by the Land Commission and the Land followed by the Land Commission and the Land Judges Court respectively, in carrying out the provisions of the Land Purchase Acis." The Commissioners were: Sir Edward Fry, ex-Lord Justice of Appeal (chairman), George Fottiell, Esq., George Gordon, Esq., Anthony Itaill, Esq., D. L., Robert Vigers, Esq., Secretary, Richard R. Cherry, Esq. The Commissioners reported early in '98, after having held 34 sittings and examined 138 witnesses. They recommended that the Jurisductor of the Civil Bill Cou ts in respect of the Land Acts Civil Bill Cou to in respect of the Land Acts should be abolished As to Assistant Com-missioners and Court valuers, they should be permanent officials, pad on a sufficiently liberal scale to enable them to devote the whole of their time to the work of the Land Commission. The Sub-Commissioners should have power, and should in certain cases be required to state cases for the Land Com-missioners. Two lay Commissioners should be missioners. I wo lay commissioners should be present with the Legal Assistant Commissioner at every hearing and every inspection of land. The Commissioners reported on the question of "fair rent," thus: "In our view, assuming the law to be, as at present decided, that occupation interest is not to be taken into account in fixing the fair rent of the holding, the annual smreferred to in paragraph A of section 1 of the Act of '96 (which we may call the gross fair rent) is the annual sum at which, after all the circumstances of the case, holding and district have been taken into consideration, the holding in the landlord's hands might reasonably be expected to let from year to year to a solvent and prudent tenant who desired to derive a benefit from the occupation of the tenement and not from its sale; and the fair rent of the hold-ing (or the net fair rent) is the gross fair rent less a reasonable annual allowance in respect of the sum which would represent the present

to the Acts, a deduction is to be made from the rent." With regard to true value, the Commissioners laid down as the two elements to be considered in ascertaining it—(1) the value of the improvements when these are the property of the tenant: (2) a reasonable compensation for the disturbance of the tenant in consequence of the notice of pre-emption. As to advances for purchase, in every case in which landlord and tenant have agreed upon a price, and the landlord is willing that the whole amount should remain as a guarantee fund, the advance should be made as a matter of course

the sum which would represent the present value of the improvements, for which, according John Henry Brodribb, but assumed his present

name by royal patent. He was born at Keinton Glastonbury, 1838, and was educated at Dr. Pinches' school in George Yard, Lombard Street, London. His first appearance on the stage was at the Sunderland theatre in 36, and he afterwards played at Edinburgh, London, Glasgow, Manchester, Liverpool, and elsewhere. His first great success was made in the spring of '70 as Digby Grant in the comedy "Two Roses." In '71 he first appeared at the Lyceum in "The Bells," and then after a series of successes in "Charles I.," "Eugene Aram," and "Richelheu," came that famous re-presentation of "Hamlet" in '74, which created such a sensation, and finally gave him his pre-eminent position on the stage. "Macbeth," "Othello," Tennyson's "Queen Mary," "Richard III.," and "The Lyons Mail," followed in '75, 76 and '77; and then, in December '78, he took over the sole management of the Lyceum, and opened with "Hamlet" again. In "Othello" afterwards he alternated the characters of Othello and Iago with the late Mr Edwin Booth, and he afterwards played at Edinburgh, London, waids he alternated the characters of Othello and Iago with the late Mr Edwin Booth, and produced and in conjunction with Miss Ellen Terry played in "The Merchant of Venice," "Much Ado about Nothing," "The Cup," "Twelfth Night," "Faust," "The Dead Heart" ('89), "Ravenswood" ('90), "The Corsican Brothers" ('91), "Henry VIII." ('92), Tennyson's "Becket" ('93), "King Arthur" ('93), "Cymbeline" ('96), "Madaine Sans-Gene" ('97), and "Peter the Great" ('98). The interest in the last play was greatly increased by the fact the last play was greatly increased by the fact that the author was Mr. Lawience Irving, the great actor's son. In '83 he first visited America, and the experiment inswered so well that the visit was repeated in '84, '88, '93, and '95. In '95 Sir Henry was knighted.

Isle of Man. Lies in the Irish Channel, equidistant from England, Scotland, and Ireland. Area, 220 sq. m, pop. 55,668. Divisions are 6 sheadings and 17 parishes. The principal towns are Education, Ramsey, and Peel. Castletown is the ancient capital, but Peel. Castletown is the ancient capital, but Douglas (pop 15,719) is the chief town and the seat of government. Physical aspect mountainous, well watered, and exhibiting lovely scenery. There are peculiar breeds of ponies, cattle, cats, etc Government is "home rule under a Lieutenant-Governor, who, with Council and Hause of Very of a members, wither cil and House of Keys of 24 members, makes up the Tynwald Court. Acts, after assent of the Crown, must be proclaimed on Tynwald Hill. Industries are farming, fishing, mining of lead, copper, iron, zinc, and reception of tourists. The land is in a high state of cultivation. Railways exist between the various The Manx people are a distinct Celtic lity. Their language and old customs nationality. are rapidly disappearing

ITALY.

of 508 Deputies, elected by conditional universal suffrage for a period of five years. Citizens over 21 who pay direct taxes to the amount of about 20 lire, professors, soldiers who have served under arms for 2 years, and others are all qualified to vote. Senators and deputies are unpaid, but travel free. For the purposes of local government the country is divided into 60 provinces administered by provincial councils, and subdivided into 826x communes. Each commune is presided over by a syndic (who in the larger communes is elected, in the smaller appointed by the King), and has besides a communal council and a municipal council. Agriculture is the occupation of about one-third of the population, wheat, maize and other grains being laigely produced. Wine, silk, and oil, are among the other products.

The Roman Catholic is the nominal State religion, and the religion of the vast majority of the people; but after the Pope was deprived of the temporal power the Government passed many acts to liamed as to make the civil government supreme, and to secure complete treedom for all creeds. The officials of the Church are appointed by the Pope, but the royal assent is necessary in the case either of a bishop or an archbishop. (See separate articles Pope and Roman Catholic Church) Elementary education is compulsory between the ages of six and nine in most parts of the country, but the law is not rigorously enforced, There are about 50,000 public primary schools, with scholars numbering in all about 2,550,000.—Area, 110,623 sq. m; pop 31,102,833. Revenue, '97-8, £67,980,364; expenditure, £69,689,374; public debt, '97, £518,141,619; imports, 96, £51,347,066; exports, £46,887,689 See COLONIES, ETC., OF EUROPEAN POWERS, DIPLOMATIC, FOREIGN ARMIES, FOREIGN NAVIES, and LABOUE MOVERS. Political Parties. The peculiarity of Italian political parties at the present time is that there cannot be said to be any definite and permanent parties. There are various that there cannot be and permanent parties. There are various groups which are continually changing; but remain a fixed principles. Formerly there they have no fixed principles. Formerly there was a Right and a Left, the former being the party of Cavour, the monarchical and Conservative party, and the latter consisting of the followers of Mazzini, the Liberal and democratic if not Republican party. These two parties, however, have since split up into many parties, nowever, nave since spin the into many different combinations. Signor Giolitti in '92 succeeded the Marquis of Rudini, who took office when Signor Crispi, after a long tenure of power, resigned in '91 In '94 Signor Giolitti was defeated, and the disastrous state of the country's finances led to the recall of Signor Crispi by the unanimous wish of the nation. In spite of fierce attacks upon his policy and private life, he remained in office during the year, and at the general election in '95 his supporters numbered 349, while the Opposition of all shades, Conservatives, Radicals, and Social-Italy is governed by Humbert I., the second constitutional king, who succeeded King Victor Emmanuel in 1878. The legislative authority is exercised by the King in conjunction with a Senate of about 375 members (composed of the Princes of the royal house who are of age, and of members nominated by the King, who have rendered eminent services to the country, are upwards of forty years of age, and pay taxes to an annual amount of £120); and a Chamber ists, could not muster more than 159 members. The disasters which overtook the Italian forces

James, Rev. Dr. H. A., Head Master of Rugby, was b. at Kirkdale in Lancashire. He was educated at Abergavenny and Encoln College, Oxtord, taking a first-class in Classical Mods. 65, his B.A. with a first-class in Litteræ Humaniores 67, his M.A., 5t. John's College, 70, the degree of B.D. in '74, and of D.D. in '95. He was President of the Oxford Union in '95. He was President of the Oxford Union Society in '70. He, was ordained deacon '70, and oriest '72. He obtained a Fellow ship at St. John's College, Oxford, which he held '09-87 (being elected Honorary Fellow in '95), was tutor' 71-2, as. istaiv master at Mariborough College '72-5, head master of Rossall School '75-86, and '71 incipal of Cheltenham College '80-95 in March '60 he was appointed to succeed Dr March 95 he was appointed to succeed Dr Percival as head master of Rugby. From 86 to 89 he was Dean of 5t Asaph, and then was appointed chaplain to the Pishop of St. Asaph

Jameson, Leander Starr, the leader of the famous Raid on the Fransvaal in '95, was b in Edinburgh, 1853 He is a son of the late Mi. R. W. Jameson, Writer to the Signet, and was ducated at London University He took his degree as MB and B Sc. in '75, and MD in '77 Having become associated with Mr Rhodes in the development of South Africa, he was appointed Administrator of Rhodesia in '91, and appointed Administrator of Rhodesia in '91, and heid the position with distinction till the Raid on the Transvaal, in Dec '95, when he was defeated at Kiugersdorp. He was afterwards given up to the Imperial authorities, and in May '96 tried and scuteured to ten months' imprisonment. After seven months, however, he was released owing to ill-health. In '97 he returnd to Rhodesia and assisted in the he returned to Rhodesia, and assisted in the development of the country, though not in an official capacity. He was made a C.B. in '94.

JAPAN.

'91), "The Lesson of the Master" ('92), "The Keal Thing" ('93), "Terminations" ('95), "Embarrassments," "The Other House" ('96), "The Spoils of Poynton," "What Maisie Knew" ('97), and "The Turn of the Screw" ('98), have all been successful.

James of Hereford, Lord. See under prepared the Master of Hereford, Lord. See under the various districts who pay the highest three transports of the Master of Hereford, Lord. See under the various districts who pay the highest three transports of the Master of Remarkable there. in the various districts who pay the highest taxes. In the House of Representatives there are 300 members, elected for 4 years by male citizens over 25 paying national taxes of 15 yen per annum who have resided in their districts for one year at least. Each member is paid about 800 year (£150) for each session. For local administration the country is divided into 46 districts, each with a governor and an elected assembly. The districts are subdivided into cities and counties. In religious matters absolute freedom is allowed, subject to the preservation of peace and order. Ihe chief forms of religion, however, are Shintoism and Buddhism. Elementary education is computsory There are about 27,000 elementary sory There are about 27,000 elementary schools, and 3,700,000 pupils, while high schools and technical schools are rapidly increasing in number. There are about 1,300,000,000 tons of workable coal in the empire, one-half of which was found in Yesso, which island also contains large deposits of sulphur. The land is largely held by peasant proprietors, and the chief products are rice and cereals, tea, sugar, and silk, while manufacturers are improving and increasing. An important treaty was concluded with Great Britain in Aug. '94. The right of the Japanese to frame their own Customs policy was aknowledged, though pro-visional arrangements were made for a period of twelve, ears. It was also agreed that Eng-lish jurisdiction in the treaty ports should be aboushed at the end of five years, when it was estimated that the new Japanese Codes would be completed, and their new judicial tribunals organised. In return Japan agreed to throw all the country open to British traders, instead of only the treaty ports, so soon as the foreign jurisdiction was abolished Revenue, 97, (24 accounce servenditure, 124,05,000; Imports, toms policy was acknowledged, though pro-Jurisdiction was advantaged to the following the following the first following the fol

June he was defeated and the House was dissolved. At this juncture the Liberals and Progressives at last joined their forces, and the Marquis Ito at once resigned, and advised the Emperor to accept the principle of party government and to summon Counts Okuma and Itagaki to form a Ministry. This he did, and the new Ministry was accordingly formed with Count Okuma as Premier. The Liberals and Progressives combined command about 200 votes in the House, out of 300. The ex-periment, however, failed, as will be seen from

the History 98 below.

History, 98.—The Premier, Count Matsugata, and the Minister of Marine, Admiral Saigo, resigned office (Dec 27th), finding themselves almost without support in the House of Representatives. The rest of the Ministry followed suit, and the Diet was then dissolved After an attempt at a coalition between Count Okuma and the Marquis Ito had failed, the latter constructed a Ministry independent of party divisions, with Baron Nishi as Foreign Minister (Jan. 12th) It was reported from Yokohama that an agreement had been concluded with Russia (April 28th), Russia pledging herself not to impede Japanese industry or commerce in Korea, and both countries agreecommerce in Korea, and both countries agreeing not to send their subjects to Korta except
by mutual consent. The Japanese Minister in
London received the final payment in connection with the Chinese war indemnity, a sum of
over £17,000,000, at the Bank of England (May
8th) Wei-hai-wei was shortly after handed
over to the British forces. Government Bills
providing for increased taxation, levied chiefly on land and alcohol, and for extending the tranchise so as to increase the electorate from tranchise so as to increase the electorate from aco, coo to 2,000,000 were introduced. Proof of the revival of Japanese influence in korea was afforded by the Government's decision to advance the money to enable a Japanese syndicate to acquire and complete the railway from Seoul to Chemulpo (June 31d) The Marquis Ito resigned office (20th) and, in view of a cyaliton between the Liberals and Progressives, who thus companded a large Progressives, who thus commanded a large majority in the House, advised the Emperor to frankly accept the principle of party govern-ment. His advice was taken, and Count Okuma became Premiei (28th) The Government noti fied the Powers that the new Commercial and Civil Codes were put into operation as from July 1st and 16th (July 19th) A split in the Cabinet occurred in October over the appointment of a successor to the Minister of Education, and as it proved impossible to compose the dispute all the Ministers resigned (31st) This was the ignominious end of the attempt at party government. A new Cabinet, independent of parties, was then formed by the

independent of parties, was then formed by the Marquis Yamagata (Nov 6th)

Japan, Emperor of. See Mutsu Hito.

Java. An island of the Asiatic Archipelago, the chief seat of Dutch power in the East Indies. Capital, Batavia, 500,000. Other chief towns, Samarang and Sourabaya. Exports: coffee, sugar, tea, rice, indigo, pepper, tobacco, etc. Divided, with the adjacent island of Madura, into 22 Residences, each administered by a Resident and his subordinates under the Governor-General of Dutch East India. Land is government property, except india. Land is government property, except in the west, and is let on hereditary lease. Most of the coffee plantations are directly

cultivating coffee instead of paying taxes. The authorities take the whole of the proane authorities take the whole of the produce at the fixed price of 15 florins (£1 52.) for every picul (133\frac{1}{2} lb.). This system still obtains in part, but a poll tax of one florin is also imposed on the natives. Area of Java and Madura 50,554 sq. m.; pop. about 25,500,000. See EAST INDIA, DUICH, and DIPLOMATIC.

Jebb, Professor M.P. See under Commons. Jenner, Sir, Wm, Bart., G.C.B., M.D., F.R.S., was b. at Chatham 1815. Ed. at Univ. Coll., M.D. Lond. '44. Has held successively the appointments of Professor of Pathological Anatomy in Univ. Coll.; Physician to the Hos-pital for Sick Children, Physician to Univ. Coll. Hospital, Professor of Clinical Medicine, and Professor of the Principles and Practice of Medicine in Univ. Coll, and is Physician in Ordinary to the Queen and the Prince of Wales. whom he attended with Sir William Gull in the serious attack of typhoid fever which prostrated H.R.H. in '71. Sir William Jenner also attended the Prince Consort in his last illness. His eminence as a physician dates from the time of his discovery of the symptoms which differentiate typhus from typhoid fever. Presi-dent of the Royal College of Physicians '81-88. Address Greenwood, Durley, Bishop's Waltham, Hants.

Jersey. One of the Channel Islands (q.v.). Jeune, Sir Francis Henry, K.C.B., is the eldest son of a former Bishop of Peterborough, and was b. in 1843 Ed. at Balliol Coll , Oxford, where he obtained 1st Class in Classical Mods. '63, and 1st class in Lit. Hum two years later. He also was successful in obtaining the Stan-hope prize in '63, and the Arnold prize in '67. He was called to the bar of the Inner Temple '68, and took silk in '88. In connection with the civil action of the Tichborne claimant he acted as junior counsel. In ecclesiastical law he long enjoyed a considerable reputation, and long enjoyed a considerable reputation, and appeared in the Lincoln case in '90. Succeeded Lord Hannen, in Jan. '91, as Judge of the Probate, Divorce, and Admiralty Division. Was knighted on his accession to the judicial bench. On the decease of Sir C P. Butt, in '92, Sir Francis succeeded him as President of the Probate Division, and was made a Privy Councillor He was afterwards appointed Judge-Advocate-General, and was made K C.B in 97 for services in that office Lady Jeune has long been an energetic philanthropist, and, with Sir

been an energetic philanthropist, and, with Sir Francis, has occupied a noteworthy position in the social life of London. She published "Lesser Questions," a volume of essays, in '94. Address' Arlington Manor, Newbury.

Jews. The numbers of Jews in the various countries of Europe, according to the "Jewish ryear Book" are as follows: Russia, 4,50,000; Austria-Hungary, 1,860,000; Germany, 567,000; Roumania, 300,000; Turkey, (about) 120,000; Holland, 97,000; France, 72,000; England, 101,000; Italy, 50,000; Switzerland, 606; Servia, 4652; Greece, 5792. Total in Europe, 7,701,266.

Outside Europe no satisfactory enumeration is possible, but it is probable that Asia contains possible, but it is probable that Asia contains 300,000; Africa, 350,000; the Americas, 700,000; 300,000; AIT(a, 350,000; the Americas, 700,000; and Australia, 15,000. There are probably about eleven millions of Jews in existence at the present date, and of late years the number living in Palestine has noticeably increased. The Jewish colonies in the Holy Land are flourishing and the laws are returning UNITY CONTROLLED PHANTATIONS are directly are flourishing, and the Jews are returning UNITY CONTROLLED IN THE THEORY OF THE PARTY OF THE PROPERTY OF THE PROPE the soil. A movement for founding a Jewish State in Palestine has been started by Dr. Theodor Herzl, of Vienna, and a conference on the question was held at Basle in August '98. The number of Jews in London is estimated at 65,000, and in other parts of Great Britain and Ireland at 35,000. Until very recently Jews were restricted in their rights the window the second parts. recently Jews were restricted in their rights throughout the world; and those of eastern Europe, Africa, and the East still labour under many disabilities, which it is the object of the "Alliance Israelite" of Paris, and of similar societies in Germany, Austria, and England (Anglo-Jewish Association, 85, London Wall, E.C.), to remove. The persecution of the Jews in Russia has become less acute, but the overcrawing within the pale of Lewish settleovercrowding within the pale of Jewish settlement (owing to expulsions from other parts of Russia) causes a high rate of mortality, beyond all previous modern experience among Jews. In England, full emancipation was granted to the Jews in '58 They possess a special Jewish Board of Guardians (Middlesex Street, Bishopsgate), which provides for indigent Jews, and expended £45,573 in relief during '97 to 4366 applicants, a large orphan asylum at West Norwood, in addition to many other charities, and there are Jewish wards in several hospitals. There are six wards in several hospitals. There are jewish wards in several hospitals. There are six large Jewish elementary schools in London, the principal being the Jews' Free School, Bell Lane, Spitalfields, the largest and one of the most successful elementary schools in the world. Similar schools and charities are the world. Similar schools and charities are connected with the principal provincial con gregations. The most important are those of Liverpool, Manchester, Birmingham, Leeds, Glasgow, Newcastle, Hull, and Sheffield The spiritual wants of Jews are provided for in the East-End by a number of hebras or minor congregations, which have been united (Fede ration of Synagogues); while fourteen of the ration of Synagogues); while fourteen of the larger synagogues are organised by the United Synagogue (2, Charlotte Street, Portland Place, W.). Ministers for these are trained at the Jews' College (Tavistock House, Tavistock Square), which has a very extensive library of works dealing with Jewish subjects. Another library specially noteworthy for Hebrew MSS. is situated at the Beth Hamidrash (St. James' Place, E.C.), where the sittings of the Beth Din, or ecclesize the Things of the Beth Din, or ecclesiastical tribunal, are held, at which points of Jewish law are decided. Ecclesiastical of Jewish law are decided. Ecclesiastical matters are under the control of the Chief Rabbi, Dr. Hermann Adler (q v.). The mandates of the Chief Rabbi are only binding on the so-called Orthodox Jews, while there are "Beform" congregations at Upper Berkeley Street, London, Manchester and Bradford. There has been a marked rapprochement of recent years between these two bodies. There are, besides, some 200 Snanish and Portuguese. are, besides, some 3000 Spanish and Portuguese Jews (Sephardim) in London, who are under the spiritual charge of the Rev. Dr. Gaster and whose spiritual charge of the Rev. Dr. Gaster and whose ritual slightly differs from that of the more numerous German and Polish Jews (Ashkenasim). As a religious term "Jew" has nowadays the very vaguest connotation, ranging from the superstition of the Chassidim of Russia and Galicia to the advanced agnosticism of the Society of Ethical Culture in New York. Jews

Deputies (36, Finsbury Circus). There are two Jewish weeklies, of which the most important is The Jewish Chronicle (2, Finsbury Square, E.C. - Publisher, Asher I. Myers).

Jibutil. See French Somalliand.

Joachim, Joseph, the distinguished violinist, was born near Presburg, in Hungary, in 1831. Already famous as a youthful prodigy, he went to Leipzig in '43, to the Conservatoire previously founded by Mendelssohn, who saw his genius and encouraged him. He first saw his genius and encouraged him. He first came to London in '44, and has since annually visited us. He has been principal violinist of the Monday and Saturday Popular Concerts from their very commencement. In '69 he became the head of the newly developed Academy of Music at Berlin. He has written Academy of Music at Berlin. He has written several works for his instrument and the orchestra, the chief being the Hungarian Concerto. The University of Cambridge conferred on him the degree of Mus. Doc. in '77, and he was afterwards given the Hon. D.C.L. of Oxford. In celebration of the fiftieth anniversary of his first appearance in public, Herr Joachim was, on March 17th, '80, presented with a magnificent violin purchased by subscribers to a fund of which the Duke of

JOINT STOCK COMPANIES.

Edinburgh was President.

During the year ending Dec. 318t, '96, there were registered in England 4291 companies, 136 in Ireland and 308 in Scotland, or a total of 4735, of which 4658 were new companies with limited liability, 2 new unlimited companies, 6 were old limited companies, 2 old unlimited, 59 were limited by guarantee, and 8 were mutual. The nominal capital of the 4735 companies registered during the year was

Jones, Henry Arthur, the dramatist, was b. Sept. 20th, 1851, at Grandborough, Bucks. His early dramatic attempts included "Only Round the Corner," "A Clerical Error," "His Wife," and "A Bed of Roses." In Nov. '82 Mr. Wilson Barrett produced "The Silver King" at the Princess's Theatre, and this greatly increased Mr. Jones's reputation. "Breaking a Butterfly" and "Chatterton" ('84), "Saints and Sinners," "Hoodman Blind," "The Lord Harry," "The Noble Vagabond," "Hard Hit," and "Heart of Hearts," which followed, testify to the energy with which he prosecuted his dramatic labours "Wealth," at the Haymarket in April '89, was followed by "The Middleman" (Aug '89). A play of daring originality, called in April 89, was followed by "The Middleman" (Aug 89). A play of daring originality, called "Judah" (90), and "The Dancing Girl" (91), added greatly to the estimation in which he was held. In Nov. '92 "The Crusaders." was produced at the Avenue Theatre; "The Tempter," duced at the Avenue Theatre; "The Tempter," Mr. Jones's first essay in blank verse, at the Haymarket in 93, "The Masqueiadders" at the St. James's, and "The Case of Rebellious Susan" at the Criterion in 94, "The Iniumph of the Philistines" at the St. James's in 95, "Michael and his Lost Angel' at the Lyceum, and "The Regue's Comedy" at the Carrick in 96, "The Physician" and "The Liars" at the Criterion in 97 A book on "The Renascence of the Drama" was published by him during '95 Addiess Townshend House, North Gate, Regent's Park.

Journalists, The Institute of was established.

North Cate, Regent's Park.

Journalists, The Institute of, was established on March oth, 1889, by conversion of the National Association of Journalists, a professional society founded in '84, and incoporated by royal charter in March '90. The Charter, by which journalism is formally constituted one of the professions, directs and declares that the members of the Institute 'shall for ever bereafter be by writing of these. "shall for ever hereafter be, by virtue of these piesents, one body politic and corporate " objects of the lustitute include the devising of examination or other practical tests for candidates for membership, "the promotion of whatever may tend to the clevation of the status and the improvement of the qualifications of all members of the journal istic profession," ascertainment, and where necessary amendment, of the law and practice affecting the discharge by journalists of their professional duties, and the promotion by all reasonable means of the interests of journalists and journalism. Care has been exercised in drawing up the constitution of the Institute to guard against the possibility of its operating at any future time in such a way as to exclude from the work of the newspaper press any honest and capable service, from whatsoever source it may come; and the decentialisation of authority which attends the system of organisation by branches (called "Districts" and "Sub-districts") is regarded as an efficient; safeguard against that possibility. Although the central office and committee rooms are in London, there is no fixed or localised centre of authority; the council meetings and the annual conference both being movable, and held from time to time in the chief towns throughout the country At the date of conversion into the Institute there were about 1200 members, since increased to over 3300, organised in 54 districts and sub-districts, and including nearly all the well-known journalists of London and the provinces (including Scotland) and Ireland), and all the most distinguished

foreign correspondents. The Charter, more-over, confers upon the Institute power to affiliate branches in India and the colonies and over, confers upon the Institute power to affiliate branches in India and the colonies and in foreign countries. The annual conference in '88 was held in the University College. Nottingham. Sir Wemyss Reid was elected President for '98-9. The Vice-Presidents are: Mr. A. W. à Becket, F. J.I., London; Mr. Thomas Arden, Lincoln; Mr. W. S. Campron, J.P., F. J.I., London; Mr. Sam S. Campion, J.P., F. J.I., Richmond; Mr. F. W. Dunkleby, F. J.I., Richmond; Mr. Samuel J. Fisher, London; Mr. L. Gilbertson, F. J.I., Bathgate; Capt. G. F. Gratwicke, F. J. I., Exeter; The Right Hon James Henderson, M.A., Lord Mayor of Belfast; Mr. Richard Ivens, Nottingham; Mr. P. Linakei, Leamington, Mr. C. H. Mate, F. J. I., Bournemouth; Mr. Alexander Paul, F. J. H., London; Mr. W. Ritchie, Enniskillen; Mr. A. Steven, Berwick-upon-Iweed. Hon. Treasurer, Mr. Frank Lloyd. Legal Advisers, Mr. J. R. Fisher, B.A., Counsel; and Sir Albeit K. Rollit, M.P., Solicitor Auditors, Mr. Arthur J. Cook and Mr. J. H. Warden Hon Secretares, Mr. A. W. a Beckett and Mr. G. H. Justice Murphy, Sir F. Peel, and Viscount Cobham
Judicial Separation. The law and practice Cobham

Judicial Separation. The law and practice of judicial separation is founded on that of the old ecclesiastical courts. It was in their power to determine all matrimonial causes, to grant a divorce a mensa et thoro, releasing the husband and wife from the duty of cohabitation, But preventing them both from marrying again. provided that such divorces should no more be granted, but that in every case in which a decree might have been made for a divorce a mensa et thoro, a decree might thenceforwards be made for a judicial separation. A decree for judicial separation may be obtained either by the husband or by the wife on the ground of adultery or cruelty, or desertion without cause for two years or upwards, or non-compliance with an order for the restitution of conjugal rights. The court has power to order such

alimony for the wife, and to make such provision for the custody, maintenance, and education of the children of the marriage, as it may think proper; and can give the custody to the guilty party if for the benefit of the children. The separation may be ended at any moment by the deliberate consent of the any moment by the deliberate consent of the parties separated to a renewal of conhabitation. What is equivalent to a judicial separation can now be granted to a wife only by magistrates in petty sessions in flany cases, by virtue of the Summary Juri-diction Act, 95, but alimony under this Act is restricted to Δz a week. The relief may be granted to any married woman whose husband shall have been consisted summary of magazinated associated. convicted summarily of an aggravated assault upon her, or whose husband shall have been convicted of an assault upon her and sentenced to pay a fine of more than five pounds or to a term of imprisonment exceeding two months, or whose husband shall have deserted her, or having been guilty of persistent cruelty to her, or wilful neglect to provide reasonable maintenance for her or her infant children, shall by such crueity or neglect have caused her to leave and live separately and apart from him The court that can grant the separation is a court of summary jurisdiction acting within the district in which any such conviction has taken place, or in which the cause of complaint shall have arisen, or in case of conviction on indictment the convicting court. The court, besides granting what is in effect a judicial separation, may make provision that the legal custody of any children of the marriage, while under the age of sixteen years, be committed to the wife, and that the husband shall pay

to the applicant personally, or for her use to any officer of the court or third person on her behalf, such weekly sum not exceeding two pounds as the court shall, having regard to the means both of the husband and wife. consider reasonable. The court may also provide for payment by the applicant or the husband, or both of them, of the costs of the court and such reasonable costs of either of the parties as the court may think fit. No orders can be made under this Act on the application of a married woman if it is proved that such married woman has committed an act of adultery unless the husband has condoned, or connived at, or by his wilful neglect or misconduct conduced to such act of adultery. The order may be varied from time to time on the application of the husband or wife and the allowance increased or diminished, and the anowance increased of different accounts the order shall be discharged it the woman upon whose application it was made voluntarily resumes consistation with her husband, or commits an act of adultery. The payment or commits an act of adultry. The payment of any sum of moncy directed to be paid by an order under the Act may be enforced in the same manner as the payment of money is enforced under an order of affiliation—that is, by warrant issued for the arrest of the husband by the magistrates of the district in which the by the magistrates of the district in which sine woman resides. The magistrates may refuse to deal with any case that they think would be more fittingly dealt with by the Divorce Court, and there is an appeal to the Divorce Court. Kew Observatory, Old Deer Park, Richmond, Suriey Superintendent, C Chree, Sc D, F R.S. Was built by George III, in preparation for the transit of Venus in 1769, to serve as a substitute for an older observatory connected with Kew Palace—associated historically with the discovery of aberration and nutation—which had fallen into disrepair. In 1843, the Government having determined to discontinue its maintenance, the building was handed over to the British Association for the Advancement of Science, under the title of the Kew Observatory. The connection between the British Association and the Kew Observatory lasted until '71. Mi J. P. Gassiot, chairman of the Kew committee, then made the munificent offer to give an endowment of £10,000 if the Royal Society would nominate a committee who should have entire control over the nanagement of the observatory, subject to the condition that magnetic and meteorological observations should be continued in perpetuity. This offer was accepted, and the use of the Kew Observatory is now granted by Her Majesty at a nominal rent te the Royal Society. It possesses a valuable collection of verifying apparatus and standard instruments, many of which have been purchased by grants made by the Royal Society and the British Association. In addition to its observational work in magnetism, electricity and meteorology.
